5. Esc button: Press to return to the previous screen.

Connecting to the PC

Connect the tablet to a PC with Windows XP/ Vista /7, Linux, MAC operating system. The PC will automatically recognize the device.

In the tablet you will see a connection screen. To correctly connect the device with the computer, press “Turn on USB storage.”

Touch “Turn on USB storage” and then you can copy files to/from your PC or other external devices.

Note: For the first time you connect this device to your computer, you might be asked to install driver of your device so that it can be recognized by your computer. Please follow the installation guide or contact your computer service provider for help.

" USB debugging in settings->developers options should be off/disabled for USB Storage."

Touch “Turn off USB storage” and then safely remove your device from computer after file management to prevent data lose

Once the computer has detected the device, it will operate like a portable disk. Hence file transfer will be carried out in the same way as with any other storage device (for example selecting and dropping files to the unit, or copying and pasting files in the tablet).

Important Note:

1) Enable Auto Connect in “Connect to PC” in the setting menu, so that whenever you plug the device to the PC the system will automatically get connected.

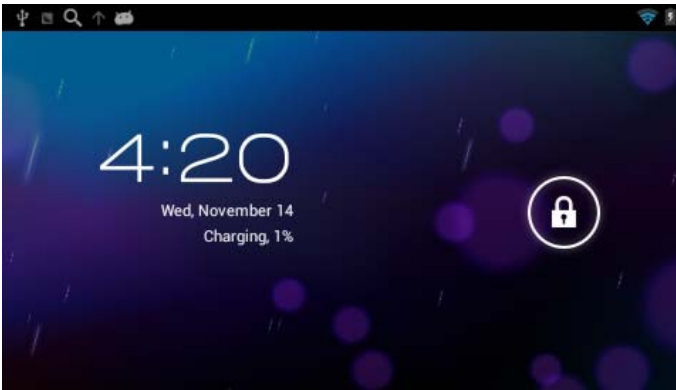

2) Don't disconnect the device during the data copying or deleting process as this could cause the unit to malfunction and damage the software. Disconnect it using the “Safely remove hardware” icon at the bottom on the task bar.

3) You should use the Mini USB port-marked as “USB DEVICE” on the tablet for establishing connectivity with the PC.

GETTING STARTED:

Turning the tablet On/Off

◆ To turn “ON” press and hold the <POWER> switch down until the screen turns on. It takes approximately one minute for the system to boot

The device will go to the locking screen mode as shown above, slide the lock icon to top to unlock the screen.

The below screen appears after unlocking.

- ◆ Short press the <POWER> switch to turn “OFF” the display, short press again to turn on the display
- ◆ Long press the <POWER> switch in the unlock mode to display Power Off option.

Pressing the Power off option will shut down the tablet

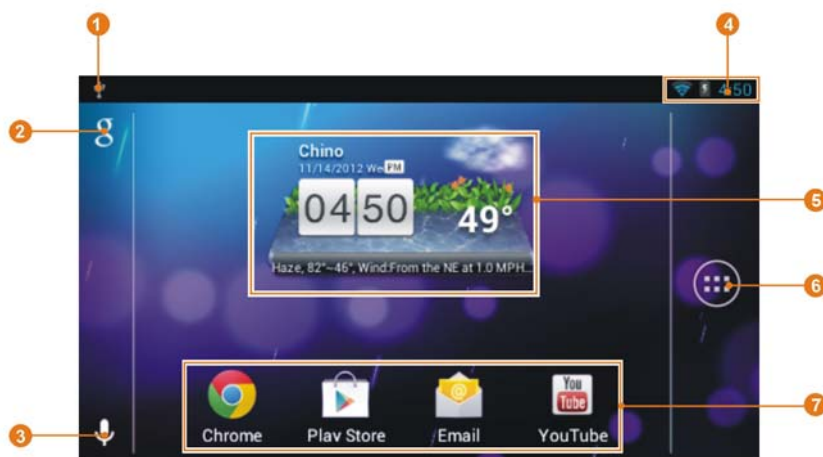

Home Screen

The Home screen is the Starting point for using device.

1. **Create a shortcut icon:** Touch and hold an application icon, and drag it to the home screen to create a shortcut icon on home screen.
2. **Delete a shortcut icon:** Touch and hold the shortcut icon until there is an “X Remove” icon appearing on the top edge of the screen, drag the application shortcut icon to the “X Remove” icon and the application will be deleted from your home screen.

 **Note:** You can only create shortcut icon of an application but not a folder contains more than one application.

3. You can create 5 home screens at most. To navigate with different screen, just touch the blank area of the screen and slide left or right.

- ① Usb icon: External memory is connected
- ② Google Search: Touch to search with google home page
