# **Safety Instructions**

Read and understand all the instructions to avoid injury to yourself and damage to the equipment.

## **Earphones**

#### Follow Traffic Safety Instructions

- Do not use the earphones while driving an automobile or riding a bicycle. It's not only dangerous, but also against the law.
- It may cause an accident if you turn up the volume of the earphones while walking down the street, especially crossing at intersections.

#### Protect your ears

- Do not turn up the volume too high.
- Doctors warn against prolonged exposure to high volume.
- Stop using the device or turn the volume down if you have ringing in your ears.

## Ambient operating conditions

Ambient temperature: 5°C ~ 35°C (41°F ~ 95°F)
 Humidity: 10 ~ 75%

## **Environmental Information**

- Follow local guidelines for waste disposal when discarding packages, batteries, and old electronic appliances.
- Yepp packages use cardboard, polyethylene etc., and do not use any unnecessary materials.

# DIGITAL SOUND Yepp'

# DIGITAL SOUND yepp'

# **Featuring an Encoding Function**

- You can make a MP3 file out of an source using the ENC jack on the main unit.
- You can also convert an FM radio program into an MP3 file in real time.

# **Supports 3D surround sound**

- You can feel the deep base and 3D surround sound.
- sis a trademark of SRS Labs, Inc. technology is incorporated under license from SRS labs, Inc.

# **How to Operate the Touchpad**

• You can easily operate the functions you want by using the touchpad.

# MP3 & WMA Playback

- MP3 is an MPEG1 Layer3 audio format.
- WMA is a Microsoft Windows Media audio format.

# Supports 2xMP3

 In order to save more MP3 files, you can reduce the size of MP3 files by using 2xMP3 technology.

# **FM Reception**

Listening to an FM program is made easy with Auto Search and Frequency 0 1 0 1
 Memory functions.

# DIGITAL SOUND Yepp'

# **Voice Recording Function**

• You can do a Voice Recording with high quality and use it for a conference.

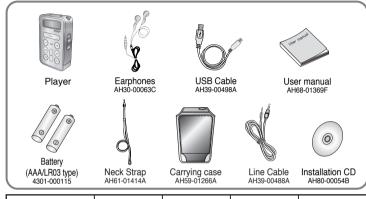

## Sound

You can adjust equalizer manually.

# 20-Hour Continuous Play

This unit uses one AAA/LR03 alkaline battery. Operation can last up to 20 hours.
 Actual playing time may vary according to the type and capacity of the battery.

# Components

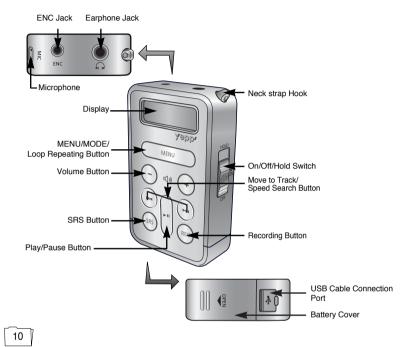

Model	YP-780 H	YP-780 V	YP-780 X	YP-780 Z
Built-in memory	128MB	256MB	512MB	1GB

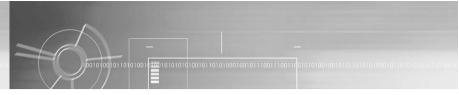

- The capacity of the useable built-in memory is less than indicated as the internal firmware uses a part of the memory as well.
- Design of accessories is subject to change for improvement without notice.

### Notice:

 Do not mix rechargeable and nonrechargeable batteries, alkaline or Ni-MH types of batteries, or different grades or brands of batteries.

# **Location of Controls (yepp)**

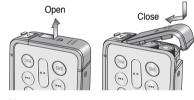

# Display

# Inserting a Battery

Slide the cover in the direction of the arrow to open.

2 Insert a battery to the right poles
+, - and push-close the cover in
the direction the arrow as indicated.

#### Note:

Do not place heavy objects on the cover.

# **Connecting yepp to PC**

# System Requirements.

The PC system must meet the following specifications:

- Pentium 133MHz or greater
- Windows 98 SE/ME/2000/XP
- 40MB of available hard disk space
- CD-ROM drive (double speed or greater)
- USB port (1.1) supported
- VGA graphic
- DirectX 8.0 or above

### Note:

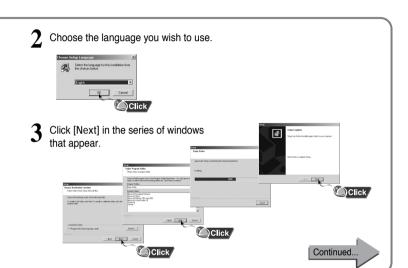

Windows ME, 2000 and XP can recognize the driver without installing the provided program. However, you must install the program in order to format yepp and upgrade firmware.

Before connecting yepp to PC, make sure to install USB driver. If "Add New Hardware Wizard" appears, press the [Cancel] button and install USB driver.

## Installing software

Insert the Installation CD into CD-ROM drive.
The picture shown below appears.
Select [yepp Studio].

## Connecting yepp to PC with USB cable

- 4 Plug one end of the USB cable into the USB port on the back of the PC.
- 5 Connect the opposite end of the USB cable to the USB cable port on the bottom of the yepp.
  - If you disconnect the USB cable from your PC while implementing a command or initializing during USB driver installation, your PC may not function correctly.
- 6 USB driver is installed with a message saying that it is searching for a new device. You may not see the display screen during installation.

  Go to the device manager to check that installation.
  - Go to the device manager to check that installation has been successfully completed.
- 7 Upon installation of the USB driver "SAMSUNG YP-780" will appear in the [System Properties] → [Device Manager].

### How to check USB driver

Windows 98:

Control Panel → System → Device Manager →
Universal Serial Bus controllers/Samsung YP-780 Class
Windows 2000:

Control Panel  $\rightarrow$  System  $\rightarrow$  Hardware  $\rightarrow$ 

Device Manager → Universal Serial Bus controllers → USB Mass Storage Device

Windows XP:

Download from Www.Somanuals.com. All Manuals Search And Download.

Control Panel  $\rightarrow$  System  $\rightarrow$  Hardware  $\rightarrow$ 

Device Manager → Universal Serial Bus controllers →

USB Mass Storage Device

**8** When USB driver is not Installed automatically, refer to next page.

# **Manual Installation of USB Driver**

Go to "Using yepp Studio" if the USB driver is in place. Follow these steps if the USB driver is not in place :

Check the device manager.

Windows 98,ME:

Control Panel → System → Device Manager

Windows 2000:

Control Panel → System → Hardware →

Device Manager

Windows XP:

Control Panel  $\rightarrow$  System  $\rightarrow$  Hardware  $\rightarrow$ 

Device Manager

- 2 Check if there is a device listed with an exclamation point or a question mark (displayed as unknown device or USB device).
- 3 Double click on the device listed with an exclamation point or a question mark.

4 After selecting the driver, click on [Update Driver].

5 Select a compatible driver, click on [Next] to finish.

## In Windows XP

1 Select [Install from a list or specific location] and click the [Next] button.

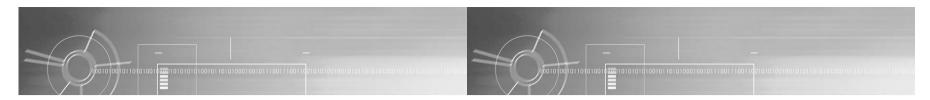

2 Select [Include this location in the search] and designate [CDROM]/Drivers /win2k\_winxp or select [Search removable media].

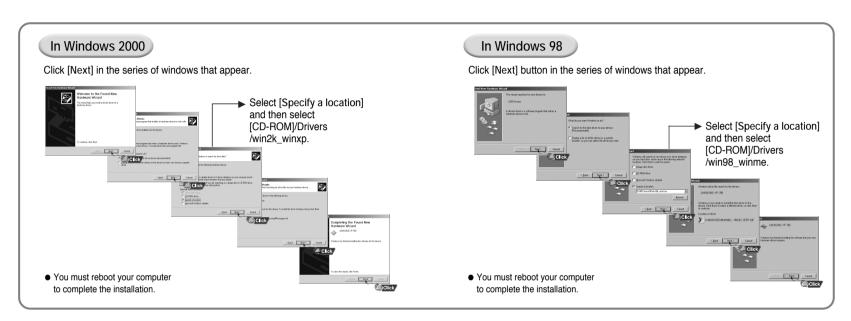

3 Click the [Finish] button when installation is complete.

 You must reboot your computer to complete the installation.

# **Using yepp Studio**

## **Downloading Files**

- Turn on the yepp and connect yepp to PC.
- 2 Select the file you wish to download from the Play List Window or File List Window.
  - If the Play List Window is empty, use the [Open Files] button on the main window or drag-and-drop the desired files from the File List Window to the Play List Window.
- 3 Drag-and-drop the selected files to the Music folder in the yepp window or click the [Transmit to yepp] button to move the files.

- 4 When the Download List Window appears, click the button.
  - The selected files are sent to yepp.
  - You can change to the desired font when downloading.

### Note:

- Refer to Help for more detailed information about using yepp Studio.
- When running yepp Studio for the first time, input the serial number listed on the back of the yepp when the Product Number Registration Window appears.

# Creating 2xMP3 Files

1 Click the button on the Download List Window.

2 After selecting the Limit BitRate first, adjust the file size according to the sound quality.

3 Click the YOPP COPY button.

• Files converted to 2xMP3 are sent to yepp.

### Note:

• Refer to Help for more detailed information about using yepp Studio.

## Downloading an Album

- Turn on the yepp and connect it to the PC.
- After selecting the album that you wish to download from the Album List Window, drag-and-drop the album to the Music folder in the yepp window.

- When the Download List Window appears, click the PREF COOK button.
  - The selected album is sent to yepp.

### Note:

- Refer to Help for more detailed information about using yepp Studio.
- Albums can only be downloaded to the Music folder.

## Creating a Folder

- Turn on the yepp and connect it to the PC.
- After clicking in the Music folder using the right mouse button, select [Make Folder].

- 3 When the Making New Folder Window appears, click [OK] after entering the folder name.
  - A new sub-folder is created under the Music folder.

### Note:

- Refer to Help for more detailed information about using yepp Studio.
- A folder can only be created in the Music folder.
- Only sub-folders of the Music folder can be deleted.

## **Uploading Files**

- ${f 1}$  Turn on the yepp and connect yepp to PC.
- 3 After selecting the folder in which to save the files when the Folder Setting Window appears, click the [OK] button.

#### Note:

- Refer to Help for more detailed information about using yepp Studio.
- MP3 and WMA formatted files that are in the Music folder are not uploaded to the PC.

After selecting the files to upload in the yepp window, click the [Transmit to yepp] button at the bottom of the window.

Click

- If you want to listen on the PC to a file that you sent, convert the VOC file to a WAV file.
- The VOC file and the newly created WAV file are saved together.

# Deleting a File

- Turn on the yepp and connect it to the PC.
- 2 After selecting the file that you want to delete in the yepp window, click the [Delete] button.
- $3^{\,\,\text{Click [Yes] when the confirm window appears.}}$ 
  - The selected file is deleted.

### Note:

• Refer to Help for more detailed information about using yepp Studio.

## Formatting

- Turn on the yepp and connect it to the PC.
- $2 \ \ {\small After clicking in the yepp window with} \\ {\small the right mouse button, select [Format].}$ 
  - 3 Click [Yes] when the confirm window appears.

#### Note:

• Refer to Help for more detailed information about using yepp Studio.

28

# To View Help on yepp Studio

Run yepp Studio and press F1.

Help will appear.

Move the arrow to the top of yepp Studio and right click on the mouse. The following selection window will appear.

• Click on Help and the Help window will appear.

### Note:

- Music recognition technology and related data are provided by Gracenote and Gracenote CDDB® Music Recognition Service<sup>SM</sup>.
- CDDB is a registered trademark of Gracenote. The Gracenote logo and logotype, the Gracenote CDDB logo and logotype, and the "Powered by Gracenote CDDB" logo are trademarks of Gracenote. Music Recognition Service and MRS are service marks of Gracenote.

31

• If a firewall is installed on the PC, it may not be possible to import CDDB information.

# **Playing Music and Turning Off the Device**

First insert batteries and connect the earphone correctly.

### Playing Music (Power On)

Turn on the power by pushing up the power switch on the side of the device.

• Music and voice files can be played.

## Pausing Music (Power Off)

Pause playback by pressing the - button.

 Turn off the power by pushing down the power switch on the side of the device.

#### Note:

- WMA files can be played only as music files with a compression rate of 64Kbps-192Kbps that can be created in Windows Media Player (Version 8.0).
- $\bullet$  The power off time can be set in the menu.

32

# Adjusting the Volume/Hold Function

## Adjusting the Volume

Move the , buttons to adjust the volume.

### Note:

- The volume can be adjusted in increments between 0 and 40.
- Press once to adjust the volume by one level.
   Press and hold to increase or decrease the volume in greater increments.

Under Hold mode, buttons will not work.

Slide the switch on the player in the direction of the arrow.

 When a button is pressed, " HOLD!" message will appear on the display.

00:01:30, 001 NOR VOI 20

# **Changing Modes**

- 1 Press the MENU button briefly while the player is stopped.
- 2 Move to the mode you want by using the , + buttons, and then press the MENU button.

#### Note:

 You will exit from the Mode Switching function if no action is taken for 5 seconds or if another button is pressed during mode switching.

# **Recording Voice**

- Press the REC button to start vioce recoding while the player is stopped.
- If the button is pressed again, the recording is stopped and the voice file is saved.

  If the button is pressed, the recording is paused and if the button is pressed again, the recording resumes.

#### Note:

- Recording is performed in order (VI000001, VI000002, etc.) and files are saved in the VOC format after recording.
- If the Memory is full, voice recording is stopped automatically.
- During vioce recording, there is no beeping sound and the button lights and backlight do not illuminate
- Voice Recording does not work in FM Mode or when the Line cable is connected.

# **Encoding MP3s**

1 Connect the Audio Output port on the external audio source (or the Line Out port) to the ENC port on the device with the Line in cable.

- 2 If the 🙉 button is pressed, MP3 encoding begins.
  - If the is button is pressed, encoding is paused and if the button is pressed again, the encoding resumes.

- $\boldsymbol{3}$  If the  $\ensuremath{\text{@C}}$  button is pressed during encoding, the encoding stops and an encoding file is created.
  - Encoding is performed in order (ENC000001, ENC000002, etc.) and files are saved in the MP3 format after encoding.

#### Note:

- The bit rate can be set to 64Kbps, 96Kbps and 128Kbps.
- During encoding, there is no beeping sound and the button lights and backlight do not illuminate.

#### Notice:

- Do not disconnect the Line cable during Encoding.
- If the battery is not charged enough, encoding will not be done.
- Adjust the volume of the external audio source to a suitable level and encode it.
   If the volume level is extremely high, the sound quality may not be good.

# **Searching for Music/Voice Files**

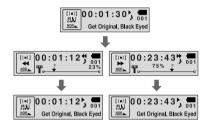

- VBR(Variable Bit Rate) file: MP3 file whose compression rate changes when played.
- With VBR files, pressing the button within 5 seconds.

  From the start of the track may not result in the previous track playing.
- This player may not play back MPEG1 LAYER1 files.

## To search for specific parts during play:

• A desired part can be searched for by pressing and holding down the (144), (144) buttons during play.

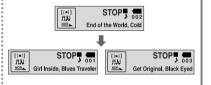

### To change tracks during play:

- If the button is pressed during play, the next track is played.
- If the Geo button is pressed before five seconds have passed since starting to play a track, the previous track is played and if the Geo is pressed after five seconds, the current track is replayed from the beginning.

## To change tracks when stopped:

If the (ks) (ss) buttons are pressed when stopped, the yepp moves to the previous or next track, respectively.

38

# **Listening to FM Radio**

While the player is stopped, select FM Mode by using the MENU button.

## Manual Search for a Frequency

• Press the (144),(144) buttons to search manually for the desired frequency.

## Manual Storage of a Frequency

- After searching manually for a desired frequency, press the (srs) button to select the channel in which to save the frequency.
- When the CH channel flashes, press the button to save the selected frequency.

#### Note:

To exit from FM Mode, press the MENU button.

## Automatic Search for a Frequency

• Press and hold the (144), (>>1) buttons in order to search for and stop at frequencies for which there is reception.

## Automatic Storage of a Frequency

- Press and hold the (SRS) button while in FM Mode.
- Frequencies within the range of 87.5MHz to 108MHz are automatically selected and stored.
- Frequencies are automatically stored, starting from 1.

## Searching Stored Frequencies

Press and hold the MENU button in FM mode.

button after using the (-),(+) buttons to move to Press the MENU the desired channel.

#### Note:

- You can store up to 20 frequencies.
- You can replace an existing frequency with a new one but you cannot delete a stored

# **Encoding From FM Radio**

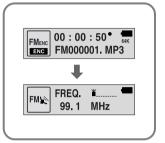

**Loop Repeating** 

Press the (REC) button during FM reception.

 Encoding of the currently transmitted FM broadcast begins.

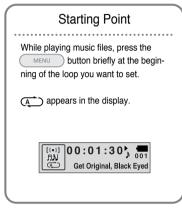

Press the 🕟 button again.

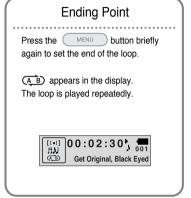

- A file is created and the encoding stops.
- Files are saved in order of F000001, F000002...and stop automatically when the memory is full.

#### Note:

- During encoding, there is no beeping sound and the button lights and back light do not illuminate.
- Encoded file will become 64Kbps file after it is encoded to FM.

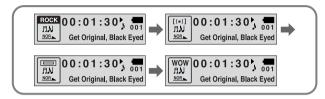

### Note:

- Press the MENU button briefly to cancel the loop.
- Loop Repeat is automatically released if you Speed Search with the (►) buttons.

42

# **Setting SRS**

Press the (srs) button in Music mode to select the desired SRS mode.

- SRS (((•))): You will hear 3D Stereo sound.
- TRUBASS (): This is a bass boost feature that adds fullness to the sound.
- WOW: This feature allows you to enjoy the SRS and Trubass features simultaneously.

### Note:

- Please adjust the volume to a suitable level, as the volume may increase in the SRS setting.
- This unit supports sampling frequencies of 32KHz, 44.1KHz or 48KHz.
- You can set SRS functions only in Music Mode. (Except for 2xMP3 files)
- When not in folder playback mode, press and hold set to skip the next 10 songs.
   Example) To move to Track 42 while Track 15 is being played, press and hold the set button three times and then press the button twice.

$$15 \Rightarrow 20 \Rightarrow 30 \Rightarrow 40 \Rightarrow 41 \Rightarrow 42$$

# **MENU Mode**

To switch to Menu Mode, press and hold the MENU button while in Music/Voice Mode.

After moving with the , + buttons, press the MENU button to select the desired menu.

Menu mode is cancelled if the button is pressed.

- PLAY MODE: To select track repeating mode.
- EQ: To select the desired music tones.
- FOLDER PLAY: To play only the music in the selected folder.
- FILE: To delete or format music files.
- **SETTING**: To change the advanced yepp functions.
- EXIT : To exit MENU.

### Note:

• In MENU mode, no input for 30 seconds will cancel the MENU mode.

# Selecting the Play mode

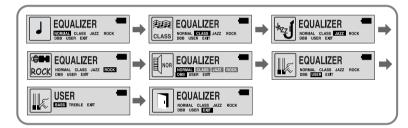

- Select PLAY MODE in the MENU. (refer to "MENU Mode")
- 2 Use the \_\_\_,\_\_ buttons to move to the mode you want and press the \_\_\_\_\_ button to select.

- NORMAL : To play all the tracks in order one time.
- REPEAT ONE : To repeat one track.
- $\bullet$  REPEAT ALL : To repeat all tracks.
- SHUFFLE : To play tracks at random.
- INTRO: To play the first 10 seconds of each track.
- EXIT : To move to the upper menu.

# Selecting the EQ mode

- Select EQUALIZER in the MENU. (refer to "MENU Mode")
- 2 Use the , the buttons to move to the setting you want (out of the 4 settings) and press the MENU button to select.
  - Select the DBB Mode if you want to fine-tune the sound.
- If you want to manually adjust the equalizer, select User and Bass/Treble.
  - Bass and treble can each be adjusted from 0 to 10.

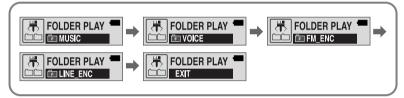

#### Note:

• DBB is for Dynamic Bass Booster, which enhances bass response.

# Selecting the Play Folder

- Select Folder Play in the MENU. (refer to "MENU Mode")
  - F: This signifies the root folder; the files in the folder are played if the Menu button is pressed.
  - This signifies the sub-folders of the Music folder; only the files in the selected sub-folder are played when the Menu button is pressed.
- 2 Use the \_\_, \_\_ buttons to move to the desired folder and press the \_\_\_ button to select.
  - Only the files in the selected folder are played.

### Note:

- You can only create sub-folders in the Music folder and folder creation is only possible in yepp Studio.
- You can move to the next folder by pressing and holding down the (srs) button when playing a folder.

# Managing Files

## Deleting

- Select FILE in the MENU. (refer to "MENU Mode")
- 2 Select DELETE and then move to the file you wish to delete.
  - If GO UP is selected, files in other folders can also be selected.
- 3 Select YES in the Delete Confirm Window after pressing the MENU button.
  - The selected file is deleted.

Continued... 49

# **Setting Advanced Functions**

# Formatting

1 Select FILE in the MENU. (refer to "MENU Mode")

2 Select FORMAT.

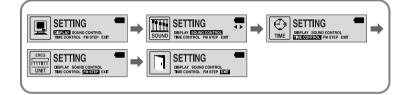

• Formatting is performed if CONFIRM is selected.

#### Note:

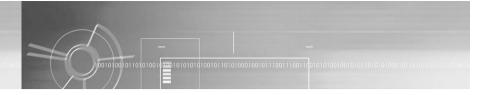

• All files are deleted if yepp is fomatted.

Select SETTING in the MENU. (refer to "MENU Mode")

Continued... 51

Select DISPLAY in the MENU.

### **INFORMATION**

- Use the , buttons to select the music mode and select the content to be displayed at the top of the Screen Display Window.
- Play time: Displays the current play time
- Remain time: Displays the remaining play time
- Free memory: Displays the remaining memory
- Bit rate: Displays the wave bit rate that is being played

# P.TIME PREE MEMORY BUTRATE EXIT

## **BACK LIGHT**

- Use the \_\_\_, \_\_\_ buttons to set the Backlight "ON" time.
- The setting range of Backlight-On Time is 0 to 30 seconds.
- When set to Always On, the backlight stays on continuously.

### Note:

• The backlight does not illuminate when the residual battery level is insufficient.

### CONTRAST

- Use the (-),(+) buttons to set the Contrast.
- The setting range of the contrast, which adjusts the brightness of the screen, is 0 to 20.

## **SCROLL SPEED**

- Use the \_\_\_, + buttons to set the Scroll Speed.
- The setting range of the scroll speed, which adjusts the speed of the track title flow, is 0 to 10.

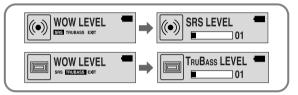

# SOUND CONTROL

Select SOUND CONTROL in the MENU.

### **WOW LEVEL**

- The levels of SRS and TRUBASS can be adjusted.
- Use the (-), (+) buttons to select the level you want.
- \*The level for SRS and TRUBASS can each be set within the range of 0 to 10.

## **OPTIMIZATION**

- Optimizes the SRS function to the device that's connected.
- Set the desired device to earphone, headphone, speaker or carpack by using the (-), (+) buttons.

- Use the —, buttons to sel the desired MP3 encoding bit rate.
- You can set the desired bit rate to 64kbps, 96kbps or 128kbps when doing MP3 encoding.

### **BEEP ON/OFF**

- Use the (-),(+) buttons to set the BEEP mode.
- BEEP ON: A beep sounds each time a button is pressed.
- BEEP OFF: No beep sounds when a button is pressed.

## **DEFAULT VOLUME**

- Use the —, + buttons to set the DEFAULT VOLUME.
- It is possible to set the default volume to a value between 0 and 40. If the power is turned on again after having adjusted the volume above the default value, music is played at the default volume.

 If the power is turned on again after the volume was set to within the default value, the music is replayed at the previously played volume.

# TIME CONTROL

Select TIME CONTROL in the Menu.

### **INTRO TIME**

- Use the (-), (+) buttons to set the INTRO TIME.
- The intro play time can be set from 10 to 50 seconds.
   The first section of each track is played for the set time.

## **POWER OFF TIME**

- Use the —, + buttons to set the POWER OFF TIME.
- The power off time can be set from 3 to 180 seconds.
   After stopping playback, the power is turned off automatically if no buttons have been pressed during the set time.

• When set to No Power Off, the power does not turn off even when the device is stopped.

### SLEEP TIME

- Use the —, + buttons to set the SLEEP TIME.
- The sleep time can be set from 3 to 180 minutes.
   The power turns off automatically after the set time has passed.

### Note:

 When the device is turned off automatically, the power can be turned on again by pushing the power switch down to the Off position and then pushing it back up to the On position.

# **Setting the FM Frequency Unit**

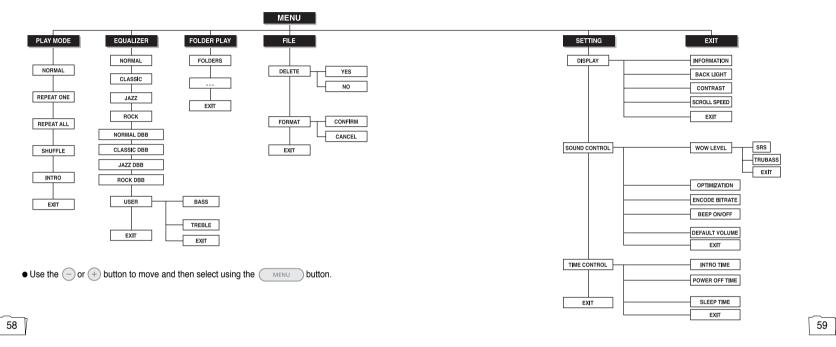

You can set the unit of frequency movement in FM mode.

- Select FM STEP in the MENU.
- 2 Use the \_\_, \_+ buttons to move FM step to 100KHz or 50KHz and press the \_\_\_\_\_\_ button to select.

# MENU Table

# Troubleshooting -

#### The software doesn't work

Refer to the recommended PC specifications.

### yepp does not work and the LCD displays nothing.

- Check the battery capacity
- Check to see if the battery is inserted to the right poles -,+

### In PLAY mode, music is not played after pressing the 💂 button

- Verify that the device is currently set to Music mode.
- Check to see if MP3 or WMA files are saved in the built-in memory.
- Check to see if the HOLD switch is locked.
- Check if the REC button is on.

#### Files cannot be downloaded.

- Check to see if the driver is installed correctly in the computer.
- Check the connection between yepp and computer.
- Check and/or replace the battery, turn on the yepp's power.

#### Backlight does not work.

- Check the backlight setup.
- When the battery power is low, the backlight will go out.

#### The buttons do not work.

Check setting of Hold switch.

### yepp keeps being turned off.

- In Stop mode, the power is automatically turned off after ten seconds (changes depending on settings).
- Check to see if there are files saved in it.

### Something's wrong with play time displayed during Play mode.

• "VBR SONG" message is displayed while VBR (Variable Bit Rate) file is playing.

#### LCD window is dark

Check Contrast

### Yepp doesn't work even though the power switch is set to On.

• Try pushing the power switch down to Off and then pushing it back up to On.

#### Strange characters are displayed on the screen during playback.

• Change the font settings in the Download List Window to the correct font.
