High Sensitivity, Day & Night 30X Zoom Color Camera INSTRUCTION MANUAL SDZ-330

SAMSUNG

EDISV

About this manual

Devenload from Www.Somanuals.com. All Manuals Search And Download.

The lightning flash with an arrowhead symbol, within an equilateral triangle is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

INFORMATION-This equipment has been tested and found to comply with limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications.

Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

WARNING - Changes or modifications not expressly approved by the manufacturer could void the user's authority to operate the equipment.

CAUTION : To prevent electric shock and risk of fire hazards:

- Do NOT use power sources other than that specified.
- Do NOT expose this appliance to rain or moisture.

This installation should be made by a qualified service person and should conform to all local codes.

Features (

Warning

30x Optical Zoom

The built-in SDZ-330 optical zoom lens is a highly durable component. It features auto focus, auto iris, and zoom functions.

SDZ-330 features a powerful DSP that can efficiently remove image noise, producing crisp and clear images even under low lighting conditions.

Fine Picture Quality under Ultra Low

The integrated SV-III DSP Chip and 1/4" high density CCD allows the user to capture bright, high-quality images under ultra low lighting conditions.

- 0.4 Lux in normal color mode.

Wide Dynamic Range (WDR)

The WDR feature offers powerful compensation performance and thus allows for crisp, clear, and perfect light contract under any environment.

Featuring 520TV line horizontal resolution in color mode and 570TV line horizontal resolution in BW mode, the camera features Sony's Double Speed 410,000 pixel CCD and captures clean, noiseless, high-quality images.

Day & Night

The camera automatically determines whether it is night time or day time, selecting operating mode automatically. The camera operates in color mode during day light conditions and BW mode in night conditions for clearer identification.

Motion Detection

Once motion is detected, the camera sends an alert signal to the processing unit, which, if used in conjunction with an optional alarm, can provide effective surveillance of your property.

Miscellaneous Functions

Other miscellaneous functions of the camera include privacy zone masking, digital zoom, line lock synchronization (INT/LL), freeze, horizontal inversion, and user-configured presets.

Control via OSD Menu and RS-485

The OSD menu and RS-485 pins allow for remote control of the camera. The user can also directly control the lens using external control connection.

The camera requires regular maintenance.

Contact an authorized technician for maintenance and/or servicing.

Do not continue to use if malfunctioning.

Prolonged use of the camera in abnormal operating conditions (produces smoke, overheats, etc.) may result in a fire.

Do not Install the camera on a surface that can not support it.

Installation on an unsuitable surface may cause the camera to fall and/or other hazards.

Do not handle the power cable with wet hands.

May result in an electric shock.

Do not disassemble the camera.

May result in a fire, electric shock, and/or other hazards.

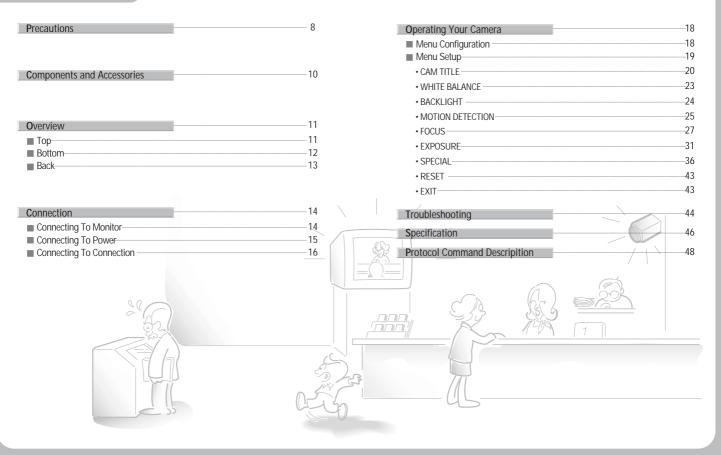

Do not place the camera in the vicinity of inflammables.

May result in a fire and/or other hazards.

Correct Disposal of This Product (Waste Electrical & Electronic Equipment)

(Applicable in the European Union and other European countries with separate collection systems) This marking shown on the product or its literature, indicates that it should not be disposed with other household wastes at the end of its working life. To prevent possible harm to the environment or human health from uncontrolled waste disposal, please separate this from other types of wastes and recycle it responsibly to promote the sustainable reuse of material resources. Household users should contact either the retailer where they purchased this product, or their local government office, for details of where and how they can take this item for environmentally safe recycling. Business users should contact their supplier and check the terms and conditions of the purchase contract. This product should not be mixed with other commercial wastes for disposal.

Contents 🔘

Precautions

Do not install under extreme temperature conditions.

Do not install in high humidity environment.

Use only under temperature conditions between -10°C and +50°C. Provide good ventilation when using in high temperature conditions. May lower image quality.

Do not drop the camera or subject it to physical shock.

May cause a product malfunction.

Never keep the camera face to strong light directly.

May damage the CCD.

Do not expose the camera to rain or other types of liquids.

Do not expose the camera to radioactivity.

Wipe dry any liquids. Liquids may contain minerals that are corrosive to electronic components.

Radioactivity exposure may damage the CCD.

Solution Notes

- Exposure to a spotlight or an object emitting strong light may cause smear or blooming.
- Ensure that the power source complies with normal specifications before supplying it to the camera.

Do not install under unstable lighting conditions.

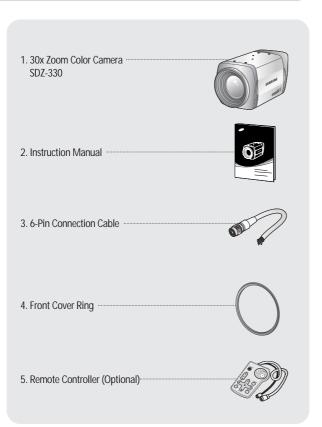

Severe lighting changes or flickering may hinder normal camera operation.

Avoid touching the camera lens.

The lens is the most important component of the camera. Be careful not to smear it with fingerprints.

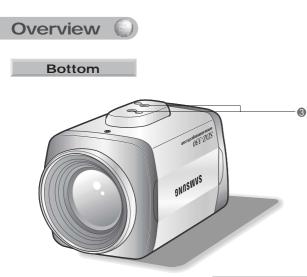

Components and Accessories

Tripod Mounting Bracket Screw Hole Used to fix tripod mounting bracket on top of the camera.

Pront Cover Ring Removable for replacement with a filter.

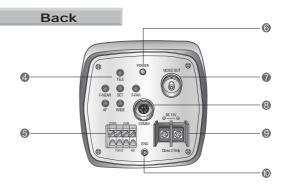

Tripod Mounting Hole

Used to install the camera on an optional tripod. The tripod must be equipped with screws with specifications shown on the right.

1/4"-20 UNC (20 THREAD)
L:4.5mm±0.2mm (ISO standard),
or 0.197" (ASA standard)

Attach the bracket to the top of the camera. Use screws included in the package or their equivalent (less than 6mm). Otherwise, the bracket may not assemble to the camera properly.

Key Buttons

· Following buttons control zoom, focus, and auto focus functions.

WIDE button : To widen the view. (ZOOM OUT)

TELE button : To close in on a far object. (ZOOM IN)

F-NEAR button : To see a near object clearly.

F-FAR button : To see a far object clearly.

AF button : To activate auto focus just once.

Pressing the 'SET' button locks the zoom control function of these buttons and prompts the main setup menu.

Solution Notes

The zoom postion is saved after 5 seconds when you set zoom function.

Main setup menu can be navigated using these buttons.
 SET : To access the main setup menu.
 UP (WIDE button) : To move the arrow indicator to up.
 DOWN (TELE button) : To move the arrow indicator to down.
 LEFT (F-NEAR button) : To move the arrow indicator to left.
 RIGHT (F-FAR button) : To move the arrow indicator to right.

Overview 🌍

External Control Connector

Relates to the motion detection output signal.

Zoom and focus functions can be controlled using external siganals.

Power LED

Illuminates when power is supplied.

Video Output Jack

Used to connect an external video monitor in jack.

Operation Control Connector

Used to connect the Remote Controller (Optional). Includes external 'SYNC' signal input pin, which is used for the line lock function. Includes the RS-485 communication pin.

Over Input Terminal

Power supply terminal (DC12V±10%).

Frame Ground Terminal

It is the GND terminal of the motion detection signal.

Connection

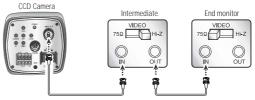

Connecting to Monitor

Connect Video Out Jack to the monitor's Video In jack as shown below.

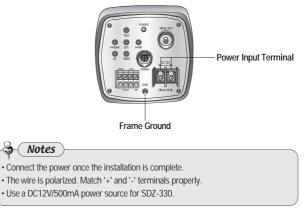

- Connection methods may vary depending on the video equipment. Please refer to the model specific instruction manual.
- · Connect cables with the unit powered down.

- Set the 75 $\!\Omega$ / Hi-Z selection switch as shown below if you have an intermediate device.

Connecting to Power

Connect the power cable to the camera's Power In as shown in the figure below.

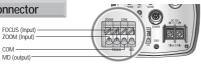

Connecting to connection

External Control Connector

COM -MD (output)

Connector	Function	Signal Level	I/O	
ZOOM	Tele	+6V-+12V	I	
2001	Wide	-6V12V

Notes

· Contact an authorized technician for inspection.

Menu Configuration

Menu Setup

Use the six buttons on back of the camera.

1. Press the SET button to access the main setup mode.

• Main setup menu is displayed on the monitor screen.

MAIN SET	rup
► CAM TITLE	OFF
WHITE BAL	ATW
BACKLIGHT	OFF
MOTION DET	OFF
FOCUS	
EXPOSURE 🚽	
SPECIAL	
RESET	
EXIT	

- 2. Select the desired feature using the UP or DOWN button.
 - Each pressing of the UP or DOWN button moves the indicator to the next or previous feature.
 - Move the arrow indicator to the desired feature item.

Operating Your Camera Image: Comparison of the status using the UP Select feature using the UP Comparison of the status using the stat

3. Change the status of the selected feature using the LEFT or RIGHT button.

4. When completed, move the arrow indicator to 'EXIT' and press the SET button.

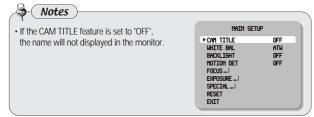

Notes_

- Features marked with a ,J have an accessible submenu
- · Access the submenu by pressing the SET button.

Cam Title

Use this feature to designate a name for the camera, which will display on the monitor screen.

- Press the SET button to display the main setup menu and move the arrow indicator to 'CAM TITLE' using the UP or DOWN button.
- 2. Set 'CAM TITLE' to 'ON' using the LEFT or RIGHT button.

3. Press SET button.

- 4. You can enter up to 20 characters.
 - Move the cursor to the character entry field using the LEFT or RIGHT button.
 - **2** Use UP, DOWN, LEFT, and RIGHT buttons to select a desired character.

C.	AM T	ITLE	
ABCDI	EFGH	IJKI	LMNC
PQRS	TUVW	XYZa	abcd
efgh	ijkl	mnoj	pqrs
tuvw			
89() < > -	/#!	?,
	CLR	POS	RND

Press the SET button to confirm selection of the blinking character. The character is then saved, and the cursor in the entry field moves to the next position.

Provide the steps Through Suntil the desired name has been entered.

> Notes

Correcting Mistakes

Move the cursor to 'CLR' and press the SET button to clear the entire entry. To modify one character, use \leftarrow or \rightarrow to position the cursor above the character to be modified and click the SET button after selecting the character to enter.

5. Select on screen position of the CAM TITLE.

Move the cursor to 'POS' and press SET button.

The CAM TITLE is displayed on the top-left of the monitor screen. (Default position)

Select the position by using the 4-directional buttons, then press the SET button to confirm the position.

6. When completed, move the cursor to 'END' and press SET button.

White Balance Control

Your camera provides three 'WHITE BAL' control modes for your choosing in adjusting the white balance.

- 1. Press the SET button to access the main setup menu and move the indicator to 'WHITE BAL' using the UP or DOWN button.
- 2. Set 'WHITE BAL' using the LEFT or RIGHT button.

MAIN	SETUP
CAM TITLE	OFF
▶WHITE BAL	ATW
BACKLIGHT	OFF
MOTION DET	OFF
FOCUS→	
EXPOSURE 🚽	
SPECIAL	
RESET	

The three white balance control modes are as follows :

- CATW (Auto Tracking White Balance): When color temperature is 1800 ~ 10500°K, select this mode.
- CAWC (Auto White balance Control): The white balance is automatically adjusted in a specific environment. In order to obtain the best result, press the SET button while the camera focuses on white paper. If the environment including the light source is changed, you have to adjust the white balance again.
- CManual: To fine adjust, select the Manual mode. You can increase or decrease the red or blue factor while monitoring the difference on the screen. Set to 'MANUAL' mode and press the SET button. Increase or decrease the value for red(R-Gain) and blue(B-Gain), watching the color of the picture, and press the SET button when you obtain the best color.

Notes

- Proper White Balance may not be obtained under the following conditions.
 When the scene contains mostly high color temperature object, such as a blue sky or sunset.
- When the scene is dim.
- If your camera directly faces a fluorescent lamp or is used in an environment of varying lighting conditions.

Backlight

The built-in SVIII DSP chip provides intelligent light level control to overcome the severe 'BACKLIGHT' conditions.

 Press the SET button to display the main setup menu and move the arrow indicator to 'BACKLIGHT' using the UP or DOWN button.

MAIN SETUP	
CAM TITLE	OFF
WHITE BAL	ATW
▶ BACKLIGHT	OFF
MOTION DET	OFF

2. SET 'BACKLIGHT' to the desired mode using the LEFT or RIGHT button.
 WDR: Compensates for scenes simultaneously containing bright and dark elements.
 OFF: Deactivation

3. Select the 'WDR' mode and Press the SET button •You can adjust the LIMIT for WDR

You can select the level(LOW,MIDDLE,HIGH). WDR sensitivity is increased or decreased.

4. When completed, press the SET button.

- \bullet The WDR mode cannot be used if 'Shutter of Exposure Menu' is set to 'MANUAL'.
- The following phenomenon may occur when operating under the WDR mode. In such event, do not continue use under the WDR mode.
- Unnatural color change or screen phenomenon.
- Screen noise on bright elements.
- WDR performance vary on bright on screen elements. Adjust the camera angle accordingly when installing the camera to compensate.
- Making changes to the WDR LIMIT may result in unnatural screen phenomenon.

Motion Detection

alert signal upon detecting motion. When used in conjunction with an external alarm, the user can receive MD alerts. This feature is useful when monitoring several screens simultaneously.

- 1. Press the SET button to access the main setup menu and move the indicator to 'MOTION DET' using the UP or DOWN button.
- 2. Set 'MOTION DET' to ON using the LEFT or RIGHT button.

Operating Your Camera MAIN SETUP CAM TITLE OFF WHTTE BAL ATH OFF BACKLIGHT ▶ MOTION DET ON FOCUS Press the SET button. MOTION DETECTION SENSITIVITY 50 ----

Increase or decrease detection sensitivity by setting the 'SENSITIVITY' value.

Press SET to Return

· When completed, press SET button.

Notes

the camera

Tips on Using the Motion Detection Feature

- · Once the sensitivity level has been set, perform a test to verify proper operation of the feature.
- The feature may not function properly under flickering light conditions.
- The camera interprets sudden changes in lighting and subsequent change in brightness of an object as motion.
- · With the feature enabled, other algorithms may require additional time to operate than usual
- This system does not guarantee prevention of fire or theft. The manufacturer shall not be held responsible for any accident or damage incurred.

IMAG ADJ⊸J	

CIMAGE ADJ: Includes image quality or special function factors.

- TONE : Increasing this value increases the overall brightness.
- SHARPNESS : Increasing this value sharpens object edges. Too high of a setting, however, produces noise and may obscure the image.
- COLOR : Adjusting this value affects the chroma level only; the burst level is unaffected.
- COMMUNICATION: Use this feature to select communication protocol (refer to p.48~ p.53 for details). Position the indicator over 'COMMUNICATION' using the UP or DOWN button.

SET COMMUNI	CATION
CAM ID NO.	0
CAM ID DISP	ON
BAUD RATE	9600
UART MODE	8-E-1
RETURN PACKET	ENABLE

- CAM ID NO. : Assign an ID number to the camera (1 to 255). Identification number zero is used for Remote controller setup.
- CAM ID DISP: Displays camera ID on top left corner of the screen.
- BAUD RATE : Configure baud rate from 9600, 19200, or 38400bps.
- UART MODE : Configure parity bit to NON, EVEN, or ODD. Data bit is set to 8bit, and stop bit to 1bit. Set the UART MODE to EVEN if using the Remote Controller.
- RETURN PACKET : Used to transfer a packet.

CEND: evert back to the USER PRESET menu.

RESET

To reset your camera to factory default condition.

EXIT

To finish setup menu.

Refer to the following table if you are experiencing trouble with your camera. Contact an authorized technician if the table does not provide you with a solution to the trouble.

Problem	Solution
No display	Check the power cable and the wiring between the camera and the monitor.Ensure proper video cable connection (Video Out Jack).
Dim display	 The lens could be dirty. Clean with a soft, clean piece of cloth. Adjust monitor settings. Adjust camera position if exposed to a strong light source.
Dark display	• Adjust the monitor's contrast level. • Set the intermediate device, if in use, to 75Ω / Hi-z (refer to p.15).
The camera is not functioning properly and its surface is hot	Check the power source for compliance with specifications.
Motion Detection feature is not active.	Ensure that the feature is set to ON.Check the SENSITIVITY level.
Uneven colors	Adjust and configure WHITE BAL.

Problem	Solution
Flickering	The camera may be facing the sun or a fluorescent light. Adjust the position of the camera.
Can't select LL mode	The camera may be connected to a DC power source. Connect to an AC power source.
LL is not function properly.	Check external SYNC signal frequency (should be 60Hz for NTSC, 50Hz for PAL).
