BEFORE CONNECTION

IMPORTANT INFORMATION:
- To connect this unit to a TV, TV must have a set of Audio/Video composite input jacks (RCA-type). You cannot use an antenna terminal to connect this unit.
- If your TV has only an antenna terminal, please purchase the TV with Audio/Video input jacks or the RF modulator.
- Do not connect the unit to a VCR directly. The playback picture will be distorted because DVD video discs are copy-protected.
- Please refer to the instruction manuals for the components that you are connecting (TV, AV amplifier, etc.).

Choosing a Connection

Does your TV have "Audio/Video input jacks"?

Yes   No ⇒ Do you use an RF Modulator (not supplied)?   ⇒ Yes ⇒ See "Connecting to a Conventional TV (Example 1)" and "Using RF Modulator" on pages E6 & E7.

No ⇒ Please purchase the TV with Audio/Video input jacks or the RF Modulator.

TV Connection ⇒ Do you connect it to a Conventional TV?   ⇒ Yes ⇒ See "Connecting to a Conventional TV (Example 1)" on page E6.

No ⇒ Do you connect it to a TV with Progressive-scan Capability?   ⇒ Yes ⇒ See "Connecting to a TV with Progressive-scan Capability (Example 2)" on page E8.

TV and Amplifier Connection

VIDEO Connection ⇒ See "Connecting to a Conventional TV (Example 1)" on page E6 or "Connecting to a TV with Progressive-scan Capability (Example 2)" on page E8.

AUDIO Connection ⇒ Do you connect it to an Amplifier with Dolby Digital Decoder, DTS Decoder or MPEG2 Decoder?   ⇒ Yes ⇒ See "Connecting to an Amplifier with Dolby Digital Decoder, DTS Decoder or MPEG2 Decoder (Example 4)" on page E10.

No ⇒ Do you connect it to a Digital Amplifier?   ⇒ Yes ⇒ See "Connecting to a Digital Amplifier (Example 5)" on page E10.

No ⇒ Do you connect it to an Amplifier with Dolby Pro Logic Decoder?   ⇒ Yes ⇒ See "Connecting to an Amplifier with Dolby Pro Logic Decoder (Example 6)" on page E11.

No ⇒ See "Connecting to an Audio System and TV (Example 3)" on page E9.

Notes:
- Please refer to your TV instruction manual.
- When you connect the DVD video player to your TV, be sure to turn off the power and disconnect both units from the wall outlet until all the connections have been made.
- If your TV has one audio input jack, connect the AUDIO OUT jacks of the DVD video player to a Y-cable adapter (not supplied), then connect it to the TV Audio input. Please consult your local audio/video dealer.
- Do not connect the DVD video player to a VCR directly. The playback picture will be distorted because DVD video discs are copy protected.

Using the COMPONENT VIDEO OUT jacks
Note:
Please follow the steps before turn on the power.
1. If your TV has the component video input jacks, connect the DVD video player to these jacks. (The VIDEO OUT or S-VIDEO OUT jack connection is not necessary.)
   You can enjoy high quality picture playback.
2. Set the VIDEO OUT SELECT switch to the **COMPONENT** position.
3. You also need to connect the left and right audio cables (not supplied) to the AUDIO OUT jacks of DVD video player and the Audio input jacks of the TV.
4. **Set the DVD video player to the INTERLACE position. See page E13.**

Using the S-VIDEO jack
Note:
Please follow the steps before turn on the power.
1. If your TV has the S-video input jack, connect the DVD video player with the S-video cable (not supplied). (The VIDEO OUT jack connection is not necessary.)
   You can enjoy clearer picture playback.
2. Set the VIDEO OUT SELECT switch to the **S** position.
3. You also need to connect the left and right audio cables (not supplied) to the AUDIO OUT jacks of DVD video player and the Audio input jacks of the TV.

4. **Set the DVD video player to the PROGRESSIVE position. See page E13.**

Notes:
- Please refer to your TV instruction manual.
- When you connect the DVD video player to your TV, be sure to turn off the power and disconnect both units from the wall outlet until all the connections have been made.
- Do not connect the DVD video player to a VCR directly. The playback picture will be distorted because DVD video discs are copy protected.

Progressive Scanning

While interlaced scanning produces one frame of video in two fields, progressive scanning creates one frame in one field. Conventional interlaced scanning constitutes one second with 30 frames (60 fields), but progressive scanning constitutes it with 60 frames from scratch. Progressive scanning can reproduce sharper picture with high resolution for still image or other picture containing long texts or horizontal lines.
This model has compliance with 525p (progressive) system.

Power Supply

Connect the power cord to a 120VAC 60Hz outlet. This unit is equipped with a polarized plug. If you have difficulty inserting the plug, turn it over and reinsert it. If the unit will not be used for a long time, disconnect the AC plug from the AC outlet.

Notes:
- Before plugging the power cord into an AC outlet, make sure that all the connections have been made.
- The unit is not disconnected from the AC power unless the power cord is unplugged from the AC outlet.

CAUTION:
TO PREVENT ELECTRIC SHOCK, MATCH WIDE BLADE OF PLUG TO WIDE SLOT, FULLY INSERT.

FOR SAFE AND EFFICIENT OPERATION

- Do not damage the power cord.
- When not in use, disconnect the power cord from the outlet. Grasp the plug, not the cord, when disconnecting the unit.
- If water should enter the unit, electrical shock or a malfunction may result. Use in an area where there is low humidity and little dust.
- Do not disassemble or alter the unit in any way.
- Do not use the unit in areas where extremes in temperature occur (below 40°F (5°C) or exceeding 95°F (35°C)), or where it may be exposed to direct sunlight.
- Because of the DVD video player extremely low noise and wide dynamic range, there is a tendency to set the volume on the amplifier higher than necessary. Doing so may produce an excessively high output from the amplifier which can cause damage to your speakers. Please be careful in this regard.
- Sudden changes in the surrounding temperature can cause dew to form on the optical pickup lens inside the unit. Under this condition the unit may be unable to operate properly. If this should occur, remove the disc and allow the unit to adjust to the surrounding temperature.

- **When carrying the unit, be sure to remove a disc which may be inside and turn the power off. Then unplug the power cord from the AC outlet after 10 seconds. Carrying the unit with a disc inside may damage the disc and/or the unit.**
- The unit is automatically set to the Screen Saver mode after approximately 15 minutes have elapsed under the stop or pause mode.
- The unit is automatically set to the standby mode after approximately 30 minutes have elapsed under the complete stop mode.

Press [⏏] (or [OPEN/CLOSE] on the remote control) when closing the disc tray. Do not push the disc tray.

PLAYABLE DISCS

The following types of discs can be played on this unit.

| Disc type and logo mark	
DVD-Video	
Audio CD	

Region Number

Region number (Regional restriction code) is built-in to the unit and DVD video discs.
Region number "1" or "ALL" of DVD video discs can be used on this unit.

DVD Video Disc

DVD video discs are divided into titles, and the titles are sub-divided into chapters.

Title 1		Title 2		
Chapter 1	Chapter 2	Chapter 1	Chapter 2	Chapter 3
There are the marks on some DVD video disc package.
Examples:

Multiple languages
Multi-language subtitles
Multi-angle
16:9 LB	Multi-aspect
Region Number
CC	Closed caption
Audio CD Disc

Audio CD discs are divided into tracks.

Track 1	Track 2	Track 3	Track 4	Track 5

CAUTION:

- Only the above types of discs can be played on this unit. DVD-ROM, CD-ROM, SVCD, CVD, VCD, etc. cannot be played.
- This unit can play back the DVD-R that has recorded movie data as well. However, some DVD-Rs cannot be played back depending on the recording conditions.
- The DVD-R that has no movie data cannot be played back.
- This unit is to be used exclusively with the NTSC color system. PAL and SECAM system discs cannot be used with this unit.
- **For MP3/WMA CD, please see page E23.**
- **For Picture/JPEG CD, please see pages E25 and E26.**

Handling, Storing and Cleaning Discs

- Fingerprints and dust should be carefully wiped from the signal surface of the disc (glossy side) with a soft cloth. Wipe in a straight motion from the center to the outside of the disc.
- Never use chemicals such as record cleaning sprays, antistatic sprays or fluids, benzene or thinner to clean the discs. These chemicals will permanently damage the plastic surface of the disc.
- To remove a disc from its storage case, press down on the center of the case and lift the disc out, holding it carefully by the edges.
- Discs should be returned to their cases after use to protect them from dust and scratches.
- To prevent warping the disc, do not expose it to direct sunlight, high humidity or high temperatures for extended periods of time.
- Do not apply paper or write anything on either side of the disc. Sharp writing instruments, or the inks used in some felt-tip pens, may damage the surfaces of the disc.

     TV with Progressive-scan Capability: Select " $\boxed{}$P ".
     Note:

     In " $\boxed{}$P " mode, the closed caption may not appear on the TV screen.

Important Note:
- This instruction manual explains the basic instruction of this unit using the remote control.
- Some DVD video discs have different functions that may not be explained in this instruction manual. You may need extra instructions. In this case, please follow the instructions displayed on the TV screen or jacket or case of the disc.
- " $\bigcirc$ " may appear on the TV screen during operation. This icon means that the function is not available on the disc now.
- For improvement, FL displays and on-screen displays subject to change without notice.

Basic Playback

Notes:
- Do not touch the disc tray while it is moving.
- Never place anything except a disc on the disc tray. Foreign objects can damage the unit.
- Do not apply excessive force to the disc tray.
- Discs must be placed on the disc tray one at a time.

When operation buttons are pressed, that operation is displayed on the TV screen. The display turns off after several seconds.

1. Press [⏻/ON].
   - "SANYO" logo appears on the TV screen.
   - "------" blinks, and then "NO dISC" appears on the FL display.

2. Press [▲] (or [OPEN/CLOSE] on the remote control).
   - "OPEN" appears on the FL display and the disc tray opens.
   Note:
   To open or close the disc tray, be sure to press [▲] (or [OPEN/CLOSE] on the remote control). Do not press the disc tray with your hand.

3. Place the disc with the label facing up on the disc tray.

MP3/WMA CD OPERATION

Before Starting

This unit can play back the CD that has recorded music data, MP3 or WMA (Windows Media Audio) files.

- The file system is ISO9660 Level 1 and Level 2.
- If the CD has both audio CD tracks and MP3/WMA files, only audio CD tracks are played.
- It would take 30 seconds or more for this unit to read MP3/WMA files depending on its structure.
- This unit can recognize up to 256 files or folders per disc. The CD with 257 files or folders and over is not available to this unit.
- MP3/WMA CDs may not be played in the recorded order.
  1. Please use the MP3 or WMA software with the function that can record data alphabetically or numerically.
  2. Please refrain from making many sub-folders by preference.

However, some CD-R/RWs cannot be played back depending on the recording conditions.
Before playing back MP3 or WMA files, please read the following.

MP3 CD

- MP3 files must have the extension letters, ".MP3" or ".mp3".
- Standard, sampling frequency, and the bit rate:
  MPEG-1 Audio
  32kHz, 44.1kHz, 48kHz
  32kbps ~ 320kbps (constant bit rate or variable bit rate)
- The recommend recording setting for a high-quality sound is 44.1kHz of sampling frequency and 128kbps of constant bit rate.

WMA CD

- When creating a WMA disc, be sure the copyright function is off.
- WMA files must have the extension letters, ".WMA" or ".wma".
- Standard, sampling frequency, and the bit rate:
  WMA version 7, and 8
  32kHz, 48kbps ~ 64kbps
  44.1kHz, 48kbps ~ 192kbps
  48kHz, 128kbps ~ 192kbps
- DRM files cannot be played back.

Microsoft, Windows Media, and Windows Logo are trademarks or registered trademarks of Microsoft Corporation in both the United States and other countries.

LIMITATIONS ON DISPLAY

- Available letters for display are the following: capital or small alphabets of A through Z, and numbers of 0 through 9.
- Other letters than those above are replaced in "-" (hyphen).

CAUTION:

- Some MP3/WMA CDs cannot be played back depending on the recording conditions.
- The CD has no music data or non-MP3/WMA files cannot be played back.

MP3/WMA CD Playback

Parental Control
MPAA (Motion Picture Association of America) Guideline is a rating system that provides advanced cautionary information to parent about the content of movie programs.

The parental lock level is equivalent to the following MPAA Rating System.
Level 7: NC-17 (No one 17 and under admitted)
Level 6: R (Restricted)
Level 4: PG-13 (Parents strongly cautioned)
Level 3: PG (Parental guidance suggested)
Level 1: G (General audiences)

Some DVD discs contain a restriction level which enables parents to prevent playback of discs by children. This unit is equipped with a password designed to prevent children changing the level.

You cannot play DVD video discs rated higher than the level you selected unless you cancel the parental lock function.
For example, when you select level "5", the unit will not play discs with ratings of "6", "7" or "8".
The information will appear on the TV screen.

If you forget the password…
Enter "788444" even if 4 digits "----" appears, then press [ENT] to clear the current password.
Enter a new password and set the parental lock level again.

Note:
DVD video discs may or may not respond to the parental lock settings. Make sure this function works with your DVD video discs.

(f) Damage in or due to transportation.
(g) Damage due to improper maintenance, improper wiring, accident, abuse, misuse or negligence.
(h) Damage caused by lightning and power surges.

ORIGINAL RETAIL PURCHASER'S RESPONSIBILITY

You, the original retail purchaser, must present your original, dated bill-of-sale together with this warranty to SANYO Canada Inc. or to an authorized Sanyo Service Depot when you make a claim under this Warranty.

You, the original retail purchaser, are responsible for any costs of TRANSPORTING the product to and from SANYO Canada Inc. or an authorized Sanyo Service Depot. You also are responsible for the cost of any MAINTENANCE necessary in respect of the product.

WARRANTY BECOMES VOID

This warranty becomes void if the product's serial numbers are altered or removed or if any repair to the product is made other than by SANYO Canada Inc. or by an authorized Sanyo Service Depot.

LIMITATIONS

(a) SANYO Canada Inc. reserves the right to change or improve the design of the model of the product warranted hereunder without incurring any obligation to make any modifications to or to install any improvement in or on the product.
(b) In no event shall SANYO Canada Inc. or any of its Authorized Dealers be liable for special or consequential damage arising from the use of this product.

STATUTORY WARRANTIES

The above provisions do not preclude the operation of any applicable provincial statute which in certain circumstances may not allow some of the limitations and exclusions described in this Warranty. Where any terms of this Warranty are prohibited by such a statute, they shall be deemed null and void but the remainder of this warranty shall remain in effect.
