### **Control Panel of Your Television**

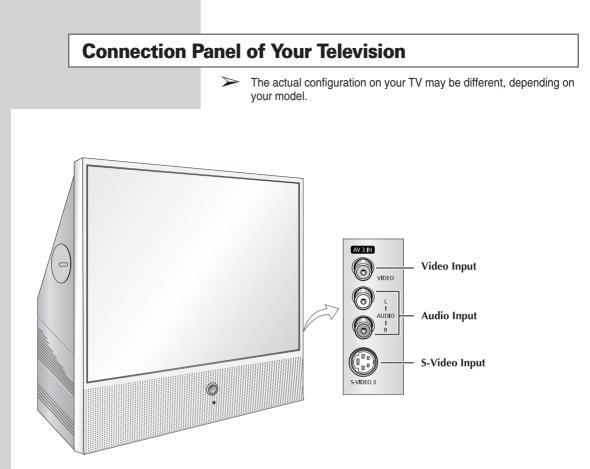

The actual configuration on your TV may be different, depending on your model.

#### ( $\bigcirc$ :On, $\bigcirc$ :Blinking, $\bigcirc$ :Off)

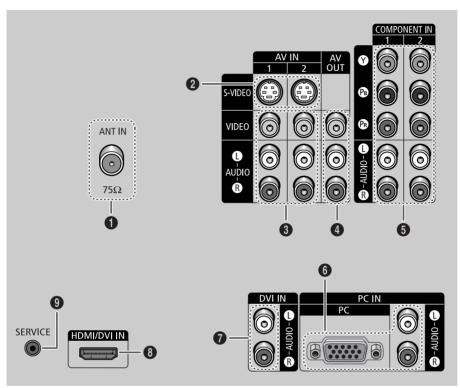

TIMER	LAMP	STAND BY/TEMP	Indication	
0	0	•	Standby mode.	
•	0	0	A timer pilot lights when Timer Auto On or Off is selected.	
0	•	0	Normal operation.	
•	•	0	Normal operation (when Timer Auto On or Off is selected).	
0	0	0	Lamp is warming up. The normal picture comes on after 25 seconds.	
•	•	0	The normal picture comes on after 25 seconds. (when Timer Auto On or Off is selected)	
0	0	•	Air vent cover in the rear of the TV is not properly installed.	
0	0	•	Inside temperature of the TV is over normal. Clean the air vent cover in the rear of the TV. Turn the TV back on after 1 hour.	
•	0	•	The lamp does not work, please contact an authorized Service Center for assistance.	

- You can use the channel selection buttons to switch on the TV when it is in standby mode depending on the model.
  - ♦ When using the on-screen menu the volume adjustment and channel selection buttons have the same function as the ▲/▼/◄/► buttons on the remote control.
  - If the remote control no longer works or your have lost it, you can use controls on the panel of the TV.

### Connection Panel of Your Television (continued)

The actual configuration on your TV may be different, depending on your model.

Rear of the TV

#### **1** ANT IN

Coaxial connector for aerial or cable network.

#### **2** S-Video Input

Connect to S-Video output jacks of an S-VHS VCR or DVD player.

#### Audio/Video Input

Connect to the audio/video output jacks of VCRs, DVD players and similar devices.

#### **4** Audio/Video Output

Connect to the audio/video input jacks of a recording VCR.

#### **6** COMPONENT Input

Connect to the audio and video outputs of DVD or DTV Set-Top Box. 480i/480p/576i/576p/720p/1080i Y, PB and PR video signal outputs are available.

#### **6** PC Input

Connect to the PC audio/video outputs.

#### **1** DVI Audio Input

Connect to the audio output jacks for device with DVI output.

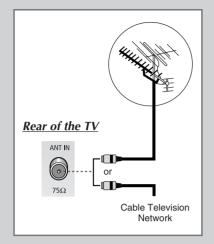

#### **8** HDMI/DVI Input

Connect to the digital device with HDMI or DVI output.

#### **9** SERVICE Jack

It is for repairs and software upgrades.

### **Connecting to an Aerial or Cable Television Network**

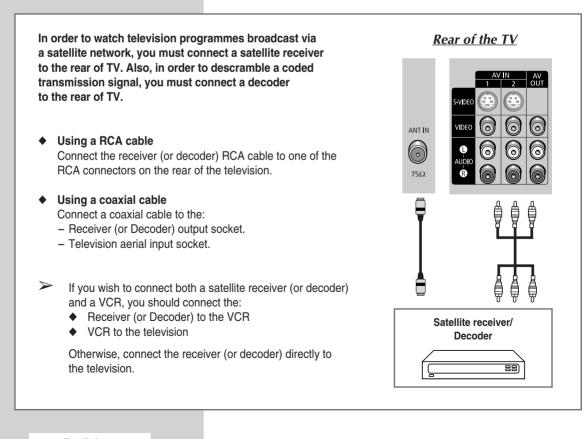

To view television channels correctly, a signal must be received by the set from one of the following sources:

- An outdoor aerial
  - A cable television network
  - A satellite network
- 1 In the first three cases, connect the aerial or network input cable to the  $75\Omega$  coaxial socket on the rear of the television.
- 2 If you are using an indoor aerial, you may need to turn it when tuning your television until you obtain a picture that is both sharp and clear.

For further details, refer to:

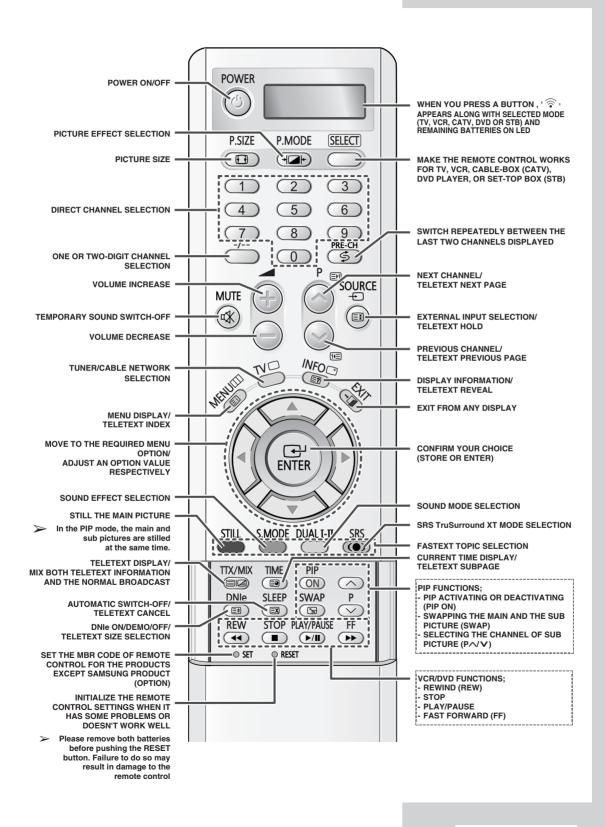

- "Storing Channels Automatically" on page 15.
- "Storing Channels Manually" on page 16.

### **Connecting a Satellite Receiver or Decoder**

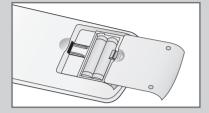

### **Infrared Remote Control**

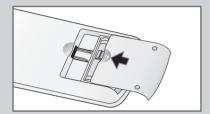

The performance of the remote control may be affected by bright light.

### **Inserting the Batteries in the Remote Control**

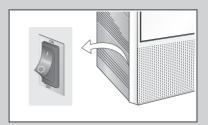

You must insert or replace the batteries in the remote control when you:

- Purchase the television
- Find that the remote control is no longer operating correctly
- 1 Remove the cover on the rear of the remote control by pressing the symbol (*▼*) downwards and then pulling firmly to remove it.
- 2 Insert two R03, UM4, "AAA" 1.5V or equivalent batteries taking care to respect the polarities:
  - on the battery against on the remote control
  - + on the battery against + on the remote control
- **3** Replace the cover by aligning it with the base of the remote control and pressing it back into place.

### **Switching Your Television On and Off**

#### The mains lead is attached to the rear of your television.

- 1 Plug the mains lead into an appropriate socket.
  - The main voltage is indicated on the rear of the television and the frequency is 50 or 60Hz.
- Press the power switch on the side of the television toward "ON"(I).
- 3 Press the **POWER** (<sup></sup>⊚) button on the remote control (or the "<sup></sup>⇔" button on the front of the television).
  - <u>Result</u>: The programme that you were watching last is reselected automatically.
  - If you have not yet stored any channels, No clear picture appears. Refer to "Storing Channels Automatically" on page 15 or "Storing Channels Manually" on page 16.
- 4 To switch your television off, press the power switch toward "OFF" (O).

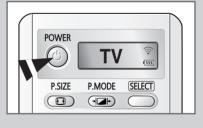

### **Placing Your Television in Standby Mode**

Your television can be placed in Standby mode, in order to reduce the power consumption.

The Standby mode can be useful when you wish to interrupt viewing temporarily (during a meal, for example).

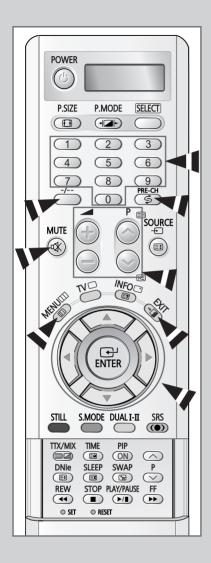

- 1 Press the **POWER** ((()) button on the remote control to turn the screen off.
  - <u>Result</u>: The **STAND BY/TEMP** indicator on the front of the television lights.
- 2 To turn the screen back on, simply press the **POWER** (()) button again.
  - You can also switch on by pressing the P<sup>→</sup>/<sup>→</sup>, TV or numeric button.

Do not leave your television in Standby mode for long periods of time (when you are away on holiday, for example). Turn your television off by pressing the power switch toward "**OFF**" (**O**). It is best to unplug the set from the mains and aerial.

### **Becoming Familiar with the Remote Control**

The remote control is used mainly to:

- Change channels and adjust the volume
- Display the on-screen menu system

The following table presents the most frequently used buttons and their functions.

-		
Button	Viewing Function	Menu Function
$\bigcirc$	Used to display the next stored channel.	-
	Used to display the previous stored channel.	-

(+)	Used to increase the volume.	-
$\bigcirc$	Used to decrease the volume.	-
MUTE	<ul> <li>Used to switch the sound off temporarily.</li> <li>To turn the sound back on, press this button again, or press the  or  button.</li> </ul>	
MENU	Used to display the on-screen menu system.	Used to return to the previous menu or normal viewing.
	_	<ul> <li>Used to:</li> <li>◆ Display a submenu containing selections for the current menu option</li> <li>◆ Increase/decrease a menu option value</li> </ul>
ENTER	-	Used to confirm your choice.
EXIT	-	Used to exit from the menu system and return to normal viewing directly.

### **Plug & Play Feature**

When the television is initially powered ON, several basic customer settings proceed automatically and subsequently. The following settings are available.

1	If the television is in Standby mode, press the <b>POWER</b> ((()) button on the remote control.		
2	To start the Plug & Play, select the <b>Start</b> and press the <b>ENTER</b> button.		
	Result: The languages available are listed.		
3	Select the appropriate language by pressing the $\blacktriangle$ or $\checkmark$ button. Press the <b>ENTER</b> button to confirm your choice.		
	Result: The message Check antenna input is displayed.		
4	Make sure that the antenna is connected to the TV, and then press the <b>ENTER</b> button.		
	Result: The areas available are listed.		
5	Select the appropriate area by pressing the $\blacktriangle$ or $\blacktriangledown$ button. Press the <b>ENTER</b> button to confirm your choice.		
	Result: The Auto Store menu is displayed.		

6 Press the ENTER button to start the search

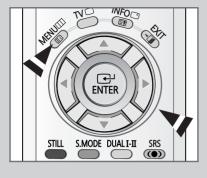

<u>Result</u>: The search will end automatically. Channels are sorted and stored in an order which reflects their position in the frequency range (with lowest first and highest last).

- To stop the search before it has finished or return to normal viewing, press the EXIT or ENTER button.
- 7 When the channels have been stored, the Clock Set menu is displayed. Press the ENTER button to set the current time. Press the ◄ or ► button to move to the hour or minute. Set these by pressing the ▲ or ▼ button. Press the ENTER button to confirm your choice.
- 8 When it has finished, the message **Enjoy your watching** is displayed, and then the channel which has been stored will be activated.

### Plug & Play Feature (continued)

If you want to reset this feature ...

1	Press the <b>MENU</b> button.		
	Result: The main menu is displayed.		
2	Press the ▲ or ▼ button to select <b>Setup</b> .		
	Result: The options available in the <b>Setup</b> group are displayed.		
3	Press the ENTER button.		
	Result: The Plug & Play is selected.		
4	Press the ENTER button again.		
5	To start the Plug & Play, select the <b>Start</b> and press the <b>ENTER</b> button.		
6	For further details on how to set, refer to the previous page.		

### **Choosing Your Language**

When you start using your television for the first time, you must select the language which will be used for displaying menus and indications.

1	Press the MENU button.		
	Result: The main menu is displayed.		
2	Press the ▲ or ▼ button to select <b>Setup</b> .		
	Result: The options available in the <b>Setup</b> group are displayed.		
3	Press the ENTER button.		
4	Press the ▲ or ▼ button to select <b>Language</b> . Press the <b>ENTER</b> button.		
	Result: The languages available are listed.		
5	Select the appropriate language by pressing the $\blacktriangle$ or $\checkmark$ button. Press the <b>ENTER</b> button to confirm your choice.		

### **Storing Channels Automatically**

You can scan for the frequency ranges available to you (and availability depends on your country). Automatically allocated programme numbers may not correspond to actual or desired programme numbers. However you can sort numbers manually and clear any channels you do not wish to watch.

1	Press the MENU button.	
	Result: The main menu is displayed.	
2	Press the ▲ or ▼ button to select <b>Channel</b> .	
	Result: The options available in the <b>Channel</b> group are displayed.	
3	Press the ENTER button.	
	Result: The Auto Store is selected.	
4	Press the ENTER button again.	
	Result: The Area is selected.	
5	Press the ENTER button once again.	
	Result: The areas available are listed.	
6	Select the appropriate area by pressing the $\blacktriangle$ or $\blacktriangledown$ button. Press the <b>ENTER</b> button to confirm your choice	
7	Press the $\blacktriangle$ or $\blacktriangledown$ button to select <b>Search</b> . Press the <b>ENTER</b> button.	
8	To start the search, select the <b>Start</b> and press the <b>ENTER</b> button.	
	Result: The search will end automatically. Channels are sorted and stored in an order which reflects their position in the frequency range, (with lowest first and highest last). The programme originally selected is then displayed.	
	To stop the search before it has finished or return to normal viewing, press the EXIT or ENTER button.	
9	<ul> <li>When searching and storing are complete, the Sort menu is displayed.</li> <li>To sort the stored channels into the desired numerical order, go to Step 5 of the "Sorting the Stored Channels" procedure on page 19.</li> <li>To exit from the channel store function without sorting the channels, press the MENU button repeatedly until the menus disappear.</li> </ul>	
10	<ul> <li>When the channels have been stored, you can:</li> <li>Sort them in the order required (see page 19)</li> <li>Clear a channel (see page 18)</li> <li>Assign a name to the stored channels (see page 21)</li> <li>Fine-tune channel reception if necessary (see page 22)</li> </ul>	

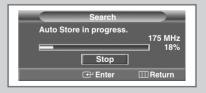

- Activate/deactivate the LNA (Low Noise Amplifier) feature (see page 23)
- Activate/deactivate the Digital NR (Digital Noise Reduction) feature (see page 28)

You can store the television channels, including those received via cable networks.

When storing channels manually, you can choose:

- Whether or not to store each of the channels found
- The programme number of each stored channel which you wish to identify

1	Press the	MENU button.		
	Result:	The main menu is displayed.		
2	Press the	▲ or $\blacksquare$ button to select <b>Channel</b> .		
	<u>Result</u> :	The options available in the <b>Channe1</b> group are displayed.		
3	Press the	ENTER button.		
4		Press the ▲ or ▼ button to select Manual Store. Press the ENTER button.		
	<u>Result</u> :	The <b>Manual Store</b> menu is displayed with the <b>Prog.</b> (programme number) is displayed.		
5	To assign a programme number to a channel, find the correct number by pressing the $\blacktriangle$ or $\blacksquare$ button.			
6		✓ or ► button to select Color System. Press the ▲ or to select the broadcasting system required.		
	<u>Result</u> :	The color systems are displayed in the following order (depending on the model).		
		◆ AUTO – PAL – SECAM		
		♦ AUTO - NTSC3.58 - NTSC4.43 - PAL60		
7		✓ or ► button to select Sound System. Press the ▲ or to select the sound system required.		
	<u>Result</u> :	The sound systems are displayed in the following order.		

BG - DK - I - M

### Storing Channels Manually (continued)

8 If you know the channel number to be stored, see the following steps.

- ♦ Press the ◄ or ► button to select Channel.
- Press the ▲ or ▼ button to select c (Air channel) or s (Cable channel).
- ♦ Press the ► button.
- Press the ▲, ▼ or numeric buttons (0~9) to select indicate the required number.
- If no sound or abnormal sound, re-select the sound standard required.
- 9 If you do not know the channel number, select the **Search** by pressing the ◀ or ► button. Press the ▲ or ▼ button to start the search.
  - <u>Result</u>: The tuner scans the frequency range until the first channel or the channel that you selected is received on your screen.
- 10 To store the channel and associated programme number, select the store by pressing the ◄ or ► button. Press the ENTER button.

Result: The ox is displayed.

11 Repeat Steps 8 to 10 for each channel to be stored.

#### Channel mode

- P (Programme mode): When completing tuning, the broadcasting stations in your area have been assigned to position numbers from P00 to max P99. You can select a channel by entering the position number in this mode.
- C (Real channel mode): You can select a channel by entering the assigned number to each air broadcasting station in this mode.
- S (Cable channel mode): You can select a channel by entering the assigned number for each cable channel in this mode.

If the reception is clear, you do not have to fine tune the channel, as this is done automatically during the search and store operation. If the signal is weak or distorted, you may have to fine tune the channel manually.

1	Press the MENU button.	
	Result: The main menu is displayed.	
2	Press the $\blacktriangle$ or $\blacktriangledown$ button to select <b>Channel</b> .	
	Result: The options available in the <b>Channel</b> group are displayed.	
3	Press the ENTER button.	
4	Press the $\blacktriangle$ or $\blacktriangledown$ button to select <b>Fine Tune</b> . Press the <b>ENTER</b> button.	
	Result: The horizontal bar is displayed.	
5	To obtain a sharp and clear picture and good sound quality, press the $\blacktriangleleft$ or $\blacktriangleright$ button until you reach the required setting.	
6	To store the fine tuning setting in the TV's memory, press the <b>ENTER</b> button.	
	Result: The symbol "*" is displayed beside the programme number.	
7	To reset the fine tuning to <b>0</b> , select <b>Reset</b> by pressing the $\blacktriangle$ or $\blacktriangledown$ button then press the <b>ENTER</b> button.	

### **Using the LNA (Low Noise Amplifier) Feature**

This feature is very useful in the situation that the TV is used in a weak signal, and amplifies the TV signal in the weak signal area, but not noise.

This feature is working only in a weak signal condition, and that is memorized on relevant channel's additional information.

1	Press the MENU button.		
	Result: The main menu is displayed.		
2	Press the $\blacktriangle$ or $\blacktriangledown$ button to select <b>Channel</b> .		
	Result: The options available in the <b>Channel</b> group are displayed.		
3	Press the ENTER button.		
4	Press the $\blacktriangle$ or $\blacktriangledown$ button to select <b>LNA</b> . Press the <b>ENTER</b> button.		
5	Select <b>off</b> or <b>on</b> by pressing the $\blacktriangle$ or $\blacktriangledown$ button. Press the <b>ENTER</b> button to confirm.		

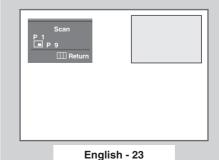

- If the picture is noisy with the **LNA** set to **On**, select **Off**.
- LNA setting is to be made for each channel.

### **Viewing the Channel Scan Picture**

### This feature automatically scans all of the channels it has memorized.

1	Press the MENU button.		
	Result:	The main menu is displayed.	
2	Press the ▲ or ▼ button to select <b>Channel</b> .		
	<u>Result</u> :	The options available in the <b>Channel</b> group are displayed.	
3	Press the	e ENTER button.

	Result: The sound effects are displayed.
	Standard - Music - Movie - Speech - Custom.
6	Press the ENTER button to confirm.

You can also select these options simply by pressing the **S.MODE** (Sound Mode) button.

>

### **Adjusting the Sound Settings**

The sound settings can be adjusted to suit your personal preferences.

1 Press the MENU button.

Result: The main menu is displayed.

**2** Press the  $\blacktriangle$  or  $\blacktriangledown$  button to select **Sound**.

<u>Result</u>: The options available in the **sound** group are displayed.

3 Press the ENTER button.

>

4 Press the ▲ or ▼ button to select **Equalizer**. Press the **ENTER** button.

Result: The options available are displayed.

5 Select the option to be adjusted by pressing the ◄ or ► button. Press the ▲ or ▼ button until you reach the required setting.

6 Press the ENTER button to confirm.

If you make any changes to the equalizer settings, the sound standard is automatically switched to the **Custom**.

### Setting the SRS TSXT

TruSurround XT is a patented SRS technology that solves the problem of playing 5.1 multichannel content over two speakers. Trusurround delivers a compelling, virtual surround sound experience through any two-speaker playback system, including internal television speakers. It is fully compatible with all multichannel formats.

1 Press the **MENU** button.

- Result: The main menu is displayed.
- 2 Press the ▲ or ▼ button to select **Sound**.

<u>Result</u>: The options available in the **sound** group are displayed.

- 3 Press the ENTER button.
- 4 Press the ▲ or ▼ button to select **SRS TSXT**. Press the **ENTER** button.
- 5 Select **Off**, **3D Mono** or **stereo** by pressing the ▲ or ▼ button. Press the **ENTER** button.

You can also select these options simply by pressing the SRS button.

### **Adjusting the Volume Automatically**

Each broadcasting station has its own signal conditions, and so it is not easy for you to adjust the volume every time the channel is changed. This feature lets you automatically adjust the volume of the desired channel by lowering the sound output when the modulation signal is high or by raising the sound output when the modulation signal is low.

1	Press the MENU button.	
	Result: The main menu is displayed.	
2	Press the $\blacktriangle$ or $\triangledown$ button to select <b>Sound</b> .	
	$\underline{\mbox{Result}} \qquad \mbox{The options available in the } {\bf Sound} \mbox{ group are displayed}.$	
3	Press the ENTER button.	
4	Press the $\blacktriangle$ or $\checkmark$ button to select <b>Auto Volume</b> . Press the <b>ENTER</b> button.	
5	Select <b>off</b> or <b>on</b> by pressing the $\blacktriangle$ or $\blacktriangledown$ button. Press the <b>ENTER</b> button.	

### **Enjoying the Sound of External Speakers**

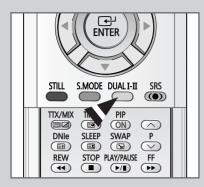

When using external device such as Home Theater Systems, external speaker or external audio amplifier set "Internal Mute" to "On" to produce sound which is consistent with what the picture shows.

1	Press the MENU button.		
	Result: The main menu is displayed.		
2	Press the $\blacktriangle$ or $\triangledown$ button to select <b>Sound</b> .		
	<u>Result</u> : The options available in the <b>sound</b> group are displayed.		
3	Press the ENTER button.		
4	Press the ▲ or ▼ button to select <b>Internal Mute</b> . Press the <b>ENTER</b> button.		
5	Select <b>off</b> or <b>on</b> by pressing the $\blacktriangle$ or $\triangledown$ button.		

- 6 Press the ENTER button to confirm.
  - The Internal Mute is set to On. At this time, if you press the Internal Mute is set to On. At this time, if you press the Internal Mute button, the message Not Available is displayed.

тν		Sound
	Mode	: Standard
	Equalizer SRS TSXT	: Off
٢	Auto Volume	: Off Off
	internal mate	On
- TT	A 11	
	→ → Move	🕒 Enter 🛛 🕅 Return

#### Selecting the Sound Mode (depending on the model)

The "DUAL I-II" button displays/controls the processing and output of the audio signal. When power is switched on, the mode is automatically preset to either "Dual I" or "Stereo", depending on the current transmission.

	Type of broadcast	On-screen indication
	Regular broadcast (Standard audio)	Mono (Normal use)
NICAM	Regular + NICAM Mono	NICAM Mono ↔ Mono
Stereo	NICAM Stereo	NICAM Stereo ↔ Mono (Forced mono)
	NICAM Dual I/II	NICAM Dual-1 → NICAM Dual-2 → Mono
	Regular broadcast (Standard audio)	Mono
A2 Stereo	Bilingual or Dual I/II	Dual I/II ↔ Dual I/II
	Stereo	Stereo ↔ Mono (Forced mono)

- If the receiving conditions deteriorate, listening will be easier if the mode is set to the Mono.
  - If the stereo signal is weak and an automatic switching occurs, then switch to the Mono.
  - When receiving a mono sound in the AV mode, connect to the "AUDIO-L" input connector on the side of the television. If the mono sound comes out only from left speaker, press the **DUAL I-II** button.

### **Setting and Displaying the Current Time**

#### You can set the television's clock so that the current time is displayed by pressing the "INFO" button. You must also set the time if you wish to use the automatic on or off timers.

- When pressing the power switch toward "OFF" (O) on the side of the television, the clock setting will be reset.
- Press the MENU button. <u>Result</u>: The main menu is displayed.
   Press the ▲ or ▼ button to select Setup. Result: The options available in the Setup group are displayed.
- **3** Press the **ENTER** button.
- 4 Press the ▲ or ▼ button to select **Time**. Press the **ENTER** button.
  - Result: The options available in the **Time** group are displayed with **Clock Set** is selected.
- 5 Press the ENTER button again.
  - Result: The Clock Set menu is displayed.
- 6 Press the ◄ or ► button to move to the Hour, Minute or am/pm. Set the current time by pressing the ▲ or ▼ button.
- 7 When you have finished, press the **EXIT** button to exit.
- 8 Press the INFO button to display the current time.

### **Setting the Sleep Timer**

You can select a time period of between 30 and 180 minutes after which the television automatically switches to Standby mode.

1	Press the <b>MENU</b> button.		
	Result: The main menu is displayed.		
2	Press the ▲ or ▼ button to select <b>Setup</b> .		
	Result: The options available in the <b>Setup</b> group are displayed.		
3	Press the ENTER button.		
4	Press the $\blacktriangle$ or $\blacktriangledown$ button to select <b>Time</b> . Press the <b>ENTER</b> button.		
	Result: The options available in the <b>Time</b> group are displayed.		
5	Press the ▲ or ▼ button to select <b>Sleep Timer</b> . Press the <b>ENTER</b> button.		

6 Select the preset time interval (Off, 30, 60, 90, 120, 150, 180) for staying on by pressing the  $\blacktriangle$  or  $\blacktriangledown$  button.

7 Press the ENTER button to confirm.

- You can also set these options simply by pressing the ٠ **SLEEP** button.
  - If the sleep timer is not yet set, **Off** is displayed. ٠ If the sleep timer is already set, the remaining time before which the television switches to Standby mode is displayed.
- >

Your TV automatically turns off when it receives no input signal for 15 minutes or longer.

### Switching the Television On and Off Automatically

#### You can set the On or Off timers so that the television will:

- Switch on automatically and tune to the channel of your choice at the time you select
- Switch off automatically at the time you select
- The first step is to set the television's clock (refer to "Setting and Displaying the Current Time" on page 39). If you have not yet set the clock, the message **Set the clock first** is displayed.
- 1 Press the MENU button. Result: The main menu is displayed. 2 Press the ▲ or ▼ button to select **Setup**. Result: The options available in the **Setup** group are displayed. 3 Press the ENTER button. 4 Press the ▲ or ▼ button to select **Time**. Press the **ENTER** button. Result: The options available in the **Time** group are displayed. 5 Press the ▲ or ▼ button to select **On Timer**. Press the **ENTER** button. Result: The options available in the **On Timer** group are displayed. 6 Select the Hour, Minute, am/pm, Prog. (programme number) or **Volume** by pressing the  $\triangleleft$  or  $\triangleright$  button.
- **Volume** by pressing the  $\triangleleft$  or  $\blacktriangleright$  button. Set these by pressing the  $\blacktriangle$  or  $\blacktriangledown$  button.
- 7 To activate the on timer with the settings satisfied, select Activation by pressing the ◄ or ► button, then select Yes by pressing the ▲ or ▼ button.
- 8 Press the **MENU** button. <u>Result</u>: The options available in the **Time** group are displayed again.
- 9 Press the ▲ or ▼ button to select off Timer. Press the ENTER button.
   <u>Result</u>: The options available in the off Timer group are

displayed.

10 Set the **Off Timer** as methods for **On Timer** setting.

#### Absent Power Off

>

When you set the timer "On", your television will eventually be turned off, if you do not operate any controls during the 3 hours after the TV is turned on by timer. This function is available in only the timer "On" mode and will prevent a leakage accident or overheating, caused by your TV left on for a long time due to the timer "On" (when you are away on holiday, for example).

#### **Setting the Blue Screen**

If no signal is being received or the signal is very weak, a blue screen automatically replaces the noisy picture background. If you wish to continue viewing the poor picture, you must set the "Blue Screen" mode to "Off".

1	Press the MENU button.		
	Result: The main menu is displayed.		
2	Press the ▲ or ▼ button to select Setup.		
	<u>Result</u> : The options available in the <b>Setup</b> group are displayed.		
3	Press the ENTER button.		
4	Press the ▲ or ▼ button to select Blue Screen. Press the		

5 Select **off** or **on** by pressing the  $\blacktriangle$  or  $\checkmark$  button. Press the **ENTER** 

ENTER button.

button.

### **Teletext Feature**

# Most television channels provide written information services via teletext. Information provided includes:

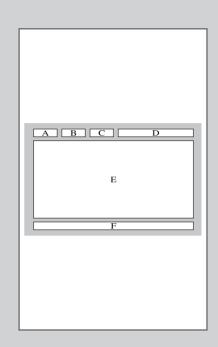

- Television programme times
- News bulletins and weather forecasts
- Sports results
- Travel information

This information is divided into numbered pages (see diagram).

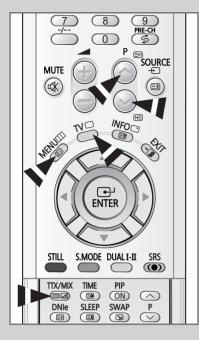

Part	Contents
А	Selected page number.
В	Broadcasting channel identity.
С	Current page number or search indications.
D	Date and time.
E	Text.
F	Status information. FASTEXT information.

Teletext information is often divided between several pages displayed in sequence, which can be accessed by:

- Entering the page number
- Selecting a title in a list
- Selecting a colored heading (FASTEXT system)

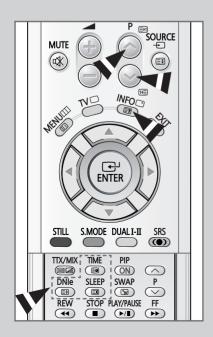

### **Displaying the Teletext Information**

#### You can display Teletext information at any time on your television

- For Teletext information to be displayed correctly, channel reception must be stable; otherwise:
  - Information may be missing
  - Some pages may not be displayed
- 1 Select the channel providing the Teletext service by pressing the  $P \odot$  or  $P \odot$  button.
- 2 Press the TTX/MIX ( ) button to activate the teletext mode. <u>Result</u>: The contents page is displayed. It can be redisplayed at any time by pressing the ) (index) button.
- 3 Press the TTX/MIX ( □ □) button again. <u>Result</u>: The screen will be split into two. This Double Teletext feature lets you view the actual broadcast and teletext information separately on the screen.
- 5 To exit from the teletext display, press the TV (\_\_) button.

### **Selecting Display Options**

When you have displayed a Teletext page, you can select various options to suit your requirements.

To display	Press the
<ul> <li>Hidden text (answers to quiz games, for example)</li> </ul>	E? (reveal)
The normal screen	E? (reveal) again
• A secondary page by entering its number	(sub-page)
• The broadcast when searching for a page	EX (cancel)
<ul><li>The next page</li><li>The previous page</li></ul>	En (page up) IE (page down)
<ul> <li>Double-size letters in the:</li> <li>Upper half of the screen</li> <li>Lower half of the screen</li> <li>The normal screen</li> </ul>	<ul> <li>€€ (size)</li> <li>Once</li> <li>Twice</li> <li>Three times</li> </ul>

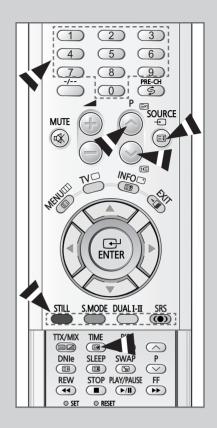

#### **Selecting a Teletext Page**

## *You can enter the page number directly by pressing the numeric buttons on the remote control.*

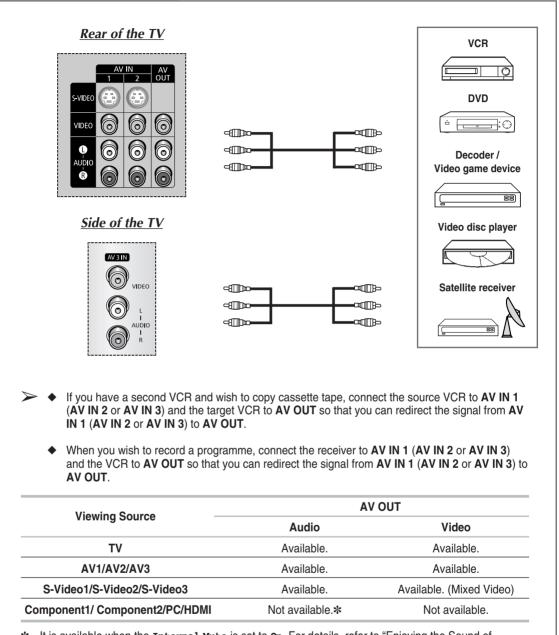

- 1 Enter the three-digit page number given in the content by pressing the corresponding numeric buttons.
  - <u>Result</u>: The current page counter is incremented and the page is then displayed. If the selected page is linked with several secondary pages, the secondary pages are displayed in sequence. To freeze the display on a given page, press the **EI** (hold) button. Press the it again to resume.
- 2 If the FASTEXT system is used by the broadcasting company, the different topics covered on a Teletext page are colour-coded and can be selected by pressing the colored buttons on the remote control.

Press the colored button corresponding to the topic that you wish to select; the available topics are given on the status line.

- <u>Result</u>: The page is displayed with other colored information that can be selected in the same way.
- **3** To display the previous or next page, press the corresponding colored button.
- 4 To display the subpage, see the following steps.
  - Press the (sub-page) button.
     <u>Result</u>: The available subpages appear.
  - Select the required sub-page. Sub-pages can be scrolled by pressing the ftee or in button.

#### **Connecting to the External Input/Output**

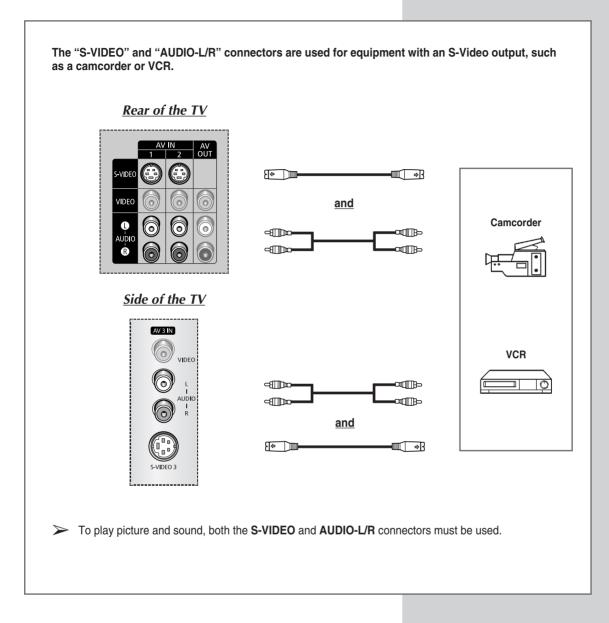

It is available when the Internal Mute is set to On. For details, refer to "Enjoying the Sound of External Speakers" on page 37.

Whenever you connect an audio or video system to your television, ensure that <u>all</u> elements are switched <u>off</u>.

Refer to the documentation supplied with your equipment for detailed connection instructions and associated safety precautions.

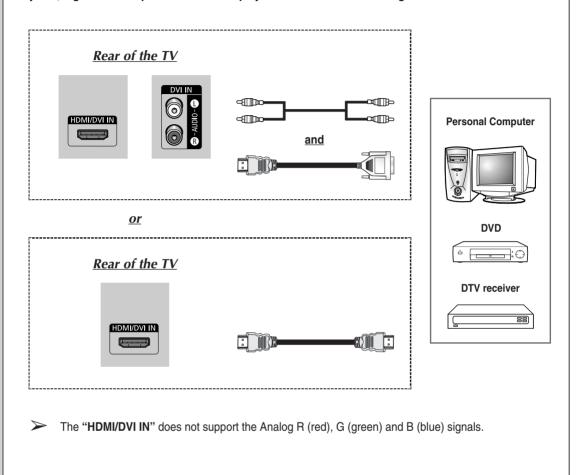

### **Connecting to the S-Video Input**

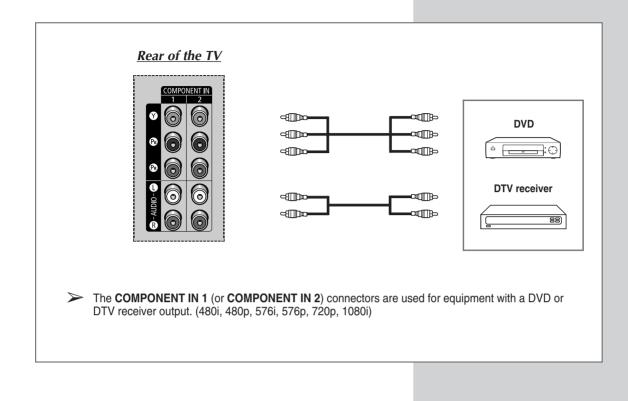

English - 51 Download from Www.Somanuals.com. All Manuals Search And Download.

### **Connecting to the Digital Input**

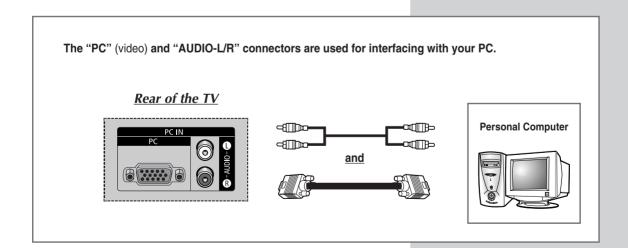

The "HDMI/DVI IN" and "AUDIO-L/R" connectors are used for equipment with a digital output. By inputting a high-bandwidth digital content protection high-definition picture source to these jacks, high-definition pictures can be displayed on the screen in their digital forms.

#### **Connecting to the Component Input**

### **Connecting to the PC Input**

#### Setting up Your PC Software (Windows 98)

The Windows display-settings for a typical computer are shown below. But the actual screens on your PC will probably be different, depending upon your particular version of Windows and your particular video card. But even if your actual screens look different, the same, basic set-up information will apply in almost all cases. (If not, contact your computer manufacturer or Samsung Dealer.)

**Display Properties** ? × Background Screen Saver Appearance Effects Web Settings æ 8 8 1 5 8 Display: (Unknown Monitor) on ATI Graphics Pro Turbo PCI (atim64 - CT) Colors Screen area True Color (24 bit) Less . - 1 More 1024 by 768 pixels Extend my Windows desktop onto this monito Advanced. OK Cancel

On the windows screen, select in the following sequence: Start  $\rightarrow$  Settings  $\rightarrow$  Control Panel.

When the control panel screen appears, click on **Display** and a display dialog-box will appear.

Select the Settings tab in the display dialog-box.

The two key variables that apply the television-PC interface are "Resolution" and "Colors". The correct settings for these two variables are:

- Size (sometimes called "Resolution") 1024 x 768 pixels.
- Colour
   24-bit colour (might also be expressed as "16 million colors")
   Shown at left is a typical screen for "Display" dialog box.

If a vertical-frequency option exists on your display settings dialog box, the correct value is **60 Hz**. Otherwise, just click **OK** and exit the dialog box.

### PC/HDMI(DVI) Input Mode

Standard	Resolution	Horizontal frequency (kHz)	Vertical frequency (Hz)	Pixel Clock (MHz)	Sync Polarity (H/V)
VGA	720 x 400	31.47	70.00	28.322	_/_
	640 x 480	31.47	60.00	25.175	-/+
		35.00	66.70	30.24	-/-
		37.86	72.80	31.50	-/-
		37.50	75.00	31.50	-/-
		43.27	85.00	36.00	-/-
SVGA	800 x 600	35.16	56.30	36.00	-+/-
		37.88	60.30	40.00	+/+-
		48.08	72.20	50.00	+/+
		46.87	75.00	49.50	+/+
		53.67	85.10	56.25	+/+
	832 x 624	49.73	74.60	57.284	-/+
XGA	1024 x 768	48.36	60.00	65.00	_/_
		56.40	70.10	75.00	_/_
		60.02	75.00	78.75	+/-
DTV	720 x 576	31.25	50.00	27.00	Х
(EIA/CEA-	720 x 480	31.50	60.00	27.027	Х
861-B)	1280 x 720p	37.50	50.00	74.25	Х
		45.00	60.00	74.25	Х
	1920 x 1080i	28.125	50.00	74.25	Х
		33.75	60.00	74.25	Х

Both screen position and size will vary depending on the type of PC monitor and its resolution. The table below shows all of the display modes that are supported:

• The interlace mode is not supported.

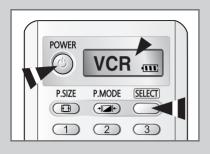

• The television might operate abnormally if a non-standard video format is selected.

The 4:3 mode does not work with input signals from "720 x 400".

#### Notes

- The text quality of PC screen is optimum in the XGA mode (1024 x 768), the full size displayed PC mode is optimum in the SVGA mode (800 x 600).
- When this television is used as a PC display, 24-bit color is supported (over 16 million colors).
- Your PC display screen might appear different depending on the manufacturer (and your particular version of Windows). Check your PC instruction book for information about connecting your PC to a television.
- If a vertical and horizontal frequency-select mode exists, select 60Hz (vertical) and 31.5kHz (horizontal). In some cases, abnormal signals (such as stripes) might appear on the screen when the PC power is turned off (or if the PC is disconnected). If so, press the **SOURCE** button to enter the Video mode. Also, make sure that the PC is connected.
- When connecting a notebook PC to the television, make sure that the PC screen is displayed through only the television (Otherwise, random signals might appear).
- When horizontal synchronous signals seem irregular in PC mode, check PC power saving mode or cable connections.

### **Programming the Remote Control for Other Components**

Your TV comes equipped with a universal remote control. In addition to controlling the TV, the universal remote control can also operate a VCR, Cable box, DVD and Set-Top Box made by Samsung (even if your VCR, Cable box and DVD are made by manufacturers other than Samsung).

- The remote control might not be compatible with all VCRs, DVD players and Cable boxes.
- **1** Turn off your VCR (Cable box or DVD).
- 2 Press the SELECT button to switch the remote control to the VCR (CATV or DVD) mode.
  - The remote control has five modes : TV, VCR, CATV, DVD and STB
- 3 Press the SET button.
- 4 Enter 3 digits of the VCR (Cable box or DVD) code listed on next page for your VCR (Cable box or DVD).
  - Example: To enter the code "6", press 0, 0, and 6. To enter the code "76", press 0, 7, and 6.
- 5 Press the **POWER** (()) button. Your VCR (Cable box or DVD) should turn on. If it turns on, your remote control is now set correctly.
  - If it does not turn on, repeat steps above, but try one of the other codes listed for the brand of particular yours.
- 6 Once your remote control is set up, press the **SELECT** button any time you want to use the remote control to operate VCR (Cable box or DVD).
  - When your remote control is in the VCR, CATV, DVD or STB mode, the volume buttons still control your television's volume.
    - When your remote control is in the TV mode, the VCR or DVD control buttons (rewind, stop, play/pause and fast forward) still operate your VCR or DVD.

#### **Replacing the Lamp**

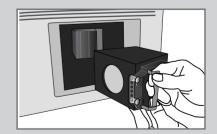

- **1** Unplug TV, then use a screwdriver to remove the screw.
- 2 Remove the Lamp cover.
- **3** Remove the screws securing the Lamp by using a screwdriver.
- 4 Separate the Lamp from the engine by holding the handle and pulling it out
- 5 To reinstall the Lamp, follow these steps in reverse order.
  - Why do I need to replace the lamp? The lamp used in a projection TV has a limited lifespan. For the best screen quality it needs to be replaced periodically. After replacing the lamp, the screen quality will be bright and clear as new.
  - When do I need to replace it? It should be replaced when the screen becomes darker, less clear or when all three LEDs on the front (TIMER, LAMP and STAND BY/TEMP) are flashing.
  - Check before lamp replacement
    - Turn the power off and wait for 30 minutes before replacing the lamp as it will be hot.
    - The lamp must be the same code to avoid damage to the TV. The lamp code is indicated on the lamp case or the side of TV.
    - After checking the lamp code, give to the store where you purchased the TV or to a Samsung Service Center.
  - ♦ Caution
    - Do not touch the glass part of the lamp with your bare hands nor insert any foreign object inside the cover as it may cause poor screen quality, electric shock or fire.
    - Do not place the old lamp near flammable objects or within the reach of children.
    - Don't allow dirt or dust to accumulate inside the lamp cover or on the lamp. A dirty cover or lamp can catch fire, explode and cause electric shock.
    - If a new lamp is improperly handled, the screen quality can be affected and the expected lifespan of the lamp can be reduced.
    - Be sure to tighten the lamp cover on the TV after changing the lamp. The TV will not turn on if the lamp cover is not correctly closed (as this will activate the protective

#### Troubleshooting: Before Contacting Service Personnel

Before contacting Samsung after-sales service, perform the following simple checks.

If you cannot solve the problem using the instructions below, note the model and serial number of the television and contact your local dealer.

No sound or picture	<ul> <li>Check that the mains lead has been connected to a wall socket.</li> <li>Check that you have pressed the power switch toward "OFF" (O) and the POWER (()) button on the remote control or the rear of the television).</li> <li>Check the picture contrast and brightness settings.</li> <li>Check the volume.</li> </ul>
Normal picture but no sound	<ul> <li>Check the volume.</li> <li>Check whether the volume MUTE button on the remote control has been pressed.</li> <li>Check that the Internal Mute is set to On.</li> </ul>
No picture or black and white picture	<ul> <li>Adjust the color settings.</li> <li>Check that the broadcast system selected is correct.</li> </ul>
Sound and picture interference	<ul> <li>Try to identify the electrical appliance that is affecting the television, then move it further away.</li> <li>Plug your television into a different mains socket.</li> </ul>
Blurred or snowy picture, distorted sound	<ul> <li>Check the direction, location and connections of your aerial. This interference often occurs due to the use of an indoor aerial.</li> </ul>
Remote control malfunctions	<ul> <li>Replace the remote control batteries.</li> <li>Clean the upper edge of the remote control (transmission window).</li> <li>Check the battery terminals.</li> </ul>

## **Technical Specifications**
