MULTI CHANNEL AV RECEIVER
STR-DN1050/STR-DN850

Function for conversion of video signals

The receiver is equipped with a function for converting video signals. Video signals and component video signals can be output as HDMI video signals (*1).

The correspondence of the INPUT jacks to the OUTPUT jacks is shown below.

- HDMI IN: HDMI OUT
- COMPONENT VIDEO IN (for STR-DN1050 only): HDMI OUT (*1), COMPONENT VIDEO MONITOR OUT (*2)
- VIDEO IN: HDMI OUT (*1), MONITOR OUT (*2)

*1 For STR-DN1050 only. Video signals are upconverted when output (up to 4K).

*2 The same type of signal as the input signal is output.

Note

- When video signals from a VCR, etc., are upconverted on this receiver and then viewed on your TV, the image on the TV screen may appear distorted horizontally or no image may be seen depending on the status of the video signal output.
- If you are using image improvement circuitry with your VCR, it may impact the video signal conversion. It is recommended that you turn off this function on your VCR.
- Converted HDMI image output does not support "x.v.Color (x.v.Colour)," Deep Color (Deep Colour), or 3D.
- HDMI video signals cannot be converted to component video signals or video signals.
- 1080p component video signals cannot be upconverted.
- When [4K Scaling] is set to [Auto], if the HDMI input signals are 1080p@23.98/24 Hz and a 4K-compatible TV is connected, the HDMI input signals are automatically upscaled to 4K images and output from the HDMI OUT jack.

MULTI CHANNEL AV RECEIVER
STR-DN1050/STR-DN850

Digital audio formats supported by the receiver

The digital audio formats that this receiver can decode depend on the digital audio output jacks of the connected device. This receiver supports the following audio formats. The words in brackets are those indicated on the display panel.

Dolby Digital [DOLBY D]

Maximum number of channels: 5.1

Connection with the receiver: COAXIAL/OPTICAL, HDMI (*2)

Dolby Digital EX [DOLBY EX]

Maximum number of channels: 6.1

Connection with the receiver: COAXIAL/OPTICAL, HDMI (*2)

Dolby Digital Plus [DOLBY D +] (*1)

Maximum number of channels: 7.1

Connection with the receiver: HDMI (*2)

Dolby TrueHD [DOLBY HD] (*1)

Maximum number of channels: 7.1

Connection with the receiver: HDMI

DTS [DTS]

Maximum number of channels: 5.1

Connection with the receiver: COAXIAL/OPTICAL, HDMI (*2)

DTS-ES Discrete [DTS-ES Dsc]

Maximum number of channels: 6.1

Connection with the receiver: COAXIAL/OPTICAL, HDMI (*2)

DTS-ES Matrix [DTS-ES Mtx]

Maximum number of channels: 6.1

Connection with the receiver: COAXIAL/OPTICAL, HDMI (*2)

DTS 96/24 [DTS 96/24]

Maximum number of channels: 5.1

Connection with the receiver: COAXIAL/OPTICAL, HDMI (*2)

DTS-HD High Resolution Audio [DTS-HD HR] (*1)

Maximum number of channels: 7.1

Connection with the receiver: HDMI (*2)

DTS-HD Master Audio [DTS-HD MA] (*1)

Maximum number of channels: 7.1

Connection with the receiver: HDMI

DSD [DSD] (*1)

Maximum number of channels: 5.1

Connection with the receiver: HDMI

Multi Channel Linear PCM (*1) [PCM]

Maximum number of channels: 7.1

Connection with the receiver: HDMI (*2)

*1 Audio signals are output in another format if the playback device does not correspond to the actual format. For details, refer to the operating instructions of the playback device.

*2 These formats are compatible with MHL when you connect a MHL-compatible source device to the HDMI/MHL (VIDEO 2 IN) (for STR-DN1050 only), HDMI VIDEO 1 IN (MHL) (for STR-DN1050 only) or HDMI VIDEO IN (MHL) (for STR-DN850 only) jack.

Notes on connecting cables

- Be sure to disconnect the AC power cord (mains lead) before connecting cables.
- It is not necessary to connect all of the cables. Connect cables according to the availability of jacks on the connected device.
- Use a High Speed HDMI cable. 1080p, Deep Color (Deep Colour), 4K or 3D images may not be displayed properly if you use a Standard HDMI cable.
- We do not recommend using an HDMI-DVI conversion cable. If you connect an HDMI-DVI conversion cable to a DVI-D device, the sound and/or image may be lost. Connect separate audio cables or digital connecting cables, then reassign the input jacks if the sound is not output correctly. For details, see [“Using other video/audio input jacks \(Input Assign\).”](#)
- When connecting optical digital cables, insert the plugs straight until they click into place.
- Do not bend or tie optical digital cables.

Hint

- All of the digital audio jacks are compatible with 32 kHz, 44.1 kHz, 48 kHz, and 96 kHz sampling frequencies.

If you want to connect several digital devices, but cannot find an unused input

See [“Using other video/audio input jacks \(Input Assign\).”](#)

Using HDMI connections

High-Definition Multimedia Interface (HDMI) is an interface that transmits video and audio signals in digital format. Connecting Sony “BRAVIA” Sync-compatible devices using HDMI cables simplifies operations. See “[Interlocking other devices using an HDMI connection \(“BRAVIA” Sync\).](#)”

HDMI features

- Digital audio signals transmitted by HDMI can be output from the speakers connected to the receiver. This signal supports Dolby Digital, DTS, DSD, and Linear PCM. For details, see “[Digital audio formats supported by the receiver.](#)”
- The receiver can receive Multi Channel Linear PCM (up to 8 channels) with a sampling frequency of 192 kHz or less via an HDMI connection.
- Analog video signals input to the receiver’s VIDEO jack or COMPONENT VIDEO jacks can be output as HDMI signals (for STR-DN1050 only). Audio signals are not output from the HDMI OUT jack(s) while the image is being converted.
- This receiver supports High Bitrate Audio (DTS-HD Master Audio, Dolby TrueHD), Deep Color (Deep Colour), “x.v.Color (x.v.Colour),” and 4K or 3D transmission.
- To enjoy 3D images, connect a 3D-compatible TV and video device (Blu-ray Disc player, Blu-ray Disc recorder, PlayStation 3, etc.) to the receiver using High Speed HDMI cables, put on 3D glasses, and then play 3D-compatible content.
- To enjoy 4K (HDMI BD/DVD, GAME, SAT/CATV, VIDEO1) images, connect a 4K-compatible TV or video device (Blu-ray Disc player, etc.) to the receiver using High Speed HDMI cables, and then play 4K-compatible content (for STR-DN1050 only).

Note

- Depending on the TV or video device, 4K or 3D images may not be displayed. Check the HDMI video formats supported by the receiver.
- Refer to the operating instructions of each connected device for details.

STR-DN1050/STR-DN850

Using MHL (Mobile High-Definition Link) connections

MHL (Mobile High-Definition Link) is an HD video and digital audio interface for connecting mobile phones and portable devices to HDTVs and other home entertainment products. MHL can support 1080p HD video and digital audio signals and supply power to the mobile device simultaneously. It also enables the remotes of TV and other home entertainment products to control the mobile phone and access its content.

Note

- MHL-compatible mobile devices are charged when connected to the HDMI/MHL (VIDEO 2 IN) (*1), HDMI VIDEO 1 IN (MHL) (*1) or HDMI VIDEO IN (MHL) (*2) jacks of the receiver while the receiver is turned on, or while the receiver is turned off when [Pass Through] is set to [On] (*3) or [Auto], or [Network Standby] (*4) is set to [On].

*1 For STR-DN1050 only

*2 For STR-DN850 only

*3 For USA, Canadian, Mexican, and Australian models only

*4 For USA and Canadian models only

MULTI CHANNEL AV RECEIVER
STR-DN1050/STR-DN850

Installing speakers

This receiver allows you to use up to a 7.2-channel system (7 speakers and two subwoofers). Typical examples of speaker system configurations are as follows.

[5.1-channel speaker system](#)

To fully enjoy theater-like multi-channel surround sound, you need five speakers (two front speakers, a center speaker, and two surround speakers) and a subwoofer.

[7.1-channel speaker system using surround back speakers](#)

You can enjoy high-fidelity reproduction of recorded sound from a DVD or Blu-ray Disc in 6.1-channel or 7.1-channel format.

[7.1-channel speaker system using front high speakers](#)

You can enjoy vertical sound effects by connecting an additional two front high speakers.

Note

- You cannot use the surround back speakers and the front high speakers simultaneously.

Connecting speakers

Connect each speaker as illustrated below.

Be sure to disconnect the AC power cord (mains lead) before connecting cables.

For details on how to connect speaker cables to the receiver, see “[How to connect speaker cables.](#)”

A Monaural audio cable (not supplied)

B Speaker cable (not supplied)

*1 If you connect a subwoofer with an auto standby function, turn off this function when watching movies. If the auto standby function is turned on, it switches to standby mode automatically based on the level of the input signal to the subwoofer, and the sound may not be output.

*2 Notes on connections to the SPEAKERS SURROUND BACK/BI-AMP/FRONT HIGH/FRONT B terminals

- If connecting only one surround back speaker, connect it to the L (+/-) terminals.
- If you have an additional front speaker system, connect it to these terminals. In this case, perform the following procedure:

1. Select [Speaker Connection] in the Speaker Settings menu, then select a speaker pattern that does not have surround back and front high speakers.

2. Set [SB Speaker Assign] in the Speaker Settings menu to [Front B].

You can select the front speaker system you want by using the SPEAKERS button on the receiver.

- You can connect the front speakers to this terminal using a bi-amplifier connection. In this case, set [SB Speaker Assign] in the Speaker Settings menu to [Bi-Amp].

Note

- After you have installed and connected your speakers, be sure to select the speaker pattern you want using [Speaker Connection] in the Speaker Settings menu.

Connecting a TV (for STR-DN1050)

Connect a TV to the HDMI OUT or MONITOR OUT jack. You can operate this receiver using a GUI (Graphical User Interface). GUI is used only for HDMI OUT A and HDMI OUT B.

Be sure to disconnect the AC power cord (mains lead) before connecting cables.

Connecting a TV compatible with the Audio Return Channel (ARC) function via an HDMI connection

A HDMI cable (not supplied)

Sony recommends that you use an HDMI-authorized cable or HDMI cable made by Sony.

Connecting a TV incompatible with the Audio Return Channel (ARC) function via an HDMI connection

The solid lines show recommended connections and the dashed lines show alternative connections.

A Optical digital cable (not supplied)

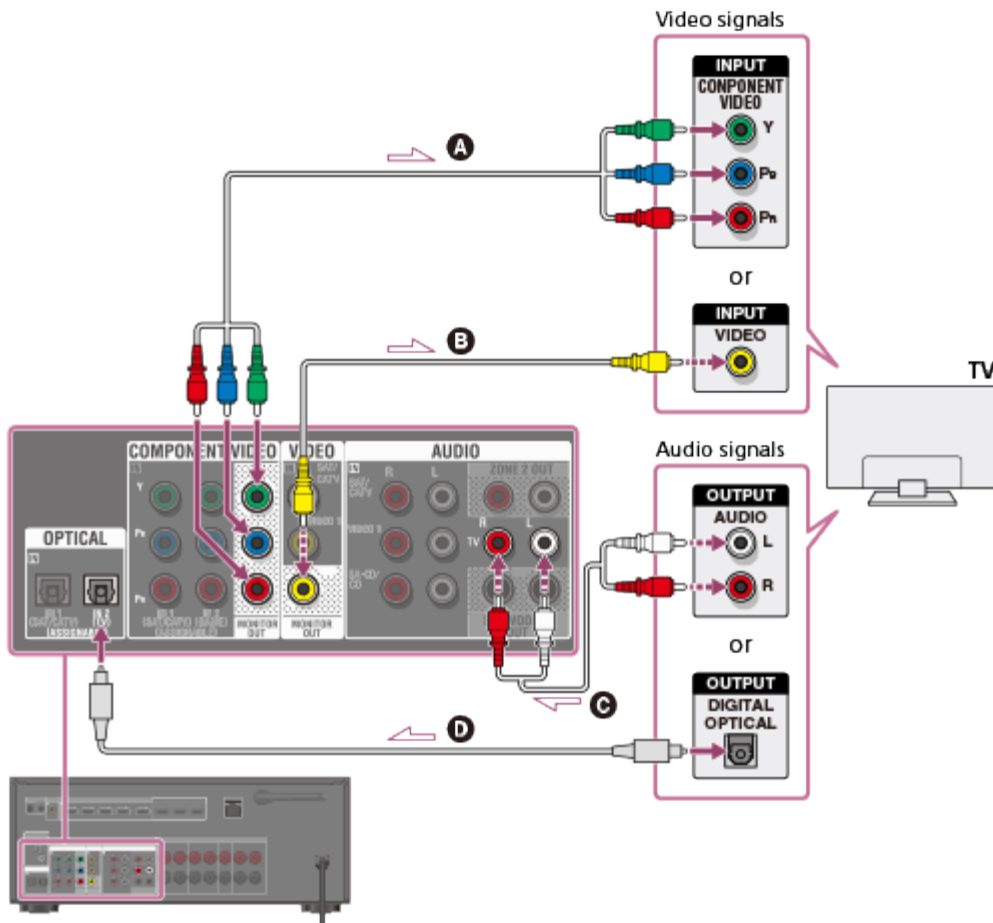

B Audio cable (not supplied)

C HDMI cable (not supplied)

Sony recommends that you use an HDMI-authorized cable or HDMI cable made by Sony.

Connecting a TV without HDMI jacks

The solid lines show recommended connections and the dashed lines show alternative connections.

- Ⓐ Component video cable (not supplied)
- Ⓑ Video cable (not supplied)
- Ⓒ Audio cable (not supplied)
- Ⓓ Optical digital cable (not supplied)

Note

- Connect a TV monitor or a projector to the HDMI OUT or MONITOR OUT jack on the receiver.
- Depending on the status of the connection between the TV and the antenna (aerial), the image on the TV screen may be distorted. If this is the case, place the antenna (aerial) farther away from the receiver.
- When connecting an optical digital cable, insert the plugs straight until they click into place.
- Do not bend or tie optical digital cables.

Hint

- All of the digital audio jacks are compatible with 32 kHz, 44.1 kHz, 48 kHz, and 96 kHz sampling frequencies.
- The receiver has a video conversion function. For details, see “[Function for conversion of video signals.](#)”
- When connecting a TV to the receiver via the TV IN jacks of the receiver, set the sound output jack of the TV to [Fixed] if it can be switched between either [Fixed] or [Variable].

Connecting devices with HDMI jacks

Connect devices to the receiver as illustrated below.

Before connecting cables, be sure to disconnect the AC power cord (mains lead).

If your device does not have an HDMI jack, see “[Connecting devices with jacks other than HDMI jacks \(for STR-DN1050\)](#)” or “[Connecting devices with jacks other than HDMI jacks \(for STR-DN850\)](#).”

- A** HDMI cable (not supplied)
Sony recommends that you use an HDMI-authorized cable or Sony HDMI cable.
- B** Satellite tuner, cable TV tuner
- C** PlayStation3
- D** DVD recorder
- E** Super Audio CD player, CD player
- F** Blu-ray Disc player, DVD player

Note

- This HDMI connection is an example. You can connect each HDMI device to any HDMI input, including the HDMI input on the front panel.
- The BD/DVD and SA-CD/CD inputs have better sound quality. When you need a higher sound quality, connect your device to these jacks and select them as the input.

Hint

- The image quality depends on the connecting jack. We recommend that you connect your devices via an HDMI connection if they have HDMI jacks.

Enjoying audio content stored on an iPhone/iPod via the USB port

You can enjoy music from an iPhone or iPod by connecting it to the  (USB) port on the receiver.

1. Select [Listen] - [USB] from the home menu.
When an iPhone or iPod is connected, [iPod/iPhone] appears on the TV screen.
2. Follow the on-screen instructions to select the iPhone/iPod control mode.

Operating an iPhone/iPod using the remote control

Press USB before you use the following buttons:

- , : Starts or pauses playback.
- : Moves to the start of the previous/current or next track.

Note

- When connecting the receiver to the network via a wired LAN connection, the USB function temporarily may not work due to the power status of the router or the network connection status, etc. Please wait as the function will recover after a short period of time.

Enjoying audio content from iTunes or an iPhone/iPad/iPod via the network (AirPlay)

You can play audio content on an iPhone, iPad, iPod touch or in an iTunes Library on your PC with this receiver via a wireless network.

- A** PC
- B** iPhone/iPad/iPod touch

1. Tap/click icon on the iPhone/iPad/iPod screen or iTunes window.
2. Select [STR-DN1050] or [STR-DN850] on the AirPlay menu of iTunes or your iPhone/iPad/iPod.
3. Start playing back audio content on an iPhone/iPad/iPod or in iTunes.

Controlling AirPlay playback

You can use the buttons on the remote control when the receiver is selected as the device for output.

Note

- Update the iPhone/iPad/iPod or iTunes to the latest version before using with the receiver.
- Refer to the operating instructions of your device for details on operating the iPhone/iPad/iPod, iTunes or AirPlay.

Hint

- If the playback does not start, perform the process again from step 1.
- The device name displayed on the AirPlay menu may be different. To confirm or edit the device name, see [“Assigning a name to the receiver \(Device Name\).”](#)
- Very loud sound may output from the receiver if you set the volume loud on an iPhone/iPad/iPod or iTunes.
- It may not be possible to link the volume level of an iPhone/iPad/iPod or iTunes with the volume level of this receiver.

Enjoying audio content stored on a BLUETOOTH device

1. Place the BLUETOOTH device within 1 meter (3.3 feet) of the receiver.
2. Press BLUETOOTH on the receiver to select the BLUETOOTH function.
3. Hold down BLUETOOTH for 2 seconds to activate the pairing mode of the receiver.
[PAIRING] appears and [BT] flashes quickly on the display panel. Perform step 4 within five minutes, otherwise pairing will be canceled. In this case, repeat this step.
4. Perform pairing on the BLUETOOTH device to detect this receiver.
For details, refer to the operating instructions of your BLUETOOTH device.
A list of detected devices may appear on the BLUETOOTH device display depending on the type of BLUETOOTH device. This receiver is displayed as [STR-DN1050] or [STR-DN850] .
5. Select [STR-DN1050] or [STR-DN850] on the BLUETOOTH device display.
If [STR-DN1050] or [STR-DN850] is not displayed, repeat this process from step 1.
6. Check that the connection is completed and [BT] lights up on the display panel.
7. Start playback on the BLUETOOTH device.
8. Adjust the volume.
Adjust the volume of the BLUETOOTH device first. If the volume level is still too low, adjust the volume level of the receiver.

Canceling pairing operation

Hold down BLUETOOTH after step 3. [CANCEL] appears on the display panel.

Note

- When establishing a connection with this receiver in step 4, select the audio profile (A2DP or AVRCP) on the BLUETOOTH device. If the BLUETOOTH device does not support the AVRCP profile, you cannot perform playback or other operations on the receiver.
- If a passkey is required on the display of the BLUETOOTH device in step 5, enter [0000]. The passkey may be called "Passcode," "PIN code," "PIN number" or "Password."
- You can pair up to 9 BLUETOOTH devices. If a 10th BLUETOOTH device is paired, the least recently connected device will be replaced by the new one.

Hint

- On some types of BLUETOOTH devices, you can adjust the volume using the controls of the BLUETOOTH device.

- You can also activate the pairing mode of the receiver by the following ways:
 - Press OPTIONS while the input is set to [Bluetooth], then select [Pairing].
 - Select [Bluetooth Pairing] in the Bluetooth Settings menu.

- The receiver is unable to read data in NTFS format.
- The receiver is unable to read data other than that saved in the first partition of a hard disk drive.
- Operation of models not listed here is not guaranteed.
- Operation may not always be guaranteed even when using these USB devices.
- Some of these USB devices may not be available for purchase in certain areas.
- When formatting the above models, be sure to format using the model itself or the dedicated formatting software for that model.
- When connecting a USB device to the receiver, be sure to connect after the display Creating Library or Creating Database on the USB device has disappeared.

USB specifications

Supported formats (*1)

The music file formats that can be played back by this receiver are as follows:

MP3 (MPEG 1 Audio Layer-3):

32 kbps – 320 kbps, VBR

AAC (*2):

16 kbps – 320 kbps, CBR, VBR

WMA9 Standard (*2):

40 kbps – 320 kbps, CBR, VBR

WAV:

32 kHz – 192 kHz, 16/24 bit PCM

FLAC:

44.1 kHz – 192 kHz, 16/24 bit FLAC

AIFF:

32 kHz – 192 kHz, 16/24 bit PCM

ALAC:

32 kHz - 96 kHz, 16/24 bit ALAC

DSD (for STR-DN1050 only):

2.8 MHz, 1 bit DSD

*1 Compatibility with all encoding/writing software, recording devices and recording media cannot be guaranteed.

*2 The receiver does not play files encoded with DRM.

Notes on USB devices

- Do not remove a USB device during operation. To avoid data corruption and damage to the USB device, turn the receiver off when connecting or removing a USB device.
- Do not connect a USB device to the receiver through a USB hub.
- When a USB device is connected, [Reading] appears.
- It may take about 10 seconds before [Reading] appears depending on the type of USB device connected.
- When a USB device is connected, the receiver reads all of the files on the USB device. If there are many folders or files on the USB device, it may take a long time to finish reading the USB device.
- The receiver can recognize up to
 - 256 folders (including [ROOT] folder).
 - 256 audio files in each folder.
 - 8 folder levels (tree structure of files, including [ROOT] folder).

The maximum number of audio files and folders may vary depending on the file and folder structure. Do not save other types of files or unnecessary folders on a USB device.

- Compatibility with all encoding/writing softwares, recording devices, and recording media cannot be guaranteed. Incompatible USB devices may produce noise or interrupted audio or may not play at all.
- Some time may be needed to start playback when:
 - the folder structure is complex.
 - the memory capacity is excessive.
- This receiver does not necessarily support all of the functions provided in a connected USB device.
- The playback order for the receiver may differ from the playback order of the connected USB device.
- If folders that have no audio files are selected, [No Track] appears.
- When playing a very long track, some operations may cause playback delay.

Listening to FM/AM radio

You can listen to FM and AM broadcasts through the built-in tuner. Before operation, be sure you have connected the FM and AM antennas (aerials) to the receiver.

1. Select [Listen] - [FM TUNER] or [AM TUNER] from the home menu.
The FM/AM screen appears.

FM/AM screen

You can select and operate each item on the screen by pressing \uparrow / \downarrow / \leftarrow / \rightarrow and \oplus .

1. Band indication
You can select [FM] or [AM] by pressing \uparrow / \downarrow repeatedly.
2. Frequency indication
You can tune to a station automatically by pressing \uparrow / \downarrow repeatedly (Auto Tuning).
Press \uparrow to scan from lower to higher frequency stations or press \downarrow to scan from higher to lower stations.
The receiver stops scanning whenever a station is received.
3. Preset station list
You can tune to a station by selecting the preset number from the list.

Tuning to a station directly (Direct Tuning)

You can enter the frequency of a station directly.

1. Select [Listen] - [FM TUNER] or [AM TUNER] from the home menu.
2. Press **+**.
3. Enter the frequency using **↑/↓/←/→**.
 - i. Press **←/→** to select a digit.
 - ii. Press **↑/↓** to change the digit.
4. Press **+**.

Note

- If the tuned frequency is invalid or out of range, [---.-- MHz] or [---- kHz] appears and then the screen returns to the current frequency.
Make sure you have entered the right frequency. If not, repeat steps 3 and 4. If you still cannot tune to a station, the frequency may not be in use in your area.

Hint

- Adjust the direction of the AM loop antenna (aerial) for optimum reception upon tuning to an AM station.
- The tuning scale for direct tuning is shown below:
 - USA and Canada
FM: 100 kHz
AM: 10 kHz (*)
 - Mexico
FM: 50 kHz
AM: 10 kHz (*)
 - Europe and Australia
FM: 50 kHz
AM: 9 kHz

* The AM tuning scale can be changed. For details, see “ [Changing the AM tuning scale \(for USA, Canadian, and Mexican models only\)](#).”

STR-DN1050/STR-DN850

Receiving RDS broadcasts (for European and Australian models only)

This receiver allows you to use Radio Data System (RDS), which enables FM radio stations (*) to send additional information along with the regular programming signal. This receiver offers convenient RDS features, such as Program Service name display.

* Not all FM stations provide RDS service, nor do they provide the same type of services. If you are not familiar with the RDS services in your area, check with your local radio stations for details.

1. Select [Listen] - [FM TUNER] from the home menu.

2. Select a station.

When you tune to a station that provides RDS services, the Program Service name appears on the TV screen and the display panel.

Note

- RDS may not work properly if the station you tuned to does not transmit the RDS signal or if the signal strength is weak.
- Some letters that can be displayed on the TV screen cannot be displayed on the display panel.

Hint

- You can check the frequency while a Program Service name is displayed by pressing DISPLAY repeatedly.

Selecting a sound field (Sound Field)

You can select from a variety of sound field modes according to speaker connections or input sources.

1. Select [Settings] - [Audio Settings] from the home menu.
2. Select [Sound Field].
3. Select the sound field you want.

For details on each sound field, see the following topics.

- [Auto Format Direct \(A.F.D.\)/2-channel sound mode](#)
- [Movie mode](#)
- [Music mode](#)
- [When headphones are connected](#)

Note

- The sound fields for movie and music may not work, depending on the input or the speaker pattern you select, or with audio formats.
- The receiver may play signals at a lower sampling frequency than the actual sampling frequency of the input signals, depending on the audio format.
- [PLIIX Movie] or [PLIIX Music] may not appear, depending on the speaker pattern you select.
- Some speakers or the subwoofer may not output sound, depending on the sound field setting.
- If there is any noise present, the noise may be different, depending on the sound field you select.

Hint

- You can also select [Sound Field] in [Sound Effects] from the home menu.
- You can also use A.F.D./2CH, MOVIE or MUSIC on the remote control or the receiver to select a sound field.

System requirements for a wired LAN connection

The following system environment is required to use the network function of the receiver via a wired LAN connection.

Broadband connection

A broadband connection to the Internet is required in order to listen to the music services and to update the software of the receiver.

Router

- Use a router compatible with transmission speeds of 100 Mbps or greater to enjoy content on your home network.
- We recommend that you use a router equipped with a built-in DHCP (Dynamic Host Configuration Protocol) server. This function automatically assigns IP addresses to devices on the LAN.

LAN cable (CAT5)

- We recommend using a normal shielded type cable for a wired LAN to avoid electric noise.
- Some flat-type LAN cables are easily affected by noise.

Server

A server is a device which delivers music content to a DLNA device on a home network. A device that can be used as a server (a computer, etc.) must be connected to your wireless or wired LAN home network.

Setting up a wired LAN connection

You can set up a wired LAN connection by the following procedure.

1. Select [Settings] - [Network Settings] from the home menu.

2. Select [Internet Settings].

3. Select [Wired] (*).

The screen for selecting the IP address acquisition method is displayed on the TV screen.

* You cannot select [Wired] if a LAN cable is not connected to the receiver.

4. Select [Auto].

5. Select [OK].

The receiver starts connecting to the network. For details, refer to the messages that appear on the TV screen.

If using a fixed IP address

Select [Manual] in step 4. The IP address input display appears on the TV screen.

Enter the value for [IP Address] using the on-screen keyboard. Press **↑** / **↓** / **←** / **→** and **+** to select the characters one by one, then select [Enter] to confirm the values.

Enter the values for [Subnet Mask], [Default Gateway], [Primary DNS] and [Secondary DNS], then select [Next].

Hint

- See [Information] when checking the network settings.

STR-DN1050/STR-DN850

Method 1: Setting up a wireless network using the WPS push button configuration method

If your wireless LAN router/access point has a WPS button, you can easily connect the receiver to a Wi-Fi (wireless LAN) network.

If your wireless LAN router has an AOSS button or other easy setup button, it may support WPS. Check the operation manual of your wireless LAN router/access point for details.

1. Select [Settings] - [Network Settings] from the home menu.
2. Select [Internet Settings].
3. Select [Wireless] (*).
The screen for selecting the IP address acquisition method is displayed on the TV screen.

* You cannot select [Wireless] if a LAN cable is connected to the receiver.

4. Select [WPS Push].
The receiver starts searching for access point, and displays a list of up to 30 available network names (SSIDs).
5. Follow the on-screen instructions, and press the WPS button on the access point.
Message: [Push the WPS button on the access point within 2 minutes.]

A WPS button on the wireless LAN router/access point

The receiver starts connecting to the network. For details, refer to the messages that appear on the TV screen. After the network settings are complete, [] lights up on the display panel.

Hint

- WPS (Wi-Fi Protected Setup) is a standard created by the Wi-Fi Alliance allowing you to set up a wireless network easily and securely.
- See [Information] when checking the network settings.

Notes on use

Copyright 2014 Sony Corporation

MULTI CHANNEL AV RECEIVER
STR-DN1050/STR-DN850

Method 2: Setting up a wireless network using the WPS PIN code configuration method

You can set up a connection by entering the WPS PIN (Personal Identification Number) code of the receiver into your wireless LAN router/access point to authenticate the connection between the devices.

1. Select [Settings] - [Network Settings] from the home menu.
2. Select [Internet Settings].
3. Select [Wireless] (*).

* You cannot select [Wireless] if a LAN cable is connected to the receiver.

4. Select [Manual Registration].

5. Select [WPS PIN].

A list of available SSIDs (access points) appears.

6. Select the network name (SSID) you want.

The PIN code (8 digits) of the receiver appears on the TV screen. Leave the PIN code displayed until the connection is complete. (A different PIN code is displayed each time you perform this operation.)

7. Input the receiver's PIN code into the wireless LAN router/access point.

The receiver starts connecting to the network. For details, refer to the messages that appear on the TV screen. After the network settings are complete, [WPS] lights up on the display panel.

Note

- SSIDs that do not support WPS PIN will appear dimmed and cannot be selected in step 5.

Hint

- WPS (Wi-Fi Protected Setup) is a standard created by the Wi-Fi Alliance allowing you to set up a wireless network easily and securely.
- See [Information] when checking the network settings.
- For details on entering the PIN code into the wireless LAN router/access point, refer to the operating instructions of your wireless LAN router/access point.

Method 3: Setting up a network connection by selecting an access point (Access Point Scan method)

To set up the network using this connection method, you will be required to select or enter the following information. Check the following information in advance.

Note

- This connection method requires information such as the network name (SSID) (*1) of the wireless LAN router/access point and the security key (password) (*2) for the network.

*1 SSID (Service Set Identifier) is a name that identifies a particular access point.

*2 This information should be available from a label on your wireless LAN router/access point, from the operating instructions, from the person who set up your wireless network, or from the information provided by your Internet service provider.

1. Select [Settings] - [Network Settings] from the home menu.
2. Select [Internet Settings].
3. Select [Wireless] (*).
The screen for selecting the IP address acquisition method is displayed on the TV screen.
* You cannot select [Wireless] if a LAN cable is connected to the receiver.
4. Select [Access Point Scan].
A list of available SSIDs (access points) appears.
5. Select the network name (SSID) you want.
The security setting display appears on the TV screen.
6. Enter the security key (WEP key, WPA/WPA2 key) using the on-screen keyboard. Press **↑** / **↓** / **←** / **→** and **⏏** to select the characters one by one, then select [Enter] to confirm the security key.
The screen for selecting the IP address acquisition method is displayed on the TV screen.
7. Select [Auto].
8. Select [OK].
The receiver starts connecting to the network. For details, refer to the messages that appear on the TV screen.
After the network settings are complete, [] lights up on the display panel.

If using a fixed IP address

Select [Manual] in step 7. The IP address input display appears on the TV screen.

Enter the value for [IP Address] using the on-screen keyboard. Press **↑** / **↓** / **←** / **→** and **⏏** to select the characters one by one, then select [Enter] to confirm the value.

Enter the values for [Subnet Mask], [Default Gateway], [Primary DNS] and [Secondary DNS], then select [Next].

Note

- The security setting display in step 6 does not appear if your network has not been secured by encryption (using the security key).

Hint

- See [Information] when checking the network settings.

STR-DN1050/STR-DN850

Method 4: Setting up a network connection by adding a new access point (manual setup method)

You can input the network name (SSID) you want manually if it does not appear on the list.

1. Select [Settings] - [Network Settings] from the home menu.
2. Select [Internet Settings].
3. Select [Wireless] (*).
* You cannot select [Wireless] if a LAN cable is connected to the receiver.
4. Select [Manual Registration].
5. Select [Direct Input].
6. Enter the network name (SSID) you want using the on-screen keyboard. Press \uparrow / \downarrow / \leftarrow / \rightarrow and + to select the characters one by one, then select [Enter].
The name you entered is registered.
7. Select the security setting you want.
8. Enter the security key (WEP key, WPA/WPA2 key) using the on-screen keyboard. Press \uparrow / \downarrow / \leftarrow / \rightarrow and + to select the characters one by one, then select [Enter] to confirm the security key.
The screen for selecting the IP address acquisition method is displayed on the TV screen.
9. Select [Auto].
10. Select [OK].
The receiver starts connecting to the network. For details, refer to the messages that appear on the TV screen.
After the network settings are complete, Wi-Fi lights up on the display panel.

If using a fixed IP address

Select [Manual] in step 9. The IP address input display appears on the TV screen.

Enter the value for [IP Address] using the on-screen keyboard. Press \uparrow / \downarrow / \leftarrow / \rightarrow and + to select the characters one by one, then select [Enter] to confirm the value.

Enter the values for [Subnet Mask], [Default Gateway], [Primary DNS] and [Secondary DNS], then select [Next].

Hint

- See [Information] when checking the network settings.

Enjoying audio content stored on a server on the home network (DLNA)

You can play back audio content such as DSD, FLAC, WAV, AAC, MP3, etc., stored on a server on the home network using the receiver.

The server may require some settings to be configured to allow the receiver to play audio content from the server. For details, refer to the operating instructions or help of the respective devices or applications.

A Server

1. Select [Listen] - [Home Network] from the home menu.
The server list appears on the TV screen.
If the last selected item (playlist, album, folder, etc.) appears on the TV screen, press RETURN to return to the server list.
If [No server is available] appears, press OPTIONS and then select [Refresh] to refresh the server list.
2. Select the server.
The content list appears on the TV screen.
If the server is not available, press OPTIONS and then select [Refresh] to refresh the server list.
3. Select the item (playlist, album, folder, etc.) you want.
Repeat this step to narrow down the choices until the item you want appears. The items that are displayed depend on the server you are connected to.
4. Select the track you want to listen to.
Playback starts.

Note

- Audio content with DRM (Digital Rights Management) copyright protection cannot be played on this receiver.
- There may be some tracks that cannot be played on this receiver.

Hint

- If the server device supports the Wake-on-LAN, the receiver turns the server on automatically in step 2. If the server does not support the Wake-on-LAN, turn on the server in advance. For details on the Wake-on-LAN settings or operations of your server, refer to the operating instructions or help of your server.

- If you select a folder (such as an artist folder, genre folder, etc.) and then press the ►|| button, the receiver plays all items in the selected folder.

Enjoying music services offered on the Internet

You can listen to music services offered on the Internet with this receiver.

To use this function, the receiver must be connected to the Internet.

Visit the website below for more information on the music services:

<http://www.sonyentertainmentnetwork.com>

A Internet

B Router

Note

- You may have to register your receiver before using some music services. For details on registration, visit the customer support site of the service provider.

1. Select [Listen] - [Music Services] from the home menu.

The service provider list appears on the TV screen. If the receiver automatically displays the last selected service or station, press RETURN repeatedly until the service provider list appears.

2. Select the music service you want.

Press RETURN to go to the previous directory.

Controlling the music services using the remote control

- Changing the station or service:

Press RETURN to return to the service provider list, then select the service again or select another service.

To return to the playback display, press OPTIONS and select [Now Playing].

- Using various functions while the receiver is selecting or playing a station or service:

Press OPTIONS. The displayed items may vary according to the selected item or directory.

- Select the service options:

While selecting or playing content in the service, press OPTIONS and select [Service Options]. The service options vary depending on the selected services.

Note

- If [No service is available] appears, press OPTIONS and select [Refresh].

Hint

- The receiver displays the last selected service or station when the function is changed to the music services until the receiver is turned off.

Registering a TV SideView device to the receiver

You can control the receiver by touch-pad operation of a mobile device, tablet device, etc. with TV SideView installed. You need to register your mobile device to the receiver as a remote device (for the first time only).

1. Select [Settings] - [Network Settings] from the home menu.
2. Select [TV SideView Setup].
3. Select [Registration of Devices].
4. Select [Start].
The receiver starts to detect TV SideView devices.
Operate the TV SideView device to be registered. Please note that the receiver will exit the registration if no device is detected in 30 seconds.
5. Select [Finish].

Checking/deleting registered devices

For details, see the following topics:

- [Checking registered TV SideView devices \(TV SideView Setup\)](#)
- [Deleting registered TV SideView devices from the device list](#)

Note

- Up to five TV SideView devices can be registered to the device list. If five devices have already been registered, the device cannot be added to the list. In this case, delete unnecessary devices from the list.
- To start DLNA playback from the TV SideView device, the device needs to be able to control the receiver in [DLNA Control Permission]. For details, see "[Setting control permissions to all devices on the home network \(DLNA Control Permission\)](#)."

Hint

- Download TV SideView from one of the following services according to your mobile device:
 - Google Play (for mobile devices Android OS)
 - App Store (for iPhone or iPad)

Controlling the receiver using a smartphone or tablet device (SongPal)

“SongPal” enhances music visually with your smartphone display. You can choose music/audio contents from integrated functions of various device and smartphone, and control various settings intuitively.

A dedicated App for this model is available on both Google Play and App Store.

Search for “SongPal” and download the free App to find out more about the convenient features.

Easy Control app, “SongPal”, supports wireless operation. It allows you to:

- choose music/audio contents from integrated functions of various devices and smartphone.
- control various settings intuitively.
- enhance the music visually with your smartphone display.

1. Download the “SongPal” application to your mobile device.
2. Run “SongPal” and follow the on-screen instructions.
3. Connect your mobile device to the receiver using the NFC function or by manual operation.
After the connection is completed, you can control the receiver using “SongPal.”

Note

- “SongPal” does not support the iPad.

1. Select [Settings] - [HDMI Settings] from the home menu.
2. Select [Control for HDMI].
3. Select [On].
The Control for HDMI function of the receiver is turned on.
4. Press HOME to exit the GUI menu.
5. Select the HDMI input of the receiver and TV to match the HDMI input of the connected device, so that the image from the connected device is displayed.
6. Turn on the Control for HDMI function of the connected device.
For details on setting the TV and connected device, refer to the operating instructions of the respective devices.
7. Repeat steps 5 and 6 for other devices for which you want to use the Control for HDMI function.

Note

- Perform the steps above again if you unplug the HDMI cable or change the connection.

Interlocking other devices using an HDMI connection (“BRAVIA” Sync)

By connecting Sony devices that support the “BRAVIA” Sync using an HDMI cable (not supplied), operations are simplified as follows:

- [Enjoying an input source from a connected device immediately \(One-Touch Play\)](#)
- [Enjoying TV sound from the speakers connected to the receiver \(System Audio Control\)](#)
- [Turning off the receiver and connected devices simultaneously with the TV \(System Power Off\)](#)
- [Selecting the optimum picture quality and sound field automatically \(Scene Select\)](#)
- [Home Theatre Control](#)
- [Operating the receiver menu using the TV remote control \(Remote Easy Control\)](#)
- [Controlling MHL devices](#)

Note

- The “One-Touch Play,” “System Audio Control,” and “System Power Off” functions can be used with non-Sony devices. However, compatibility with all non-Sony devices is not guaranteed.
- The “Scene Select” and “Home Theatre Control” functions are Sony proprietary functions. These cannot operate with non-Sony devices.
- Devices incompatible with “BRAVIA” Sync cannot activate these features.
- The Control for HDMI function does not work on devices connected to the HDMI OUT B jack of the receiver (for STR-DN1050 only).
- Some of the operations may be supported when you connect an MHL device.

Enjoying sound of TV broadcasts from the receiver

If your TV supports the Audio Return Channel (ARC) function, set the receiver by the following procedure to output the sound of the TV from the speakers connected to the receiver.

1. Select [Settings] - [HDMI Settings] from the home menu.
2. Select [Control for HDMI].
3. Select [On].

If you connect to a TV that is not compatible with the Audio Return Channel (ARC) function or you want to select an audio signal using a cable other than an HDMI cable (e.g. via an optical digital cable or an audio cable)

Switch the audio input mode. For details, see “[Switching between digital and analog audio \(Input Mode\)](#).”

Note

- Be sure to turn off the volume of the TV or activate the muting function of the TV.
- If your TV does not support the System Audio Control function, set [Audio Out] to [TV+AMP] in the HDMI Settings menu to output the sound of the TV from the TV speaker and the speakers connected to the receiver.

Switching the monitors that output the HDMI video signals (for STR-DN1050 only)

If you have connected two monitors to the HDMI OUT A and HDMI OUT B jacks, you can switch the output for these two monitors using the HDMI OUTPUT button on the remote control.

1. Turn on the receiver and the two monitors.
2. Press HDMI OUTPUT.

Each time you press the button, the output will be switched as follows:

HDMI A - HDMI B - HDMI A + B - HDMI OFF

Note

- [HDMI A + B] may not work if the compatible video formats of the monitors connected to the HDMI OUT A jack and the HDMI OUT B jack of the receiver are different.
- [HDMI A + B] may not work depending on the playback device you connect.

Switching between digital and analog audio (Input Mode)

When you connect devices to both digital and analog audio input jacks on the receiver, you can fix the audio input mode to either device, or switch from one to the other, depending on the type of material you intend to watch.

1. Press the input buttons to select the input.
2. Press OPTIONS.
3. Select [Input Mode].
 - Auto: Gives priority to digital audio signals. If there is more than one digital connection, HDMI audio signals have priority.
If there is no digital audio signals, analog audio signals are selected. When TV input is selected, priority is given to Audio Return Channel (ARC) signals. If your TV supports the ARC function, digital optical audio signals are selected.
 - Optical: Specifies input of digital audio signals to the OPTICAL jack.
 - Coaxial: Specifies input of digital audio signals to the COAXIAL jack.
 - Analog: Specifies input of analog audio signals to the AUDIO IN (L/R) jacks.

Note

- Depending on the input, [Input Mode] may be dimmed on the TV screen and other modes cannot be selected.
- When [2ch Analog Direct] is being used, audio input is set to [Analog]. You cannot select other modes.

Hint

- You can also use INPUT SELECTOR on the receiver to select the input in step 1.

Using other video/audio input jacks (Input Assign)

You can reassign the COMPONENT VIDEO (*) and OPTICAL/COAXIAL digital audio input jacks to other input if the default settings of the jacks do not correspond to your connected device.

E.g. When connecting a DVD player to the OPTICAL IN 1 (SAT/CATV) and COMPONENT VIDEO IN 1 (SAT/CATV) jacks of the STR-DN1050:

- Assign the OPTICAL IN 1 (SAT/CATV) jack to [BD/DVD].
 - Assign the COMPONENT VIDEO IN 1 (SAT/CATV) jacks to [BD/DVD].
1. Select [Settings] - [Input Settings] from the home menu.
 2. Select the input name you want to assign.
 3. Press ←/→ repeatedly to select [COMPONENT] (*) or [OPT/COAX].
 4. Press ↑/↓ repeatedly to select the jack you want to assign.

* For STR-DN1050 only

Assignable video input jacks (for STR-DN1050 only)

IN 2:

BD/DVD, GAME (*), SAT/CATV, VIDEO 1, VIDEO 2, SA-CD/CD

IN 1:

BD/DVD, GAME, SAT/CATV (*), VIDEO 1, VIDEO 2, SA-CD/CD

None:

BD/DVD (*), GAME, SAT/CATV, VIDEO 1 (*), VIDEO 2 (*), SA-CD/CD (*)

Assignable audio input jacks

OPT 2:

STR-DN1050: BD/DVD, GAME, SAT/CATV, VIDEO 1, VIDEO 2, SA-CD/CD

STR-DN850: BD/DVD, GAME, SAT/CATV, VIDEO, SA-CD/CD

OPT 1:

STR-DN1050: BD/DVD, GAME, SAT/CATV (*), VIDEO 1, VIDEO 2, SA-CD/CD

STR-DN850: BD/DVD, GAME, SAT/CATV (*), VIDEO, SA-CD/CD

COAX:

STR-DN1050: BD/DVD (*), GAME, SAT/CATV, VIDEO 1, VIDEO 2, SA-CD/CD

STR-DN850: BD/DVD, GAME, SAT/CATV, VIDEO, SA-CD/CD (*)

None:

STR-DN1050: BD/DVD, GAME (*), SAT/CATV, VIDEO 1 (*), VIDEO 2 (*), SA-CD/CD (*)

STR-DN850: BD/DVD (*), GAME (*), SAT/CATV, VIDEO (*), SA-CD/CD

* Default setting

Note

- When you assign the digital audio input, the Input Mode setting may change automatically.
- One reassignment is allowed for each input.
- If no sound is output from the assigned jacks, also check the Input Mode settings.

About Custom Preset

You can save various settings with the player, monitor, etc., according to your listening and viewing style. You can register those settings for “one-touch” operation, and then recall the environment created with the settings easily. For example, by saving the settings in the [1: Movie] preset as follows, you can switch the settings of the receiver all at one time without switching each setting for [Input], [Calibration Type], and [Sound Field] individually.

- Input: BD/DVD
- Sound Field: HD-D.C.S.
- Calibration Type: No Change

[Notes on use](#)

Saving the settings to a preset

1. Select [Custom Preset] from the home menu.
2. Press OPTIONS with a preset for which you want to edit settings among from [1: Movie], [2: Music], [3: Party] or [4: Night] selected.
3. Select the menu you want from the options menu.
 - Edit:
Allows you to customize and save the settings to suit your preferences.
 - Import:
Loads the present settings of the receiver and saves those settings with the preset. [Input] and [Volume] are set to [No Change].

Note

- Settings items saved as [No Change] are not changed from the present settings even when you recall the preset. Select [Edit], then uncheck the box for a setting item on the edit screen to set [No Change].

Hint

- You can overwrite [1: Movie], [2: Music], or [3: Party] with the present settings by holding down CUSTOM PRESET 1, CUSTOM PRESET 2 or CUSTOM PRESET 3 for 3 seconds in the same way as you do when you select [Import] from the menu.
- When you select [3: Party], zone 2 is turned on automatically and you can simultaneously enjoy the same music as the main zone.

Using bi-amplifier connections

If you are not using surround back speakers or front high speakers, you can connect the front speakers to the SPEAKERS SURROUND BACK/BI-AMP/FRONT HIGH/FRONT B terminals using a bi-amplifier connection. STR-DN850 is used for illustration purpose in this section.

Connect the jacks on the Lo (or Hi) side of the front speakers to the SPEAKERS FRONT A terminals, and connect the jacks on the Hi (or Lo) side of the front speakers to the SPEAKERS SURROUND BACK/BI-AMP/FRONT HIGH/FRONT B terminals.

Make sure that metal fittings of Hi/Lo attached to the speakers have been removed from the speakers to avoid receiver malfunction.

After you have made the bi-amplifier connection, set [SB Speaker Assign] in the Speaker Settings menu to [Bi-Amp].

Note

- You can only set [SB Speaker Assign] if the speaker pattern is set to a setting that does not have surround back and front high speakers.

Using the sleep timer

You can set the receiver to turn off automatically at a specified time using the menu on the display panel.

1. Press AMP MENU.
The menu is displayed on the display panel of the receiver.
2. Select [SYSTEM] on the display panel.
3. Select [SLEEP] on the display panel.
4. Press \uparrow / \downarrow to set specified time.
Each time you press \uparrow / \downarrow , the display on the display panel changes cyclically as follows:
OFF - 0:30:00 - 1:00:00 - 1:30:00 - 2:00:00
[SLEEP] lights up on the display panel of the receiver when sleep timer is being used.

Hint

- To check the remaining time before the receiver turns off, repeat steps 1 to 4. The remaining time appears on the display panel.
- The sleep timer will be canceled if you perform the following:
 - Update the software of the receiver.
 - Press \mathcal{P} (on/standby).

Viewing information on the display panel

The display panel provides various information on the status of the receiver, such as the sound field.

1. Select the input for which you want to check information.

2. Press DISPLAY repeatedly.

Each time you press DISPLAY, the display will change cyclically as follows:

Index name of the input (*1) - Input you selected - Sound field currently applied (*2) - Volume level - Stream information (*3)

When listening to FM and AM radio

Preset station name (*1) - Frequency - Sound field currently applied (*2) - Volume level

When receiving RDS broadcasts (for European and Australian models only)

Program service name or preset station name (*1) - Frequency, band and preset number - Sound field currently applied (*2) - Volume level

*1 Index name appears only when you have assigned one to the input or preset station. Index name does not appear if only blank spaces have been entered or it is same as the input name.

*2 [PURE.DIRECT] appears on the display panel when the Pure Direct function is activated.

*3 Stream information may not be displayed.

Note

- Characters or marks in some languages may not be displayed.

Performing Auto Calibration

You can perform automatic calibration from where you are sitting.

1. Select [Settings] - [Speaker Settings] from the home menu.
2. Select [Auto Calibration].
3. Follow the instructions on the TV screen, then press **+** to select [Start].
The measurement starts in 5 seconds.
The measurement process will take approximately 30 seconds with a test tone.
When the measurement ends, a beep sounds and the screen switches.
4. Select the item you want.
 - Save: Saves the measurement results and exits the setting process.
 - Retry: Performs the Auto Calibration again.
 - Discard: Exits the setting process without saving the measurement results.For details on the measurement results, see [“Checking Auto Calibration results.”](#)
5. Save the measurement results.
Select [Save] in step 4.

Note

- If an error code or warning message appears on the screen in step 3, see [“List of messages after Auto Calibration measurements.”](#)
- This setting is not available when headphones are connected.

Hint

- The Auto Calibration function will be canceled if you perform the following during the measurement process:
 - Press **1/0**.
 - Press the input buttons on the remote control or turn INPUT SELECTOR on the receiver.
 - Press **⌘**.
 - Press SPEAKERS on the receiver.
 - Change the volume level.
 - Connect headphones.

You can delay the output of audio to minimize the time gap between audio output and a visual display.

This function is useful when using a large LCD or plasma monitor or a projector. You can set the function for each input independently.

1. Select [Settings] - [Audio Settings] from the home menu.
2. Select [A/V Sync].
3. Select the setting you want.
 - HDMI Auto: The time gap between the audio output and visual display of a monitor connected via an HDMI connection will be adjusted automatically. This feature is available only when the monitor supports the A/V Sync function.
 - 0 ms – 300 ms: You can adjust the delay from 0 ms to 300 ms in 10 ms intervals.

Note

- The receiver may play signals at a lower sampling frequency than the actual sampling frequency of the input signals, depending on the audio format.

Adjusting the volume automatically (Advanced Auto Volume)

This receiver can adjust its volume automatically depending on the input signal or content from a connected device. This function is useful, for example, when the sound of commercials is louder than a TV program.

1. Select [Settings] - [Audio Settings] from the home menu.
2. Select [Advanced Auto Volume].
3. Set to [On] or [Off].

Note

- Be sure to reduce the volume level before you turn this function on or off.
- The Advanced Auto Volume function may not work, depending on the audio format.
- This function does not work when [2ch Analog Direct] is being used.

Compressing the dynamic range (Dynamic Range Compressor)

You can compress the dynamic range of the soundtrack. This may be useful when you want to watch movies at a low volume late at night, etc.

This function only works for Dolby Digital and Dolby TrueHD sources.

1. Select [Settings] - [Audio Settings] from the home menu.
2. Select [Dynamic Range Compressor].
3. Select the setting you want.
 - Auto: The dynamic range is compressed automatically when there is a flag in the sound source that recommends using the Dynamic Range Compressor function.
 - On: The dynamic range is compressed as intended by the recording engineer.
 - Off

Passing HDMI signals through (Pass Through)

You can output HDMI signals to the TV even when the receiver is in standby mode.

1. Select [Settings] - [HDMI Settings] from the home menu.
2. Select [Pass Through].
3. Select the setting you want.
 - Auto: The receiver outputs HDMI signals to the TV from the HDMI OUT jack when the TV is turned on while the receiver is in the standby mode.
Sony recommends this setting if you are using a “BRAVIA” Sync-compatible Sony TV. This setting saves power in the standby mode compared to the [On] setting.
 - On (*): The receiver continuously outputs HDMI signals from the HDMI OUT jack when in standby mode.
 - Off: The receiver does not output HDMI signals when in standby mode.
This setting saves power in the standby mode compared to the [On] setting.

* For USA, Canadian, Mexican, and Australian models only

Note

- When the receiver is in standby mode, the I/O (on/standby) indicator on the front panel lights up in amber if [Pass Through] is set to [On] (*) or [Auto].
- When [Auto] is selected, it may take a little more time for the image and sound to be output to the TV than when [On] is selected (*).

* For USA, Canadian, Mexican, and Australian models only

Setting the HDMI audio signal output of connected devices (Audio Out)

You can set the HDMI audio signal output of playback devices connected to the receiver via an HDMI connection.

1. Select [Settings] - [HDMI Settings] from the home menu.
2. Select [Audio Out].
3. Select the setting you want.
 - AMP: HDMI audio signals from playback devices are only output to the speakers connected to the receiver. Multi-channel sound can be played back as it is.
 - TV+AMP: The sound is output from the speaker of the TV and the speakers connected to the receiver.

Note

- Audio signals are not output from the speaker of the TV when [Audio Out] is set to [AMP].
- The sound quality of the playback equipment depends on the sound quality of the TV, such as the number of channels and the sampling frequency, etc. If the TV has stereo speakers, the sound output from the receiver is in the same stereo as the TV, even when playing back multi-channel source.
- When you connect the receiver to a video device (projector, etc.), sound may not be output from the receiver. In this case, select [AMP].

Updating the software (Network Update)

By downloading the latest version of the software, you can take advantage of the newest functions.
For details on available software updates, refer to the customer support site.

1. Select [Settings] - [System Settings] from the home menu.
2. Select [Network Update].
3. Select [Start].

The time required for the downloading process varies depending on the download conditions, such as the speed of the Internet connection, etc.

[Downloading 100%] appears on the TV screen when the download is completed.

When the download is completed, the receiver automatically starts to update the software. During the software updates, the displays on the TV screen and display panel are turned off automatically. Only the I/O (on/standby) indicator on the front panel flashes slowly.

The update process may take about 40 minutes at the longest to complete.

When the update is completed, [COMPLETE] appears on the display panel and the receiver will restart automatically.

Note

- Make sure not to turn off the receiver, disconnect the network cable or perform any operations on the receiver while the update is in progress.
- Once you start the update, you cannot restore the previous software version.
- If you try to update the software when the sleep timer is on, the sleep timer will turn off automatically.

17. PHONES jack

Connect headphones here.

Indicator light above  (on/standby) button (1)

- Green: The receiver is turned on.
- Amber: The receiver is in standby mode, and:
 - [Control for HDMI], [Network Standby] (*1), or [Bluetooth Standby] is set to [On].
 - [Pass Through] is set to [On] (*2) or [Auto].

Indicator turns off when the receiver is in standby mode and [Control for HDMI], [Pass Through], [Network Standby] (*1), and [Bluetooth Standby] are set to [Off].

*1 For USA and Canadian models only

*2 For USA, Canadian, and Australian models only

Note

- The indicator flashes slowly when a software update is in progress.

MULTI CHANNEL AV RECEIVER
STR-DN1050/STR-DN850

Indicators on the display panel

1. Input indicator
Lights up to indicate the current input.
HDMI
The receiver recognizes devices connected via an HDMI IN jack.
ARC
TV input is selected and Audio Return Channel (ARC) signals are detected.
COAX
Digital signals are input through the COAXIAL jack.
OPT
Digital signals are input through the OPTICAL jack.
2. S.OPTIMIZER
Lights up when the Sound Optimizer function is activated.
3. D.C.A.C.
Lights up when the measurement results of the Auto Calibration function are applied.
4. Dolby Digital Surround indicator
The applicable indicator lights up when the receiver is decoding the corresponding Dolby Digital format signals.
 - : Dolby Digital
 - : TrueHD: Dolby TrueHD
5. DTS(-HD) indicator
The applicable indicator lights up when the receiver is decoding the corresponding DTS format signals.
DTS: DTS
DTS-HD: DTS-HD
6. Speaker system indicator
7. Tuning indicator
ST
Lights up when the receiver tunes to a stereo broadcast.
8. HDMI OUT A + B (for STR-DN1050 only)
9. SLEEP

- Lights up when the sleep timer is activated.
- 10. EQ
Lights up when the equalizer is activated.
- 11. D.L.L.
Lights up when the Digital Legato Linear (D.L.L.) function is activated.
- 12. D.R.C.
Lights up when dynamic range compression is activated.
- 13. NEO:6
Lights up when DTS Neo:6 Cinema/Music decoding is activated.
- 14. Dolby Pro Logic indicator
The applicable indicator lights up when the receiver performs Dolby Pro Logic processing. This matrix surround decoding technology can enhance input signals.
 -  PL: Dolby Pro Logic
 -  PLII: Dolby Pro Logic II
 -  PLIIx: Dolby Pro Logic IIx
- 15. ZONE2 (for STR-DN1050 only)
Lights up while the power for zone 2 is turned on.
- 16. A.P.M.
Lights up when the A.P.M. (Automatic Phase Matching) function is activated. You can only set the A.P.M. function in the D.C.A.C. (Digital Cinema Auto Calibration) function.
- 17. UPDATE
Lights up when new software is available.
- 18. Wireless LAN signal strength indicator
Lights up to show the strength of the wireless LAN signal.
 -  : No signal.
 -  : Weak signal.
 -  : Moderate signal.
 -  : Strong signal.
- 19. BT
Lights up when a BLUETOOTH device is connected. Flashes during pairing.
- 20. Wired LAN indicator
Lights up when a LAN cable is connected.
- 21. USB
Lights up when an iPhone/iPod or USB device is detected.

MULTI CHANNEL AV RECEIVER
STR-DN1050/STR-DN850

Remote control

Use the supplied remote control to operate this receiver.

1. I/O (on/standby)

Turns the receiver on or sets it to the standby mode.

Saving power in standby mode

Save power by setting the receiver as follows:

- Set [Control for HDMI], [Pass Through], [Network Standby] (for USA and Canadian models only), and [Bluetooth Standby] to [Off].
- Turn off the receiver in zone 2 (for STR-DN1050 only).

2. Input buttons

Select the device you want to use.

When you press any of the input buttons, the receiver turns on.

3. CUSTOM PRESET

4. A.F.D./2CH, MOVIE, MUSIC

Select a sound field.

5. AMP MENU
Displays the menu to operate the receiver.
6. , , , , 
7. OPTIONS
Display and select items from the options menus.
8. HOME
Displays the menu of the audio/video device that is currently being controlled by the remote control.
9. , ,  (*), 
Skip, play, pause, stop operation.
PRESET +/-
Select preset stations or channels.
10.  + (*)/-
Adjust the volume level of all speakers at the same time.
11. HDMI OUTPUT
Switches the output for two monitors connected to the HDMI OUT A and HDMI OUT B jacks (for STR-DN1050 only).
Turns the output for HDMI TV OUT on/off (for STR-DN850 only).
12. WATCH, LISTEN Select [Watch] or [Listen] on the home menu directly. When pressing these buttons on the Watch or Listen screen, you can move the focus to select the desired input.
13. DISPLAY
View information on the display panel.
14. RETURN
Returns to the previous menu or exits a menu or on-screen guide that is displayed on the TV screen.
15. 
Turns off the sound temporarily. Press the button again to restore the sound.

* The  and + buttons have tactile dots. Use the tactile dots as a reference when operating the receiver.

Note

- The above explanations are intended to serve as examples.
- Depending on the model of your connected device, some functions explained in this section may not work with the supplied remote control.

MULTI CHANNEL AV RECEIVER
STR-DN1050/STR-DN850

Specifications

POWER OUTPUT AND TOTAL HARMONIC DISTORTION: (USA model only)

STR-DN1050:

With 6 ohm loads, both channels driven, from 20 – 20,000 Hz; rated 100 watts per channel minimum RMS power, with no more than 0.09% total harmonic distortion from 250 milliwatts to rated output.

STR-DN850:

With 6 ohm loads, both channels driven, from 20 – 20,000 Hz; rated 95 watts per channel minimum RMS power, with no more than 0.09% total harmonic distortion from 250 milliwatts to rated output.

Amplifier section

Mexican model

STR-DN1050:

Minimum RMS Output Power (*1): 95 W + 95 W (6 ohms, 20 Hz – 20 kHz, THD 0.09%)

Stereo Mode Output Power (*1): 110 W + 110 W (6 ohms, 1 kHz, THD 1%)

Surround Mode Output Power (*1)(*2): 145 W per channel (6 ohms, 1 kHz, THD 0.9%)

Other models

STR-DN1050:

Minimum RMS Output Power (*1): 100 W + 100 W (6 ohms, 20 Hz – 20 kHz, THD 0.09%)

Stereo Mode Output Power (*1): 120 W + 120 W (6 ohms, 1 kHz, THD 1%)

Surround Mode Output Power (*1)(*2): 165 W per channel (6 ohms, 1 kHz, THD 0.9%)

STR-DN850:

Minimum RMS Output Power (*1): 95 W + 95 W (6 ohms, 20 Hz – 20 kHz, THD 0.09%)

Stereo Mode Output Power (*1): 110 W + 110 W (6 ohms, 1 kHz, THD 1%)

Surround Mode Output Power (*1)(*2): 150 W per channel (6 ohms, 1 kHz, THD 0.9%)

*1 Measured under the following conditions (Area: Power requirements):

USA and Canadian models: 120 V AC, 60 Hz

Mexican model: 127 V AC, 60 Hz

European and Australian model: 230 V AC, 50 Hz

*2 Reference power output for front, center, surround, surround back and front high speakers. Depending on the sound field settings and the source, there may be no sound output.

Frequency response

Analog:

10 Hz – 100 kHz, +0.5/-2 dB (with sound field and equalizer bypassed)

Input

Analog:

Sensitivity: 500 mV/50 kilohms

S/N (*3): 105 dB (A, 500 mV (*4))

Digital (Coaxial):

Impedance: 75 ohms

S/N: 100 dB (A, 20 kHz LPF)

Digital (Optical):

S/N: 100 dB (A, 20 kHz LPF)

Output (Analog)

ZONE 2 (for STR-DN1050 only):

Voltage: 2 V/1 kilohm

SUBWOOFER:

Voltage: 2 V/1 kilohm

Equalizer

Gain levels:

±10 dB, 1 dB step

*3 INPUT SHORT (with sound field and equalizer bypassed).

*4 Weighted network, input level.

FM tuner section

Tuning range: 87.5 MHz – 108.0 MHz

Antenna (aerial): FM wire antenna (aerial)

Antenna (aerial) terminals: 75 ohms, unbalanced

AM tuner section

Tuning range (USA, Canada, and Mexico):

530 kHz – 1,710 kHz (Tuning scale: 10 kHz step)

531 kHz – 1,710 kHz (Tuning scale: 9 kHz step)

Tuning range (Europe and Australia):

531 kHz – 1,602 kHz (Tuning scale: 9 kHz step)

Antenna (aerial): Loop antenna (aerial)

Video section

Inputs/outputs

Video:

1 Vp-p, 75 ohms

COMPONENT VIDEO (for STR-DN1050 only):

Y: 1 Vp-p, 75 ohms

PB: 0.7 Vp-p, 75 ohms

PR: 0.7 Vp-p, 75 ohms

80 MHz HD Pass Through

HDMI Video

*1 Supports YUV 4:2:0 / 8 bit format only.

*2 Supports 8 bit format only.

*3 These formats are also supported by MHL connection.

MHL section

Supported MHL version: Incorporates MHL 2

Maximum current: 900 mA

iPhone/iPad/iPod section

DC 5V 1.0 A MAX

USB works with iPhone 5s, iPhone 5c, iPhone 5, iPhone 4s, iPhone 4, iPhone 3GS, iPhone 3G, iPod touch (2nd through 5th generation), iPod classic, and iPod nano (3rd through 7th generation).

BLUETOOTH technology works with iPhone 5s, iPhone 5c, iPhone 5, iPhone 4s, iPhone 4, iPhone 3GS, and iPod touch (4th and 5th generation).

AirPlay works with iPhone, iPad, and iPod touch with iOS 4.3.3 or later, Mac with OS X Mountain Lion, and Mac and PC with iTunes 10.2.2 or later.

You can use “SongPal” app with this receiver via BLUETOOTH or network connection.

You can only charge the iPhone/iPod when they are connected to the USB port while the receiver is turned on.

Network section:

Ethernet LAN: 10BASE-T/100BASE-TX

Wireless LAN:

Compatible standards: IEEE 802.11 b/g

Security:

WEP 64 bit, WEP 128 bit, WPA/WPA2-PSK (AES), WPA/WPA2-PSK (TKIP)

Radio frequency:

2.4 GHz

BLUETOOTH section

Communication system: BLUETOOTH Specification version 3.0

Output: BLUETOOTH Specification Power Class 2

Maximum communication range: Line of sight approx. 10 m (33 feet) (*1)

Frequency band: 2.4 GHz band (2.4000 GHz – 2.4835 GHz)

Modulation method: FHSS (Freq Hopping Spread Spectrum)

Compatible BLUETOOTH profiles (*2): A2DP (Advanced Audio Distribution Profile), AVRCP 1.3 (Audio Video Remote Control Profile)

Supported Codecs (*3): SBC (*4), AAC, aptX

Transmission range (A2DP): 20 Hz – 20,000 Hz (Sampling frequency 44.1 kHz)

*1 The actual range will vary depending on factors such as obstacles between devices, magnetic fields around a microwave oven, static electricity, cordless phone, reception sensitivity, antenna's performance, operating system, software application, etc.

*2 BLUETOOTH standard profiles indicate the purpose of BLUETOOTH communication between devices.

*3 Codec: Audio signal compression and conversion format

*4 Subband Codec

General section

Power requirements

USA and Canadian models: 120 V AC, 60 Hz

Mexican model: 127 V AC, 60 Hz

European model: 230 V AC, 50/60 Hz

Australian model: 230 V AC, 50 Hz

Power consumption

240 W

Power consumption (during standby mode)

STR-DN1050:

0.3 W (When [Control for HDMI], [Pass Through], [Network Standby] (*), and [Bluetooth Standby] are set to [Off], and the receiver in zone 2 is turned off.)

0.7 W (When [Control for HDMI] is set to [On], [Pass Through], [Network Standby] (*), and [Bluetooth Standby] are set to [Off], and the receiver in zone 2 is turned off.)

1.3 W (When [Control for HDMI] and [Bluetooth Standby] are set to [On], [Pass Through] and [Network Standby] (*) are set to [Off], and the receiver in zone 2 is turned off.)

STR-DN850:

0.3 W (When [Control for HDMI], [Pass Through], [Network Standby] (*), and [Bluetooth Standby] are set to [Off].)

0.5 W (When [Control for HDMI] is set to [On], [Pass Through], [Network Standby] (*), and [Bluetooth Standby] are set to [Off].)

1.0 W (When [Control for HDMI] and [Bluetooth Standby] are set to [On], [Pass Through] and [Network Standby] (*) are set to [Off].)

* For USA and Canadian models only

Dimensions (width/height/depth) (Approx.)

STR-DN1050: 430 mm × 172 mm × 329.4 mm (17 in × 6 7/8 in × 13 in)

STR-DN850: 430 mm × 156 mm × 329.4 mm (17 in × 6 1/4 in × 13 in)

including projecting parts and controls

Mass (Approx.)

STR-DN1050: 10.0 kg (22 lb 1 oz)

STR-DN850: 8.0 kg (17 lb 11 oz)

Design and specifications are subject to change without notice.

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types.

"Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been

received by Licensor and subsequently incorporated within the Work.

2. **Grant of Copyright License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. **Grant of Patent License.** Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. **Redistribution.** You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
 - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
 - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
 - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
 - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. **Submission of Contributions.** Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. **Trademarks.** This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. **Disclaimer of Warranty.** Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your

exercise of permissions under this License.

8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

END OF TERMS AND CONDITIONS

APPENDIX: How to apply the Apache License to your work.

To apply the Apache License to your work, attach the following boilerplate notice, with the fields enclosed by brackets "[]" replaced with your own identifying information. (Don't include the brackets!) The text should be enclosed in the appropriate comment syntax for the file format. We also recommend that a file or class name and description of purpose be included on the same "printed page" as the copyright notice for easier identification within third-party archives.

Apache License

Version 2.0, January 2004

<http://www.apache.org/licenses/>

TERMS AND CONDITIONS FOR USE, REPRODUCTION, AND DISTRIBUTION

1. Definitions.

"License" shall mean the terms and conditions for use, reproduction, and distribution as defined by Sections 1 through 9 of this document.

"Licensor" shall mean the copyright owner or entity authorized by the copyright owner that is granting the License.

"Legal Entity" shall mean the union of the acting entity and all other entities that control, are controlled by, or are under common control with that entity. For the purposes of this definition, "control" means (i) the power, direct or indirect, to cause the direction or management of such entity, whether by contract or otherwise, or (ii) ownership of fifty percent (50%) or more of the outstanding shares, or (iii) beneficial ownership of such entity.

"You" (or "Your") shall mean an individual or Legal Entity exercising permissions granted by this License.

"Source" form shall mean the preferred form for making modifications, including but not limited to software source code, documentation source, and configuration files.

"Object" form shall mean any form resulting from mechanical transformation or translation of a Source form, including but not limited to compiled object code, generated documentation, and conversions to other media types. "Work" shall mean the work of authorship, whether in Source or Object form, made available under the License, as indicated by a copyright notice that is included in or attached to the work (an example is provided in the Appendix below).

"Derivative Works" shall mean any work, whether in Source or Object form, that is based on (or derived from) the Work and for which the editorial revisions, annotations, elaborations, or other modifications represent, as a whole, an original work of authorship. For the purposes of this License, Derivative Works shall not include works that remain separable from, or merely link (or bind by name) to the interfaces of, the Work and Derivative Works thereof.

"Contribution" shall mean any work of authorship, including the original version of the Work and any modifications or additions to that Work or Derivative Works thereof, that is intentionally submitted to Licensor for inclusion in the Work by the copyright owner or by an individual or Legal Entity authorized to submit on behalf of the copyright owner. For the purposes of this definition, "submitted" means any form of electronic, verbal, or written communication sent to the Licensor or its representatives, including but not limited to communication on electronic mailing lists, source code control systems, and issue tracking systems that are managed by, or on behalf of, the Licensor for the purpose of discussing and improving the Work, but excluding communication that is conspicuously marked or otherwise designated in writing by the copyright owner as "Not a Contribution."

"Contributor" shall mean Licensor and any individual or Legal Entity on behalf of whom a Contribution has been received by Licensor and subsequently incorporated within the Work.

2. Grant of Copyright License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable copyright license to reproduce, prepare Derivative Works of, publicly display, publicly perform, sublicense, and distribute the Work and such Derivative Works in Source or Object form.
3. Grant of Patent License. Subject to the terms and conditions of this License, each Contributor hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, offer to sell, sell, import, and otherwise transfer the Work, where such license applies only to those patent claims licensable by such Contributor that are necessarily infringed by their Contribution(s) alone or by combination of their Contribution(s) with the Work to which such Contribution(s) was submitted. If You institute patent litigation against any entity (including a cross-claim or counterclaim in a lawsuit) alleging that the Work or a Contribution incorporated within the Work constitutes direct or contributory patent infringement, then any patent licenses granted to You under this License for that Work shall terminate as of the date such litigation is filed.
4. Redistribution. You may reproduce and distribute copies of the Work or Derivative Works thereof in any medium, with or without modifications, and in Source or Object form, provided that You meet the following conditions:
 - (a) You must give any other recipients of the Work or Derivative Works a copy of this License; and
 - (b) You must cause any modified files to carry prominent notices stating that You changed the files; and
 - (c) You must retain, in the Source form of any Derivative Works that You distribute, all copyright, patent, trademark, and attribution notices from the Source form of the Work, excluding those notices that do not pertain to any part of the Derivative Works; and
 - (d) If the Work includes a "NOTICE" text file as part of its distribution, then any Derivative Works that You distribute must include a readable copy of the attribution notices contained within such NOTICE file, excluding those notices that do not pertain to any part of the Derivative Works, in at least one of the following places: within a NOTICE text file distributed as part of the Derivative Works; within the Source form or documentation, if provided along with the Derivative Works; or, within a display generated by the Derivative Works, if and wherever such third-party notices normally appear. The contents of the NOTICE file are for informational purposes only and do not modify the License. You may add Your own attribution notices within Derivative Works that You distribute, alongside or as an

addendum to the NOTICE text from the Work, provided that such additional attribution notices cannot be construed as modifying the License.

You may add Your own copyright statement to Your modifications and may provide additional or different license terms and conditions for use, reproduction, or distribution of Your modifications, or for any such Derivative Works as a whole, provided Your use, reproduction, and distribution of the Work otherwise complies with the conditions stated in this License.

5. Submission of Contributions. Unless You explicitly state otherwise, any Contribution intentionally submitted for inclusion in the Work by You to the Licensor shall be under the terms and conditions of this License, without any additional terms or conditions. Notwithstanding the above, nothing herein shall supersede or modify the terms of any separate license agreement you may have executed with Licensor regarding such Contributions.
6. Trademarks. This License does not grant permission to use the trade names, trademarks, service marks, or product names of the Licensor, except as required for reasonable and customary use in describing the origin of the Work and reproducing the content of the NOTICE file.
7. Disclaimer of Warranty. Unless required by applicable law or agreed to in writing, Licensor provides the Work (and each Contributor provides its Contributions) on an "AS IS" BASIS, WITHOUT WARRANTIES OR CONDITIONS OF ANY KIND, either express or implied, including, without limitation, any warranties or conditions of TITLE, NON-INFRINGEMENT, MERCHANTABILITY, or FITNESS FOR A PARTICULAR PURPOSE. You are solely responsible for determining the appropriateness of using or redistributing the Work and assume any risks associated with Your exercise of permissions under this License.
8. Limitation of Liability. In no event and under no legal theory, whether in tort (including negligence), contract, or otherwise, unless required by applicable law (such as deliberate and grossly negligent acts) or agreed to in writing, shall any Contributor be liable to You for damages, including any direct, indirect, special, incidental, or consequential damages of any character arising as a result of this License or out of the use or inability to use the Work (including but not limited to damages for loss of goodwill, work stoppage, computer failure or malfunction, or any and all other commercial damages or losses), even if such Contributor has been advised of the possibility of such damages.
9. Accepting Warranty or Additional Liability. While redistributing the Work or Derivative Works thereof, You may choose to offer, and charge a fee for, acceptance of support, warranty, indemnity, or other liability obligations and/or rights consistent with this License. However, in accepting such obligations, You may act only on Your own behalf and on Your sole responsibility, not on behalf of any other Contributor, and only if You agree to indemnify, defend, and hold each Contributor harmless for any liability incurred by, or claims asserted against, such Contributor by reason of your accepting any such warranty or additional liability.

FastDelegate

<http://www.codeproject.com/KB/cpp/FastDelegate.aspx>

THE WORK (AS DEFINED BELOW) IS PROVIDED UNDER THE TERMS OF THIS CODE PROJECT OPEN LICENSE ("LICENSE"). THE WORK IS PROTECTED BY COPYRIGHT AND/OR OTHER APPLICABLE LAW. ANY USE OF THE WORK OTHER THAN AS AUTHORIZED UNDER THIS LICENSE OR COPYRIGHT LAW IS PROHIBITED.

BY EXERCISING ANY RIGHTS TO THE WORK PROVIDED HEREIN, YOU ACCEPT AND AGREE TO BE BOUND BY THE TERMS OF THIS LICENSE. THE AUTHOR GRANTS YOU THE RIGHTS CONTAINED HEREIN IN CONSIDERATION OF YOUR ACCEPTANCE OF SUCH TERMS AND CONDITIONS. IF YOU DO NOT AGREE TO ACCEPT AND BE BOUND BY THE TERMS OF THIS LICENSE, YOU CANNOT MAKE ANY USE OF THE WORK.

Definitions.

"Articles" means, collectively, all articles written by Author which describes how the Source Code and Executable Files for the Work may be used by a user.

"Author" means the individual or entity that offers the Work under the terms of this License.

"Derivative Work" means a work based upon the Work or upon the Work and other pre-existing works.

"Executable Files" refer to the executables, binary files, configuration and any required data files included in the Work.

"Publisher" means the provider of the website, magazine, CD-ROM, DVD or other medium from or by which the Work is obtained by You.

"Source Code" refers to the collection of source code and configuration files used to create the Executable Files.

"Standard Version" refers to such a Work if it has not been modified, or has been modified in accordance with the consent of the Author, such consent being in the full discretion of the Author.

"Work" refers to the collection of files distributed by the Publisher, including the Source Code, Executable Files, binaries, data files, documentation, whitepapers and the Articles.

"You" is you, an individual or entity wishing to use the Work and exercise your rights under this License.

Fair Use/Fair Use Rights. Nothing in this License is intended to reduce, limit, or restrict any rights arising from fair use, fair dealing, first sale or other limitations on the exclusive rights of the copyright owner under copyright law or other applicable laws.

License Grant. Subject to the terms and conditions of this License, the Author hereby grants You a worldwide, royalty-free, non-exclusive, perpetual (for the duration of the applicable copyright) license to exercise the rights in the Work as stated below:

You may use the standard version of the Source Code or Executable Files in Your own applications.

You may apply bug fixes, portability fixes and other modifications obtained from the Public Domain or from the Author. A Work modified in such a way shall still be considered the standard version and will be subject to this License.

You may otherwise modify Your copy of this Work (excluding the Articles) in any way to create a Derivative Work, provided that You insert a prominent notice in each changed file stating how, when and where You changed that file.

You may distribute the standard version of the Executable Files and Source Code or Derivative Work in aggregate with other (possibly commercial) programs as part of a larger (possibly commercial) software distribution.

The Articles discussing the Work published in any form by the author may not be distributed or republished without the Author's consent. The author retains copyright to any such Articles. You may use the Executable Files and Source Code pursuant to this License but you may not repost or republish or otherwise distribute or make available the Articles,

without the prior written consent of the Author.

Any subroutines or modules supplied by You and linked into the Source Code or Executable Files this Work shall not be considered part of this Work and will not be subject to the terms of this License.

Patent License. Subject to the terms and conditions of this License, each Author hereby grants to You a perpetual, worldwide, non-exclusive, no-charge, royalty-free, irrevocable (except as stated in this section) patent license to make, have made, use, import, and otherwise transfer the Work.

Restrictions. The license granted in Section 3 above is expressly made subject to and limited by the following restrictions:

You agree not to remove any of the original copyright, patent, trademark, and attribution notices and associated disclaimers that may appear in the Source Code or Executable Files.

You agree not to advertise or in any way imply that this Work is a product of Your own.

The name of the Author may not be used to endorse or promote products derived from the Work without the prior written consent of the Author.

You agree not to sell, lease, or rent any part of the Work. This does not restrict you from including the Work or any part of the Work inside a larger software distribution that itself is being sold. The Work by itself, though, cannot be sold, leased or rented.

You may distribute the Executable Files and Source Code only under the terms of this License, and You must include a copy of, or the Uniform Resource Identifier for, this License with every copy of the Executable Files or Source Code You distribute and ensure that anyone receiving such Executable Files and Source Code agrees that the terms of this License apply to such Executable Files and/or Source Code. You may not offer or impose any terms on the Work that alter or restrict the terms of this License or the recipients' exercise of the rights granted hereunder. You may not sublicense the Work. You must keep intact all notices that refer to this License and to the disclaimer of warranties. You may not distribute the Executable Files or Source Code with any technological measures that control access or use of the Work in a manner inconsistent with the terms of this License.

You agree not to use the Work for illegal, immoral or improper purposes, or on pages containing illegal, immoral or improper material. The Work is subject to applicable export laws. You agree to comply with all such laws and regulations that may apply to the Work after Your receipt of the Work.

Representations, Warranties and Disclaimer. THIS WORK IS PROVIDED "AS IS", "WHERE IS" AND "AS AVAILABLE", WITHOUT ANY EXPRESS OR IMPLIED WARRANTIES OR CONDITIONS OR GUARANTEES. YOU, THE USER, ASSUME ALL RISK IN ITS USE, INCLUDING COPYRIGHT INFRINGEMENT, PATENT INFRINGEMENT, SUITABILITY, ETC. AUTHOR EXPRESSLY DISCLAIMS ALL EXPRESS, IMPLIED OR STATUTORY WARRANTIES OR CONDITIONS, INCLUDING WITHOUT LIMITATION, WARRANTIES OR CONDITIONS OF MERCHANTABILITY, MERCHANTABILITY QUALITY OR FITNESS FOR A PARTICULAR PURPOSE, OR ANY WARRANTY OF TITLE OR NON-INFRINGEMENT, OR THAT THE WORK (OR ANY PORTION THEREOF) IS CORRECT, USEFUL, BUG-FREE OR FREE OF VIRUSES. YOU MUST PASS THIS DISCLAIMER ON WHENEVER YOU DISTRIBUTE THE WORK OR DERIVATIVE WORKS.

Indemnity. You agree to defend, indemnify and hold harmless the Author and the Publisher from and against any claims, suits, losses, damages, liabilities, costs, and expenses (including reasonable legal or attorneys' fees) resulting from or relating to any use of the Work by You.

Limitation on Liability. EXCEPT TO THE EXTENT REQUIRED BY APPLICABLE LAW, IN NO EVENT WILL THE AUTHOR OR THE PUBLISHER BE LIABLE TO YOU ON ANY LEGAL THEORY FOR ANY SPECIAL, INCIDENTAL, CONSEQUENTIAL, PUNITIVE OR EXEMPLARY DAMAGES ARISING OUT OF THIS LICENSE OR THE USE OF THE WORK OR OTHERWISE, EVEN IF THE AUTHOR OR THE PUBLISHER HAS BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES.

Termination.

This License and the rights granted hereunder will terminate automatically upon any breach by You of any term of this

License. Individuals or entities who have received Derivative Works from You under this License, however, will not have their licenses terminated provided such individuals or entities remain in full compliance with those licenses. Sections 1, 2, 6, 7, 8, 9, 10 and 11 will survive any termination of this License.

If You bring a copyright, trademark, patent or any other infringement claim against any contributor over infringements You claim are made by the Work, your License from such contributor to the Work ends automatically.

Subject to the above terms and conditions, this License is perpetual (for the duration of the applicable copyright in the Work). Notwithstanding the above, the Author reserves the right to release the Work under different license terms or to stop distributing the Work at any time; provided, however that any such election will not serve to withdraw this License (or any other license that has been, or is required to be, granted under the terms of this License), and this License will continue in full force and effect unless terminated as stated above.

Publisher. The parties hereby confirm that the Publisher shall not, under any circumstances, be responsible for and shall not have any liability in respect of the subject matter of this License. The Publisher makes no warranty whatsoever in connection with the Work and shall not be liable to You or any party on any legal theory for any damages whatsoever, including without limitation any general, special, incidental or consequential damages arising in connection to this license. The Publisher reserves the right to cease making the Work available to You at any time without notice

Miscellaneous

This License shall be governed by the laws of the location of the head office of the Author or if the Author is an individual, the laws of location of the principal place of residence of the Author.

If any provision of this License is invalid or unenforceable under applicable law, it shall not affect the validity or enforceability of the remainder of the terms of this License, and without further action by the parties to this License, such provision shall be reformed to the minimum extent necessary to make such provision valid and enforceable.

No term or provision of this License shall be deemed waived and no breach consented to unless such waiver or consent shall be in writing and signed by the party to be charged with such waiver or consent.

This License constitutes the entire agreement between the parties with respect to the Work licensed herein. There are no understandings, agreements or representations with respect to the Work not specified herein. The Author shall not be bound by any additional provisions that may appear in any communication from You. This License may not be modified without the mutual written agreement of the Author and You

MULTI CHANNEL AV RECEIVER
STR-DN1050/STR-DN850

PROTECTOR

The receiver will automatically turn off after a few seconds. Check the followings:

- There may be an electrical surge or power failure. Unplug the AC power cord (mains lead) and then plug in the cord again after 30 minutes.
- The receiver is covered and the ventilation holes are blocked. Remove the object covering the ventilation holes of the receiver.
- The impedance of the connected speakers is below the rated impedance range indicated on the back panel of the receiver. Reduce the volume level.
- Unplug the AC power cord (mains lead) and let the receiver cool down for 30 minutes while performing the following troubleshooting:
 - Disconnect all of the speakers and subwoofer.
 - Check that the speaker wires are tightly twisted on both ends.
 - Connect the front speaker first, increase the volume level and operate the receiver for at least 30 minutes until it completely warms up. Then, connect each additional speaker one by one and test each additional speaker until you detect which speaker is causing the protection error.

After checking the above items and fixing any problems, plug in the AC power cord (mains lead) and turn on the receiver. If the problem persists, consult your nearest Sony dealer.

List of messages after Auto Calibration measurements

- Code 30:
Headphones are connected to the PHONES jack on the receiver. Remove the headphones and perform the Auto Calibration again.
- Code 31:
Front speakers are not selected properly. Select the front speakers using SPEAKERS and perform the Auto Calibration again. For details on selecting the front speakers, see [“Selecting the front speakers.”](#)
- Code 32, Code 33:
 - Speakers were not detected or not connected properly.
 - None of the front speakers are connected or only one front speaker is connected.
 - Either the surround left or surround right speaker is not connected.
 - A surround back speaker is connected only to the SPEAKERS SURROUND BACK/BI-AMP/FRONT HIGH/FRONT B R terminal. If connecting only one surround back speaker, connect it to the SPEAKERS SURROUND BACK/BI-AMP/FRONT HIGH/FRONT B L terminal.
 - Either the front high left or front high right speaker is not connected.

The optimizer microphone is not connected. Make sure that the optimizer microphone is connected properly and perform the Auto Calibration again.

If the optimizer microphone is connected properly but the error code still appears, the optimizer microphone cable may be damaged.
- Warning 40:
The measurement process has been completed and a high noise level has been detected. You may be able to achieve better results if you try the process again in a quiet environment.
- Warning 41, Warning 42:
The input from the microphone is too large.
 - The distance between the speaker and the microphone may be too small. Set them further apart and perform the measurement again.
- Warning 43:
The distance and position of a subwoofer cannot be detected. This may be caused by noise. Try performing the measurement in a quiet environment.
- NO WARNING:
There is no warning information.

Copyright 2014 Sony Corporation

MULTI CHANNEL AV RECEIVER
STR-DN1050/STR-DN850

No sound or only a very low level of sound is heard from specific speakers.

- Connect a pair of headphones to the PHONES jack to verify that sound is output from the headphones. If only one channel is output from the headphones, the device may not be connected to the receiver correctly. Check that all of the cables are fully inserted into the jacks on both the receiver and the device.
If both channels are output from the headphones, the front speaker may not be connected to the receiver correctly. Check the connection of the front speaker that is not outputting any sound.
- Make sure you have connected to both the L and R jacks of an analog device, as analog devices require both L and R jack connections. Use an audio cable (not supplied).
- Adjust the speaker level.
- Check that the speaker settings are appropriate for the setup using [Auto Calibration] or [Speaker Connection] in the Speaker Settings menu. Then check that sound is output from each speaker correctly using [Test Tone] in the Speaker Settings menu.
- Some discs have no Dolby Digital Surround EX information. In this case, sound may not be output from some speakers.
- Check that the subwoofer is connected correctly and securely.
- Make sure you have turned on your subwoofer.
- Depending on the selected sound field, sound may not be available from the subwoofer.
- There is no sound from the subwoofer when all speakers are set to [Large] and [Neo:6 Cinema] or [Neo:6 Music] is selected.

MULTI CHANNEL AV RECEIVER
STR-DN1050/STR-DN850

There is no sound from a specific device.

- Check that the device is correctly connected to the corresponding audio input jacks.
- Check that the cable(s) used for the connection is (are) fully inserted into the jacks on both the receiver and the device.
- Check the Input Mode setting.
- Check that the device is correctly connected to the corresponding HDMI jack.
- The HDMI settings of some playback devices need to be configured. Refer to the operating instructions supplied with each device.
- Be sure to use a High Speed HDMI cable when you view images or listen to sound, especially for 1080p, Deep Color (Deep Colour), 4K or 3D transmission.
- Sound may not be output from the receiver while the GUI appears on the TV screen. Press HOME to turn the GUI off.
- Audio signals (format, sampling frequency, bit length, etc.) transmitted from an HDMI jack may be suppressed by the connected device. Check the setup of a device connected via an HDMI cable if the image is poor or the sound does not come out of the device.
- When a connected device does not support the copyright protection technology (HDCP), the image and/or the sound from the HDMI OUT jack may be distorted or may not be output. If this is the case, check the specifications of the connected device.
- Set the image resolution of the playback device to more than 720p/1080i to enjoy High Bitrate Audio (DTS-HD Master Audio, Dolby TrueHD).
- The image resolution of the playback device may need to be configured to certain settings before you can enjoy DSD and Multi Channel Linear PCM. Refer to the operating instructions of the playback device.
- Make sure the TV supports the System Audio Control function.
- If the TV does not have a System Audio Control function, set [Audio Out] in the HDMI Settings menu to:
 - [TV+AMP] if you want to listen to the sound from the TV speaker and receiver.
 - [AMP] if you want to listen to the sound from the receiver only.
- When you connect the receiver to a video device (projector, etc.), sound may not be output from the receiver. In this case, set [Audio Out] to [AMP] in the HDMI Settings menu.
- You cannot listen to the sound of a device connected to the receiver while TV input is selected on the receiver.
 - Be sure to change the input of the receiver to HDMI if you want to watch a program on a device connected via HDMI connection to the receiver.
 - Change the TV channel if you want to watch a TV broadcast.
 - Be sure to select the correct device or input when watching a program from a device connected to the TV. Refer to the section on this operation in the operating instructions of the TV.
- When [2ch Analog Direct] is being used, sound is not output. Use another sound field.
- When using the Control for HDMI function, you cannot control connected devices using the remote control of the TV.
 - Some devices and TVs need to be set up. Refer to the operating instructions supplied with each device and TV.
 - Change the input of the receiver to the HDMI input connected to the device.

- Check that the selected digital audio input jack is not assigned to another input.

STR-DN1050/STR-DN850

Auto Format Direct (A.F.D.)/2-channel sound mode

- Auto Format Direct (A.F.D.) mode: This mode allows you to listen to higher-fidelity sound and select the decoding mode for listening to a 2-channel stereo or monaural sound as multi-channel sound.
- 2-channel sound mode: You can switch the output sound to 2-channel sound regardless of the recording formats of the software you are using, the playback device connected, or the sound field settings of the receiver.

A.F.D. Auto (A.F.D. AUTO):

Presets the sound as it was recorded/encoded without adding any surround effects.

However, for USA and Canada models, this receiver will generate a low-frequency signal for output to the subwoofer when there is no LFE signals.

Multi Stereo (MULTI ST.):

Outputs 2-channel left/right or monaural signals from all speakers. However, sound may not be output from certain speakers depending on the speaker settings.

2ch Stereo (2CH ST.):

The receiver outputs the sound from the front left/right speakers only. There is no sound from the subwoofer.

Standard 2-channel stereo sources completely bypass the sound field processing and multi-channel surround formats are downmixed to 2-channels.

2ch Analog Direct (A. DIRECT):

You can switch the audio of the selected input to 2-channel analog input. This function enables you to enjoy high-quality analog sources.

Only the volume and front speaker level can be adjusted when using this function.

Note

- You cannot select [2ch Analog Direct] while using the BD/DVD, GAME, VIDEO 2, BLUETOOTH, USB, Home Network, Music Services, or AirPlay function.
- [Multi Stereo] does not work when multi-channel audio signals are being received.

MULTI CHANNEL AV RECEIVER
STR-DN1050/STR-DN850

Movie mode

You can take advantage of surround sound simply by selecting one of the receiver's pre-programmed sound fields. They bring the exciting and powerful sound of movie theaters into your home.

HD-D.C.S.:

HD Digital Cinema Sound (HD-D.C.S.) is Sony's new innovative home theater technology using the latest acoustic and digital signal processing technologies. It is based on the precise response measurement data of a mastering studio. With this mode, you can enjoy Blu-ray and DVD movies at home with not only a high-quality of sound but also the best sound ambience, just as the movie's sound engineer intended in the mastering process.

- **Dynamic:** This setting is suitable for an environment which is reverberant but lacks a spacious feel (where sound absorption is not sufficient). It emphasizes the reflection of sound and reproduces the sound of a large, classic movie theater. This emphasizes the spacious feel of a dubbing theater and creates a unique acoustic field.
- **Theater:** This setting is suitable for a general living room. It reproduces the reverberation of sound just like in a movie theater (dubbing theater). It is most appropriate for watching content recorded on a Blu-ray Disc when you want the atmosphere of a movie theater.
- **Studio:** This setting is suitable for a living room with the appropriate sound devices. It reproduces the reverberation of sound provided when a theatrical sound source is remixed for a Blu-ray Disc to a volume level suitable for home use. The level of reflection and reverberation of sound is kept to a minimum, while dialogues and surround effects are reproduced vividly.

PLII Movie:

Performs Dolby Pro Logic II Movie mode decoding. This setting is ideal for movies encoded in Dolby Surround. In addition, this mode can reproduce sound in 5.1-channel format when watching videos of overdubbed or old movies.

PLIIx Movie:

Performs Dolby Pro Logic IIx Movie mode decoding. This setting expands Dolby Pro Logic II Movie or Dolby Digital 5.1 to 7.1 discrete movie channels.

Neo:6 Cinema (Neo:6 CIN):

Performs DTS Neo:6 Cinema mode decoding. Sources recorded in 2-channel format are enhanced up to 7 channels.

MULTI CHANNEL AV RECEIVER
STR-DN1050/STR-DN850

Music mode

You can take advantage of surround sound simply by selecting one of the receiver's pre-programmed sound fields. These bring the exciting and powerful sound of concert halls into your home.

Berlin Philharmonic Hall (BERLIN):

Reproduces the sound characteristics of the Berlin Philharmonic Hall.

Concertgebouw Amsterdam (CONCERTGEB):

Reproduces the sound characteristics produced by the reflectivity of a concert hall in Amsterdam, Netherlands that features a large sound stage.

Musikverein Vienna (MUSIKVEREI):

Reproduces the sound characteristics of a concert hall in Vienna, Austria that features a resonant and unique reverberative sound.

Jazz Club (JAZZ):

Reproduces the acoustics of a jazz club.

Live Concert (CONCERT):

Reproduces the acoustics of a 300-seat live house.

Stadium (STADIUM):

Reproduces the feel of a large open-air stadium.

Sports (SPORTS):

Reproduces the feel of sports broadcasting.

Portable Audio (PORTABLE):

Reproduces clear enhanced sound from your portable audio device. This mode is ideal for MP3s and other compressed music.

PLII Music:

Performs Dolby Pro Logic II Music mode decoding. This setting is ideal for normal stereo sources such as CDs.

PLIIX Music:

Performs Dolby Pro Logic IIX Music mode decoding. This setting is ideal for normal stereo sources such as CDs.

Neo:6 Music (Neo:6 MUS):

Performs DTS Neo:6 Music mode decoding. Sources recorded in 2-channel format are enhanced up to 7 channels. This setting is ideal for normal stereo sources such as CDs.

MULTI CHANNEL AV RECEIVER
STR-DN1050/STR-DN850

When headphones are connected

You can only select this sound field if headphones are connected to the receiver.

Headphone (2ch) (HP 2CH) :

This mode is selected automatically if you use headphones (except when [2ch Analog Direct] is selected). Standard 2-channel stereo sources completely bypass the sound field processing and multi-channel surround formats are downmixed to 2 channels except LFE signals.

Headphone (Direct) (HP DIRECT) :

This mode is selected automatically if you use headphones when [2ch Analog Direct] is selected.
This mode outputs analog signals without processing by the equalizer, sound field, etc.

STR-DN1050/STR-DN850

Compatible formats with DLNA

The music file formats that can be played back by this receiver are as follows:

MP3 (MPEG 1 Audio Layer-3):

32 kbps – 320 kbps, VBR

AAC (*):

16 kbps – 320 kbps, CBR, VBR

WMA9 Standard (*):

40 kbps – 320 kbps, CBR, VBR

WAV:

8 kHz – 192 kHz, 16/24 bit PCM

FLAC:

44.1 kHz – 192 kHz, 16/24 bit FLAC

AIFF:

8 kHz – 192 kHz, 16/24 bit PCM

ALAC:

32 kHz - 96 kHz, 16/24 bit ALAC

DSD (for STR-DN1050 only):

2.8 MHz, 1 bit DSD

* The receiver does not play files encoded with DRM.

Note

- Compatibility with all encoding/writing software, recording devices and recording media cannot be guaranteed.

Enjoying TV sound from the speakers connected to the receiver (System Audio Control)

You can use the System Audio Control function as follows:

- The sound of the TV is output from the speakers connected to the receiver if you turn the receiver on while sound is being output from the TV speaker. If you turn off the receiver, the sound is output from the TV speaker.
- When you adjust the TV volume, the System Audio Control function adjusts the volume of the receiver simultaneously.

Note

- When [Control for HDMI] is set to [On], the [Audio Out] settings in the HDMI Settings menu will be set automatically based on the System Audio Control settings.

Hint

- You can also operate this function using the TV menu. For details, refer to the operating instructions of the TV.

Turning off the receiver and connected devices simultaneously with the TV (System Power Off)

If the TV, receiver and any connected devices are connected to each other via HDMI connections, you can turn them off simultaneously by pressing either of the following buttons:

-  on the remote control of the TV
-  on the remote control of the receiver

Note

- Turn on the power supply interlock function of the TV before using the System Power Off function. For details, refer to the operating instructions of the TV.
- Some connected devices may not be turned off depending on their specifications. For details, refer to the operating instructions of the connected device.

Controlling MHL devices

By connecting an MHL device with an MHL cable (not supplied), you can use One-Touch Play and Remote Easy Control.

Note

- This function allows communication with Sony “BRAVIA” Sync-compatible TVs using an HDMI cable (not supplied).
- This function may not work depending on the connected MHL device.
- This function can only work when:
 - The receiver is turned on.
 - [Control for HDMI] is set to [On].
 - The MHL device is connected via an MHL cable (not supplied) to the HDMI/MHL (VIDEO 2 IN) (for STR-DN1050 only), HDMI VIDEO 1 IN (MHL) (for STR-DN1050 only) or HDMI VIDEO IN (MHL) (for STR-DN850 only) jack.

One-Touch Play

The receiver switches to the appropriate input when you connect, play content, etc. from your MHL device.

Remote Easy Control

You can use the / / / , , RETURN, OPTIONS, HOME (*), , , and / buttons on the remote control to control your MHL device.

* Hold down HOME to display the home menu of the MHL device.

Before you perform Auto Calibration

Before you perform Auto Calibration, check the following items:

- Set up and connect the speakers.
- Do not connect any microphones other than the supplied optimizer microphone to the AUTO CAL MIC jack.
- If using a bi-amplifier connection or speakers with a front B connection, set the assignment for the SPEAKERS SURROUND BACK/BI-AMP/FRONT HIGH/FRONT B terminals properly. For details, see “[Selecting the speaker pattern and setting the assignment for the speaker terminals \(Speaker Connection/SB Speaker Assign\)](#).”
- Set the speaker output to a setting other than [SPK OFF]. For details, see “[Selecting the front speakers](#).”
- Disconnect the headphones.
- Remove any obstructions between the optimizer microphone and the speakers.
- For accurate measurement, make sure the environment is quiet and free from noise.

Note

- The speakers emit very loud sound during the calibration and the volume cannot be adjusted. Be considerate of your neighbors and any children who are present.
- If the muting function has been activated before you perform Auto Calibration, the muting function will shut off automatically.
- It may not be possible to take the correct measurements or to perform Auto Calibration at all if special speakers such as dipole speakers are used.

Selecting the front speakers

You can select the front speakers you want to operate.
Be sure to use the buttons on the receiver to perform this operation.

1. Press SPEAKERS on the receiver repeatedly to select the front speaker system you want to operate.

The indicators on the display panel shows which set of terminals are selected.

- SP A :
Speakers connected to the SPEAKERS FRONT A terminals.
- SP B (*):
Speakers connected to the SPEAKERS SURROUND BACK/BI-AMP/FRONT HIGH/FRONT B terminals.
- SP A+B (*):
Speakers connected to both the SPEAKERS FRONT A and SPEAKERS SURROUND BACK/BI-AMP/FRONT HIGH/FRONT B terminals (parallel connection).
- (None):
[SPK OFF] appears on the display panel. No audio signals are output from any speaker terminals.

* To select [SP B] or [SP A+B], set the assignment for the SPEAKERS SURROUND BACK/BI-AMP/FRONT HIGH/FRONT B terminals to [Front B] by using [SB Speaker Assign] in the Speaker Settings menu.

Note

- This setting is not available when headphones are connected.

About Auto Calibration

Auto Calibration allows you to perform automatic calibration as follows.

- Check the connection between each speaker and the receiver.
- Adjust the speaker level.
- Measure the distance of each speaker from your seating position. (*1)
- Measure the speaker size. (*1)
- Measure the frequency characteristics (EQ). (*1)
- Measure the frequency characteristics (Phase). (*1, *2)

*1 The measurement result is not utilized when [2ch Analog Direct] is selected.

*2 The measurement result may be not utilized, depending on the audio formats.

Note

- The D.C.A.C. is designed to achieve proper sound balance for your room. However, you can adjust the speaker levels manually according to your preference using [Test Tone].

Confirming active subwoofer setup

- When a subwoofer is connected, turn on the subwoofer and turn up the volume prior to activating the subwoofer. Turn the LEVEL to just before the mid-point.
- If you connect a subwoofer with a crossover frequency function, set the value to maximum.
- If you connect a subwoofer with an auto standby function, set it to off (deactivated).

Note

- Depending on the characteristics of the subwoofer you are using, the setup distance value may be different from the actual position.

Checking Auto Calibration results

To check error codes or warning messages received in [Auto Calibration], proceed with the following steps:

If an error code appears

Check the error and perform Auto Calibration again.

1. Select [Retry].
2. Follow the instructions on the TV screen and then press **+** to select [Start].
The measurement starts in five seconds.
The measurement process will take approximately 30 seconds with a test tone.
When the measurement ends, a beep sounds and the screen switches.
3. Select the item you want.
 - Save: Saves the measurement results and exits the setting process.
 - Retry: Performs the Auto Calibration again.
 - Discard: Exits the setting process without saving the measurement results.
4. Save the measurement results.
Select [Save] in step 3.

If a warning message appears

Check the warning message and select [OK]. For details on the warning messages, see “[List of messages after Auto Calibration measurements.](#)”

Hint

- The measurement results may vary depending on the position of the subwoofer. However, continuing to use the receiver with that value does not cause problems.
