## 4. Installation Steps

Note: Make sure that your system is turned off and unplugged. Disconnect the AC power cord from your old power supply.

1. Open your computer case; please refer to the direction in your case manual.
2. Install the PSU into the case with the four screws provided.
3. Connect the 24 pin Main Power Connector to your motherboard and peripheral. If your motherboard uses a 20-pin connector, detach the 4-pin attachment on the 24-pin connector.  
Note: The detachable 4-pin section cannot be used in place of a 4-pin +12V connector.
4. Connect the 8-pin or 4-pin connector for the CPUs.
5. Connect other peripheral power connectors to devices such as hard drives, optical drives, etc.
6. Close your computer case and connect the AC power cord to the power supply AC inlet.
