## 1.2 Overview of the Product

The adapter is an 802.11n client device; it is designed to provide a high-speed and unrivaled wireless performance for your computer or notebook. With a faster wireless connection, you can get a better Internet experience, such as downloading, gaming, video streaming and so on.

With the 802.11n technology, the RNX-MiniN2 allows high packet transfer rate of up to 300Mbps for maximum download throughput. It can also interoperate with other wireless (802.11b, 802.11g). The adapter supports WEP, WPA and WPA2 encryption to prevent outside intrusion and protect your personal information from being exposed.

The adapter is easy to install and manage. The Quick Setup guides you step-by-step through the installation process; the Rosewill Wireless N Client Utility helps you create a wireless connection immediately.

With unmatched wireless performance, reception, and security protection, the RNX-MiniN2 is also designed to be one of the smallest size wireless adapters that is capable at the rate of 300 Mbps upload and 300 Mbps download so you can use without any interference. It is the best choice for easily adding or upgrading wireless connectivity to your notebook and computer.

## **Chapter 3 Wireless Connection Guide**

This chapter describes how to configure your Adapter for wireless connectivity on your Wireless Local Area Network (WLAN) and use the data security encryption features.

After Installing the Adapter, the Adapter's tray icon will appear in your system tray. It appears at the bottom of the screen, and shows the signal strength using color and the received signal strength indication (RSSI).

In the following instruction for making a network connection, we use the provided Utility to configure your wireless network settings.

**Note**: You could use either the software we provide or Microsoft Zero Configuration tool to configure this adapter.

- 3.1 Connecting with Microsoft Zero Configuration tool (Win XP)
- After specifying the Microsoft Zero Configuration tool to configure your wireless network, right click on the icon on system tray. Select "View Available Wireless Networks" to specify your wireless network.

• The tool shows the available wireless networks. Select your demanding network to connect with.

 If prompted, enter the password/network key for your wireless network and click the Connect button.

The network 'Rosewill Wirele	ess Acc' requires a network key (also called a WEP key or WP4
key). A network key helps	s prevent unknown intruders from connecting to this network.
Type the key, and then cl	ick Connect.

## 3.3 Connecting with Rosewill Wireless Utility

We also provide this Utility for users to connect to a wireless network easily. It provides more information and configuration for this adapter. As default, the Utility is started automatically upon starting your computer and connects to a connectable wireless network with best signal strength and with no security setting.
