Model Name Using Similar Mechanism	MZ-E90
MD Mechanism Type	MT-MZE60-169
Optical Pick-up Mechanism Type	LCX-2E

### SPECIFICATIONS

#### System

Audio playing system  
MiniDisc digital audio system  
Laser diode properties  
Material: GaAlAs  
Wavelength:  $\lambda = 790 \text{ nm}$   
Emission duration: continuous  
Laser output: less than  $44.6 \mu\text{W}$   
(This output is the value measured at a distance of 200 mm from the objective lens surface on the optical pick-up block with 7 mm aperture.)  
Revolutions  
800 rpm to 1,800 rpm  
Error correction  
Advanced Cross Interleave Reed Solomon Code (ACIRC)  
Sampling frequency  
44.1 kHz  
Coding  
Adaptive TRansform Acoustic Coding (ATRAC)  
Modulation system  
EFM (Eight to Fourteen Modulation)  
Number of channels  
2 stereo channels  
1 monaural channel  
Frequency response  
20 to 20,000 Hz  $\pm 3 \text{ dB}$   
Wow and Flutter  
Below measurable limit  
Outputs  
Headphones: stereo mini-jack, maximum output level 5 mW + 5 mW, load impedance 16 ohms

#### General

Power requirements  
One LR6 (size AA) battery (not supplied)  
Battery operation time  
You can check the battery condition with the battery indication which is displayed while using the player.  
 Battery power decreasing  
↓  
 Weak battery  
↓  
 The battery has gone out. "LOW BATT" flashes in the display on the remote control, and the power goes off.

#### Battery Life

Approximately 12 hours of playback can be expected with one LR6 (size AA) alkaline battery (not supplied).

#### Note

The battery life may shorter depending on operating conditions and temperature of the location.

– Continued on next page –

## PORTABLE MINIDISC PLAYER

# SONY®

#### Dimensions

Approx. 81 × 25 × 74 mm (w/h/d)  
(3 1/4 × 1 × 3 in.) not including projecting  
parts and controls

#### Mass

Approx. 95 g (3.4 oz.) the player only  
Approx. 136 g (4.8 oz.) incl. a mastered MD  
and a LR6 (size AA) alkaline battery

#### Supplied accessories

Headphones with a remote control (1)  
Carrying pouch (1)

Design and specifications are subject to change  
without notice.

This MiniDisc player is classified as a CLASS 1 LASER product.

The CLASS 1 LASER PRODUCT label is located on the bottom exterior.

IN NO EVENT SHALL SELLER BE  
LIABLE FOR ANY DIRECT,  
INCIDENTAL OR CONSEQUENTIAL  
DAMAGES OF ANY NATURE, OR  
LOSSES OR EXPENSES RESULTING  
FROM ANY DEFECTIVE PRODUCT  
OR THE USE OF ANY PRODUCT.

“MD WALKMAN” is a trademark of Sony Corporation.

#### CAUTION

Use of controls or adjustments or performance of procedures other than those specified herein may result in hazardous radiation exposure.

#### Precautions for Laser Diode Emission Check

When checking the emission of the laser diode during adjustments, never view directly downwards as this may lead to blindness.

#### Precautions for Using Optical Pick-up (LCX-2E)

As the laser diode inside the optical pick-up damages by static electricity easily, solder the laser tap of the Optical pick-up flexible board when handling. Also take the necessary measures to prevent damages by static electricity. Handle the Optical pick-up flexible board with care as it breaks easily.

**Optical Pick-up flexible board**

#### Flexible Circuit Board Repairing

- Keep the temperature of the soldering iron around 270°C during repairing.
- Do not touch the soldering iron on the same conductor of the circuit board (within 3 times).
- Be careful not to apply force on the conductor when soldering or unsoldering.

#### Notes on chip component replacement

- Never reuse a disconnected chip component.
- Notice that the minus side of a tantalum capacitor may be damaged by heat.

#### SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY MARK  $\triangle$  OR DOTTED LINE WITH MARK  $\triangle$  ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

#### ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!!

LES COMPOSANTS IDENTIFIÉS PAR UNE MARQUE  $\triangle$  SUR LES DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPOSANTS QUE PAR DES PIÈCES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPLÉMENTS PUBLIÉS PAR SONY.

## SECTION 1 SERVICING NOTE

1) When repairing this device with the power on, if you remove the main board or open the upper panel assy, this device stops working.

In this case, you can work without the device stopping by fastening the hook of the OPEN/CLOSE switch (MAIN board S809) with tape.

2) This set is designed to perform automatic adjustment for each adjustment and write its value to EEPROM. Therefore, when EEPROM (MAIN board IC802) has been replaced in service, be sure to perform automatic adjustment and write resultant values to the new EEPROM.

Refer to section 4 Test Mode (page 10) for details.

This section is extracted from instruction manual.

# Playing an MD right away!

Stereo or monaural playback is automatically selected, depending on the sound source.

## 1 Insert the dry battery.

Use one LR6 (size AA) dry battery (not supplied) to power the player. For longer playback, an alkaline battery is recommended.

- ① Slide and open the battery compartment as shown in the illustration.
- ② Insert the battery.

Make sure the + and - terminals are correctly oriented.

### When to replace the battery

You can check the battery condition with the battery indication which is displayed while using the player.

- Battery power decreasing
- Weak battery
- The battery has gone out. "LOW BATT" flashes in the display on the remote control, and the power goes off.

### Battery life

Approximately 12 hours of playback can be expected with one LR6 (size AA) alkaline battery (not supplied).

### Note

The battery life may shorter depending on operating conditions and temperature of the location.

## 2 Insert an MD.

- ① Press OPEN.
- ② Insert an MD and press the lid to close.

With label facing front, insert disc in direction of the arrow.

### Other disc operation

To	Do this (Beeps in the headphones)
Pause	Press <b>II</b> on the remote control. (Continuous short beeps) Press <b>II</b> on the remote control again to resume play.*1
Find the beginning of the current track	Press <b>II</b> once. Press the control towards <b>II</b> on the remote control. (Three short beeps)
Find the beginning of the previous tracks	Press <b>II</b> repeatedly. Press the control towards <b>II</b> on the remote control repeatedly. (Continuous three short beeps)
Find the beginning of the next track	Press <b>III</b> once. Press the control towards <b>III</b> on the remote control. (Two short beeps)
Go backwards while playing*1	Hold down <b>II</b> . Press and hold the control towards <b>II</b> on the remote control.
Go forward while playing*1	Hold down <b>III</b> . Press and hold the control towards <b>III</b> on the remote control.
Remove the MD	Press <b>■</b> , and then press OPEN.*2

### If playback does not start

Make sure the player is not locked. For details, see "To lock the controls (HOLD)".

### Display window while playing back

For details, see "To know the track name and time".

Track name\*3 or elapsed time of the track being played

Track number

### Tips

- The OPERATE lamp on the player lights up during playback. When you press **■**, the lamp goes off.
- The display on the remote control disappears after a while after you have pressed **■**.

### Note

Do not press OPEN during playback. If you do, the lid opens and playback stops.

### When using optional headphones

Use headphones with a stereo-miniplug. You cannot use headphones with a microplug.

### 3 Play an MD.

- ① **Connect the headphones to the remote control.**  
Plug it in firmly all the way.
- ② **Connect the headphones with the remote control to the  jack.**
- ③ **Press  or  (or press the control towards /  or  on the remote control).**  
The OPERATE lamp on the player lights up and the player starts to play the first track. When using the remote control, a short beep sounds in the headphones.
- ④ **Press VOL +/- to adjust the volume.**  
The volume indicator appears on the remote control to allow you to check the volume.

#### To stop play, press .

The OPERATE lamp on the player goes off. The display on the remote control disappears after a while. When using the remote control, a long beep sounds in the headphones.

- \*1 When you press  or  on the player during pause () , the player resumes playback.  
If you hold down  or  on the player (or press and hold the control towards  or  on the remote control) during pause () , you can fast forward/rewind without listening to the playback sound.
- \*2 Once you open the lid, the point to start playback will change to the beginning of the first track.
- \*3 Appears only with MDs that have been electronically labeled.

## SECTION 3 DISASSEMBLY

**Note :** This set can be disassemble according to the following sequence.

Set → Panel Assy, Upper → Holder Assy → Mechanism Deck → Main Board  
↓  
Service Assy, OP

**Note :** Follow the disassembly procedure in the numerical order given.

### 3-1. PANEL ASSY, UPPER

### 3-2. HOLDER ASSY

### 3-3. MECHANISM DECK

### 3-4. MAIN BOARD

**Note :** When installing, fit the knobs (HOLD, MB) and the switches (S806, 807, 808).

### 3-7. SERVICE ASSY, OP

# SECTION 4 TEST MODE

## 4-1. GENERAL

- When entered in the TEST MODE, this set provides the Overall Adjustment mode which allows CD and MO discs to be automatically adjusted. In the Overall Adjustment mode, the system discriminates between CD and MO discs, performs adjustments in sequence automatically, and displays the faulty location if any fault is found. In the Manual mode, selected adjustments can be performed automatically.
- The attached remote control is used to operate the TEST MODE. Unless otherwise specified in the text, the key means that on the remote control.

## 4-2. SETTING THE TEST MODE

### 4-2-1. How to set the TEST MODE

To set the TEST MODE, two methods are available.

- ① Solder bridge and short TAP801 (TEST) on the main board. Then turn on the power.

#### 【MAIN BOARD】(SIDE B)

- ② In the normal mode, operate the keys on the set and those on the remote control as specified below:

Turn on HOLD switch on the set. Holding down ■ (STOP) key on the set, press the keys on the remote control in the following sequence:

### 4-2-2. Operations when the TEST MODE is set

When the TEST MODE is entered, the system switches to the display check mode within the TEST MODE. From this mode, the other Test modes can be accessed.

When the TEST MODE is set, the LCD repeats a cycle of the following displays:

Remote control LCD

- Press and hold down **PLAY MODE** to hold the current display while the key is being pressed.

### 4-2-3. How to release the TEST MODE

When method ① was used:

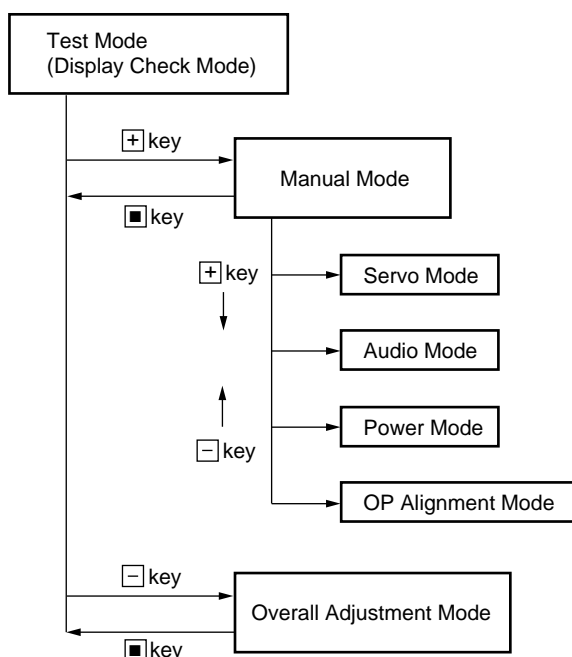

Turn off the power and open the solder bridge on TAP801 on the main board.

Note: The solder should be removed clean. The remaining solder may make a short with the chassis and other part.

When method ② was used:

Turn off the power.

## 4-3. TEST MODE STRUCTURE

## 4-4. MANUAL MODE

### 4-4-1. Outline of the function

The Manual mode is designed to perform adjustments and operational checks on the set's operation according to each individual function.

Usually, no adjustments are made in this mode.

However, the Manual mode is used to clear the memory before performing automatic adjustments in the Overall Adjustment mode.

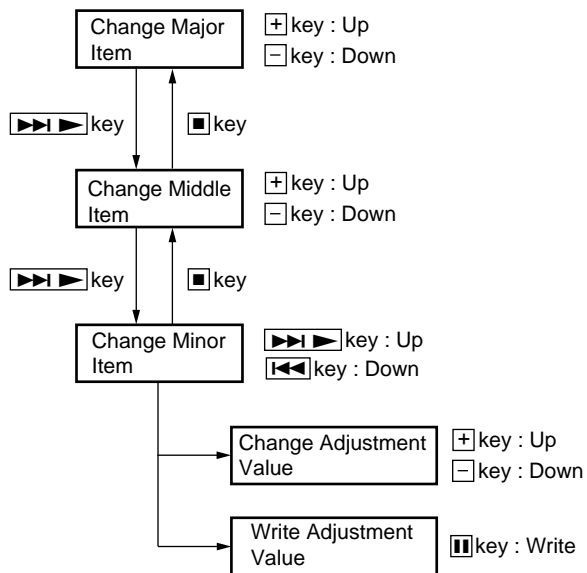

### 4-4-2. How to set the Manual mode

1. Set the TEST MODE and press **[+]** key to set the Manual mode.

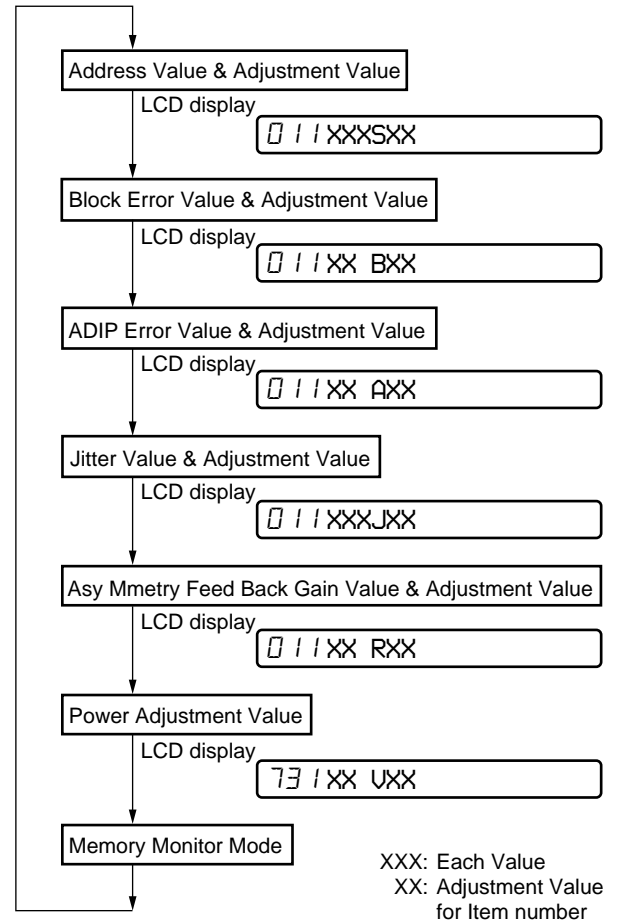

Remote control LCD display

2. Each test item is assigned with a three-digit item number. The third digit stands for a major item, the second digit for a middle item, and the first digit for a minor item.

3. During each test mode, the display is changed from one to another each time **[DISPLAY]** key is pressed.

Note: In the Power mode, the power adjustment value is only displayed.

4. During each test, press and hold down **[▶▶▶]** key or **[◀◀◀]** key for a while to move the optical pickup on the sled outer or inner perimeter.
5. To terminate the Manual mode and return to the TEST MODE, press **[■]** key.

## 4-5. OVERALL ADJUSTMENT MODE

### 4-5-1. Outline of the function

This mode is designed to adjust the servo system automatically by going through all the adjustment items.

Usually, this mode is used to perform automatic adjustments when servicing the set.

For further information, refer to section 5. ELECTRICALADJUSTMENTS (page 12).

# SECTION 5

## ELECTRICAL ADJUSTMENTS

### 5-1. GENERAL

In this set, CD and MO discs can be automatically adjusted by setting the Overall Adjustment mode within the TEST MODE. Before performing these automatic adjustments, it is necessary to clear the memory and adjust the power in the Manual mode.

### 5-2. NOTES FOR ADJUSTMENT

#### 5-2-1. Jigs

- CD disc TDYS-1 (part code: 4-963-646-01)
- MO disc PTDM-1 (part code: J-2501-054-A)  
or commercially available MO disc (recorded)
- Digital voltmeter

#### 5-2-2. Adjustment sequence

The adjustments should be always performed in the following sequence:

- |   |                             |   |                         |
|---|-----------------------------|---|-------------------------|
| ① | Reset NV (Clear the memory) | } | Manual mode             |
| ↓ |                             |   |                         |
| ② | Overall CD adjustments      | } | Overall adjustment mode |
| ↓ |                             |   |                         |
| ③ | Overall MO adjustments      |   |                         |

#### 5-2-3. Power

A stabilized power supply is used to supply 1.5 V DC to the battery terminal. Otherwise, an AA alkali battery with the remaining level of 1.5 V DC or more is used. (In this case, make sure that the battery indication on the remote control is "FULL")

### 5-3. RESET NV

#### 5-3-1. How to reset NV

1. Set the TEST MODE. (See page 10)
2. Set the Manual mode and set the item No. 021, Reset NV.

LCD display

3. Press **II** key on the remote control.

LCD display

Note: CC is blink.

4. Press **II** key on the remote control again.

LCD display

Note: CC blink. → Finish the CC light on.

5. Press **■** key to terminate the Manual mode and return to the TEST MODE.

### 5-4. OVERALL ADJUSTMENT MODE

#### 5-4-1. Overall adjustment mode structure

Note: The overall adjustments should be always performed in the sequence of CD → MD adjustments.

#### 5-4-2. Overall CD and MO adjustment method

1. Set the TEST MODE (see page 10) and press **□** key to set the Overall Adjustment mode.

LCD display

2. Insert CD disc in the set, and press **◀◀** key to set the Overall CD Adjustment mode.

Automatic adjustments are made.

LCD display

XXX: Item No. for which an adjustment is being executed.

3. If NG in the overall CD adjustments, return to Reset NV and perform the adjustment again.

LCD display

XXX: NG item No.

4. If OK through the overall CD adjustments, then perform overall MO adjustments.

LCD display

5. Insert MO disc in the set, and press **▶▶** key to set the Overall MO Adjustment mode. Automatic adjustments are made.

LCD display

XXX: Item No. for which an adjustment is being executed.

6. If NG in the overall MO adjustments, return to Reset NV and perform the adjustment again.

LCD display

XXX NGXX

XXX: NG item No.

7. If OK through the overall MO adjustments, press  key to return to the TEST MODE and terminate the Overall Adjustment mode.

LCD display

XXX End-OK

### 5-4-3. Overall CD and MO adjustment items

#### 1. Overall CD adjustment items

Item No.	Contents
312	CD electrical offset adjustment
313	
314	
321	CD TE gain adjustment
328	CD TWPP gain adjustment
323	CD TE offset adjustment
336	CD ABCD gain adjustment
344	CD focus gain adjustment
345	CD tracking gain adjustment
521	CD two-axis sensitivity adjustment
522	
341	CD focus bias adjustment

#### 2. Overall MO adjustment items

Item No.	Contents
112	MO electrical offset adjustment
113	
114	
221	Low reflective CD TE gain adjustment
223	Low reflective CD TE offset adjustment
236	Low reflective CD ABCD gain adjustment
244	Low reflective CD focus gain adjustment
245	Low reflective CD tracking gain adjustment
121	MO TE gain adjustment
122	MO TE offset adjustment
144	MO focus gain adjustment
145	MO tracking gain adjustment
131	MO TWPP offset adjustment
132

134	MO TWPP gain adjustment
141	MO focus bias adjustment

## SECTION 6 DIAGRAMS

### 6-1. IC PIN DESCRIPTION

#### 6-1-1. IC801 RU6915MF-0006 (SYSTEM CONTROL)

Pin No.	Pin Name	I/O	Description
1	S MON	I	S-MON monitor signal input from the $\mu$ PD63732GC (IC601)
2	UREG MON	I	Un-regulator power supply voltage monitor input terminal (A/D input)
3	NC	—	Not used. (open)
4	VREF	I	Input terminal for power supply voltage adjustment reference voltage (+2 V) (A/D input)
5	DVDD MON	I	Not used. (Fixed at "H".)
6	NC	—	Not used. (open)
7	RMC KEY	I	Remote commander with headphone key input terminal (A/D input)
8	SET KEY	I	Set key input terminal (A/D input) S801 to S804 (■, ►►/►►, ◀◀, +/- VOLUME keys input)
9	MRST	I	System reset signal input "L": reset For several hundreds msec. after the power supply rises, "L" is input, then it change to "H"
10	AVDD	—	Power supply pin (+2.4 V or +2.8 V)
11	AVSS	—	Ground terminal (for A/D converter)
12 – 15	TYPE0 – 3	I	Setting terminal for model discrimination (bit 0 to bit 3) Fixed at "L" in this set
16	XOUT	O	Main system clock output terminal (16.9344 MHz)
17	XIN	I	Main system clock input terminal (16.9344 MHz)
18	SX OUT	O	Sub system clock output terminal Not used. (open)
19	SXIN	I	Sub system clock input terminal Not used. (fixed at "L")
20	COUT	O	Not used. (open)
21	VDD	—	Power supply terminal (+2 V) (digital system)
22	VSS	—	Ground terminal (digital system)
23	HOLD SW	I	HOLD switch (S808) input terminal "L": hold off, "H": hold on
24	VG CON	O	Power supply control signal output to each ICs
25	XCLK	O	System clock supply output terminal (16.934 MHz) to the $\mu$ PD63732GC (IC601) or AK4352 (IC302)
26	KEY EN	O	Ground control output terminal of remote control
27	AVLS SW	I	AVLS switch (S803) input terminal "L": LIMIT "H": NORM
28	DSP SINT	I	Interruption status input from the $\mu$ PD63732GC (IC601)
29, 30	DBB0, DBB1	I	DIGITAL MEGABASS switch (S806) input terminal *1
31	OPR LED	O	OPERATE LED (D802) drive signal output terminal "H": LED on
32	OPEN CLS SW	I	Upper panel open/close detect switch (S801) input terminal "L": upper panel close, "H" : upper panel open
33	$\overline{\text{XWAKE RMC}}$	I	Wake up signal input from remote control key
34	$\overline{\text{XWAKE SET}}$	I	Wake up signal input from this set key
35	SBUS CLK	O	SSB serial clock signal output terminal
36	SBUS DATA	I/O	SSB serial data input/output terminal
37	$\overline{\text{XRST}}$	O	Reset signal output terminal to each ICs
38	SLD 1 MON	I	Sled servo timing signal input from the TLC372CPW (IC552)
39	SLD 2 MON	I	Sled servo timing signal input from the TLC372CPW (IC552)
40	VDD	—	Power supply terminal
41	VPP	—	Test terminal (fixed at "L")
42	CLV VCON	O	Spindle servo drive voltage control signal output to the BD6602KUT (IC551) or $\mu$ PD63732GC (IC601)
43	APC REF	O	Laser power control signal output terminal
44	RM VCON	O	Remote control power voltage select signal output to power circuit "L":2.4 V, "H": 2.8 V
45	CLV U MON	I	Spindle servo (U) timing signal input from the BD6602KUT (IC551)
46	CLV V MON	I	Spindle servo (V) timing signal input from the BD6602KUT (IC551)
47	CLV W MON	I	Spindle servo (W) timing signal input from the BD6602KUT (IC551)
48	CLV U CON	I	Spindle servo (U) drive signal input from the BD6602KUT (IC551)
49	CLV V CON	I	Spindle servo (V) drive signal input from the BD6602KUT (IC551)

Pin No.	Pin Name	I/O	Description
50	CLV W CON	I	Spindle servo (W) drive signal input from the BD6602KUT (IC551)
51	DRV VCON	O	Driver output control terminal to the DB6602KUT (IC551) "L": prohibited, "H": permission
52	NC	—	Not used. (open)
53	SLED 1R CON	O	Sled motor control signal output to the BD6602KUT (IC551)
54	SLED 1F CON	O	Sled motor control signal output to the BD6602KUT (IC551)
55	SLED 2R CON	O	Sled motor control signal output to the BD6602KUT (IC551)
56	SLED 2F CON	O	Sled motor control signal output to the BD6602KUT (IC551)
57 – 60	NC	—	Not used. (open)
61	VSS	—	Ground terminal (digital system)
62	NC	—	Not used. (open)
63	RMC DTCK	I/O	TSB serial communication data input/output terminal for remote commander with headphone
64	S0	O	PD-IC mode select signal output
65	S1	O	PD-IC mode select signal output
66, 67	NC	—	Not used. (open)
68	SLD VCON	O	Sled servo control PWM signal output to the BD6602KUT (IC551)
69	NC	—	Not used. (open)
70	HP MUTE	O	Muting on/off control signal output to the headphone amplifier (IC301) "H": muting on
71	HP STBY	O	Standby on/off control signal output to the headphone amplifier (IC301) "L": standby mode, "H": amplifier on
72	NC	—	Not used. (open)
73	NV DI	I	Serial data input from the EEPROM (IC802)
74	NV DO	O	Serial data output from the EEPROM (IC802)
75	NV CLK	O	Serial clock signal output to the EEPROM (IC802)
76	NV CS1	O	Chip select signal output to the EEPROM (IC802)
77	ADJUST	I	Test mode institution input terminal "L": test mode (Normally, fixed at "H")
78	$\overline{\text{XREBOOT}}$	O	System reboot control output terminal
79	VDD	—	Power supply terminal (+2 V) (digital system)
80	VSS	—	Ground terminal (digital system)

6-3-2. SCHEMATIC DIAGRAM — MAIN BOARD (1/4) — • Refer to page 33 for IC Block Diagrams.

**Note:**  
 • All capacitors are in  $\mu\text{F}$  unless otherwise noted. pF:  $\mu\text{F}$  50 WV or less are not indicated except for electrolytics and tantalums.  
 • All resistors are in  $\Omega$  and  $1/4\text{W}$  or less unless otherwise specified.

**Note:**  
 The components identified by mark  $\Delta$  or dotted line with mark  $\Delta$  are critical for safety. Replace only with part number specified.

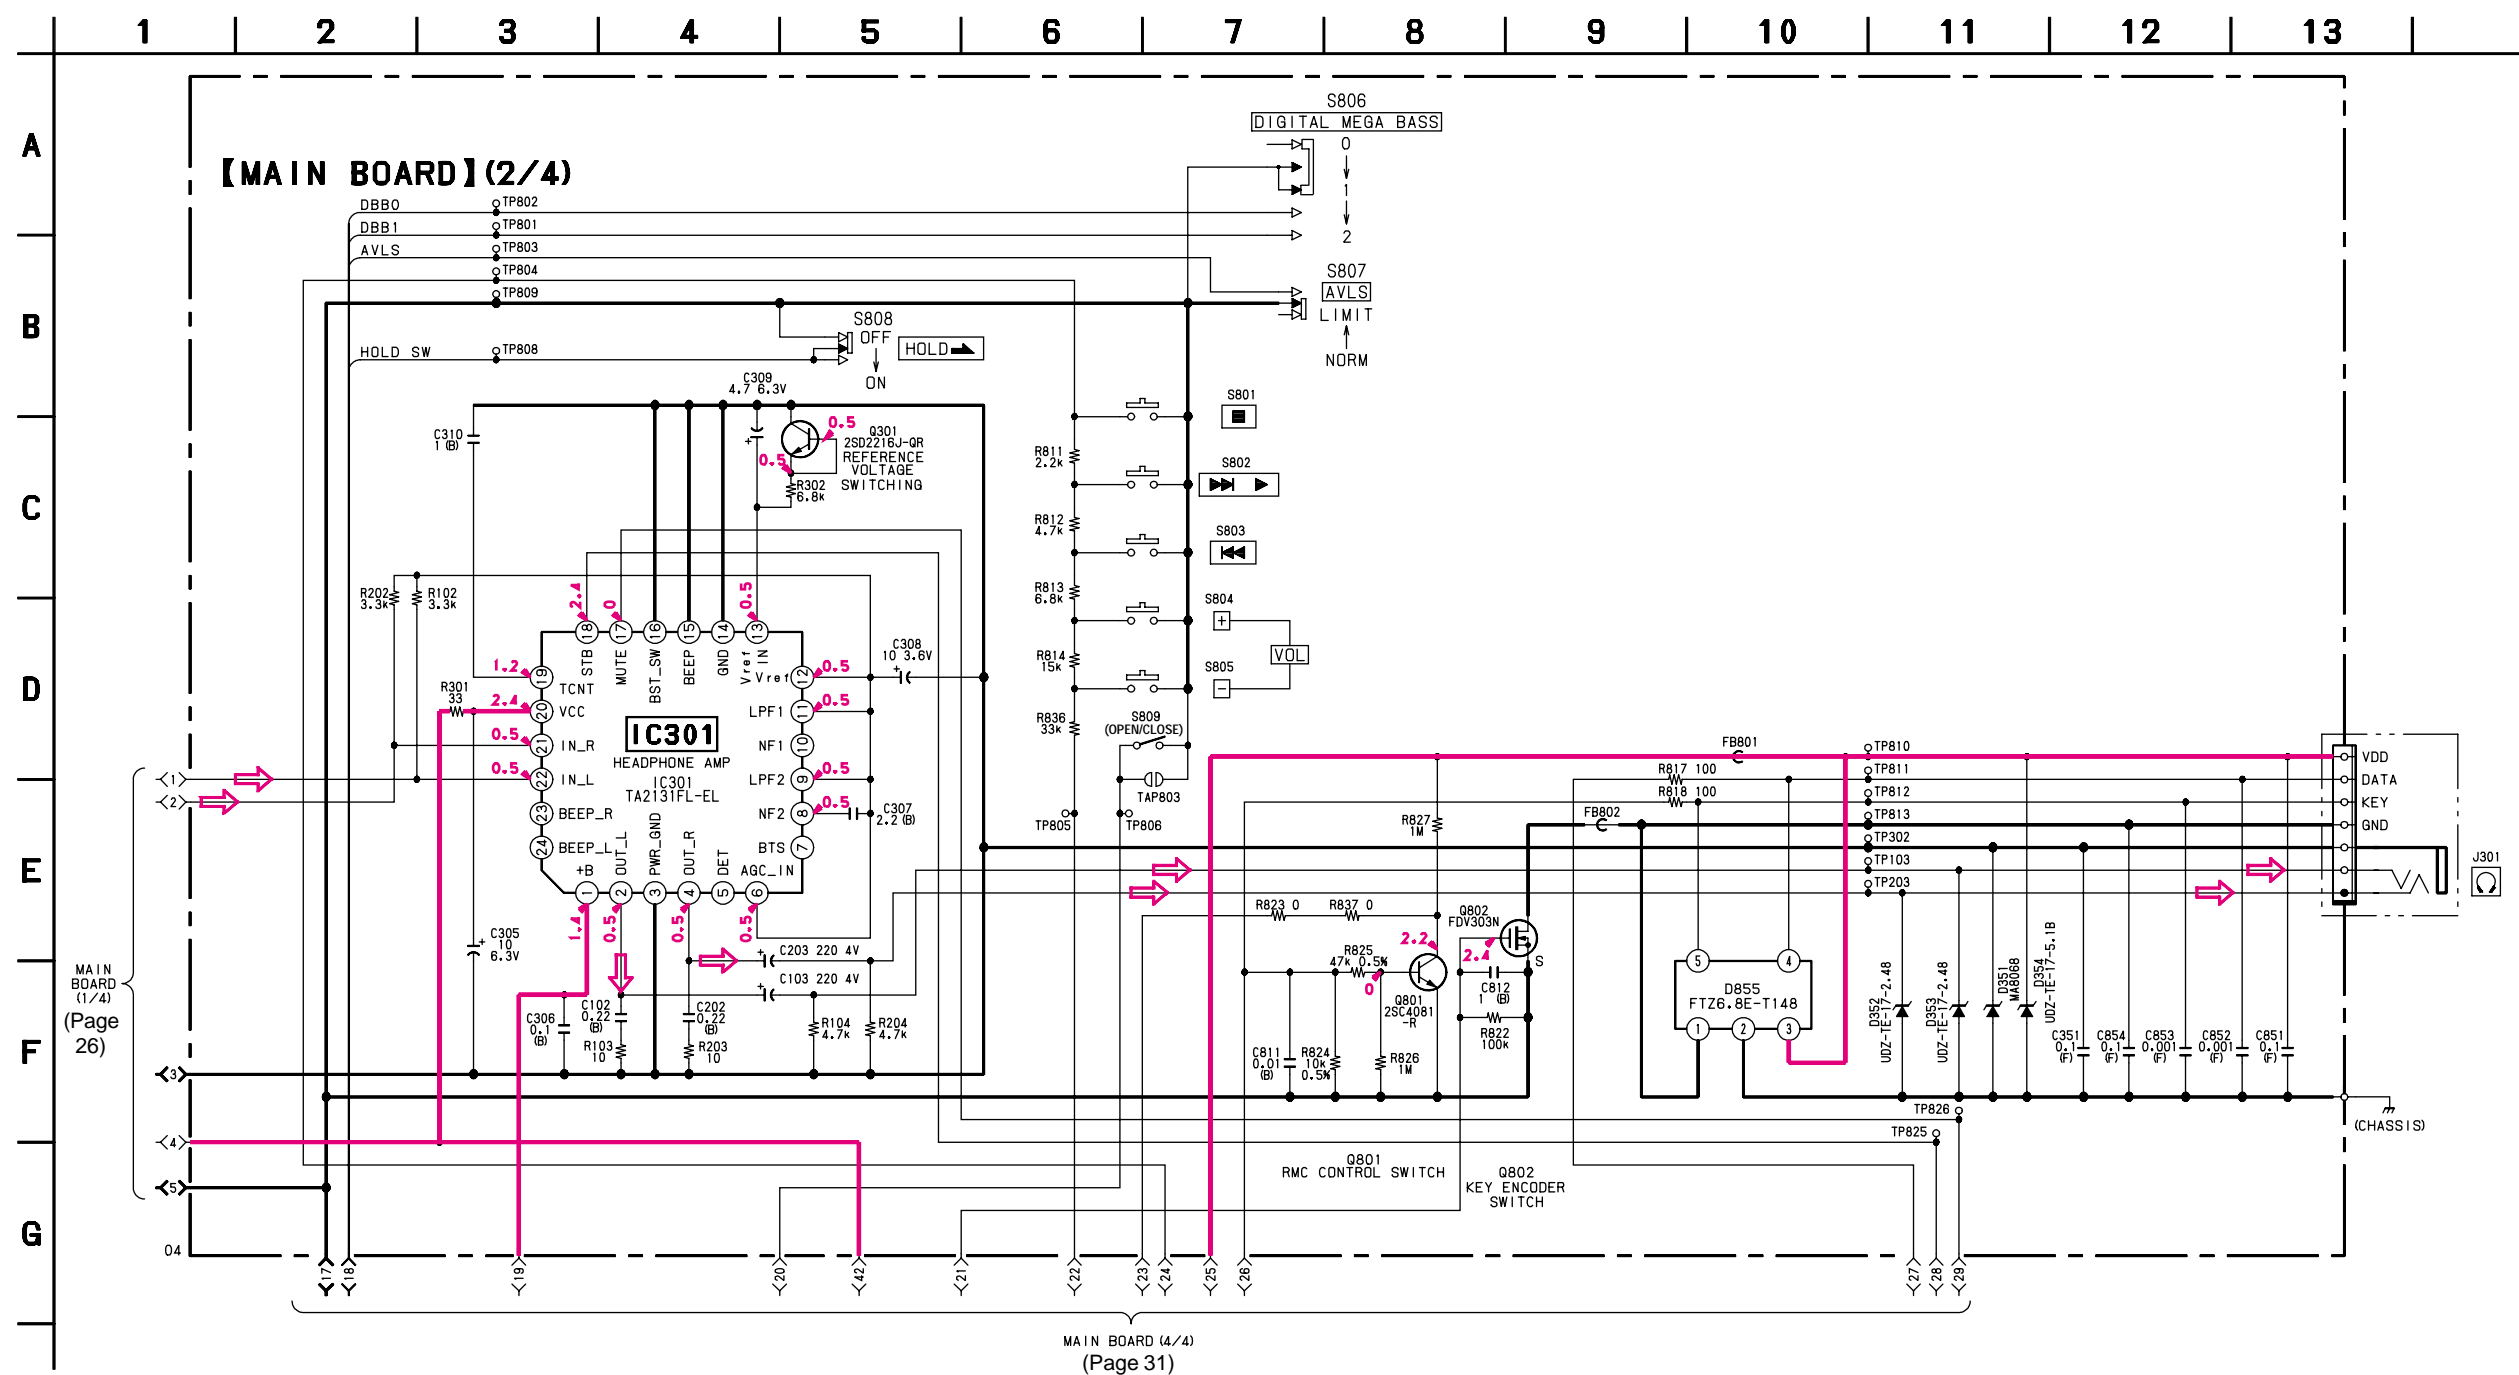

**Note:**  
 Les composants identifiés par une marque  $\Delta$  sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

- **B+ Line.**
- Power voltage is dc 1.5V and fed with regulated dc power supply from battery terminal.
- Voltage and waveforms are dc with respect to ground under no-signal conditions.
- no mark : PB
- \* : Impossible to measure
- Voltages are taken with a VOM (Input impedance 10 M $\Omega$ ). Voltage variations may be noted due to normal production tolerances.
- Waveforms are taken with a oscilloscope. Voltage variations may be noted due to normal production tolerances.
- Circled numbers refer to waveforms.
- Signal path.
- $\Rightarrow$  : PB

•Waveforms (MODE:PLAY)

6-3-3. SCHEMATIC DIAGRAM — MAIN BOARD (2/4) — • Refer to page 34 for IC Block Diagrams.

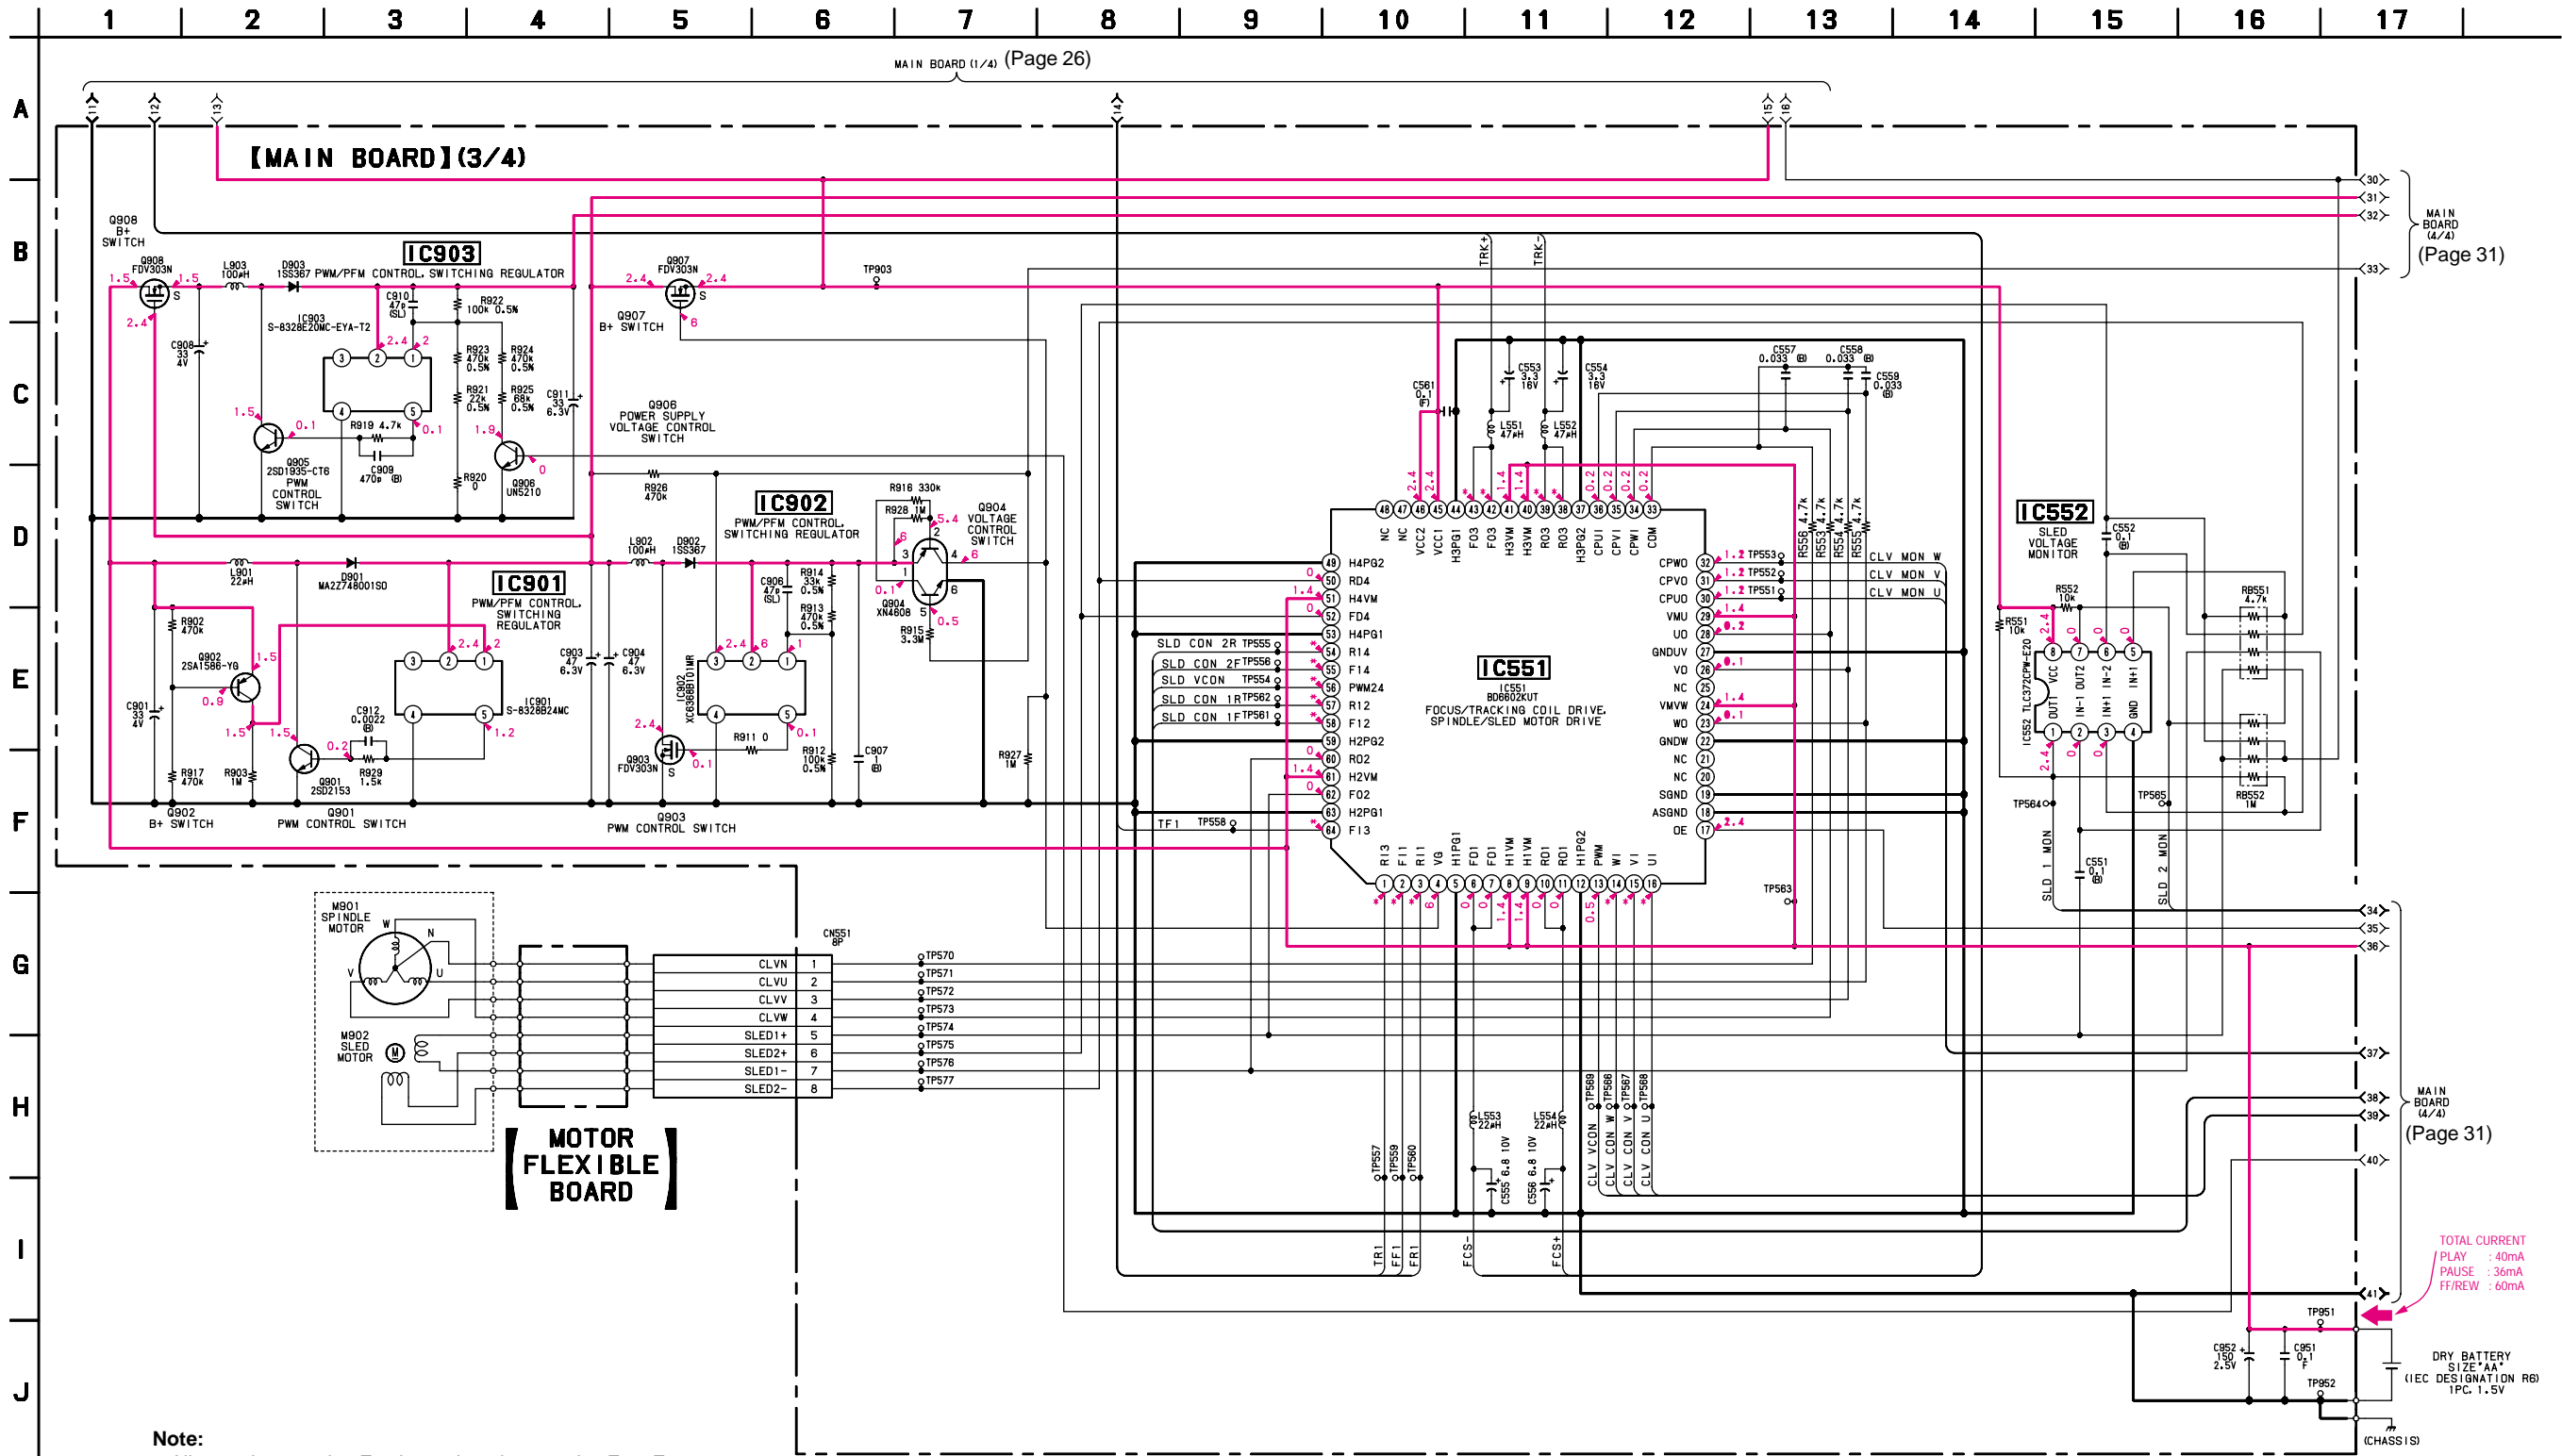

MAIN BOARD (1/4) (Page 26)

MAIN BOARD (4/4) (Page 31)

- Note:**
- All capacitors are in  $\mu\text{F}$  unless otherwise noted. pF:  $\mu\text{pF}$  50 WV or less are not indicated except for electrolytics and tantalums.
  - All resistors are in  $\Omega$  and  $1/4\text{W}$  or less unless otherwise specified.
  - % : indicates tolerance.
  - $\square$  : panel designation.
  - **—** : B+ Line.
  - Power voltage is dc 1.5V and fed with regulated dc power supply from battery terminal.
  - Voltage is dc with respect to ground under no-signal condition.
    - no mark : PB
    - \* : Impossible to measure
  - Voltages are taken with a VOM (Input impedance 10 M $\Omega$ ). Voltage variations may be noted due to normal production tolerances.
  - Signal path.
    - $\Rightarrow$  : PB

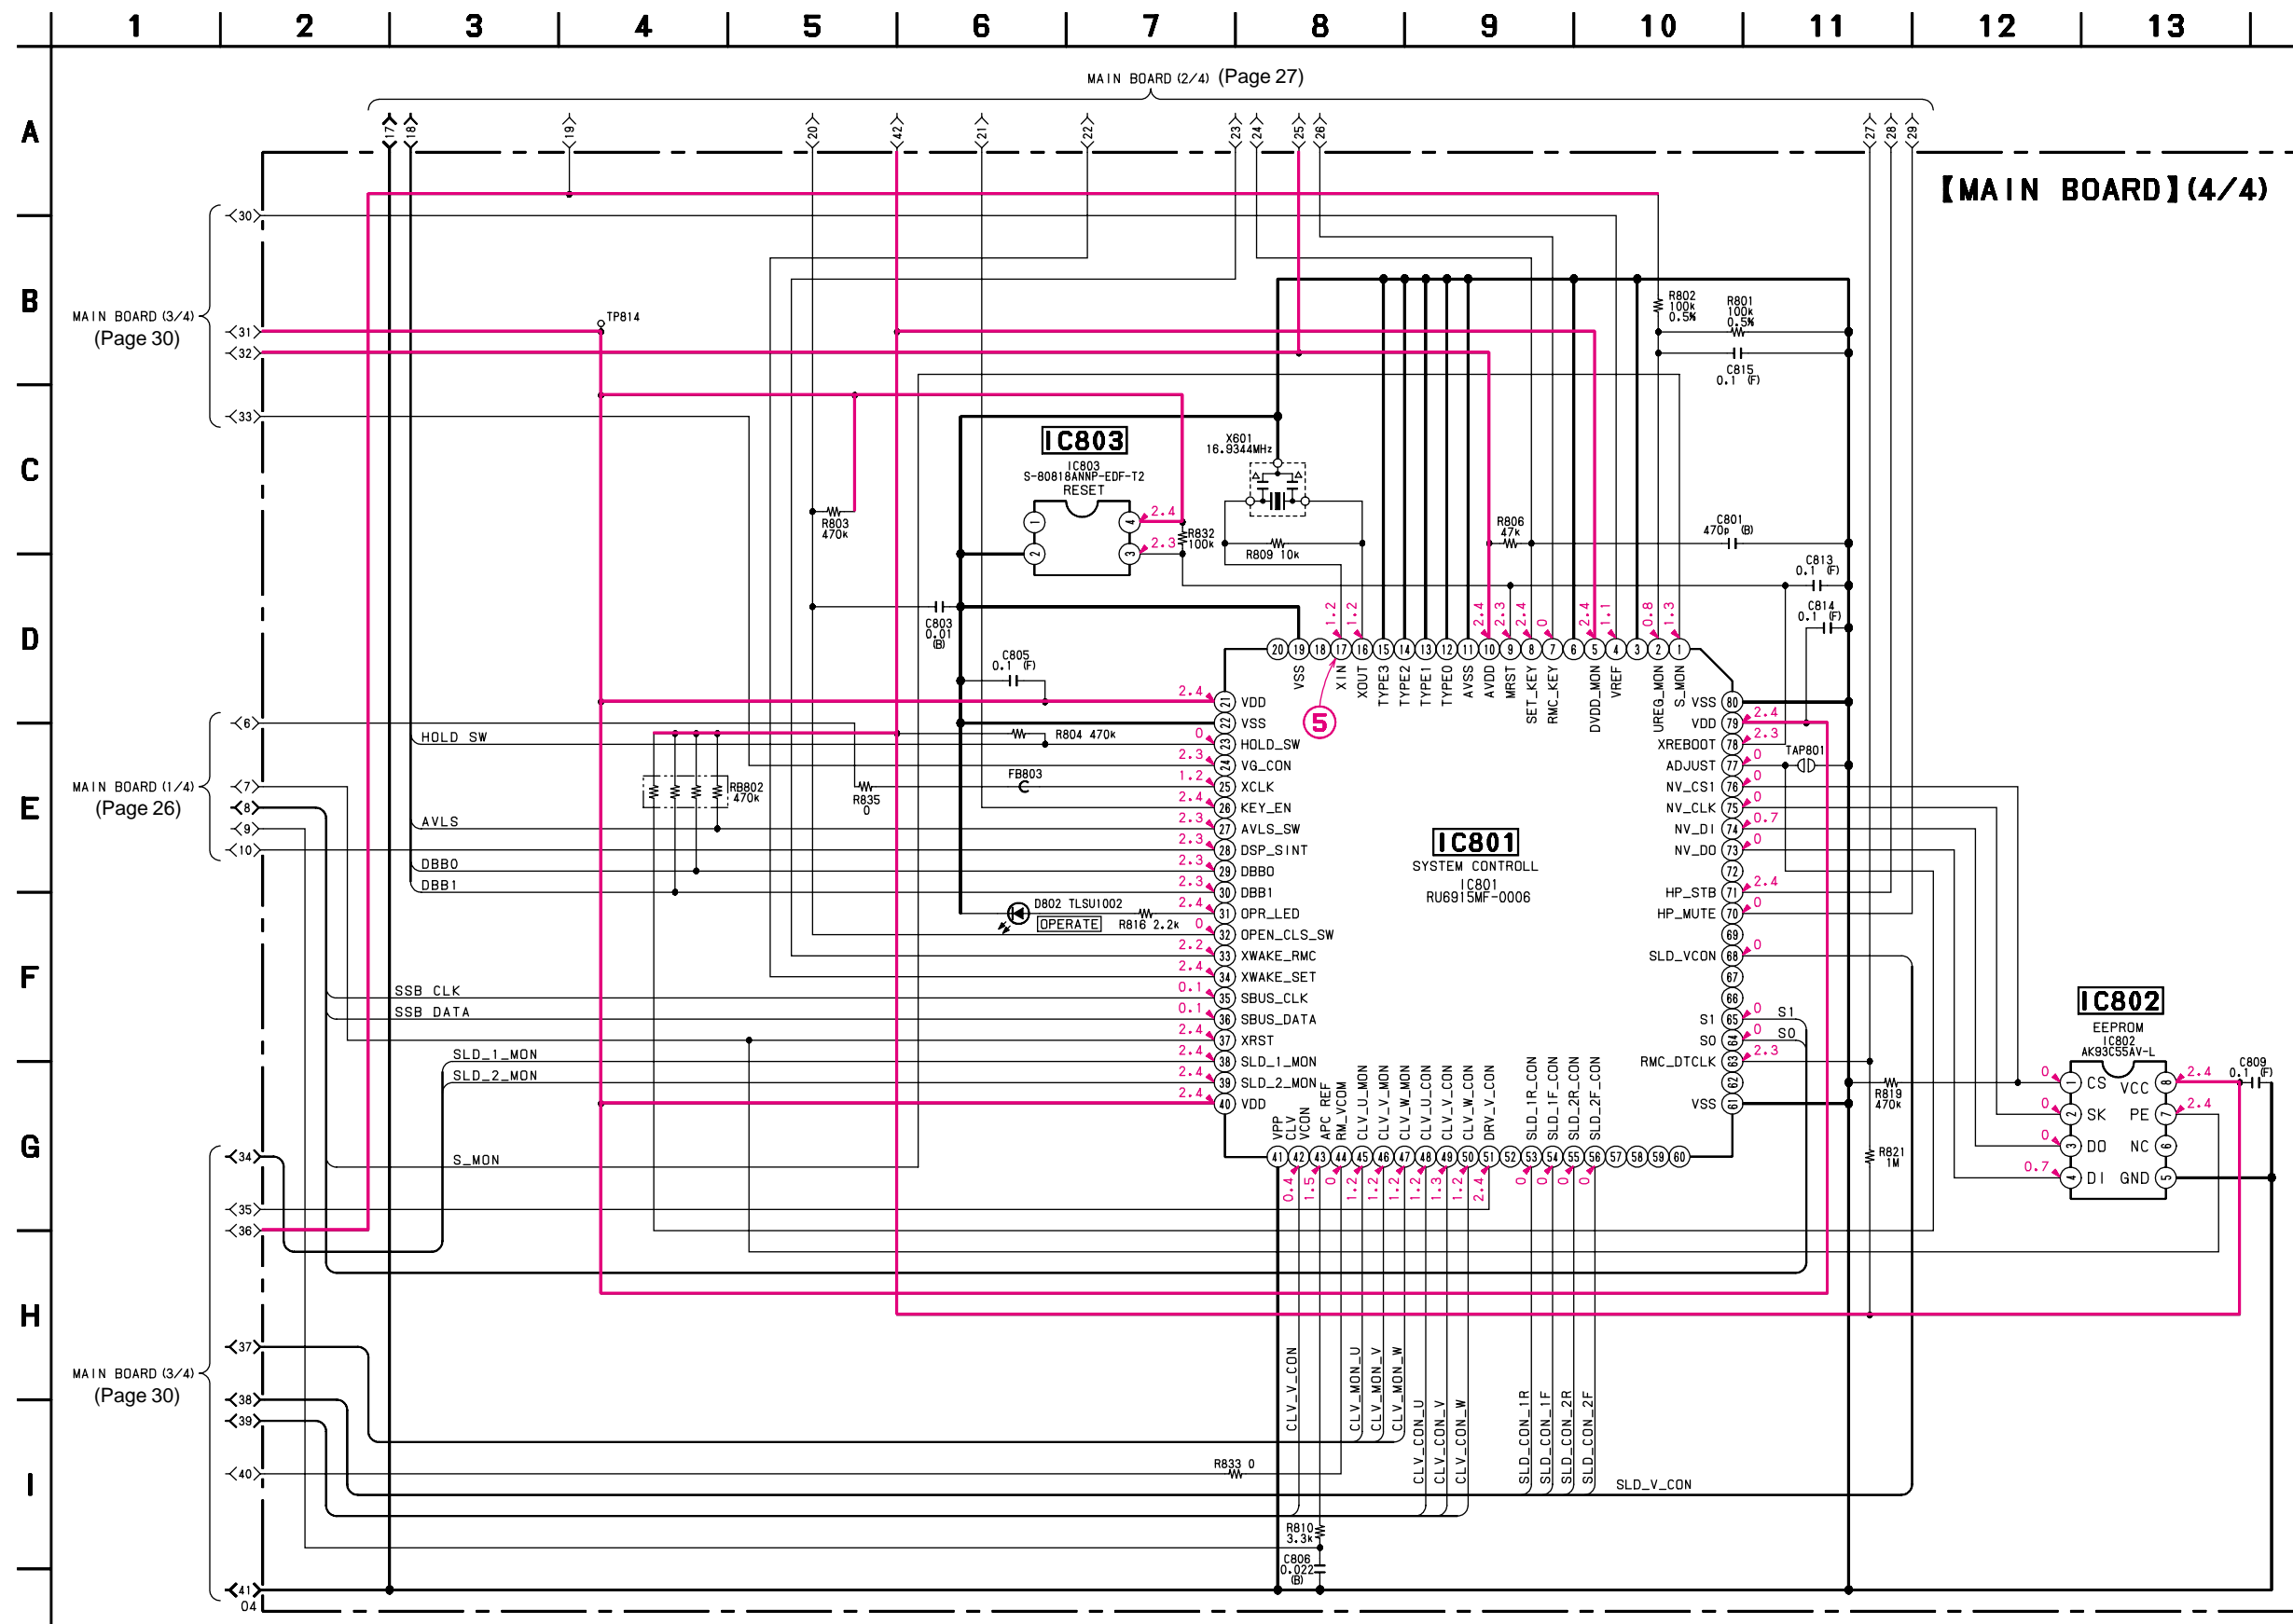

6-3-4. SCHEMATIC DIAGRAM — MAIN BOARD (3/4) — • Refer to page 34 for IC Block Diagrams.

Note:

- All capacitors are in  $\mu\text{F}$  unless otherwise noted. pF:  $\mu\text{pF}$  50 WV or less are not indicated except for electrolytics and tantalums.
- All resistors are in  $\Omega$  and  $1/4\text{W}$  or less unless otherwise specified.
- % : indicates tolerance.
- — : B+ Line.
- Power voltage is dc 1.5V and fed with regulated dc power supply from battery terminal.
- Voltage is dc with respect to ground under no-signal condition. no mark : PB
- \* : Impossible to measure
- Voltages are taken with a VOM (Input impedance 10 M $\Omega$ ). Voltage variations may be noted due to normal production tolerances.

6-3-5. SCHEMATIC DIAGRAM — MAIN BOARD (4/4) — • Refer to page 35 for IC Block Diagrams.

Note:

- All capacitors are in  $\mu\text{F}$  unless otherwise noted. pF:  $\mu\text{pF}$  50 WV or less are not indicated except for electrolytics and tantalums.
- All resistors are in  $\Omega$  and  $1/4$  W or less unless otherwise specified.
- B+ Line:** (indicated by a pink line in the diagram)

- Power voltage is dc 1.5V and fed with regulated dc power supply from battery terminal.
- Voltage and waveforms are dc with respect to ground under no-signal conditions. no mark : PB

- Voltages are taken with a VOM (Input impedance 10 M $\Omega$ ). Voltage variations may be noted due to normal production tolerances.
- Waveforms are taken with an oscilloscope. Voltage variations may be noted due to normal production tolerances.

## SECTION 7 EXPLODED VIEWS

### NOTE:

- The mechanical parts with no reference number in the exploded views are not supplied.
- Items marked "\*" are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- Abbreviation  
FR : French model

- -XX and -X mean standardized parts, so they may have some difference from the original one.
- Color Indication of Appearance Parts  
Example :  
KNOB, BALANCE (WHITE) ... (RED)

↑                      ↑  
Parts Color    Cabinet's Color

- Accessories and packing materials are given in the last of this parts list.

The components identified by mark  $\Delta$  or dotted line with mark  $\Delta$  are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque  $\Delta$  sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

## SECTION 8 ELECTRICAL PARTS LIST

MAIN

**NOTE:**

- Due to standardization, replacements in the parts list may be different from the parts specified in the diagrams or the components used on the set.
- -XX and -X mean standardized parts, so they may have some difference from the original one.
- RESISTORS  
All resistors are in ohms.  
METAL: Metal-film resistor.  
METAL OXIDE: Metal oxide-film resistor.  
F: nonflammable
- Abbreviation  
FR : France model

- Items marked “\*” are not stocked since they are seldom required for routine service. Some delay should be anticipated when ordering these items.
- SEMICONDUCTORS  
In each case, u :  $\mu$ , for example:  
uA.. :  $\mu$ A.. uPA.. :  $\mu$ PA..  
uPB.. :  $\mu$ PB.. uPC.. :  $\mu$ PC.. uPD.. :  $\mu$ PD..
- CAPACITORS  
uF :  $\mu$ F
- COILS  
uH :  $\mu$ H

The components identified by mark  $\Delta$  or dotted line with mark  $\Delta$  are critical for safety. Replace only with part number specified.

Les composants identifiés par une marque  $\Delta$  sont critiques pour la sécurité. Ne les remplacer que par une pièce portant le numéro spécifié.

When indicating parts by reference number, please include the board.
