## Install the Mainboard

Follow the steps below in order to perform the installation of your new **SY-5EMA+** Super 7 ™ Mainboard.

### Step 1.   Install the CPU

To mount the Pentium® class processor that you have purchased separately, follow these instructions.

### *CPU Mount Procedure*

1.   Lift the socket handle up to a vertical position.

2.   Align the blunt edge of the CPU with the matching pinhole distinctive edge on the socket.

3.   Seat the processor in the socket completely and without forcing.

4.   Then close the socket handle to secure the CPU in place.

Remember to connect the CPU Cooling Fan to the appropriate power connector on the Mainboard. *The fan is a key component that will ensure system stability. The fan prevents overheating, therefore prolonging the life of your CPU.*

# **4** *The SOYO CD*

Your SY-5EMA+ Super 7 ™ Mainboard comes with a CD-ROM labeled "SOYO CD." The SOYO CD contains the user's manual file for your new Mainboard, the drivers software available for installation, and a database in HTML format with information on SOYO Mainboards and other products.

### *Step 1.* Insert the SOYO CD into the CD-ROM drive
The SOYO CD will auto-run, and the SOYO CD Start Up Menu will display as shown below.

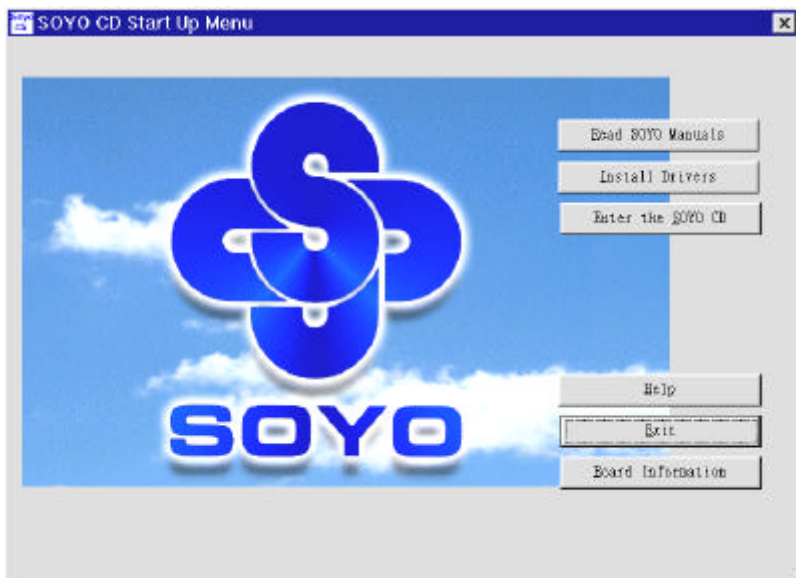

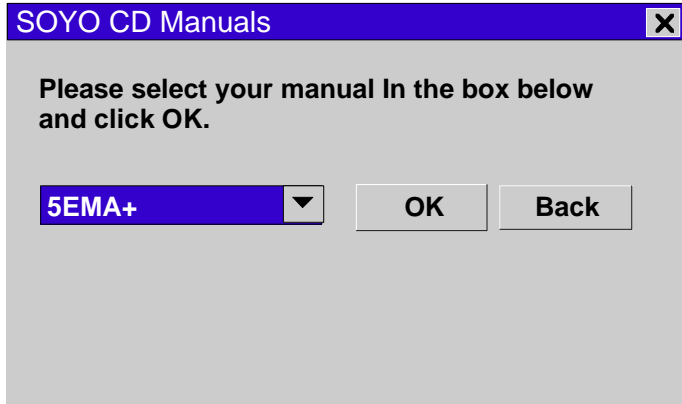

**(SOYO CD Start Up Program Menu)**

The SOYO CD Start Up Program automatically detects which SOYO Mainboard you own and displays the corresponding model name.

### *Step 2.* Read SOYO [model name] Manual
Click the *Read Manual* button to open the user's manual file of your Mainboard.

The SOYO CD

12

Please note that if the Start Up program was unable to determine which SOYO Mainboard you own, the manual selection menu will pop up, as shown below. Then select the user's manual file that corresponds to your Mainboard model name and click *OK.*

| SOYO CD Manuals | ☒ |
| --- | --- |

**Please select your manual In the box below and click OK.**

| 5EMA+ ▼ | **OK** | **Back** |

**(Manual Selection Menu)**

The user's manual files included on the SOYO CD are in PDF (Postscript Document) format. In order to read a PDF file, the appropriate Acrobat Reader software must be installed in your system.

*Note:* The Start Up program automatically detects if the Acrobat Reader utility is already present in your system, and otherwise prompts you on whether or not you want to install it. You must install the Acrobat Reader utility to be able to read the user's manual file. Follow the instructions on your screen during installation, then once the installation is completed, restart your system and re-run the SOYO CD.

### *Step 3.* Installation procedure for Windows 95/98

The following describes the best way of installing Windows 95 or Windows 98 on your 5EMA+ mainboard:

➢ The following BIOS default settings should not be changed:
1. The 'USB Controller' item under 'Chipset features' is set to enabled.
2. The 'USB Assigned IRQ' item under 'PnP/PCI Configuration is set to enabled.

You MUST have these two items enabled for Windows 95/98 to run properly on your system.
➢ Install Windows 95/98
➢ After installation of windows, you will need to install the ETEQ drivers. Follow the instruction below.

The SOYO CD

13

Click the *Install Drivers* button to display the list of drivers that can be installed on your mainboard. The start-up program displays the drivers available for the 5EMA+ and the Windows version you use. For Windows 95 four drivers will be listed (see 'Driver Installation Menu' below), for Windows 98 three drivers will be listed (the ACPI drivers will be left out). We recommend you to install all drivers, and to do so in the right sequence (top to bottom).

If you want to see all the drivers available on the SOYO –CD, click the *Display all drivers on the SOYO CD* button. Do NOT install drivers that are not suitable for you board, otherwise your system may crash.

---

**Driver Installation**  ☒

Please select the driver you want to install and click OK, you will have to restart your system after installation. Only the drivers that are relevant to your board are displayed initially.

```

ETEQ AGP Drivers
```

| Cancel | Display all drivers on the SOYO CD | OK |

---

**(Driver Installation Menu)**

Select which driver you want to install and click *OK,* or click *Cancel* to return to the main menu. When the installation program of a driver starts running the SOYO-CD will exit. After finishing the installation, restart the SOYO-CD and install the next driver.

*Note:* Once you have selected a driver, the system will automatically exit the SOYO CD to begin the driver installation program. When the installation is complete, most drivers require to restart your system before they can become active.

The SOYO CD

14

***Step 4.***    Enter the SOYO CD

Click the ***Enter SOYO CD*** button to enter the SOYO HTML database. The Start Up program will activate the default HTML browser installed on your system (for example, Internet Explorer or Netscape) to visualize the contents of the SOYO CD.

The SOYO CD contains useful information about your Mainboard and other SOYO products available in as many as eleven different languages. For your convenience, this information is available in HTML format, similar to the format widely used on the Internet.

**(SYO CD HTML Database in English\*)**
(\* The list of menu options may vary between languages)

***Note:*** If no HTML browser is installed on your system, the Start Up program will prompt you on whether or not you would like to install the Internet Explorer\* browser. Click YES to install the HTML browser. After the installation is complete, please restart your system. Then re-run the SOYO CD and you will be able to browse the SOYO HTML database.
