3 Insert the other modular plug into the

telephone wall jack.

1122

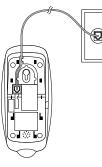

INSTALLATION

- Installing the Batteries
- 1 Insert a flat blade screwdriver into the battery door lock and open the battery cover located on top of the base. Please note this construction is for compliance with safety regulations. Install the batteries according to the diagram.

IMPORTANT: Be sure that the batteries are installed correctly. Wrong polarity may damage the unit.

- 2 For better performance and longer operating time, we recommend the use of alkaline batteries.
- a Do not mix old and new batteries.
- b Do not mix alkaline, standard (carbon-zinc) rechargeable (nickel-cadmium) batteries.
- 3 If the unit is not to be used for an extended period of time, remove all the batteries.

Desktop

- 1 Unwrap the long telephone line cord.
- 2 Insert one plug into the LINE modular jack on the bottom of the base. 3
- - studs on the wall plate and pull the base down onto the studs. 6 Insert one modular plug of the coiled cord into
 - the handset jack, and the other plug into the left side of the base.

When using your phone equipment, basic precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following.

- 1 Read and understand all instructions.
- 2 Follow all warnings and instructions marked on the product.
- 3 Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use a damp cloth for cleaning.
- 4 Do not use this product near water (for example, near a bath tub, kitchen sink, or swimming pool).
- 5 Do not place this product on unstable stand or table. The product may fall, causing damage to the product.
- 6 Slots and openings in the cabinet and the back or bottom are provided for ventilation. To protect it from overheating, these openings must not be blocked by placing the product on a sofa, rug, or other similar surface. This product should never be placed near or over a radiator or heat register. This product should not be placed in a built-in installation where proper ventilation is not provided.
- 7 This product should be operated only from the type of power source indicated on the marking label. If you are not sure of the type of power supply, consult your dealer or local power company.
- 8 Do not allow anything to rest on the power cord. Do not locate this product where the cord will be abused by persons walking on it.
- 9 Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a risk of fire or electric shock. Never spill liquid of any kind on the product
- 10 To reduce the risk of electric shock, do not disassemble this product, but take it to a Vtech authorized service facility. Opening or removing cabinet parts other than specified access doors may expose you to dangerous

voltages or other risks. Incorrect reassembling can cause electric shock when the appliance is subsequently used.

- 11 Do not overload wall outlets and extension cords as this can result in the risk of the fire or electric shock.
- 12 Unplug this product from the wall outlet and refer servicing to a Vtech authorized service facility under the following conditions:
 - A When the power supply cord or plug is damaged or frayed.
- B If liquid has been spilled into the product. C If the product has been exposed to rain or
- D If the product does not operate normally by following the operating instructions. Adjust only those controls that are covered by the operating instructions, because improper adjustment of other controls may result in damage and will often require extensive work by a Vtech authorized technician to restore the product to normal operation.
- E If the product has been dropped and the cabinet has been damaged.
- F If the product exhibits a distinct change in performance
- 13 Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.
- 14 Do not use the telephone to report a gas leak in the vicinity of the leak.

TO REDUCE THE RISK OF INJURY TO PERSONS. READ AND FOLLOW THESE INSTRUCTIONS.

- 1 Use only the type and size batteries designed for this product. Do not dispose of the batteries in a fire. The cell may explode. Check with local codes for possible special disposal instructions.
- 2 Do not open or mutilate the batteries. Released electrolyte is corrosive and may cause damage to the eyes or skin. It may be toxic if swallowed
- 3 Exercise care in handling batteries in order not to short the battery with conducting materials such as rings, bracelets and keys. The battery or conductor may overheat and cause burns.
- 4 Do not attempt to recharge the batteries provided with or identified for use with this product. The batteries may leak corrosive electrolyte or explode
- 5 Do not attempt to recharge the batteries provided with or identified for use with this product by heating them. Sudden release of the battery electrolyte may occur causing burns or irritation to eyes or skin.
- 6 When replacing batteries, all batteries should be replaced at the same time. Mixing fresh and discharged batteries could increase cell pressure and rupture the discharged batteries. (Applies to products employing more than one separately replaceable primary battery.)
- 7 When inserting batteries into this product, the proper polarity or direction must be observed. Reverse insertion or batteries can cause charging, and that may result in leakage or explosion. (Applies to product employing more than one separately replaceable primary
- 8 Remove the batteries from this product if the product will not be used for along period of time (several months or more) since during this time the battery could leak in the product. Discard "dead" batteries as soon as possible. since "dead" batteries are more likely to leak in a product.

9 Do not store this product, or the batteries provided with or identified for use with this product, in high-temperature areas. Batteries that are stored in a freezer or refrigerator for the purpose of extending shelf life should be protected from condensation during storage and defrosting. Batteries should be stabilized at room temperature prior to use after cold storage

TELEPHONE OPERATION

Setting the Caller ID

battery.)

Setting the Caller ID includes language selection, contrast selection, area code pre-set (one home area code and four local area codes) and time/date setting in this order.

Note: If you do not press any button within 10 seconds, you unit will automatically terminate the setting and revert to the standby mode with the display showing the current time and date.

Select the Language

- 1 Press the **OPTIONS** button
- 2 The display will show SET LANGUAGE. Press UP or DOWN to see "ENGLISH," "FRANCAIS," and "ESPANOL."
- 3 Press the UP or DOWN button until your desired language is displayed.
- 4 Press the OPTIONS button to confirm selection and advance to next option in the

Select the Contrast Level

- The contrast adjustment allows you to fine-tune the display. The contrast has five levels of adjustment (the default setting is 3)
- 1 Press the OPTIONS button twice.
- 2 Press UP or DOWN to adjust the contrast
- 3 Press the OPTIONS button to confirm and

/ input area codes 2, 3 and more than one local area code same area. Otherwise, press S button to skip Area Codes 2, 3

1 Press the **OPTIONS** button three times.

- 2 Press UP or DOWN to display the first digit of your HOME AREA CODE (HAC), then press DISPLAY DIAL to move to the next digit. Press **OPTIONS** to save, and advance to the next option in the menu
- 3 Follow the directions in Step 2 to input LOCAL AREA CODES (LAC)1, 2, 3 and 4 if necessary

Setting Time and Date

Note: The clock will automatically be set when you receive a Caller ID call. However, you can set the clock manually by following the steps below.

- 4 Press the **OPTIONS** button eight times.
- 5 Press UP or DOWN to enter the hours setting. Then press DISPLAY DIAL to set the hour. (You might need to scroll through 12 hours to set AM or PM.)
- 6 Press UP or DOWN to enter the minute setting. Then press **DISPLAY DIAL** to set the minute.
- 7 Follow the procedure in Steps 7 and 8 to set the month and the date
- 8 Press **OPTIONS** to save the settings, and exit the OPTIONS MENU.

Note: On receiving a Caller ID call, the date and time of your unit will be automatically updated to synchronize with the date and time registered by the Central Office. On completion of setting, the unit will revert to the standby mode, displaying the current time and date and TOTAL: 0 and NEW: 0.

don't want the other party to hear the

RINGER HI-LOW-OFF Switch

- 1 "HI" Position: Ringer sounds to alert you to incoming calls.
- 2 "LOW" Position: Ringer sounds at a lower level to minimize disturbance by incoming calls.
- 3 "OFF" Position: This telephone does not ring with incoming calls.

TONE/PULSE Switch

- 1 The **DP** (PULSE) position is used if your local telephone system offers only Pulse (rotary dial) service or if Tone service is available but you do not subscribe to it.
- 2 The TT (TONE) position is used if you subscribe to Tone Dialing (DTMF) service.

If you are not certain what type of service you have, check with your local telephone company.

Dialing Buttons

To make a phone call, pick up the handset. When you hear the dial tone, dial the phone number you are calling using the buttons (1 to 9 and 0). The number dialed will be shown in the LCD panel. When your call is completed, hang up the handset.

REDIAL Button

The last number you have dialed (up to 32 digits) remains in memory known as last number redial memory. If you call a number and receive a busy signal or no answer, hang up the handset. When you are ready to try the same call again, pick up the handset and tap the **REDIAL** button. Please note that if you have made any other calls in the meantime, only the last number you called will be stored in the redial memory.

FLASH Button

For residential phone systems with "Call Waiting" service, instead of pressing the hook switch to pick up the other call, press the FLASH button. This will automatically send the correct signal to the telephone company to switch calls. The amount of time you hold the FLASH button down is not critical

6

WARRANTY STATEMENT & FCC REGULATIONS

Limited Warranty

· What does this limited warranty cover?

The manufacturer of this VTECH product, VTECH Communications, warrants to the holder of a valid proof of purchase ("Consumer" or "You") that the product and all accessories provided by VTECH in the sales package ("Product") are free from material defects in material and workmanship, pursuant to the following terms and conditions, when installed and used normally and in accordance with operation instructions. This limited warranty extends only to the Consumer for Products purchased and used in the United States of America.

 What will VTECH Communications do if the Product is not free from material defects in materials and workmanship during the limited warranty period ("Materially Defective Product")?

During the limited warranty period, VTECH's authorized service representative will repair or replace, at VTECH's option, without charge, a Materially Defective Product. If we repair this product, we may use new or refurbished replacement parts. If we choose to replace this product, we may replace it with a new or refurbished product of the same or similar design. VTECH will return repaired or replacement products to you in working condition. VTECH will retain defective parts, modules, or equipment. Repair or replacement of Product, at VTECH's option, is your exclusive remedy. You should expect the repair or eplacement to take approximately 30 days.

• How long is the limited warranty period?

The limited warranty period for the product extends for ONE (1) YEAR from the date of purchase.

If we repair or replace a Materially Defective Product under the terms of this limited warranty, this limited warranty also applies to repaired or replacement Products for a period of either (a) 90 days from the date the repaired or replacement Product is shipped to you or (b) the time remaining on the original one-year limited warranty, whichever is longer.

- What is not covered by this limited warranty? This limited warranty does not cover:
- 1 Product that has been subjected to misuse, accident, shipping or other physical damage,

improper installation, abnormal operation or handling, neglect, inundation, fire, water, or other liquid instruction; or

- 2 Product that has been damaged due to repair, alteration, or modification by anyone other than an authorized service representative of VTECH;
- 3 Product to the extent that the problem experienced is caused by signal conditions, network reliability or cable or antenna systems; or
- 4 Product to the extent that the problem is caused by use with non-VTECH electrical accessories; or
- 5 Product whose warranty/quality stickers. Product serial number plates or electronic serial numbers have been removed, altered or rendered illeaible: or
- 6 Product purchased, used, serviced, or shipped for repair from outside the United States, or used for commercial or institutional purposes (including but not limited to Products used for rental purposes); or
- 7 Product returned without valid proof of purchase;
- 8 Charges for installation or setup, adjustment of customer controls, and installation or repair of systems outside the unit.

• How do you get warranty service?

To obtain warranty service in the United States of America, call 1-800-595-9511 for instructions regarding where to return the Product. Before calling for service, please check the user's manual. A check of the Product controls and features may save you a service call.

Except as provided by applicable law, you assume the risk of loss or damage during transit and transportation and are responsible for delivery or handling charges incurred in the transport of Product(s) to the service location. VTECH will return repaired or replaced Product under this limited warranty to you, transportation, delivery or handling charged prepaid. VTECH assumes no risk for damage or loss of the Product in transit.

If the Product failure is not covered by this limited warranty, VTECH will notify you and will request that you authorize the cost of repair prior to any further repair activity. You must pay for the cost of repair

Note: We recommend that you disconnect the phone line when programming your telephone

OPERATION

Note: We recommend that you disconnect the phone line when programming your telephone

Note: Each memory location can store up to 16 digits for the telephone number. If the number to be stored exceeds 16 digits, you should split storing of the numbers into two separate locations. This normally occurs when an access code is required. In this case, you can store the access code in another memory location.

Storing a Phone Number in the **One-Touch Memory Locations**

- 1 Lift the handset
- - 5 Hang up the handset.

TELEPHONE MEMORY

This telephone has 14 memory locations, including Last Number Redial. Your phone can store three phone numbers for one-touch dialing (for example, for emergency or frequently called numbers). You can additionally store up to 10 phone numbers for two-touch dialing. Each phone number must be stored in a specific memory location to enable your phone to locate a number from the memory for automatic dialing. The one-touch memory locations are numbered M1. M2, and M3, while the two-touch memory locations are accessed through the **MEM** button and the dialing buttons (0-9).

FCC REGULATIONS & TECHNICAL SPECIFICATIONS

(including, but not limited to lost profits or revenue inability to use the product, or other associated equipment, the cost of substitute equipment, and claims by third parties) resulting from the use of this product. Some states do not allow the exclusion or limitation of incidental or consequential damages, so

Consumer Information:

rules and the requirements adopted by the ACTA. On the bottom of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company. An applicable certification jacks Universal Service Order Codes (USOC) for the equipment is provided (i.e., RJ11C) in the packaging with each piece of approved terminal equipment.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. [For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g., 03 is a REN of 0.3). For earlier products, the REN is separately shown on the label.]

If this equipment Model# VT_1122 causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the telephone company will notify the

the above limitation or exclusion may not apply to you.

This equipment complies with Part 68 of the FCC

customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC

Memory

if you believe it is necessary. The telephone company may make changes in its facilities, equipment, operations or procedures that

could affect the operation of the equipment. If this happens the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service. Please follow instructions for repairing if any (e.g. battery replacement section); otherwise do not

alternate or repair any parts of device except specified.

Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information. This equipment is hearing aid compatible.

· What must you return with the Product to get warranty service? You must: 1 Return the entire original package and contents

including the Product to the VTECH service location along with a description of the malfunction or difficulty;

and return shipping costs for the repair of Products

that are not covered by this limited warranty.

2 Include "valid proof of purchase" (sales receipt) identifying the Product purchased (Product model) and the date of purchase or receipt; and 3 Provide your name, complete and correct

mailing address, and telephone number. • IF YOU PURCHASED YOUR TELEPHONE IN CANADA:
