## Introduction

Thank you for purchasing the 49152N CIF WebCam. Please read this manual carefully FIRST in order to get the most out of your Web Cam.

## **What your Webcam includes:**

- iConcepts Webcam with built-in USB cable
- Warranty Card
- User's Manual
- CD ROM with Software and Drivers

## **Computer System Requirements**

To be able to use this Webcam with your PC you will need the following minimum configuration:

- Microsoft Windows 98SE, 2000, XP and VISTA
- Pentium®III 700, Celeron®AMD Athlon®processor or higher
- 16 bit Color Display Adaptor
- 128 MB RAM, 100 MB free disk space
- Available USB Interface
- CD-ROM Drive
- Windows compatible Sound Card and Speakers
- Internet Access for Video Conferencing

## Installing Your Webcam

**NOTE:** Before attempting to install the software, make sure that you do not have the Webcam's USB cable attached to your computer. This will affect the install process and can cause a failed installation of the Webcam software and drivers.

### Software & Camera Driver Installation

1. Insert the CD into your CD-Rom drive. Make sure that your camera is **not** connected to the computer.
2. On the **"Install Your Camera Software"** screen, select the Webcam from the dropdown list on the left and then click the **"Install"** button to install the PhoTags Express software. The Web Cam Express software will be automatically installed.

3. On the "PhoTags Express" screen, click the "Next" button.

4. Please review the license terms and click the "I Agree" button to continue.

- 5 -

5. Let the "PhoTags Express" installer create the folder that the program will be installed to, and then click "Install".

6. Click "Finish" to let the "PhoTags Express" installer finish the installation program.

7. This will automatically launch the Install shield for the Webcam driver. Click **Next** to continue.

8. Once the driver has finished installing you will have to restart your computer.

9. Congratulations!! You have successfully installed the "PhoTags Express", the "WebCam Express" software and the Webcam driver.

## Connecting Your WebCam to your PC

When using Windows XP operating systems, the following “Found New Hardware Wizard” screens will appear upon connecting your Webcam to your PC via the USB port:

From the first screen that appears select the “Yes, this time only” option and then press “**Next**” to continue.

Select the “Install the software automatically (Recommended)” option and click the “Next” button.

Click the “Continue Anyway” button on the message box that appears.

**Note:** Some versions of the drivers may not be tested by Windows Lab testing, however it is safe for both your software and hardware.

Click the **“Finish”** button to exit the wizard and now you may begin to use your webcam.

## Using your Webcam

Connect your Webcam to your computer using the USB cable attached.

### Capturing AVI with WebCam Express

Now that you have your Webcam installed, you can use it to capture short movies called AVI video files. The length of time you can record an AVI while the camera is connected to your computer will vary, depending on how much hard drive space you will use to save the file. This is done through the PhoTags WebCam Express program. Please note that these AVI video files take up a lot of hard drive space. This next section will walk you through capturing an AVI file.

1. Double-click the **"WebCam Express"** icon that is on your desktop to launch the **"WebCam Express"** program. Adjust your Webcam to the desired position. The screen will display what the Webcam "sees".

2. To add audio to your video, plug a microphone into your computer.

3. Click the **"Capture"** button to start recording the video. The recording elapse time will appear under the video.

4. Click the **"Pause"** button to hold the recording. To continue recording click the **"Capture"** button again.
5. To finish recording click the **"Stop"** button.
6. The videos will be automatically saved into a default directory (My Documents/ My Pictures/ My WebCam).

## Capturing Photos:

You can also take snapshots with your Webcam.

Your Webcam **NEEDS** to be connected at all times to the computer in order to capture the photos.

There are 2 methods to capture and save photos taken with your WebCam Express software.

### Method 1 – Capture Mode:

1. Position the Webcam so that it is pointing in the direction of the object you wish to photograph.
2. The “image” appears in the application’s view screen.
3. Select the “**Capture**” mode button at the top of the application screen
4. Click the “**Snapshot**” button on the top left of the view screen.
5. The photo will be saved automatically as a jpeg picture in the My Documents/ My Pictures/ My WebCam folder on your computer.
6. You may now edit this photo by opening the Photags Express application.  
From the Main Menu, select the “Select Photos” mode, and from the directory tree on the left of the thumbnails screen, select the My WebCam folder where the photo has been saved.

**Method 2 – Playback Mode:**

1. After capturing an AVI video with your Webcam as explained above, select the “Playback” mode button at the top of the application screen.
2. You can now select the AVI video that appears on the left of the view screen.
3. Run the video by pressing the “**Play Video**” button.
4. While the video is running select the “**Snapshot**” button to take photo snapshots that are now saved as jpeg pictures.
5. The photo will be saved automatically as a jpeg picture in the My Documents/ My Pictures/ My WebCam folder on your computer.
6. You may now edit your photos with the “Photags Express” software application by selecting the Photags Express icon on the desktop, and from Main Menu that appears select the “Select Photos” mode.
7. From the directory tree on the left of the thumbnails screen open the “My WebCam” folder and select the photos you wish to edit using the software.

To learn more on how to capture JPEG snapshots from your Webcam or from your existing AVI movies, go to the “Take Snapshots” section in the Quick Start Help guide in the application.

To learn how to change the User Settings, go to the “Set User Preferences” section in the Quick Start Help.

### Webcam:

You can use this Webcam to chat with friends and family, sending live video feeds straight to them.

**NOTE:** In order to use this Webcam you must make sure that you have **YAHOO MESSENGER Ver 5.5 or later.**

1. Start Yahoo messenger.

2. Select the **"Tools"** listing on the top of the toolbar. Go to the drop down menu and select the listing for **"Start My Webcam"**.
3. You will see a window appear with your video that you are playing. Now people who have your Yahoo login name will be able to see your video.

## Everything you need to get the most of your Photos and MORE

The Photags Express software that is installed on your computer allows you to edit existing photos that you have on your computer as well as the photos that you have captured with your Webcam using WebCam Express:

Click the "**Photags Express**" icon that appears on your desktop to open the "**Photags Express**" Software.

From the Main Menu screen that appears, select the "**Select Photos**", "**Enhance Photos**" or "**Add Captions**" buttons. You can use these features to edit your photos:

- 16 -

**Manage your photos** by creating countless unique photo collections without duplicating any photos. Burn CD's of any folders for backup and storage.

**Enhance your photos;** Auto Enhance, Crop, Correct Red Eye, Manually Adjust and add Special Effects.

**Add Active Captions-** add Text Captions, Frames, Shapes, Keywords... and more that can be viewed or hidden any time.

**Locate and Organize your photos and collections-** Search by Captions, Category, Keyword or Date - directly from the operating system of your computer.

**Share your photos** via E-mail, Local Printing and Create HTML web pages for uploading online.

**Create Calendars, two-sided Greeting Cards and Postcards on standard photo paper...** You can purchase Albums and Video CD, two additional workshop projects online at anytime and these will be automatically activated in PhoTags Express.

**Create Photo Albums and Slide Shows** on CDs that can be viewed on your PC and VCD's for viewing on your TV using your DVD player. Add background music to your slideshow.

**WebCam Express-** Use the WebCam Express software to snap photos, record and create videos.

### How to purchase additional “Workshop” projects

In addition to the free Calendars, two-sided Greeting Cards and Postcards Workshop projects, you have the ability to **purchase** two additional Workshop projects: "Albums" and "Video CD" online, at anytime.

1. To purchase the “Workshop Project” simply click the one you want and you will be referred to an online website where you can purchase them.
2. Once you purchase the “Workshop projects” they will be automatically activated in the software.

## Video Conferencing

Your webcam can be used for video conferencing:

1. Connect the camera to your computer with USB cable.
2. Run the video conference software **Microsoft NetMeeting** on your computer.
3. Input IP address in the address bar and dial.
4. Select **[Tool]\[Video]\[Send]** and **[Transfer]** options after your call has been received.

## Webcam Maintenance

Your Webcam is a delicate instrument- please handle it with care.

## Technical Support

For question on warranty information please email [warranty@sakar.com](mailto:warranty@sakar.com)

## Appendix A: Technical Specifications

Product Type	CIF WebCam
Electronic Coupling Element	CMOS Sensor 100 K Pixels
Image Resolution	352*288 Pixels
Lens	f=3.6mm F2.4 (54°)
File Format	AVI
Frame Rate	30fps
Shutter Speed	Auto 1.8uS~1/30S
Operating Systems	Windows® 2000/XP/VISTA
Working Temperature	0c~40c
Image Process	Automatic White balance
USB Interface	USB 2.0 interface

## Appendix B: Troubleshooting and FAQ's

If you are having problems where your computer does not recognize your webcam, try to reinstall the software.

### **Software Re-installation:**

1. First install the software. Click on Start, Settings, Control Panel and Add/Remove programs. You will need to remove PhoTags Express. After removing it, restart your computer. If your webcam is connected, disconnect it.
2. Now reinstall the software. Insert the CD that came with your webcam. It should automatically run the installation.
3. Restart the computer.
4. Once your computer is back up, plug the webcam into your computer's USB port.
5. Right-click on the "My Computer" icon. Select Properties.

If you are running Windows 2000 or XP: Click on hardware and then Device Manager.

If the webcam is installed correctly, there will be a category listed for "Imaging Devices" and clicking on the "+" next to it should reveal your camera. If not, you will likely see "Digital Still Camera" under "Other Devices" with a brightly colored marking next to it indicating it is not functioning correctly.

If you are running Windows 2000 or XP: Right click on the non functioning device and select uninstall. If a warning pops up, press OK.

6. Restart your computer again. Your webcam is now successfully installed.

**How do I make sure I don't lose important pictures?**

Unlike cameras, your webcam does not have anyway to store photos. The photos that you capture using your webcam are saved on your computer in the My Documents/My Pictures/ My WebCam folder. We recommend and suggest copying these photos into a backup folder before using the photo editing tools available in Photags Express.

**Important Note:** If you delete any photos imported into the Photags Express software they will also be deleted from the folder that they where imported from on your computer.

**If you have a MAC, will your webcam work?**

Unfortunately, the system requirements for our webcams require a Windows operating system. There is no Mac driver available and no current plan to develop

**If the webcam does not work:**

Make sure you have connected the webcam correctly into an available USB port or hub.

**"No capture device found" message appears.**

Make sure the webcam and PC are connected properly.

**My video reception seems poor. How do I improve it?**

Several factors may affect the quality of the video reception. If a slower computer or slower Internet connection is being used, you may experience poorer video reception and choppy video. It is important that your computer meets the minimum system requirements. Try choosing a smaller image size to adjust in. The USB webcam works best in areas where there is sufficient light.

**Why can't I hear anyone during a web conference?**

This is most likely due to the microphone not working or not being properly connected to the sound card. Please also check if the computer volume is turned off or set very low. Additionally, you should check to make sure that your speakers are properly connected to the computer.

## Sakar Warranty Card

### **Sakar Warranty**

This warranty covers the original consumer purchaser only and is not transferable.

This warranty covers products that fail to function properly **UNDER NORMAL USAGE**, due to defects in material or workmanship. Your product will be repaired at no charge for parts or labor for a period of one year.

### **What Is Not Covered by Warranty**

Damages or malfunctions not resulting from defects in material or workmanship and damages or malfunctions from other than normal use, including but limited to, repair by unauthorized parties, tampering, modification or accident.

### **What To Do When Service Is Required**

When returning your defective product (postage pre-paid) for service, your package should include:

1. Copy of original bill of sale
2. A detailed written description of the problem.
3. Your return address and telephone number (Daytime)

### **MAIL TO ADDRESS BELOW:**

Sakar International  
Attention: Service Department  
195 Carter Drive  
Edison, NJ 08817
