## Wireless Connection Guide

This chapter describes how to configure your Adapter for wireless connectivity on your Wireless Local Area Network (WLAN) and use the data security encryption features.

After Installing the Adapter, the Adapter's tray icon will appear in your system tray. It appears at the bottom of the screen, and shows the signal strength using color and the received signal strength indication (RSSI).

In the following instruction for making a network connection, we use the provided Utility to configure your wireless network settings.

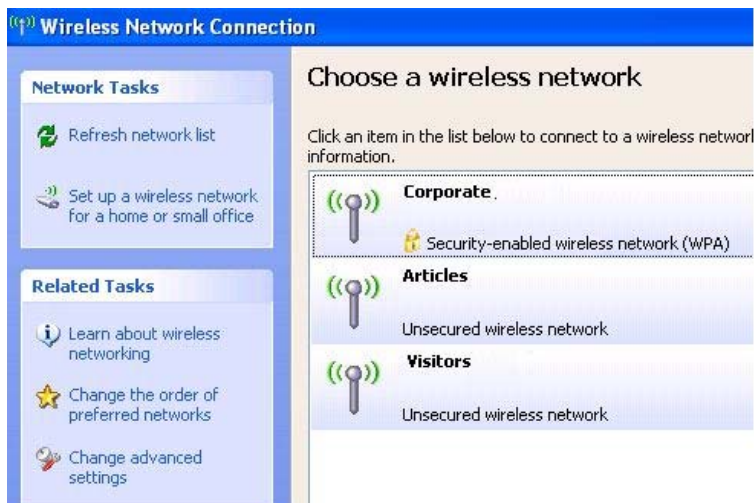

**Note:** You could use either the software we provide or Microsoft Zero Configuration tool to configure this adapter.

### 3.1 Connecting with Microsoft Zero Configuration tool (Win XP)

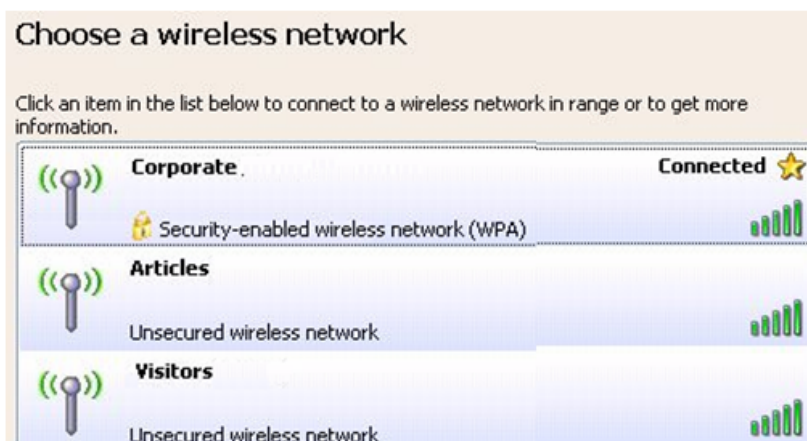

- After specifying the Microsoft Zero Configuration tool to configure your wireless network, right click on the  icon on system tray. Select "**View Available Wireless Networks**" to specify your wireless network.

- The tool shows the available wireless networks. Select your demanding network to connect with.

- If prompted, enter the password/network key for your wireless network and click the Connect button.

### 3.2 Connecting with Window 7

You can easily access to wireless with Win7. First, move your mouse to lower right hand corner as below and click on the icon where arrow pointing to.

Click **Refresh** to get an update of your Wireless Network Connection. This should help you search the SSID of the network you want to connect to.

Select your desired SSID, then Click “Connect”.

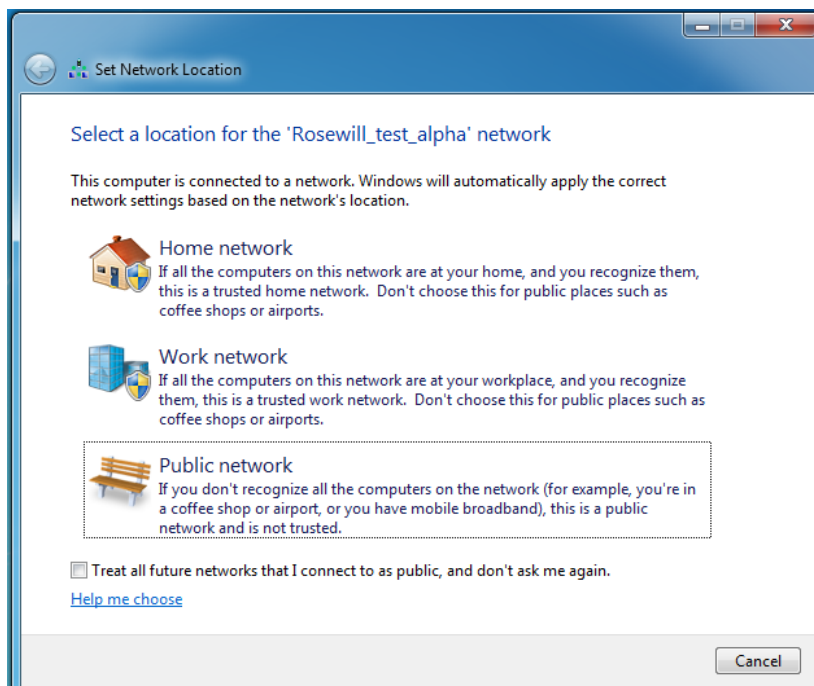

You will be prompt to ask you entering the network security key. Once entered, please click OK to complete.

You should see below in a very short period and find out whether you are connected or now.

If this is your first time connect, you will see a window show up and ask you for setting up Network Location. Please select the location based on your internet usage.

### 3.3 Connecting with Ralink Wireless Utility

We also provide a Ralink Wireless Utility for users to connect to a wireless network easily. It provides more information and configuration for this adapter. As default, the Utility will start automatically if you select **“Install driver and Ralink WLAN Utility”** when installing drivers. You can find this icon  and double click to start it on the lower right hand corner of your computer desktop. Or you can **right click** the tray icon and select **Launch Config Utility**.

Right Click on the "R" logo

This is the startup window of the Ralink Wireless Utility
