

Therma-Tru® Light Commercial/Multi-Family - Doors and Frames

GENERAL NOTES

- Material shown on these drawings will be fabricated only after formal approval by the architect, receipt of approval hardware schedule, and all necessary hardware templates.
- All frames shall be shipped “knocked-down” unless otherwise specified.
- All frames and doors shall be chemically washed, rinsed, and dried prior to receiving one coat of paint.
- Doors and frames will be reinforced for surface mounted hardware as required. Drilling and tapping for surface mounted hardware shall be applied by others.
- It will be the responsibility of the General Contractor to coordinate hardware locations.
- All frames will be supplied with the required wall and floor anchors as illustrated on the frame detail sheet.
- All frames and doors will be tagged with shop marks. This schedule can be used to cross reference shop marks with architects marks.
- These drawings are not intended for use by other trades.
- Field welding, grinding, finishing, and attachment of field splices by others.

DOOR HANDING CHART

- All standard type hardware will be located at this manufacturer’s standard locations as shown on the door and frame elevations. Hardware items such as panic exit devices, deadbolts, etc. will also be located at manufacturer’s standard locations unless specifically advised.
- Installations of all glass and glazing to be performed by others.
- Doors, frames, and finished hardware to be installed by others.
- Anchor bolts and expansion shields for any type fastener to be furnished by others.
- All frames must be set absolutely plumb, square, and level.
- All frames will be supplied with rubber door silencers: three for single swing openings and two per header for double swing openings.
