Getting To Know Your Convection Oven-Broiler

A convection oven circulates heated air continuously throughout the oven cavity to maintain uniform temperature around the food. This constant, gentle air flow is what seals in juices, promotes browning and may shorten cooking time without turning and basting. Your Toastmaster® convection oven can DEFROST, BAKE, ROAST, BROIL, ROTISSERIE, DEHYDRATE and SLOW COOK.

FIGURE 1

FIGURE 2

Selector Dial

The oven has four different settings: DEFROST, BROIL, SLOW COOK AND BAKE. Turn dial to indicator line above dial to select setting. The convection fan is ON in all modes.

Temperature Control Dial

Your oven has an adjustable temperature control dial with temperatures 200°-450° Fahrenheit. This allows you to prepare recipes according to package or recipe directions.

Timer

The timer control dial also acts as the oven's ON and OFF switch. Turn the timer clockwise to select appropriate cooking time. The dial is marked with 1 or 2 hour (HR) in 15 minute segments. If cooking less than 1 hour, turn the timer past 1 hour, then back to desired cooking time. When cooking time is complete, a signal will sound and the unit will turn OFF automatically.

On

If you are cooking for less than 15 minutes or do not wish to use the timer feature, turn the dial to ON to turn oven on. Return to OFF position when cooking is complete. The indicator light will go OFF.

Power Light

The Power Light will remain ON anytime the oven timer is turned ON.

Heating Elements

On the SLOW COOK setting, constant low wattage heat is provided by the top and bottom elements. On the BAKE setting, the top and bottom elements will turn OFF and ON as the thermostat cycles to control the cooking temperature. On the BROIL and ROTISSERIE settings, only the upper elements cycle ON and OFF. The indicator light will cycle ON and OFF with the thermostat.

NOTE: Some elements will appear black during certain heating functions. This is normal.

Interior Oven Light

The light will be ON anytime the unit is in operation. To replace oven light see page 20.

Rack Positions

The Wire Rack can be inserted into positions 1, 2, 3, 4, 5 or 6 (See Figure 4 for shelf positions). Baking on both the Wire Rack and Bake/Broil Pan at the same time is not recommended except when using the SLOW COOK setting.

Pizza Rack and Pizza Pan Positions

The Pizza Rack can be inserted into positions 3, 4, 5 or 6 (See figure 4 for shelf positions). Baking on both the Pizza Rack and Bake/Broil Pan at the same time is not recommended.

Defrost

1. Insert the Wire Rack into the Lower Shelf Rail.
2. Plug into 120 V 60 Hz outlet.
3. Remove all protective wrappings from food before placing in Oven-Broiler.
4. Center a baking container or food on the Wire Rack or use the Bake/Broil Pan and close the Glass Door.
5. Turn the Function Control to Defrost.
6. Set the Temperature Control to 200°F.
7. Turn the Timer to the desired time or to the ON position. The Power Light will illuminate.

NOTE: To set the Timer Control for less than 1 hour, turn the timer past 1 hour, and then turn back to the appropriate amount of time.

CAUTION: As soon as the Timer Control is engaged, the Oven-Broiler will turn ON. Both the top and the bottom Heating Elements may cycle ON and OFF to maintain temperature for the entire cooking time.

CAUTION: As soon as the Timer Control is engaged both Heating Elements will become hot immediately. Use care not to place anything on top of the Oven-Broiler. Do not touch the Oven-Broiler or any part of the Oven-Broiler without wearing oven mitts.

Defrost (Cont.)

8. If the timer has been set, when the Defrost time is complete, a signal will sound, and the timer will finish in the OFF position. NOTE: If you are ready to remove the food from the Oven-Broiler before the timer shuts the Oven-Broiler OFF, you may shut the Oven-Broiler OFF manually by turning the timer to the OFF position. The Power Light will go off. If the ON position has been selected, the Oven-Broiler must be shut off manually by turning the Timer Control to the OFF position. The Power Light will go off.
9. Open the Glass Door. Wear protective oven mitts to remove food from Oven-Broiler. Be careful when removing food. The inside of the Oven-Broiler is very hot. Close the Glass Door.
10. Unplug and allow to cool completely before cleaning.

WARNING: DO NOT LEAVE OVEN-BROILER UNATTENDED.

See User Maintenance Instructions. Unplug when not in use.

Hints For Defrost

- ◆ Do not use this method for defrosting meat, poultry or fish.
- ◆ Do not cover food.
- ◆ Brush frozen dough with vegetable oil to prevent drying out and remove to preheat Toaster Oven-Broiler before baking.

Bake

1. Place Bake/Broil Pan or Wire Rack into correct position.
2. Plug into 120V ~ 60Hz outlet.
3. Position selector dial to BAKE. Turn temperature control dial to temperature setting. Set timer to ON or desired baking time. Oven will shut OFF automatically if timer is set. Preheat if necessary.
4. Carefully center baking dish directly on Bake/Broil Pan or Wire Rack and close door. You may place foods such as biscuits directly onto Bake/Broil Pan.

Bake (Cont.)

5. Convection baking will cook some foods faster. Check 5-10 minutes before the end of the suggested bake time. Continue baking if necessary.
6. When finished, turn temperature control dial to lowest position. Make sure the timer is in the OFF position.
7. Unplug and allow to cool completely before cleaning.

Roast

1. Remove Bake/Broil Pan and Wire Rack.
2. Place Bake/Broil Pan and Broil Insert in position 5. The Bake/Broil Pan must be placed below the food to prevent grease from coming in contact with heating elements and to reduce clean-up.
3. Put seasoned meat, fat side up, in center of Wire Rack.
4. Plug into 120V ~ 60Hz outlet.
5. Position selector dial to BAKE. Turn temperature control dial to 325°-350°F (standard roasting temperature). It is not necessary to preheat your oven. Since some meats and poultry roast faster in a convection oven, a meat thermometer should always be used to gauge internal temperature. The thermometer should be inserted into thickest portion of roast away from bones or fatty areas. Check progress two-thirds into the cooking process to ensure meat does not over cook.
6. Set timer to MANUAL ON or desired roasting time. Oven will shut OFF automatically if timer is set.
7. When finished, turn temperature control dial to lowest position. Make sure the timer is in the OFF position.
8. Unplug and allow to cool completely before cleaning.

INTERNAL TEMPERATURE ROASTING CHART	
CUT	INTERNAL TEMPERATURE
Beef	145°F Rare 160°F Medium 170°F Well Done
Ham (fresh) Ham (precooked)	160°F 140°F Rare
Lamb	160°F Medium Well 170°F Well Done
Pork	160°F Medium 170°F Well Done
Turkey or Chicken, Whole	180°F
Turkey or Chicken, Breast	170°F

Hints For Roast

- ◆ A meat thermometer inserted into the center of the meat should always be used to ensure desired doneness.
- ◆ Roasting is recommended for large, tender cuts of meat and poultry. Seasoning prior to cooking adds to the flavor and the aroma during cooking.
- ◆ A layer of fat on the top of the roast promotes better browning and provides natural basting.
- ◆ When roasting meats with a high fat content, the Bake/Broil Pan may fill with grease before cooking is completed. Carefully remove the Bake/Broil Pan using oven mitts and empty. Replace for continued roasting.

Broil

1. Remove Bake/Broil Pan and Wire Rack.
2. Place the Broil Insert in the Bake/Broil Pan. Always use the Bake/Broil Pan and Broil Insert when broiling. Place food on Broil Insert and position the Bake/Broil Pan in shelf position 1. Juices and fat will drip into the pan and decrease spattering while broiling. Close the door.
3. Plug into 120V ~ 60Hz outlet.
4. Position selector dial to BROIL. Turn temperature control dial to BROIL.
5. Since broiling time is usually brief, the use of a timer is not recommended. Set timer to MANUAL ON.
6. Broil food until done, turning half way through cooking time. Carefully remove Bake/Broil Pan and Broil Insert from oven using oven mitts.
7. When finished, turn temperature control dial to lowest position. Make sure the timer is in the OFF position.
8. Unplug and allow to cool completely before cleaning.

Broil Recommendations

Broiling is used for tender cuts of meats or marinated meats, fish and some fruits and vegetables. Cooking time is determined by the desired doneness and the distance between the food and the heating element(s). The following chart is to be used as a guideline.

Broil Chart

FOOD	TOTAL COOKING TIME *
Beef Steaks (3/4-inch thick)	22-28 minutes
Ham Steak (1-inch thick)	25-30 minutes
Fish Fillet	8-12 minutes
Fish Steak (1-inch thick)	10-14 minutes
Ground Beef (3/4-inch thick)	25-30 minutes
Hot Dogs	10-20 minutes

* Turn food halfway through cooking time. Broil times are approximate and may vary depending on meat

NOTES: To speed up browning, brush lean cuts of meat, chicken and fish with oil, margarine or melted butter. Broiling times indicated are for fresh meat at refrigerator temperature.

Hints For Broil

- ◆ Do not place aluminum foil on top of Broil Insert. This traps grease and can cause a fire.
- ◆ Trim excess fat from meat and score edges to prevent curling and thaw frozen meats before broiling. This will reduce smoke during broiling.

Slow Cook

1. Remove Bake/Broil Pan from oven. Place Wire Rack in position 5 or 6. No preheat is necessary.
2. Cover baking container and place on Wire Rack in center of the oven.
3. Plug into 120V ~ 60Hz outlet.
4. Position selector dial to SLOW COOK. Turn temperature control dial to 250°F. The indicator light will remain on. Because of the low wattage being used, the heating elements will remain dark while maintaining the proper temperature.
5. Set timer to MANUAL ON.
6. Do not open the door during the first two hours of the slow cook period.
7. When finished, make sure the timer is in the OFF position.
8. Unplug and allow to cool completely before cleaning.

Hints For Slow Cook

Most slow cooker recipes may be used in Slow Cook by using the following guidelines.

- ◆ All baking dishes should be covered. Aluminum foil may be used if ends are tucked against edge of pan.
- ◆ Oven-proof glass and ceramic dishes are recommended.
- ◆ Aluminum foil pans and pans that will rust, such as cast iron or tin should not be used.

Hints For Slow Cook (cont.)

- ◆ Separate dishes can cook simultaneously, yet food retains its own flavor. Select foods that will take the same amount of time to cook.
- ◆ Milk, cream and sour cream may curdle. It is best to add them in the last hour of cooking. If a recipe specifies one of these ingredients as the only liquid in the cooking process, try substituting evaporated milk, water or condensed soup, such as cream of mushroom or chicken soup.
- ◆ Slow cook enhances the flavor of spices and salt. We recommend you reduce seasoning in your own recipes.
- ◆ Pre-cooked spaghetti and pasta products should be added in the last hour of slow cooking.

Rotisserie Function

Using the Rotisserie to cook meats and poultry allows them to self-baste in their own juices. This seals in flavor while any excess fat drips off of the food. The food being cooked on the Rotisserie must be no wider than 12 inches and should weigh no more than 10 pounds. This allows the entire piece of food to be over the Heating Elements. The food should be placed onto the Rotisserie Bar with the Prongs securely in place, see below. The Rotisserie may be used with the BROIL Functions. Check your food prior to the time it should be done and continue cooking as necessary.

Rotisserie

Meat Tines (P/ N 21434)

Use for whole turkeys, chickens, cornish hens, roast, etc. When using, be sure to place 1 at each end of the meat on the Rotisserie Bar.

Rotisserie Bar (P/ N 22644)

Fits into the Oven. The heavy-duty Oven Motor turns the bar so the food cooks evenly and conveniently.

Rotisserie (cont.)

Rotisserie Bar Handles (P/ N 22645)

Use to remove the Rotisserie Bar from the Oven.

Drip Pan (P/ N 22646)

Use to catch drippings from meat during Rotisserie cooking process.

FIGURE 5

1. Place Drip Pan into bottom of oven between the two heating elements.
2. Carefully center the food on Rotisserie Bar using the Meat Tines to secure the food in place. (See Figure 8) If the food is not centered it will cause a jerking motion during cooking. This results in undue stress on the Motor.
3. Place the round pointed end of Rotisserie Bar into opening on the right side Oven Wall. Place the opposite end of the Rotisserie Bar into the Bracket on the left side Oven Wall. (See Figures 6 and 7)
4. Plug into outlet.
5. Position selector dial to ROTISSERIE/ BROIL
6. Turn temperature control dial to temperature setting.

FIGURE 6

FIGURE 7

NOTE: Since meats and poultry roast faster in a convection oven, a meat thermometer should always be used to gauge internal temperature. The thermometer should be inserted into the thickest portion of roast away from bones or fatty areas. Check progress two-thirds into the cooking process to ensure meat does not over cook.

FIGURE 8

Rotisserie (cont.)

7. Set timer to **MANUAL ON** or desired baking time (Refer to **TIME AND TEMPERATURE CHART** for cooking times). Oven will shut **OFF** automatically if timer is set.
8. When finished, using the Rotisserie Bar Handles, carefully remove food from the oven.
9. Allow food to cool 15-20 minutes before removing food from Rotisserie Bar and carving.
CAUTION: DO NOT CARVE MEAT WHILE IT IS IN THE OVEN OR ON THE ROTISSERIE BAR.
10. Turn Temperature control dial to lowest position. Make sure the timer is in the **OFF** position. Allow the Oven and the Drip Tray with juices to cool completely before removing the Drip Tray for emptying for cleaning.

Hints For Rotisserie

- ◆ A meat thermometer inserted into the thickest part of the meat or poultry should always be used to ensure desired doneness. Please refer to USDA recommended temperatures.
- ◆ Rotisserie cooking is recommended for large, tender cuts of meat and poultry.
- ◆ Seasoning prior to cooking adds to the flavor and the aroma during cooking.
- ◆ Do not spray any type of aerosol spray flavoring inside the Oven Cavity while cooking.
- ◆ Always center food on the Rotisserie Bar before cooking.
- ◆ To avoid burning the exterior of your food, do not baste food with barbeque sauce until the last 20- 30 minutes of cooking.
- ◆ Once the food is placed inside the Oven Cavity, watch the food while the Rotisserie rotates at least 1 complete turn to ensure proper clearance of the Heating Elements and Drip Pan.
- ◆ When the Door is opened during operation, the Rotisserie Bar may reverse directions.

USDA Recommended Temperatures

The United States Department of Agriculture recommends that meat and poultry be cooked to the following internal temperatures to be sure any harmful bacteria has been killed. Ground turkey and chicken should be cooked to an internal temperature of 165° F and ground beef, veal, lamb and pork be cooked to an internal temperature of 160° F. Chicken and turkey should be cooked to an internal temperature of 170° F for white meat and 180° F for dark meat. Goose and duck should be cooked to an internal temperature of 180° F. Fresh beef, veal and lamb, etc. should be cooked to an internal temperature of at least 145° F. Fresh pork should be cooked to an internal temperature of at least 160° F. When re- heating meat and poultry products, they should also be cooked to an internal temperature of 165° F.

Pizza

1. Remove Bake/Broil Pan, Wire Rack and Pizza Rack from oven.
2. Position selector dial to BAKE. Turn temperature to suggested temperature listed on pizza box. Allow oven to preheat for 10 minutes.
3. Place pizza directly on Pizza Rack or in the Pizza Pan provided and then place on Pizza Rack. Close the glass door.
4. Set timer to recommended time.
5. When pizza is finished baking, using oven mitts, carefully remove Pizza Pan and/or Pizza Rack with pizza.
6. Turn temperature control dial to lowest position. Make sure the timer is in the OFF position.
7. Unplug and allow to cool completely before cleaning.
