# Sunbeam's Safety Precautions

### SAFETY PRECAUSTIONS FOR YOUR SUNBEAM COFFEE GRINDER

- Check the grinding bowl for the presence of foreign objects before using.
- Always operate the grinder with the ground coffee container properly inserted in the grinder.
- Do not place your hand in or near the burrs while the grinder is in operation.
- Always place the unit on a flat, level surface.
- Switch off and unplug at power point before cleaning.
- Do not attempt to re-grind ground coffee.

Sunbeam are very safety conscious when designing and manufacturing consumer products, but it is essential that the product user also exercise care when using an electrical appliance. Listed below are precautions which are essential for the safe use of an electrical appliance:

- Read carefully and save all the instructions provided with an appliance.
- Always turn the power off at the power outlet before you insert or remove a plug. Remove by grasping the plug do not pull on the cord.
- Turn the power off and remove the plug when the appliance is not in use and before cleaning.
- Do not use your appliance with an extension cord unless this cord has been checked and tested by a qualified technician or service person.
- Always use your appliance from a power outlet of the voltage (A.C. only) marked on the appliance.
- This appliance is not intended for use by young children or infirm persons unless they have been adequately supervised by a responsible adult to ensure that they can use the appliance safely.

- Young children should be supervised to ensure that they do not play with the appliance.
- Never leave an appliance unattended while in use.
- Do not use an appliance for any purpose other than its intended use.
- Do not place an appliance on or near a hot gas flame, electric element or on a heated oven. Do not place on top of any other appliance.
- Do not let the power cord of an appliance hang over the edge of a table or bench top or touch any hot surface.
- Do not operate any electrical appliance with a damaged cord or after the appliance has been damaged in any manner. If damage is suspected, return the appliance to the nearest Sunbeam Appointed Service Centre for examination, repair or adjustment.
- For additional protection, Sunbeam recommend the use of a residual current device (RCD) with a tripping current not exceeding 30mA in the electrical circuit supplying power to your appliances.
- Do not immerse the appliance in water or any other liquid unless recommended.

If you have any concerns regarding the performance and use of your appliance, please visit www.sunbeam.com.au or contact the Sunbeam Consumer Service Line.

Ensure the above safety precautions are understood.

## Features of your Conical Burr Coffee Grinder

#### 250g Bean hopper

The 250g capacity bean hopper has a shutter release mechanism for easy removal and preventing accidental spills. It allows the user to transfer any un-used beans to an ideal storage unit to preserve freshness.

#### Grind adjustment collar

Large and easy to use, the collar has a widerange of 25 grind settings. The coffee maker can select a fine grind to suit commercial espresso or adjust the setting for other brewing styles – from Turkish to plunger. With such precise settings the user controls the particle size and ultimately the quality of the brew.

#### Grind on demand button

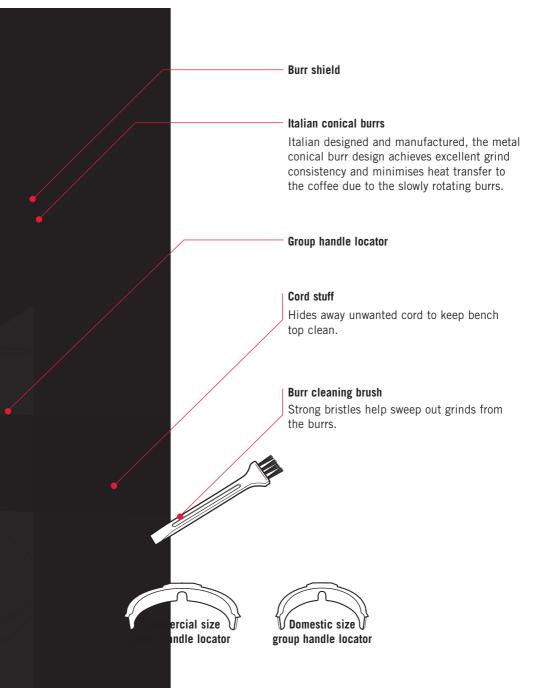

Position the group handle into the group handle locator, push against the button and freshly ground coffee will flow directly into the basket, pull the handle away and grinding will stop.

#### Preparation mat

Positioned under the grinding spout the preparation mat is ideal for catching loose coffee grinds while filling directly into the group handle.

#### **Rubber feet**

The non-slip rubber feet ensure the grinder remains stable and prevents slipping on the bench top during use.

# Operating your Conical Burr Coffee Grinder

Before using the coffee grinder, wipe the base exterior with a damp cloth. Wash the bean hopper, hopper lid and ground coffee container in warm soapy water, then rinse and dry.

**Note:** Do not immerse the burrs in water or any other liquid.

**Note:** Do not place any parts of the coffee grinder in the dishwasher.

- 1. Place the coffee grinder on a dry, level surface.
- 2. To attach the bean hopper, position bean hopper onto the top of the motor base, push down and turn clockwise. See figure 1.

Figure 1

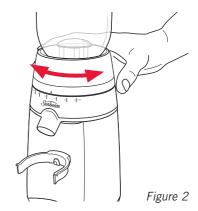

3. Fill the bean hopper with coffee beans.

**Tip:** Remember to keep the hopper full at all times. Having an even weight bearing down on the burrs is important to ensure a consistent grind.

**Note:** This coffee grinder is intended to grind whole coffee beans only.

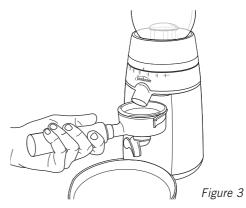

- 4. Place the hopper lid onto the bean hopper.
- 5. Plug the power cord into a 230-240V AC power outlet and switch the power on.

6. Select the grind by turning the grind adjustment collar to the desired setting, see figure 2.

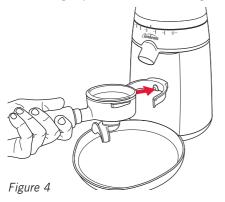

Refer to the grind setting table on page 6 to assist you in selecting the correct grind level for the desired brewing method.

7. Position the group handle into the group handle locator, see figure 3.

**Note:** There are two group handle locators provided a smaller size to fit domestic handles and a larger size for commercial handles.

8. To grind coffee, press the group handle against the button located in the centre of the group handle locator, see figure 4.

9. When the basket is full, pull the group handle off the button. Collapse the coffee in the basket by tapping it on the bench and repeat until the desired amount of coffee has been ground.

**Note:** Foreign objects like stones or twigs can sometimes be found in whole bean coffee and can cause the coffee grinder to jam. Should this occur refer to the Care and Cleaning section on page 7 as these objects need to be removed immediately.

# Adjusting the Grind Setting

#### A starting point for gring settings:

SETTING	BREWING METHOD
2 – 6	Turkish
12 – 16	Espresso
12 – 16	Stove Top
20 – 23	Drip Filter
20 – 23	Plunger

**Note:** The settings noted in the table above are a starting guide only. For example the setting for espresso will vary depending on the quality and roast degree of the beans and the type of espresso extraction desired.

The wide-range of 25 grind settings allows for precision adjustment. The coffee maker has complete control of the particle size and ultimately the quality of the resulting brew.

Some things to remember when using the coffee grinder;

- The smaller the particle size the longer it will take to grind.
- When using the finer settings the coffee may become stuck, we recommend tapping on the lid of the bean hopper to dislodge any clumps of coffee blocking the flow.
- After long periods of using the finer settings we recommend removing the upper burr and sweeping away any residual coffee to avoid clogging. See the Care and Cleaning section on page 7 for more details.

#### Tips

 Select the correct grind for the brewing method you are using. 25 grind settings are available to ensure precision adjustment. Setting 1 produces the finest grind, 12 to 16 are medium grinds appropriate for espresso coffee makers, and 25 is the coarsest grind you can achieve. Experiment with the grind settings to achieve the ideal brew that best suits your tastes.

- 2. For drip filter coffee machines, a good starting point is to use 8 grams (1 scoop) of coffee for every 4 cups of brew water as measured with the carafe. Finer grinds usually require less coffee, but using too fine a grind will result in a brew that is bitter in flavour.
- 3. For those that prefer weaker coffee, continue to use the recommended amount of ground coffee and then dilute the resulting brew with fresh hot water. Doing this will maximise flavour and minimise bitterness.
- 4. Coffee that is ground too fine for a particular brewing process will result in over-extraction and the coffee will taste bitter. On the other hand, coffee that is too coarse for a particular brewing method will result in under-extraction and the coffee will be thin and poor in flavour.
- 5. Once coffee is ground it quickly loses its flavour and aroma. For the best results we recommend you grind beans immediately prior to brewing.
- 6. Buy fresh whole coffee beans weekly.
- 7. To retain freshness, store whole coffee beans in an airtight container in a cool, dark, dry place. It is not recommended that you store beans in the grinder's bean hopper for a prolonged period.
- 8. To ensure the best results from the coffee grinder clean the bean hopper and conical burrs regularly.

#### **Always Remember**

PROBLEM	DESCRIPTION	RESULT
OVER- EXTRACTION	Over development of flavour particles (sugars etc.)	Sharp, burnt, bitter
UNDER- EXTRACTION	Under development of flavour particles	Thin, watery, weak

### Care and Cleaning

#### **Important Notes:**

- Spots and marks on the surface of the burrs are part of the hardening process. These marks do not affect the performance of the grinder or the taste of the coffee.
- Ensure the coffee grinder is switched off and unplugged from the power outlet prior to cleaning.
- Do not immerse the motor base of the coffee grinder in water.
- Do not immerse any part of the burr assembly in water or any other liquid.
- Do not place any parts of the coffee grinder in the dishwasher.
- Do not use abrasive cleansers or scouring pads.

### Cleaning the motor base, bean hopper and coffee container

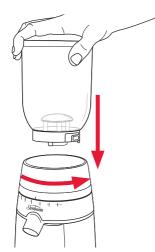

Figure 5

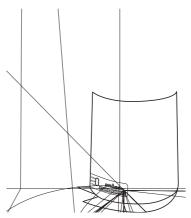

1. Remove the bean hopper from the motor base and store unused beans in an airtight container to preserve their freshness, see figure 5.

- 2.Clean the motor base exterior using a damp soft sponge with mild detergent and wipe dry.
- 3. Wash the bean hopper and coffee container in warm soapy water, then rinse and dry.

#### **Cleaning the burrs**

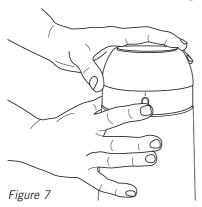

If the coffee grinder is used frequently (every day), the burrs need to be cleaned every three weeks to ensure best performance of the coffee grinder. Regular cleaning helps the burrs achieve consistent grinding results, which is especially important when grinding coffee for espresso.

- 1. Ensure the coffee grinder is switched off and unplugged from the power outlet. Remove the bean hopper from the motor base, push down and turn anti-clockwise. See figure 5.
- 2. To remove the top burr turn the grind adjustment collar in an anti-clockwise direction until it stops, see figure 6.

### Care and Cleaning (continued)

3. Press and hold down the 'UNLOCK' button at the rear of the motor base and with the other hand turn the grind adjustment collar anti-clockwise until it stops and the graphic line on the collar is aligned with the line on the motor base, see figure 7.

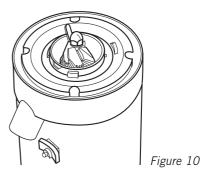

4. Lift out the top burr from the grind adjustment collar using the handle, see figure 8. Clean using the burr-cleaning brush.

5. Lift the grind adjustment collar away from the motor base and clean with the brush, see figure 9.

6.Clean the bottom burr using the burrcleaning brush, see figure 10.

- 7.Once both burrs are cleaned, return the grind adjustment collar to its position in the motor base.
- 8. With the grind adjustment collar in hand align the graphic line on the collar with the line on the rear of the motor base, press down.

9. Replace the top burr back into position in the grind adjustment collar. Ensure the marker on the top burr is aligned with the marker inside the grind adjustment collar and push firmly into place. Turn clockwise to the desired grind setting.

#### Adjusting the burrs for wear

The conical burrs are made of tool hardened steel for extra long life. However after prolonged use the burrs will require adjustment to compensate for wear. A sign of this is when the grinds are not as fine as they used to be, check by rubbing some of the grinds between two fingers or for espresso the extraction will also show signs that the grind needs adjusting.

#### **Replacing the burrs**

To inquire about having the burrs replaced contact the Sunbeam Consumer Hotline on FreeCall

#### Australia

1800 025 059

#### New Zealand

0800 786 232

# 12 Month Replacement Guarantee

We are so confident of the quality of our product, should this appliance develop any malfunction within 12 months of purchase (3 Months commercial use) due to faulty materials or manufacture, we will replace it for you absolutely free.

Should you experience any difficulties with your appliance, please phone our free call customer service line for advice on 1800 025 059 in Australia, or 0800 786 232 in New Zealand.

Alternatively, simply return the faulty appliance to your place of purchase, along with your purchase receipt.

Your Sunbeam 12 Month Replacement Guarantee naturally does not cover misuse or negligent handling, and excludes breakables such as glass or ceramic items, and normal wear and tear.

Similarly, your 12 Month Replacement Guarantee does not cover damage to household surfaces as a result of water or other substances leaking from your appliance, nor does it cover freight costs.

In Australia, this guarantee is additional to the conditions and guarantees which are mandatory as implied under the Trade Practices Act 1974 and State and Territory legislation.

#### **Sunbeam Service Centres**

Sunbeam has established a network of authorised service centres throughout Australia and New Zealand to provide quick, convenient service for our customers.

Should your appliance require repair or service, either during or after the guarantee period, contact your nearest service centre.

For a complete list of Sunbeam's authorised service centres:
