# TANNOY.

#### **Product Description**

The Tannoy CMS601 DC is a full bandwidth; high power and high sensitivity ceiling monitor system. The 165mm (6.50") Tannoy Dual ConcentricTM is a point source drive unit design comprising a multi fibre paper pulp mid bass cone and a 25mm (1.00") ferrofluid cooled, titanium dome HF unit with neodymium magnet system. The driver and passive frequency dividing network are mounted in a vented, injection moulded, paintable front baffle manufactured from UV/weather resistant UL94V-0 ABS material.

The mid-bass and tweeter sections of the Tannoy Dual ConcentricTM constant directivity driver are coincidentally aligned to a true point source; ensuring a wide and controlled dispersion for optimum coverage; this while avoiding the massive loss of energy in the vertical plane, at the crossover frequency, inherent in two-way discreet designs. This high power and high sensitivity design, with extended frequency response and very low distortion, is equipped with dynamic high frequency protection.

This compact unit is specifically designed for applications requiring the combination of premium sonic quality for music and speech reinforcement and exceptional reliability and intelligibility.

The CMS601 DC BM is equipped with a low insertion loss 60W line transformer easily configurable to the following settings via front baffle mounted rotary tapping switch:

### 70V systems: 60W / 30W / 15W / 7.5W / OFF & low Impedance operation 100V systems: 60W / 30W / 15W / OFF & low Impedance operation

The CMS601 DC PI is supplied without a transformer. The 60W line transformer is available as an optional accessory pack (7600 1658) for easy connection to the control switch circuit if the product is to be used without a back can.

The recommended option for optimum performance and compliance with safety ratings is to use the CMS601 PI Back Can (8001 4520) in which the transformer is pre-fitted.

Two CMS601 DC model versions and a separate back can are available to satisfy the vast majority of installation application requirements:

#### CMS601 DC BM (Blind Mount) - supplied with an integral back can. CMS601 DC PI (Pre-Install) - supplied without a back can. CMS601 PI Back Can (Pre-wire back can) - use with the CMS601 DC PI.

The zinc plated steel back cans have an integrated, recessed termination box. The removable locking connector has screw terminals for secure wire termination and "loop through" facility. Strain relief is provided by a clamping mechanism for use with plenum rated cable or conduit.

Spring loaded self-aligning clamps make for quick and easy installation, while all models are also supplied with two tile support rails and one C-ring included in the package. A plaster (mud) ring is available as an optional accessory.

#### Features

- 165mm (6.50") point source Dual ConcentricTM driver
- High power & high sensitivity with extended frequency response and very low distortion
- Wide, controlled constant directivity dispersion for optimum coverage.
- Does not suffer from massive loss of energy in the vertical plane at crossover caused by two way discreet designs
- UV/weather resistant UL94V-0 ABS front baffle
- Blind Mount & Pre Install options
- · Dynamic high frequency protection
- · Easily accessible tapping switch on front baffle.
- · Low insertion loss 60W line transformer
- Ferrofluid cooled neodymium HF
- Packaged with tile rails and C-ring for quick & easy installation and simple stocking logistics
- · Five year warranty

#### Applications

- · Multi-zone foreground music & paging systems
- Boardrooms and offices
- · Business music systems
- · Airports, convention centres, hotels
- · Reception and waiting rooms
- · Houses of worship
- Retail outlets and shopping malls
- Lounges and bars
- Cruise ships
- Courtrooms

# TANOY

#### Architectural specifications

The Ceiling Monitor System shall consist of a 165mm (6.50") full range, point source, constant directivity Dual ConcentricTM transducer and passive frequency dividing network mounted in a vented, injection moulded, paintable front baffle in UL94V-0 ABS material.

The back can in both PI (pre-install) & BM (blind-mount variants) shall be constructed of zinc plated steel. A recessed termination box shall be integrated with the back can, a removable locking connector with screw terminals for secure wire termination with "loop through" facility shall be provided. Strain relief will be provided by a clamping mechanism for use with plenum rated cable or conduit.

For prewiring the PI (pre-install) back can is provided with conduit knockouts (19mm / 22mm / 28mm, 0.75" / 0.87" / 1.14"). A safety ring is located on the rear of the back can for a load bearing safety bond.

Performance of the Ceiling Monitor System shall meet or exceed the following criteria: The system shall have a conical coverage pattern of 111degrees (1kHz to 6kHz). Frequency response measured on axis shall be 50Hz - 30kHz (-10dB from rated sensitivity, measured in an IEC baffle in an anechoic chamber) with no equalization. Sensitivity shall be 91dB (1W @ 1m). Long term power handling capacity as defined in EIA-426B test shall be 80W, recommended amplifier power 160W. Dynamic high frequency protection is provided for occasional overpowering. The nominal system impedance shall be 8 Ohms (in low impedance setting).

The Ceiling Monitor System shall be equipped with a 60W high performance line transformer for use in 70.7 or 100 Volt distributed audio systems with 60, 30, 15, 7.5\* Watt taps available. An easily accessible rotary switch located on the front baffle shall be available for selecting transformer and low impedance settings. A weather resistant perforated steel grille covers the transducer and switch.

Two support rails and one C-Ring shall be included with the ceiling monitor system.

Bezel diameter 280mm (11.02")

- BM Front of ceiling to rear of back can 258mm (10.16"), Front of ceiling to top of safety loop 275.5mm (10.84")
- PI Front of ceiling surface to rear of speaker unit 99.40mm (3.91"), Front of accessory back can bezel to top of safety loop 168.50mm (6.60")

The Ceiling Monitor System shall be the...CMS601 DC.

\*70 Volt only
