### (See fig. 1)

Adjust VOLUME to minimum to avoid any sudden loud sounds that may hurt your ears and set the volume of the connected device to a moderate level.

**1 Disconnect the USB cable used for the speaker and personal computer, or set the POWER switch of the connected personal computer to OFF.**

When a USB cable is connected between the speaker and a personal computer, no sound will be heard from a Walkman set on the multiple connector, as data transfer mode takes place. Sound from the device connected to INPUT will be heard instead.

**2 Set the POWER switch to ON.**

The POWER/CHARGE indicator lights up.

**3 Play back the connected device.**

Adjust VOLUME accordingly.

When both a Walkman set on the multiple connector and a device connected to INPUT are used, both sounds can be heard. Control on/off on the connected device itself.

**4 Set the POWER switch to OFF after using.**

The POWER/CHARGE indicator goes off.

**Notes**

If connecting the speaker to a device with built-in a radio or tuner, radio reception may not occur or sensitivity may be reduced.

The USB cable function of the connected Walkman, etc., to avoid isolation.

Release the bass boost function of the connected Walkman, etc., to avoid isolation.

The USB cable connecting the speaker with personal computer, use of transferring Walkman's data and recharging. When playing back using a personal computer using the speaker, connect through the INPUT.

If the connected device's headphone output has a live signal, better sound will be heard if it is set to on. See the operating instructions of the connected device.

**Recharging**

A Walkman set on the multiple connector can be recharged by either the AC power adaptor (supplied), or by using a USB cable (supplied with the Walkman) connected to a computer.

**Notes**

Use the Operation Guide of the Walkman for details on recharging and related setting.

When the POWER switch is set to OFF, the POWER/CHARGE indicator lights up red while recharging. When the LIGHT switch is set to ON, the bottom of the Walkman will be illuminated. After completing recharging, the POWER/CHARGE indicator and the illumination go off.

Data transfer and recharging cannot be performed simultaneously. Playback and recharging can be done at the same time. Recharging time will be longer during playback.

Change the power source from the use of the AC power adaptor or USB cable. For details, see the Operation Guide of the Walkman.
