Chapter 1 Introduction

Overview

The Socket Bluetooth Connection Kit for Windows CE makes it easy to add Bluetooth wireless connectivity to a Pocket PC 2000, Pocket PC 2002 or HPC 2000. It's perfect for connecting any of these mobile computers wirelessly to your favorite Bluetooth phone, LAN access point, computer or printer.

The Bluetooth Card is the only plug-in card to incorporate all Bluetooth components within the CompactFlash Type I or SDIO form factor.

For people using notebook computers running Windows 98SE, Me, 2000 or XP, Socket offers two options. The Bluetooth Connection Kit and Adapter package includes a Bluetooth Card, CF-to-PC Card adapter plus software support for both notebook computers and Windows CE-based devices. The package is available online at: www.esend.com/socket/product.asp?sku=BL4517% 2D386&mscssid=4MM2VU1BLJGS9LMAT74D3 C3SJXGEF1C7www%2Eesend%2Ecom%2Fsocket %2Fproduct%2Easp%3Fsku%3DAC4000%2D978

For users who already own the Bluetooth Connection Kit for Windows CE, the Windows Upgrade Kit comes with a CF-to-PC Card adapter and software for Windows notebooks. You can purchase the upgrade kit separately online at:

www.esend.com/socket/product.asp?sku=BL4518%2D387&mscssid=4MM2 VU1BLJGS9LMAT74D3C3SJXGEF1C7

The Bluetooth Connection Kit includes a Bluetooth Card and Bluetooth software, including drivers, the Bluetooth Setup Wizard, the Get Connected! Wizard, the Bluetooth Devices folder, Socket OBEX and the Socket Dialer.

For quickly connecting your mobile computer to a Bluetooth phone, use the Get Connected! Wizard. Afterwards, you can use the Socket Dialer to directly dial a number from your Contacts list.

In addition to phones, Socket's Bluetooth software also makes it easy to connect to devices like computers, access points, and printers. The

4 | CHAPTER 1: INTRODUCTION

Bluetooth ActiveSync option guides you through connecting and synchronizing with a computer. Similarly, the Bluetooth LAN Access option helps you connect to a LAN access point. To connect to a printer or other type of device, use the advanced features found in the Bluetooth Devices folder.

The Transfer via Bluetooth option enables you to exchange business cards and files with another Bluetooth device that supports OBEX. You can even use one mobile computer to browse the contents of another.

This *User's Guide* explains how to install and use the Bluetooth Card. This guide shows Pocket PC 2000 and Pocket PC 2002 screens. Except where otherwise noted, other types of mobile computers will have functionally equivalent screens. The term "Pocket PCs" refers to both Pocket PC 2000s and Pocket PC 2002s.

Software updates: www.socketcom.com/support/support bluetooth.asp

Contents of the Connection Kit

The Socket Bluetooth Connection Kit includes these items:

- A Socket Bluetooth Card (CompactFlash card Type I or SDIO)
- The Socket Bluetooth Connection Kit Installation CD

To register the kit online, visit: www.socketcom.com/product/prodreg.asp

CHAPTER 1: INTRODUCTION | 5

Installation Steps Summary

Basic installation and operation of the Bluetooth Card for use with a Bluetooth phone can be completed in seven steps.

BASIC SETUP AND USE WITH A BLUETOOTH PHONE

- STEP 1: Register the card.
- STEP 2: Prepare network information.
- STEP 3: Install the software.
- STEP 4: Complete the Socket Bluetooth Setup Wizard.
- STEP 5: Insert the Bluetooth Card into your mobile computer.
- STEP 6: Get Connected!
- STEP 7: Dial-up to your network.

FEATURES

- Turn transmitter ON/OFF
- Bluetooth ActiveSync
- Bluetooth LAN Access

ADVANCED FEATURES

- Set up your Bluetooth Card.
- Use the Bluetooth Devices folder.
 - View device properties.
 - Set up your favorite devices.
 - View/modify Bluetooth COM ports.
 - Discover other Bluetooth device(s).
 - Bond with another Bluetooth device.
 - Change views.
 - Delete a device from your folder.

<u>OBEX</u>

- Exchange business cards
- Send a contact
- Send a file
- Browse remote device
- Receive contact or file
- Enable file sharing

SOCKET DIALER

BLUETOOTH PRINTING

Note: There are some important safety and usage guidelines you should read before operating the Bluetooth Card. Please refer to Appendix B, "Safety and Usage Tips."

6 | CHAPTER 1: INTRODUCTION

Chapter 2 Basic Setup

This chapter covers the minimum steps you must complete to install and use the Bluetooth Card.

STEP 1: Register the Card

Register the card online at: www.socketcom.com/prodreg/

STEP 2: Prepare Network Information

Consult with your network administrator/MIS technician to obtain any necessary settings for your network (e.g. IP addresses, dial-up number, user name, password, etc.).

STEP 3: Install the Software

Follow these steps to install the software BEFORE inserting the Bluetooth Card.

1. Make an active connection between the mobile computer and a host PC.

An active connection exists if data can move between the host PC and mobile computer via a serial/USB/Ethernet connection cable or cradle.

2. Insert the Bluetooth Connection Kit Installation CD into the host PC.

- 3. Use **My Computer** or **Windows Explorer** to access your CD-ROM drive. In the CD, click on **SETUP.EXE**
- 4. Follow the instructions on your host computer and mobile computer screens to install the software.

STEP 4: Complete the Bluetooth Setup Wizard

1. After you install the software, the Socket Bluetooth Setup Wizard will automatically launch on your mobile computer. Tap **Next>**.

2. Give your mobile computer a friendly name. Tap Next>.

🎊 Installing Socket Blue 📢 11:08 😵
🛞 Give your PDA a name.
You must assign a name to your PDA before using it. This should be a relatively unique name, such as "Bob's Pocket PC".
Vanessa Pocket_PC
< Back Next >

 If your mobile computer has fewer than 6 COM ports free, the Disable IrDA? Screen will appear. If desired, disable IrDA to free more ports. Tap Next>.

Note: This will disable the IR port on a Pocket PC. To readjust the IrDA settings, go to Start | Settings | System| IrDA. Some devices do not allow you to disable IrDA.

 If your mobile computer still has fewer than 6 COM ports free, the next screen will allow you to choose which services you plan to use most. After making your selections, tap Next>.

Note: You cannot disable the Bluetooth Phone port.

- 5. In the last screen, tap **Finish**.
- 6. If you disabled IrDA while using the wizard, soft reset your mobile computer by pressing the reset button. This is necessary for changes to take effect.

STEP 5: Insert the Card

Important!

Do NOT insert the card upside down or shove the card in too hard. Damage may occur!

Insert the card into your mobile computer's slot. Make sure the card is rightside up.

- Insert a CompactFlash or SDIO card directly into a slot of its size.
- If using a PC Card slot, first insert the Bluetooth CF Card into a CompactFlash-to-PC Card adapter (available separately).

Insert the card directly into a slot of its size...

... or plug the CF card into an adapter for use in a PC Card slot.

When properly inserted, the CF card unit will be fully contained within the slot. The SDIO card will jut out a little from the slot.

After the mobile computer recognizes the card, the Bluetooth icon will appear in the task tray (visible in the Today screen for Pocket PCs).

STEP 6: Get Connected!

The Get Connected! Wizard guides you through a one-time setup process that prepares the mobile computer and phone for Bluetooth connections. The wizard varies depending on what phone you want to connect to.

Ericsson, Nokia 6210, NTT DoCoMo, Sony Phones

- Tap on the Bluetooth task tray icon (visible from the Today screen for Pocket PCs). In the pop-up menu, select Get Connected!
- 2. Follow the **Bluetooth "Get Connected!" Wizard**. In the second screen, use the drop-down list to select your Bluetooth phone. The wizard will provide tailored instructions based on your selection.

This example is for a Nokia phone. Your phone may differ.

- 3. Follow the next screen(s) to prepare your specific phone for Bluetooth connections. You may need to do 1, 2 or all of the following steps:
 - a. Naming your Bluetooth phone
 - b. Setting your Bluetooth phone in Discoverable mode
 - c. Preparing your Bluetooth passkey

 When the search is complete, a list of the discovered Bluetooth phones will appear. Choose the phone you wish to connect to, and tap Select. A service discovery phase will begin, about 5-10 seconds.

🄀 Get Connected!	10:48a		
Device Name			
Choose the desired phone and tap	► Select.		
To perform the search again, tap Refresh.			
Tap Cancel to abandon this operation	on.		
Select Refresh C	ancel		

- As prompted in the next screen, prepare your phone for bonding. For instructions on setting your phone to "Bondable" or "Pairable" mode, refer to your phone manual. Have your passkey ready, then tap Next>.
- 6. In the next screen, enter the passkey. Tap **Reply**.

🎒 Start	12:28p	
🛞 Bluetooth Passke	y	
The following device wants a passkey: Lenr520		
The same Bluetooth passkey is required on each device. Please enter the passkey below, or reply with a blank passkey to deny this request.		
Bluetooth passkey:	Reply	

Note: Exchanging passkeys allows the phone and mobile computer to set up an encrypted data link for secure communications.

7. The mobile phone may then either automatically accept the passkey or ask you to enter one. If prompted for a passkey, use the same one you entered on the mobile computer.

Ericsson T68/T68i only: When the phone asks you if you want to bond , select 2: Add to paired devices. Do not ACCEPT.

8. Tap **Finish**. After successfully connecting, the phone will appear in the **Bluetooth Devices** folder. You will not need to run the Get Connected! Wizard again unless you plan to switch between different phones.

Note: You may also switch between different phones by assigning a new "favorite phone" in the Bluetooth Devices folder.

Motorola Timeport 270C, Nokia 6310

- 1. Tap on the Bluetooth task tray icon (visible from the **Today** screen for Pocket PC devices). In the pop-up menu, select **Get Connected**!
- 2. Follow the **Bluetooth "Get Connected!" Wizard**. In the second screen, use the drop-down list to select your Bluetooth phone. The wizard will provide tailored instructions for your phone.

Note: The screens below are for the Motorola Timeport 270C.

🎒 Get Connected!	10:20a		
Select your phone. Use the list below to select the model of your Bluetooth phone. If you don't see your phone, try using the selection " <not in="" this<br="">list>".</not>			
My Bluetooth phone is:			
< Back	Next >		

- 3. As directed in the next two screens, assign the phone a unique name and set the phone in Discoverable mode. Then tap **Next>**.
- 4. The mobile computer will begin to search for the phone. When the search is over, a list of the discovered Bluetooth phones will appear.

🄀 Start	10:36a		
Device Name Motorola 270c			
Choose the desired phone and tap Select. To perform the search again, tap Refresh. Tap Cancel to abandon this operation.			
Select Refr	esh Cancel		

Choose the phone you wish to connect to, and tap **Select**. A service discovery phase will begin, about 5-10 seconds.

5. The next two screens describe procedures you can only complete outside of the wizard. Read through each screen but do not complete the described procedures until you exit the wizard. Directions for these procedures are provided in *STEP 7: Dial-up to Your Network*, starting on the next page. The two procedures are:

Bonding with your phone — This must be completed in order to complete the Bluetooth connection and involves dial-up networking.

Automatic Connections — This procedure is optional but will make future Bluetooth connections more convenient.

6. Continue to the last screen of the wizard and tap **Finish**. Now proceed to STEP 6 to complete the bonding process and, if desired, set up automatic connections.

STEP 7: Dial-up to Your Network

Complete the following steps to create a new Bluetooth connection. Before setting up dial-up networking, prepare yourself with dial-up information and other necessary settings for your office network or ISP.

Pocket PCs

This section pertains to Pocket PC 2000s and Pocket PC 2002s.

<u>Pocket PC 2002</u> — In the Connections screen, under Internet Settings, tap Connect. In Network Log On, verify the dialing settings. Tap OK.

8. FOR MOTOROLA TIMEPORT 270C AND NOKIA 6310 ONLY:

After you tap **Connect** for the first time, the phone will display a message asking if you want to bond. On Motorola, enter **GRANT**; on Nokia, enter **ACCEPT**. Make up a 4-16 digit passkey, enter it on the phone, then enter it on the Pocket PC. After successfully bonding, you can set up the phone for automatic connections.

Automatic Connections for Motorola Timeport 270C:

- On the phone, press **MENU**.
- Scroll to Settings, then press SELECT.
- Scroll to Connection, then press ON.
- On Bluetooth Link, press SELECT.
- Scroll to **Devices**, then press **SELECT**.
- Choose your mobile computer, then press EDIT.
- Scroll to Access:Ask, then press CHANGE.
- Scroll to Automatic, then press SELECT. Press DONE.

Automatic Connections for Nokia 6310:

- On the phone, press **MENU**.
- Scroll to 10 Bluetooth, then press SELECT.
- Scroll to 4 View Paired Devices, then press SELECT.
- Highlight the Pocket PC, then press OPTIONS.
- Scroll to 3 Request Connection Authorization, then press NO.
- 9. To use a different Bluetooth phone for dial-up networking, you can use the same connection setup, but you must make the new phone your favorite. Just run the **Get Connected! Wizard** again, select the new phone, and make it your new **Favorite** when prompted. Or you can use the Bluetooth Devices folder to change your favorite phone (see page 37).

Handheld PC 2000

- 1. Go to Start | Programs | Communication | Remote Networking | Make New Connection.
- 2. In the next screen, enter a name for the Bluetooth connection. Select **Dial-Up Connection**. Tap **Next>**.

2. Select Bluetooth Phone for the modem. Tap Configure...

8. FOR MOTOROLA TIMEPORT 270C AND NOKIA 6310 ONLY:

After you tap **Connect** for the first time, the phone will display a message asking if you want to bond. On Motorola, enter **GRANT**; on Nokia, enter **ACCEPT**. Make up a 4-16 digit passkey, enter it on the phone, then enter it on the handheld PC. After successfully bonding, you can set up the phone for automatic connections.

Automatic Connections for Motorola Timeport 270C:

- On the phone, press **MENU**.
- Scroll to **Settings**, then press **SELECT**.
- Scroll to **Connection**, then press **ON**.
- On Bluetooth Link, press SELECT.
- Scroll to Devices, then press SELECT.
- Choose your mobile computer, then press EDIT.
- Scroll to Access:Ask, then press CHANGE.
- Scroll to Automatic, then press SELECT. Press DONE.

Automatic Connections for Nokia 6310:

- On the phone, press **MENU**.
- Scroll to **10 Bluetooth**, then press **SELECT**.
- Scroll to 4 View Paired Devices, then press SELECT.
- Highlight the Pocket PC, then press OPTIONS.
- Scroll to 3 Request Connection Authorization, then press NO.
- 9. To use a different Bluetooth phone for dial-up networking, you can use the same connection setup, but you must make the new phone your favorite. Just run the **Get Connected! Wizard** again, select the new phone, and make it your new **Favorite** when prompted. Or you can use the Bluetooth Devices folder to change your favorite phone (see page 37).

Chapter 3 Features

This chapter explains how to turn the Bluetooth ON/OFF and how to use the Bluetooth ActiveSync and Bluetooth LAN Access options.

Turn Radio Transmitter ON/OFF

You may want to turn off the radio transmitter to save power or if you are entering an area with radio restrictions (e.g., an airplane).

- 1. After you insert the Bluetooth Card, the Bluetooth icon should appear in the task tray (visible from the **Today** screen for Pocket PCs). Tap on the icon.
- 2. In the pop-up menu, select Turn Transmitter OFF.

3. The Bluetooth Card radio transmitter will shut off. The Bluetooth icon in the task tray will become gray, as will relevant menu options (e.g., **Get Connected!**).

4. To turn the radio transmitter back on, tap on the gray Bluetooth icon. In the pop-up-menu, select **Turn Transmitter ON**.

20 | CHAPTER 3: FEATURES

Bluetooth ActiveSync

This section explains how to use the Bluetooth ActiveSync feature. It helps you quickly and easily ActiveSync to a notebook or desktop computer with ActiveSync v3.x installed.

1. Tap on the Bluetooth icon 🕑 . In the pop-up menu, select Bluetooth ActiveSync.

2. The next screens will vary depending on if your Bluetooth Devices folder contains any computers, and if one is chosen as your favorite. Please refer to the appropriate scenario:

SCENARIO #1: Your Bluetooth Devices folder contains a favorite desktop computer.

- (a) When you tap **Bluetooth ActiveSync**, your mobile computer will automatically try to connect to your favorite computer.
- (b) The **Connect To** screen will appear, reporting that it is trying to connect to **Wireless ActiveSync**.

(c) After a successful connection is made, the status screen will report **Connected**. Now you are ready to synchronize files, if desired.

CHAPTER 3: FEATURES | 21

SCENARIO #2: Your Bluetooth Devices folder contains no favorite desktop computer.

(a) When you tap on Bluetooth ActiveSync, a screen will appear that allows you to choose which computer to connect to in your Bluetooth Devices folder. Choose a computer from the list and tap Select, or tap Find to search for another computer.

26 | CHAPTER 3: FEATURES

Bluetooth Faxing

Many Bluetooth phones and other types of Bluetooth-enabled devices support faxing. This chapter explains how to use such a device with the Bluetooth Card and your mobile computer for wireless faxing. The Socket Bluetooth Connection Kit does not include faxing software. You must obtain Bluetooth faxing software separately from a third party.

- 1. If using a Bluetooth phone, use the Get Connected! Wizard to connect to the phone. If using another type of Bluetooth-enabled device, use the Device Discovery Wizard to connect it to your mobile computer.
- 2. Make sure your Bluetooth-enabled device supports faxing.
 - In the Bluetooth Devices folder, select the device.
 - View the device's properties by either tapping on the properties icon or tapping **Device** | **Properties**. On a Pocket PC, you can also tap and hold your stylus on the device. In the pop-up menu, select **Properties**.

• Tap on the Services tab. Make sure Fax is listed. Tap ok.

CHAPTER 3: FEATURES | 27

- 3. Make sure a COM port is enabled for faxing.
 - Tap on the Bluetooth icon. Select Advanced Features, then My Bluetooth Device. Tap on the COM Ports tab.
 - In the COM Ports screen, make sure Bluetooth Fax is checked.
 - Note the COM port number assigned to faxing. You may need this to configure your fax software. Tap **ok**.

🋃 Dev	ice Manager	1:42p 🛞

CHAPTER 3: FEATURES | 29

Chapter 4 Advanced Features

This chapter explains optional steps you may choose to perform while installing and/or using the Bluetooth Card.

The steps covered in this chapter include:

- Setting up your Bluetooth Card
- Viewing and enabling/disabling Bluetooth COM ports
- Using the Bluetooth Device Discovery Wizard
- Using the Bluetooth Device Bonding Wizard
- Viewing device properties
- Setting up a Favorite Device
- Changing views
- Deleting an item from the Bluetooth Devices folder

30 | CHAPTER 4: ADVANCED FEATURES

Set up Your Bluetooth Card

Note: If you use the Get Connected! Wizard, which is recommended for normal usage, then this step is not necessary. This step would be used to change the friendly name of your mobile computer.

- 1. After you insert the Bluetooth Card, the Bluetooth icon should appear in the task tray (visible from the **Today** screen for Pocket PCs). Tap on the icon.
- 2. In the pop-up menu, select Advanced Features, then My Bluetooth Device.

Turn Transmitter OFF		
Get Co	nnected!	
Advan	My Bluetooth Device	
Blueto	Bluetooth Devices	
	oth LAN Access	
About		₩ 🛱 🛠

3. In the **My Bluetooth Device** screen, you can modify the **Friendly Name** and make any desired configuration changes. When done, tap **OK**.

🎒 Device Manager	10:25a 🛞

Friendly Name:		
Michelle Pocket PC		
Bluetooth Address:	00.e0.03.24.3c.b3	
Discoverable	Use Authentication Use Encryption	
	Firmware: 2.170	
General COM Ports		

Note:

- In normal phone connect operation, **Discoverable** mode is not needed and should be disabled.
- If you do enable **Discoverable** mode (e.g., for ActiveSync), note that it does not shut off by itself. To save power, remember to disable it when not needed.
- Connectable, Use Authentication, and Use Encryption are also not required for printing or dial-up networking applications.
- Check Use Authentication to enable the Use Encryption option.

CHAPTER 4: ADVANCED FEATURES | 31

Assign COM Ports

Follow these steps to view and/or modify the Bluetooth COM ports.

1. Tap on the Bluetooth icon (in the **Today** screen for Pocket PCs). Select **Advanced Features** then **My Bluetooth Device**.

2. The My Bluetooth Device screen will appear. Tap on the COM Ports tab.

🔀 Device Manager 👘 10:25a 🤇

Note: The Bluetooth Phone port cannot be disabled.

32 | CHAPTER 4: ADVANCED FEATURES

Discover Bluetooth Device(s)

Follow these steps to discover other Bluetooth devices nearby, including non-phone devices. The Device Discovery Wizard is a more detailed alternative to using the Bluetooth "Get Connected!" Wizard or Bluetooth ActiveSync or Bluetooth LAN Access options. The Device Discovery Wizard allows you to discover any type of Bluetooth device.

 If not open, launch the Bluetooth Devices folder: Tap on the Bluetooth icon (in the Today screen for Pocket PCs). Select Advanced Features then Bluetooth Devices.

<u>HPC 2000s</u> — You can also tap on **Bluetooth Devices** on the desktop.

- 2. In the **Bluetooth Devices Folder**, tap on the **Device Discovery** icon Or you can tap on **Tools**. In the pop-up menu, select **Device Discovery**.
- 3. Follow the **Bluetooth Device Discovery Wizard** to search for Bluetooth devices nearby. When prompted, select the device type you seek.

Bluetooth Devices 5:28p		
The Wizard is ready to search for Blueooth devices in your immediate area. Choose the type of devices you want to detect:		
Any Bluetooth device		
 Data-capable phone 		
LAN access point		
Another PDA or computer		
Enter how long you want the Device Dicovery process to last in the edit box below.		
10 second(s)		
< Back Next >		

4. When the search is complete, a screen will report the discovered Bluetooth devices. Check the box next to any device you wish to save information about, (i.e., any devices you wish to connect to). Tap **Next>**.

1	B	uetoo	th Device	s	5	:35p		
	Device Name			Device Class				
	☑	🔋 Lenrs	520		Phone			
	Choose each device to save by tapping the							
checkbox to the left of each device.								
		_		_		_		
			< Back		Next >			

- 5. A service discovery phase will begin, 5-10 seconds per chosen device.
- 6. In the next screen, tap **Finish**.

CHAPTER 4: ADVANCED FEATURES | 33

Bond with Discovered Device(s)

Follow these steps to bond with an already discovered Bluetooth device. In most cases, bonding is for establishing secure communications with a Bluetooth-enabled phone. This is a more detailed alternative to using the Bluetooth "Get Connected! Wizard."

Important!

- Do not try to bond with a <u>Motorola Timeport 270C</u> or <u>Nokia 6310</u>!
- Do not use this method to bond with a printer! The third-party printing software included on the installation CD also handles bonding.
- If not open, launch the Bluetooth Devices folder: Tap on the Bluetooth icon (in the Today screen for Pocket PC devices). Select Advanced Features then Bluetooth Devices.

<u>HPC 2000s</u> — You can also tap on **Bluetooth Devices** on the desktop.

2. Tap and hold your stylus on the Bluetooth device you want to bond with. In the pop-up menu, select **Bond**.

3. Alternatively, after selecting a device, tap on the **Bond** icon Or tap on **Device**, then select **Bond**.

34 | CHAPTER 4: ADVANCED FEATURES

4. The **Bluetooth Device Bonding Wizard** will launch. Follow the wizard to bond with your selected device.

5. As prompted, make sure the Bluetooth device that you want to bond with is in <u>Bondable</u> mode.

6. If the remote device is set up to accept bonding, a **Bluetooth Passkey** screen will appear. To continue bonding, enter the correct passkey and tap **Reply**.

7. When you have successfully bonded with the other device, tap Finish.

CHAPTER 4: ADVANCED FEATURES | 35

View Device Properties

Follow these steps to view the properties of an already discovered device.

1. If not open, launch the **Bluetooth Devices** folder.

Tap on the Bluetooth icon (in the **Today** screen for Pocket PCs). Select **Advanced Features** then **Bluetooth Devices**.

For HPC 2000s, you can also tap on the **Bluetooth Devices** folder directly on the desktop.

2. Select a device. Tap on the **Properties** icon **III**, or tap on **Device** then select **Properties**.

<u>Pocket PCs</u> — Alternatively, you can tap and hold your stylus on the Bluetooth device you want to view information about. In the pop-up menu, select **Properties**.

3. Use the General and Services screens to research device properties.

If needed, assign a new device type icon by tapping on the arrow buttons in the **General** screen. You can also use the **Device name** field to rename the device. When done, tap **ok** for the setting to take effect.

36 | CHAPTER 4: ADVANCED FEATURES

Set up Your Favorite Device

Follow these steps to set up default devices in the **Bluetooth Devices** folder. *Note: The Get Connected! Wizard automatically assigns the favorite phone.*

- 1. Tap on Tools and select My Favorites.
- 2. Tap on the tab for the type of device you would like to set a favorite for. If needed, use the arrow buttons to scroll and find the tab you need.

Note: Tabs will appear only for COM ports you have enabled. To enable a port, refer to the "Assign COM Ports" section earlier in this chapter.

- 3. To select a favorite device, select **Use the favorite selected above**. In the drop-down menu, select your device. Tap **ok**.
- 4. After setting a device as your favorite, its icon will appear in the Bluetooth Devices folder with a heart next to it.

With the device selected in the folder, tap on **Properties**, then select the **Services** tab. Tap the **Update** button.

Please report any devices that you have problems discovering services for. Email <u>askbluetooth@socketcom.com</u>

CHAPTER 4: ADVANCED FEATURES | 37

Change Views

You can switch between the Large lcons or Details views for the Bluetooth Devices folder.

- 1. In Bluetooth Devices, tap on View.
- 2. In the pop-up menu, choose between Large lcons or Details.

Large Icons view

Note: In Details view, scroll right to see the current Bonded status.

38 | CHAPTER 4: ADVANCED FEATURES

Delete a Device from the Folder

If you no longer plan to connect with it, you can delete a device from the **Bluetooth Devices** folder.

- 1. If not open, launch the **Bluetooth Devices** folder.
- 2. Pocket PCs only: Tap and hold your stylus on the device you wish to delete. In the pop-up menu, select **Delete**.

- 3. Alternatively, after selecting a device, tap on the **Delete** icon Or tap on **Device** then select **Delete**.
- 4. A Confirm screen will appear. Tap Yes.

CHAPTER 4: ADVANCED FEATURES | 39

Chapter 5 Socket OBEX

This chapter explains how to use the Socket OBEX (object exchange) application to trade business cards, contacts or files with another Bluetooth device that supports OBEX.

Socket's Bluetooth OBEX application supports five operations:

- Exchange Business Cards
- Send a Contact
- Send a File
- Browse Remote Device
- Receive Contact or File
- Enable File Sharing

The first four operations — exchange business cards, send a contact, send a file, and browse remote device — are client-oriented. They involve initiating an object exchange.

The last two operations — receive contact or file and enable file sharing — are server-oriented. They involve accepting objects in an exchange initiated by another Bluetooth device.

Important!

If you have not done so already, be sure to run the OBEX Installer from the Socket Bluetooth Card Installation CD. Otherwise, you will not be able to perform any OBEX operations with the Bluetooth Card.

40 | CHAPTER 5: SOCKET OBEX

Exchange Business Cards

1. Make sure both Bluetooth devices have a business card assigned to it.

Note: If each device does not have a business card assigned to it, you will not be able to exchange business cards.

To assign a business card to your mobile computer, do the following:

- Tap on the Bluetooth icon. In the pop-up menu, tap Advanced Features | My Bluetooth Device.
- Tap on the Object Sharing tab. Under My business card, tap Assign...

• In the next screen, select your business card and tap **ok**. If your business card is not listed, tap on the **Contacts** button to create one.

• When you return to the **Object Sharing** screen, tap **ok**.

CHAPTER 5: SOCKET OBEX | 41

2. Make sure the other Bluetooth device is set up to receive a contact. The device must support the OBEX Object Push profile.

Note: If the other device is also using the Socket Bluetooth Connection Kit, you can set it up to receive a contact by tapping the Bluetooth icon. In the pop-up menu, tap Transfer via Bluetooth | Receive Contact or File.

 Now you are ready to exchange business cards. Tap on the Bluetooth icon. In the pop-up menu, tap Transfer via Bluetooth | Exchange Business Cards.

- 4. If your mobile computer has no devices in the Bluetooth Devices Folder, then it will begin to search for Bluetooth devices nearby.
- 5. Select the Bluetooth device you wish to exchange business cards with. If the device is not listed, tap **Find**.

46 | CHAPTER 5: SOCKET OBEX

Browse Remote Device

The Bluetooth File Explorer lets your mobile computer share files with another Bluetooth device. The other device must support the OBEX File Transfer server profile.

This section covers the following file transfer operations:

- Prepare for file transfer
- Send/receive file(s) or folder(s)
- Create a folder
- Delete file(s) or folder(s)
- Refresh remote view
- Connect/disconnect
- Exit the program

Note: "Local device" refers to the mobile computer you are running the Socket OBEX from. "Remote device" refers to the Bluetooth device you are trying to transfer files with.

Prepare for File Transfer

1. Make sure the remote device has file sharing enabled. It must support the OBEX File Transfer server profile.

Note: If the other device is also using the Socket Bluetooth Connection Kit, you can enable file sharing by tapping the Bluetooth icon. In the pop-up menu, tap Transfer via Bluetooth | Enable File Sharing.

 Now you are ready to browse the remote device. Tap on the Bluetooth icon. In the pop-up menu, tap Transfer via Bluetooth | Browse Remote Device.

3. If your mobile computer has no devices in the Bluetooth Devices Folder that supports OBEX File Transfer, then it will begin to search for Bluetooth devices nearby.

CHAPTER 5: SOCKET OBEX | 47

4. Select the Bluetooth device you wish to browse. If the desired device is not listed, tap **Find**.

5. Your mobile computer will begin to establish a file sharing connection.

- 3. After successfully connecting to the remote device, the screen will report **Connected** then disappear. The new contact or file should now be on your device.
- 4. If two minutes passes before you receive the item, tap Wait Again.
- 5. After you receive the file or contact, the "Receive Contact or File" feature is automatically disabled.

Enable File Sharing

- 1. Tap on the Bluetooth icon. In the pop-up menu, tap **Transfer via** Bluetooth | Receive Contact or File.
- 2. The **Enable File Sharing** status screen will appear. Your mobile computer will wait two minutes for the remote device to connect.

- 3. After successfully connecting to the remote device, the screen will report **Connected**.
- 4. If two minutes passes before you connect, tap Wait Again.
- 5. File sharing will be enabled until you end it by tapping Cancel.

CHAPTER 5: SOCKET OBEX | 53

Chapter 6 The Socket Dialer

This chapter explains how to assign a dialing prefix and use the Socket Dialer to dial a number directly from your Contacts list. The Socket Dialer makes it quick and easy to perform dial-up networking.

If you have not done so already, be sure to run the Dialer Installer from the *Socket Bluetooth Card Installation CD*. While installing the program, you can also assign the dialing prefix.

Note: The Socket Dialer has been verified to work with Nokia and Ericsson phones and is known not to work with the Motorola 270c, NTT Docomo Paldio 633S or Sony au C413S phone. Results may vary with other phones that are not listed as being supported by the Socket Bluetooth system.

Assign a Dialing Prefix

If you have not already assigned a dialing prefix during the install process, you can do so by following these steps:

 <u>Pocket PC devices</u> — Go to Start | Settings | System. Tap on Socket Dialer.

HPC — Go to Start | Settings | Control Panel. Tap on Socket Dialer.

2. Select the appropriate Dialing Prefix, then tap ok.

🄀 Bluetooth Dialing	10:42a 🛞	
The dialing prefix will be added to the beginning of numbers that are dialed from your contact list.		
Dialing Prefix:		
• "1" • Other:		
socket		

54 | CHAPTER 6: SOCKET DIALER

Use the Socket Dialer

- 1. To use the dialer, the mobile computer must already be connected to the Bluetooth phone. You can use the Get Connected! Wizard to do this. Also, the Bluetooth phone must be selected as your favorite.
- <u>Pocket PC devices</u> Go to Start | Contacts.
 <u>HPC 2000</u> Click on the Contacts icon from the desktop.
- 3. Tap and hold your stylus on the contact you wish to dial to. In the popup menu, select **Dial Contact**. Alternatively, you can tap on **Tools** and select **Dial Contact**.

🔀 Contacts	9:53a	
All Categories 👻 📃		
	uvw xyz	
Dial Contact	w	
Create Copy		
Delete Contact		
Send E-mail to Contact		
Send via Infrared		
New Tools	Image: A = 1	

 If you have multiple phone numbers for a contact, a screen will appear listing them, including any dialing prefix you may have assigned. Select the phone number you wish to dial.

CHAPTER 6: SOCKET DIALER | 55

5. Your mobile computer will connect to your phone and begin dialing.

Note: The Socket Dialer can dial a phone number containing any of the 17 following non-numeric characters:

* # + . / ! @ - \ space A B C D T P W

Additionally, the following string can be included in a phone number:

(',')

The Socket Dialer can not dial a phone number containing non-numeric characters other than those listed above.

Socket recommends that you follow the standard Microsoft Outlook format for phone numbers.

56 | CHAPTER 6: SOCKET DIALER

Chapter 7 Bluetooth Printing

This chapter explains how to print from a Bluetooth-enabled printer, using either of two options. If you have a HPC 2000, you can print directly from Pocket Word or Pocket Excel. If you have a Pocket PC, you can install the PrintPocketCE software included on the installation CD to print from your device.

HPC 2000 only:

With the right settings, you can print directly from Pocket Word or Pocket Excel.

1. In the Print screen, select your Bluetooth printer and Bluetooth COM port. Tap **OK**.

- 2. A Bluetooth device search will begin.
- 3. After the search, select the Bluetooth printer from the list and tap **Select**. If the printer does not appear, tap **Refresh** to try again.

Note: Check **Save selection for future use** *if you would like to save the discovered printer in your Bluetooth Devices folder.*

4. After a successful connection is made, the status screen will report **Connected**. Printing should now begin.

CHAPTER 7: BLUETOOTH PRINTING | 57

Pocket PC 2000 or Pocket PC 2002:

You can print using the PrintPocketCE program included on the *Socket Bluetooth Card Installation CD*. The Socket Bluetooth Connection Kit includes a 30-day trial version of PrintPocketCE. For a full version, please visit: <u>www.fieldsoftware.com</u>

If you have not done so already, be sure to install the PrintPocketCE program. To find the install for this program on the installation CD, go to the Third Party folder, then the Field Software folder.

1. Start the printing program. Go to Start | Programs | PrintPocketCE.

2. In the welcome screen, tap **OK**.

58 | CHAPTER 7: BLUETOOTH PRINTING

3. In the main screen, tap on the file you wish to print.

To locate your file:

- Tap on the Word icon at the bottom of the screen to view a list of Pocket Word docs, TXT, or RTF files.
- Tap on the Excel icon to view a list of Pocket Excel files
- Tap on the yellow envelope icon to view email messages.
- Tap on the **Doc/Excel/Email Options** menu and select another type of printing (e.g., **Go to email printing**).
- Use the folders drop-down menu to switch between folders.
- 4. The next screens let you adjust the printer settings.Make sure the correct printer is chosen. For **Port**, choose **Bluetooth: Socket CF Card**. Make any other necessary printer settings.

Appendix B Safety and Usage Tips

About Bluetooth and Health

Bluetooth wireless technology allows you to use short-range radio signals to connect a variety of devices, such as mobile phones, Pocket PCs, notebook computers, printers, LAN access points, and many other devices at home or work. These radio signals replace the cables that have traditionally connected these devices.

Bluetooth products have small radio transmitters and receivers. Output power is normally very low, only 1 mW (1/1000 of a watt). This gives a working range of approximately 10 meters.

The maximum exposure levels from Bluetooth products are far below recommended safety guidelines. At most, typical Bluetooth devices (1mW) reach only one percent of the prescribed safety levels.

CompactFlash Card

Product Care

- Do not expose your product to liquid, moisture or extreme humidity.
- Do not expose your product to extreme high or low temperatures.
- Do not expose your product to lit candles, cigarettes, or cigars, or to open flames, etc.
- Do not drop, throw or try to bend the product, as rough treatment could damage it.
- Do not paint your product, as the paint could obstruct parts and prevent normal use.
- Do not attempt to disassemble your product: a broken warranty seal will void the warranty. The product does not contain consumer serviceable components. Should your Bluetooth Card need service, please contact Socket technical support at: techsupport@socketcom.com.
- Treat your product with care. Keep in a clean and dust-free place.
- Changes or modifications of this product, not expressly approved by Socket, may void the user's authority to operate the equipment.

Antenna Care

Do not place a metallic shield around your Bluetooth Card since it will reduce the radio transmission efficiency.

APPENDIX B: SAFETY AND USAGE TIPS | 63

Efficient Use

For optimum performance, please make sure that there is no metal surrounding your Bluetooth Card.

<u>Driving</u>

RF energy may affect some electronic systems in motor vehicles, such as car stereo, safety equipment, etc. Check with your vehicle manufacturer's representative to be sure that your Bluetooth Card will not affect the electronic system in your vehicle.

<u>Aircraft</u>

- Turn off your Bluetooth Card antenna before boarding any aircraft.
- To prevent interference with communications systems, you must not use your Bluetooth Card while the plane is in the air.
- Do not use it on the ground without permission from the crew.

Radio Frequency Exposure

Your Bluetooth Card is a radio transmitter and receiver. When in operation, it communicates with a Bluetooth-equipped mobile phone, mobile computer or other device by receiving and transmitting radio frequency (RF) magnetic fields in the frequency range 2400 to 2500 MHz. The output power of the radio transmitter is 0.001 Watt.

The Bluetooth Card unit is designed to be in compliance with the RF exposure limits set by national authorities and international health agencies¹ when installed or used separately from other antennas or radio transmitters.

99/519/EC, EU Council Recommendation on the limitation of exposure to the general public to electromagnetic fields 0 Hz - 300 GHz, Official Journal of the European Communities, July 12, 1999.

ANSI/IEEE C95.1-1992, "Safety levels with respect to human exposure to radio frequency electromagnetic fields, 3 kHz to 300 GHz", The Institute of Electrical and Electronics Engineers, Inc., New York, 1991.

FCC Report and Order, ET Docket 93-62, FCC 96-326, Federal Communications Commission (FCC), August 1996.

Radiocommunications (Electromagnetic Radiation Human Exposure) Standard 1999, Australian Communications Authority (ACA), May 1999.

64 | APPENDIX B: SAFETY AND USAGE TIPS

¹ Examples of RF exposure standards and guidelines:

ICNIRP, "Guidelines for limiting exposure to time-varying electric, magnetic, and electromagnetic fields (up to 300 GHz)", International Commission on Non-Ionizing Radiation Protection (ICNIRP), Health Physics, vol. 74, pp 494-533, April 1998.

SDIO Card

Product Care and Usage

- Do not disassemble, modify or repair this unit. There is danger of fires, electrical shock, damage to the unit, and injury. Any repair is impossible. Do not remove the label and do not paste other labels. It may cause malfunction. Disassembling or remodeling this unit will invalidate the warranty and any other service plan.
- Do not use this unit in an area where people wearing pacemakers may be nearby (such as in a crowded train).
- People wearing a pacemaker should use the system at least 22 cm from the pacemaker.
- Do not use this unit in medical facilities such as hospitals or in other places near medical electronic equipment. Likewise, do not attach medical electronic equipment to the Bluetooth Card.
- Do not use the unit near automatic doors, fire detection devices, or other automatically controlled devices.
- Do not use this unit in an aircraft or place where this unit may electromagnetically affect other devices.
- If the Bluetooth SDIO Card gives any electromagnetic interference to other devices, either turn off the mobile computer containing the Bluetooth Card or eject the Bluetooth Card from the mobile computer.
- Do not put the unit in your mouth.
- Do not use this unit in a bath or any other area where liquid may be spilt on the unit. Do not use this unit in an environment with high humidity or expose it to rain or mist. There is a risk of electrical shock.
- Do not expose your product to extreme high or low temperatures, or to rapidly changing temperatures.
- Do not insert any metal objects such as staples or paper clips into the unit.
- Do not touch the unit during or immediately after use in a mobile computer slot. There is a danger of burns from high heat levels. People with sensitive skin should also use caution.
- Do not place the unit in direct sunlight, in a closed car, near a heating device or any other location where the temperature may become high.
- Do not place the unit in a location where the temperature becomes extremely low.
- Do not place the unit in a location where the temperature changes rapidly.
- Do not place the unit in an extremely dusty location.
- Do not use the unit near a microwave oven or in areas where there is a risk of electrical shock, static electricity or electromagnetic interference.
- Do not use the Bluetooth Card in a place with risk of strong vibration.
- Do not use benzene or paint thinner to clean the Bluetooth Card.

APPENDIX B: SAFETY AND USAGE TIPS | 65

Restrictions

- The Bluetooth SDIO Card was not designed to be used with systems directly responsible for sustaining human life. Avoid using this product with such systems (e.g., medical equipment for life support, surgery, etc.).
- When this product is to be used in installations responsible for human safety or the maintenance of public installations (e.g., main control or safety systems in nuclear power plants, mass transportation systems, etc.), special transport, maintenance, operation, and wiring (i.e., safety systems installed in close consultation with a Socket representative) becomes necessary. Please contact an authorized Socket service center.

APPENDIX D ISP RESOURCES | 69

Appendix D Support Resources

Users' Forum

If you would like to discuss the Socket Bluetooth Connection Kit with other users, visit Socket's users' forum at: <u>www.socketforum.com</u>

Technical Support

If you have trouble installing or using the Bluetooth Card, please refer to the "Troubleshooting" section. If problems persist, feel free to contact Socket's technical support department.

IMPORTANT! Before you contact technical support, please do the following:

- 1. Make sure you have registered your product. You can register online at <u>www.socketcom.com/prodreg</u>
- 2. Have the following information ready:
 - The part number (including revision level) and serial number of your Bluetooth Card. See the diagram below.
 - The manufacturer, model number, and Windows CE version of your mobile computer
 - If applicable, the manufacturer, model number, and/or network carrier of the Bluetooth-enabled device you are trying to connect to
 - What you did to try to correct the problem

To reach Socket's technical support department:

- Visit <u>www.socketcom.com/support/contact.asp</u>
- Email techsupport@socketcom.com
- Phone 510-744-2720
- Fax 510-744-2727

Please refrain from disassembling the CompactFlash card. Disassembly of this device will void the product warranty.

70 | APPENDIX D: TECHNICAL SUPPORT

Limited Warranty

Socket Communications Incorporated (Socket) warrants this product against defects in material and workmanship, under normal use and service, for the following period from the date of purchase:

Plug-in card: Three years

Incompatibility is not a defect covered by Socket's warranty. During the warranty period, Socket will, at its option, repair or replace the defective product at no charge when furnished with proof of retail purchase, provided that you deliver the product to Socket or to an authorized Socket Service Center.

The returned product must be accompanied by a return material authorization (RMA) number issued by Socket or by Socket's Authorized Service Center. If you ship the product, you must use the original container or equivalent and you must pay the shipping charges to Socket. Socket will pay shipping charges back to any location in the contiguous United States. This warranty applies only to the original retail purchaser and is not transferable.

Socket may, at its option, replace or repair the product with new or reconditioned parts and the returned product becomes Socket's property. Socket warrants the repaired or replaced products to be free from defects in material or workmanship for ninety (90) days after the return shipping date, or for the duration of the original warranty period, whichever is greater.

This warranty does not cover the replacement of products damaged by abuse, accident, misuse or misapplication, nor as a result of service or modification other than by Socket.

SOCKET IS NOT RESPONSIBLE FOR INCIDENTAL OR CONSEQUENTIAL DAMAGES RESULTING FROM BREACH OF ANY EXPRESS OR IMPLIED WARRANTY, INCLUDING DAMAGE TO PROPERTY AND, TO THE EXTENT PERMITTED BY LAW, DAMAGES FOR PERSONAL INJURY. THIS WARRANTY IS IN LIEU OF ALL OTHER WARRANTIES INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

Some states do not allow limitation of implied warranties, or the exclusion or limitation of incidental or consequential damages, so that the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

This product may contain fully tested, recycled parts, warranted as if new.

For warranty information, phone (510) 744-2700.

Limited Software Warranty

LIMITED WARRANTY. SOCKET warrants that the original disk or CD ROM is free from defects for 90 days from the date of delivery of the SOFTWARE.

CUSTOMER REMEDIES. SOCKET'S entire liability and your exclusive remedy shall be, at SOCKET'S option, either (a) return of the price paid or (b) replacement of the SOFTWARE which does not meet SOCKET'S Limited Warranty and which is returned to SOCKET with a copy of your receipt. Any replacement SOFTWARE will be warranted for the remainder of the original warranty period or 30 days, whichever is longer. THESE REMEDIES ARE NOT AVAILABLE OUTSIDE OF THE UNITED STATES OF AMERICA.

NO OTHER WARRANTIES. SOCKET disclaims all other warranties, either express or implied, including but not limited to implied warranties of merchantability and fitness for a particular purpose, with respect to the SOFTWARE and the accompanying written materials. This limited warranty gives you specific legal rights. You may have others which vary from state to state.

NO LIABILITY FOR CONSEQUENTIAL DAMAGES. In no event shall SOCKET or its suppliers be liable for any damages whatsoever (including, without limitation, damages for loss of business profits, business interruption, loss of business information, or other pecuniary loss) arising out of the use of or inability to use the SOFTWARE, even if SOCKET has been advised of the possibility of such damages. Because some states do not allow the exclusion or limitation of liability for consequential or incidental damages, the above limitation may not apply to you.

EXPORT LAW ASSURANCES. You may not use or otherwise export or reexport the SOFTWARE except as authorized by United States law and laws of the jurisdiction in which the SOFTWARE was obtained. In particular, but without limitation, none of the SOFTWARE may be used or otherwise exported or reexported (a) into (or to a national or resident of) a United States embargoed country or (b) to anyone on the U.S. Treasury Department's list of Specially Designated Nationals or the U.S. Department of Commerce's Table of Denial Orders. By using the SOFTWARE, you represent and warrant that you are not located in, under control of, or a national or resident of any such country or on any such list.

GOVERNMENT END USERS. If the SOFTWARE is supplied to the U. S. Government, the SOFTWARE is classified as "restricted computer software" as defined in clause 52.227-19 of the FAR. The U. S. Government 's rights to the SOFTWARE are as provided in clause 52.227-19 of the FAR.

CONTROLLING LAW AND SEVERABILITY. This License shall be governed by the laws of the United States and the State of California. If for any reason a court of competent jurisdiction finds any provision, or portion thereof, to be unenforceable, the remainder of this License shall continue in full force and effect.

November 2002

Regulatory Compliance

CompactFlash Card

The Socket Bluetooth Card is designed to be compliant with the rules and regulations in locations where they are sold and will be labeled as required. This product is type approved — users are not required to obtain license or authorization before using.

Radio Frequency Interference Requirements

This device complies with part 15 of the FCC rules and Industry Canada RSS 210. Operation is subject to the following conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment is also ETS EN300 328-2, ETS EN301 489-1 and ETS EN301 489-17 compliant. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his or her own expense.

This equipment generates and radiates radio-frequency energy. To comply with FCC RF exposure compliance requirements, the following antenna installation and device operating configurations must be satisfied: (1) Users are not permitted to make changes or modify the system in any way, and (2) connecting external antennas to the card is prohibited. This device and its antenna must not be co-located or operated with any other antenna or transmitter.

To comply with Industry Canada RF exposure compliance requirements, the following antenna installation and device operating configurations must be satisfied: "The installer of this radio equipment must ensure that the antenna is located or pointed such that it does not emit RF field in excess of Health Canada limits for the general population; consult Safety Code 6, obtainable from Health Canada's website www.hc-sc.gc.ca/ehp/ehd/catalogue/rpb.htm"

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user may try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna of the radio or television.
- Increase the distance separating the equipment and the receiver.
- Connect the equipment to an outlet on a different branch circuit than that of the receiver.
- Consult the dealer or an experienced radio/TV technician for help.

The user may find the following booklet helpful: *How to Identify and Resolve Radio-TV Interference Problems*. This booklet is available from the U.S. Government Printing Office, Washington, D.C. 20402.

Canada Certification

The marking of "IC:xxxxx-yyyyyy" on the Bluetooth card means: "xxxxx-yyyyyy" is the certification number, and the term "IC' before the equipment certification number only signifies that Industry Canada technical specifications were met.

Radio Frequency Interference Requirements – Canada

This Class B digital apparatus meets the requirements of the Canadian Interference-Causing Equipment Regulations. Cet appareil numérique de la Classe B respecte toutes les exigencies du Reglement sur le Matériel Brouilleur du Canada.

NOTE: To comply with FCC and Industry Canada exposure requirements, this device is approved for operations in a user's hand when there is a distance of 20 cm or more between the device antenna and the user's body.

CE Marking & European Union Compliance

Products intended for sale within the European Union are marked with a CEMark which indicates compliance to applicable Directives and European Normes (EN), as follows. Amendments to these Directives or ENs are included: Normes (EN), as follows:

Applicable Directives:

- Radio and Telecommunications Terminal Equipment Directive 1999/5/EC
- Low Voltage Directive 73/23/EEC

Applicable Standards:

- EN 55 022 Limits and Methods of Measurement of Radio Interference Characteristics of Information Technology Equipment.
- EN 50 082-1 Electromagnetic Compatibility General Immunity Standard, Part 1: Residential, Commercial, Light Industry.
- IEC 801.2 Electromagnetic Compatibility for Industrial Process Measurement and Control Equipment, Part 2: Electrostatic Discharge Requirements.
- IEC 801.3 Electromagnetic Compatibility for Industrial Process Measurement and Control Equipment, Part 3: Radiated Electromagnetc Field Requirements.
- IEC 801.4 Electromagnetic Compatibility for Industrial Process Measurement and Control Equipment, Part 4: Electrical Fast Transients Requirements.
- EN 60 950 + Amd 1 + Amd 2 Safety of Information Technology Equipment Including Business Equipment.

SDIO Card

The Socket Bluetooth Card is designed to be compliant with the rules and regulations in locations where they are sold and will be labeled as required. This product is type approved — users are not required to obtain license or authorization before using.

This product has been certified as conforming to technological standards. Therefore, the following actions are punishable by law:

- Disassembly or modification of this product.
- Removal of identification labels on the back of this product.

The frequency used by this product is also used by industry, scientific and medical devices, such as microwave ovens, as well as wireless detectors for motion detectors, such as those requiring licenses used on manufacturing lines or similar radio transmitters. (all these wireless devices will be called "other wireless transmitters" below).

- 1. Before using this system, confirm that other wireless transmitters are not in use nearby.
- 2. In the unlikely event that there is electronic interference between this system and other wireless transmitters, quickly change the operating frequency of this system, change the location of operation, or stop operating the unit (cease signal transmission).
- 3. If other electrical interference or related problems should occur, contact Socket technical support at +1-510-744-2720.

Radio Frequency Interference Requirements (FCC)

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

CAUTION: Change or modification not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Radio Frequency Exposure Compliance:

In order for this device to comply with FCC rules, under the provision of Part 15.247(b)(c), it must operate in a manner that ensures that the public is not exposed to radio frequency energy levels in excess of the Maximum Permissible Exposure (MPE) limits.

It is recommended that the antenna of this device be placed at least 20 cm or more from its user and any nearby persons, during continuous and extended data transmission. The users of this device should ensure that the operation of this device is in compliance with these provisions.

Radio Frequency Interference Requirements (Industry Canada)

To prevent radio interference to the licensed service, this device is intended to be operated indoors and away from windows to provide maximum shielding. Equipment that is installed outdoors is subject to licensing.

This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference, in which case the user will be required to correct the interference at his or her own expense.

Europe R&TTE Directive

This equipment complies with the R&TTE directive 1999/5/EC and has been provided with the CE mark accordingly.

Note that the radio frequency band used by this equipment has not been harmonized in all the EU.

Applicable area (nation):

Austria, Belgium, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Luxembourg, Norway, Portugal, Spain, Sweden, Switzerland, The Netherlands, United Kingdom
