Magazine-style photos made easy.

The solid and dependable α 3000 feels good in your hands and brings out the beauty of every memorable scene. You'll enjoy stunning image quality thanks to a large Exmor APS HD CMOS sensor with 20.1 effective megapixel resolution* and ISO 16000 sensitivity. Confident, worry-free shooting is ensured by a comfortable grip and clear, easy-to-view Tru-Finder electronic viewfinder. Moreover, interchangeable-lens freedom combines with system expandability and numerous advanced features like Auto Object Framing to broaden your creative horizons. Whether capturing still images or movies, the α 3000 is the right choice for shooting pleasure. *Approx.

X 3000

E-mount

- Exmor[®] APS HD CMOS sensor with approx. 20.1 effective megapixels and ISO 16000 sensitivity
- Tru-Finder and comfortable, dependable grip
- Multi Interface Shoe and Multi Terminal
- Creative functions such as Picture Effect, Auto Object Framing and more

E 18-55mm F3.5-5.6 OSS (SEL1855), 1/320 sec., F5.6, ISO 100, Auto white balance

Sharp, clean results bursting with color. Sony technology helps capture the magic of any moment.

E 18-55mm F3.5-5.6 OSS (SEL1855), 1/160 sec., F11, ISO 100, Auto white balance

Two keys to outstanding photos and movies

You won't see them but they are there: Sony's 20.1 megapixel* Exmor[™] APS HD CMOS sensor and blazing-fast BIONZ[™] image processing engine. Every scene is captured beautifully, from corner to corner, with fine details and rich tonal gradations. The sensor's large size delivers high sensitivity, attractive defocusing effects, and low noise in wide-ranging shooting situations including dimly lit environments. Impressive 20.1-effectivemegapixel resolution and advanced BIONZ image processing also bring every detail to life.

Sony is the world's No. 1 manufacturer of image sensors for digital cameras and video recorders (based on Sony research from April 2012 to March 2013 that shows Sony has a 50% market share)

Large image sensor The APS-C size sensor on the α 3000 is more than 13x larger than the 1/2.3-size sensors commonly found on compact digital cameras.

E 18-55mm F3.5-5.6 OSS (SEL1855), 1/40 sec., F5.6, ISO 3200, Auto white balance

Wide-ranging sensitivity from ISO 100 to 16000

Even in dim lighting, you can shoot beautiful photos with natural tonal gradations and low noise — without using a flash. Auto ISO provides outstanding results in most lighting situations and you can select settings manually to suit particular occasions. Excellent low-light performance is made possible by cutting-edge features like the same area-specific noise reduction as found on the α 99.

Superior operability makes shooting a breeze. Enjoy intuitive operation and confident, worry-free shooting.

Easy-to-view Tru-Finder electronic viewfinder

Tru-Finder.

View every scene clearly with the built-in viewfinder, which even shows the effects of exposure and white balance settings so you can accurately check how the final photo will look. Features include 100% frame coverage and various shooting information displays.

Multi Interface Shoe expands your shooting options

Tap into a wide variety of optional accessories with the Multi Interface Shoe. The α 3000 system includes external flash units, video lights, adaptors and more — everything you need when it's time to expand.

Convenient mode dial

The mode dial lets you quickly change shooting modes and always be confident about which shooting mode is currently in use. By providing intuitive access to P/A/S/M modes, Superior Auto mode and more, it simplifies operation so you can concentrate on the action.

Secure, dependable grip

The grip is designed so you can hold the camera securely, shoot with confidence and enjoy worry-free shooting. Sony even conducted market research to determine the optimal grip size and shape. The result is a comfortable grip that fits snugly in the palm of your hand and is long enough to grab ahold of securely with all your fingers.

Built-in flash* for a splash of light

Brighten the scene with this convenient addition. Combined with the high sensitivity of ISO 16000, you'll never miss a shot even when the lights go down. It also produces alluring catch lights for daylight portraits.

* GN4; ISO 100·m

Precious moments you'll cherish forever. Produce stunning photos and movies that always impress.

Beautifully composed photos with Auto Object Framing

Give your photos a professional look with Auto Object Framing. This savvy function analyzes portraits, close-ups or images of moving subjects then crops them after you take the shot to produce photos with maximum appeal. Featuring advancements like exceptional two-person portrait capabilities along with Face Detection and Tracking Focus, Auto Object Framing not only turns ordinary photos into stunning compositions but does so effortlessly, automatically recognizing the scene then cropping accordingly. And thanks to Sony's By Pixel Super Resolution Technology and high-resolution Exmor sensor, images can be radically cropped without marked loss of image quality.

Notes: Cropping results vary depending on shooting situations. • The original image is saved along with the cropped version.

Auto Tracking Framing

Auto Macro Framing

Auto Portrait Framing

Clear Image Zoom

Clear Image Zoom

Conventional digital zoom

50 mm

100 mm equivalent

If you can't seem to get close enough to the subject, activate Clear Image Zoom. This extends the reach of your lens up to 2x without markedly degrading image quality. Clear Image Zoom employs Sony's By Pixel Super Resolution Technology to achieve amazingly sharp zoom shots without a telephoto lens. And by combining it with α 3000's Digital Zoom and Smart Zoom*, you can increase magnification up to 8x over the lens' maximum focal length. What's more, Clear Image Zoom supports both photos and movies so you'll always have plenty of reach for distant subjects.

* Smart Zoom does not support movies.

Fabulous Full HD movies at the press of a button

Experience the magnificence of Full HD movies in AVCHD. Just press the MOVIE button and start shooting. Support for 60i* gives your movies a lifelike feel with more natural movement while aspiring moviemakers can select 24p* to re-create the look of traditional cinema. α 3000's responsive autofocus keeps subjects

in sharp focus, allowing you to record even moving subjects and still be assured of excellent results. The built-in microphone delivers superior audio quality, and Digital Zoom can be used to extend the lens' maximum magnification while recording. * 1080 60i/1080 devices

Not all images were taken with the lpha3000.

Creative versatility for that 'Wow' look. Take your photography to new heights of artistry.

Picture Effect – Your key to an exciting photographic adventure

Every image is a potential work of art with Picture Effect — in-camera control for turning mundane shots into little gems. α 3000 includes 15 effects that can be applied to photos or movies, giving you the means to vastly expand your artistic repertoire. The ability to view effects in real-time on the LCD screen or viewfinder* before taking the shot lets you experiment with different looks until you are satisfied with the result.

* The following modes are not displayed in real-time and cannot be applied to movies: HDR Painting, Rich-tone Monochrome, Soft Focus and Miniature.

HDR Painting

Partial Color (Green)

Soft High-key

Posterization (Color)

Photo Creativity - Fine tuning the look of photos and movies

Background Defocus control

Brightness control

Color control

 α 3000 provides easy access to most Picture Effect settings as well as controls for Background Defocus, Brightness, Color and Vividness. Just activate Photo Creativity, choose the appropriate item then adjust while viewing in real-time on the LCD screen or viewfinder. The ability to combine settings offers nearly unlimited creative control, and lets you compensate for tricky lighting.

Superior Auto mode — Serious point-and-shoot simplicity

Use Superior Auto mode to shoot photos and movies with the ease of a compact digital camera. In this mode, the camera recognizes the current shooting environment then adjusts settings for optimal results. Superior Auto also includes Auto HDR and Handheld Twilight modes, both of which employ image compositing technology to handle difficult lighting by recording multiple images at high speed then compositing them to produce the final photo.

Macro mode*

Not all images were taken with the α 3000. 11

* Does not support movies.

The camera that gives you more. Advanced features, a new level of ease, and loads of fun.

Added functionality for your shooting convenience

Soft Skin Effect

Soften skin and tame unsightly wrinkles and blemishes. The pros' choice when shooting portraits to make people look their best. Adjustable in three levels.

On

Sweep Panorama

Capture a dramatic landscape or cityscape. Just swing the camera when shooting then play back on the LCD screen.

USB charging

Connect α 3000 to a PC or AC outlet via the bundled micro USB cable to charge

the battery without removing it from the camera.

Peaking function

Quickly confirm focus in the composition. A highlight — adjustable over three settings each for sensitivity level and color — appears over areas that are focused.

Face Detection / Smile Shutter

hutter [e]

Set α 3000 to recognize faces and smiles. Face Detection locates up to eight faces in a composition then adjusts exposure, white balance and other settings based on these faces. Smile Shutter — adjustable in three levels — automatically takes a shot when smiles in the scene are at their brightest.

Anti Motion Blur / Hand-held Twilight modes (Scene Selection)

Employing Sony image compositing technology, these two modes deliver superb photos with reduced noise and blur when shooting handheld in low-light environments. Anti Motion Blur mode is especially useful for decreasing blur caused by camera shake and subject movement, while Hand-held Twilight mode balances exposure between the main subject and background for pleasing nighttime photos.

Auto HDR (High Dynamic Range) mode / D-range Optimizer (DRO)

Decrease contrast in scenes with extremely dark and light areas. Well suited for stationary subjects, Auto HDR mode combines three images — one each for highlights, mid-tones and shadows — to produce one photo that closely resembles the scene as you saw it. DRO takes only one shot, but can be used for lowering contrast in photos with moving subjects and when using continuous shooting.

Creative Style

Tailor the look of photos and movies before shooting. Choose from one of six settings — Standard, Vivid, Portrait, Landscape, Sunset or Black & White — depending on the scene or your creative intent.

Speed Priority Continuous mode

Freeze fast-moving subjects by shooting at up to 3.5 fps*. This is the ideal solution for photographing sports, children at play or other action.

* In Speed Priority Continuous mode. Continuous speed varies depending on shooting conditions and memory cards. Focus and exposure are locked at the first shot.

More ways to enjoy photos and movies. Software and online sharing for PCs, tablets, smartphones and PlayStation[®]3.

PlayMemories Home™

Free, easy-to-use image management software installs onto Windows PCs for Sony Digital Camera users. Download photos and movies onto your computer then view, organize, edit, retouch, print, burn to disk, share or upload to social networking websites*. * Cannot be used to retouch movies.

PlayMemories Studio™

Turn your PlayStation®3 into a creative playground. Use familiar controllers to edit, organize, view and share photos and movies. PlayMemories Studio™ also plays photo slideshows with sound.

PlayMemories

PlayMemories Online[™]

A fun image sharing service for both photos and movies. Uploaded images can be viewed on multiple devices, and quality photo books can easily be created from the images.

TRILUMINOS™ Color.

A breathtaking way to relive your fondest memories.

 α 3000 supports Sony's "TRILUMINOS Color," allowing you to view photos and movies in rich, natural colors on any TV equipped with a "TRILUMINOS Display." The expanded color gamut lets you immerse yourself once again in those unforgettably colorful moments, from the complex shades in a shimmering blue sky to the natural tones of a rosy complexion.

A complete system for any creative challenge. Choose from a wide range of Sony lenses and accessories.
