

TEC

TEC Electronic Cash Register

FS-1450-1 SERIES

Owner's Manual

TOSHIBA TEC CORPORATION

NOTICE

This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense. Changes or modifications not expressly approved by manufacturer for compliance could void the user's authority to operate the equipment.

WARNING

"This Class A digital apparatus meets all requirements of the Canadian Interference-Causing Equipment Regulations."

"Cet appareil numérique de la classe A respecte toutes les exigences du Règlement sur le matériel brouilleur du Canada."

Safety Summary

Personal safety in handling or maintaining the equipment is extremely important. Warnings and Cautions necessary for safe handling are included in this manual. All warnings and cautions contained in this manual should be read and understood before handling or maintaining the equipment.

Do not attempt to effect repairs or modifications to this equipment. If a fault occurs that cannot be rectified using the procedures described in this manual, turn off the power, unplug the machine, then contact your authorized TOSHIBA TEC representative for assistance.

Meanings of Each Symbol

This symbol indicates warning items (including cautions). Specific warning contents are drawn inside the \triangle symbol. (The symbol on the left indicates a general caution.)

This symbol indicates prohibited actions (prohibited items). Specific prohibited contents are drawn inside or near the \circ symbol. (The symbol on the left indicates "no disassembling".)

This symbol indicates actions which must be performed. Specific instructions are drawn inside or near the \bullet symbol. (The symbol on the left indicates "disconnect the power cord plug from the outlet".)

WARNING

This indicates that there is the risk of **death** or **serious injury** if the machines are improperly handled contrary to this indication.

<p> Prohibited</p> <p>■ Do not plug in or unplug the power cord plug with wet hands as this may cause electric shock.</p> 	<p> Any other than the specified AC voltage is prohibited.</p> <p>■ Do not use voltages other than the voltage (AC) specified on the rating plate, as this may cause fire or electric shock.</p> 
<p> Prohibited</p> <p>■ If the machines share the same outlet with any other electrical appliances which consume large amounts of power, the voltage will fluctuate widely each time these appliances operate. Be sure to provide an exclusive outlet for the machine as this may cause the machines to malfunction.</p> 	<p> Prohibited</p> <p>■ Do not place metal objects or water-filled containers such as flower vases, flower pots or mugs, etc. on top of the machines. If metal objects or spilled liquid enter the machines, this may cause fire or electric shock.</p> 
<p> Prohibited</p> <p>■ Do not insert or drop metal, flammable or other foreign objects into the machines through the ventilation slits, as this may cause fire or electric shock.</p> 	<p> Prohibited</p> <p>■ Do not scratch, damage or modify the power cords. Also, do not place heavy objects on, pull on, or excessively bend the cords, as this may cause fire or electric shock.</p> 
<p> Disconnect the plug.</p> <p>■ If the machines are dropped or their cabinets damaged, first turn off the power switches and disconnect the power cord plugs from the outlet, and then contact your authorized TOSHIBA TEC representative for assistance. Continued use of the machine in that condition may cause fire or electric shock.</p> 	<p> Disconnect the plug.</p> <p>■ Continued use of the machines in an abnormal condition such as when the machines are producing smoke or strange smells may cause fire or electric shock. In these cases, immediately turn off the power switches and disconnect the power cord plugs from the outlet. Then, contact your authorized TOSHIBA TEC representative for assistance.</p> 

 <p>Disconnect the plug.</p> 	<p>■ If foreign objects (metal fragments, water, liquids) enter the machines, first turn off the power switches and disconnect the power cord plugs from the outlet, and then contact your authorized TOSHIBA TEC representative for assistance. Continued use of the machine in that condition may cause fire or electric shock.</p>	 <p>Disconnect the plug.</p> 	<p>■ When unplugging the power cords, be sure to hold and pull on the plug portion. Pulling on the cord portion may cut or expose the internal wires and cause fire or electric shock.</p>
 <p>Connect a grounding wire.</p> 	<p>■ Ensure that the equipment is properly grounded. Extension cables should also be grounded. Fire or electric shock can occur on improperly grounded equipment.</p>	 <p>No disassembling.</p> 	<p>■ Do not remove covers, repair or modify the machine by yourself. You may be injured by high voltage, very hot parts or sharp edges inside the machine. Unauthorized modification is prohibited.</p>

CAUTION This indicates that there is the risk of personal **Injury** or **damage** to objects if the machines are improperly handled contrary to this indication.

Precaution

The following precautions will help to ensure that this machine will continue to function correctly.

- Try to avoid locations that have the following adverse conditions:
 - * Temperatures out of the specification
 - * Direct sunlight
 - * High humidity
 - * Shared power socket
 - * Excessive vibration
 - * Dust/Gas
- Do not subject the machine to sudden shocks.
- Do not press the keys too hard. Keys will operate correctly if they are touched lightly.
- Clean the cover and keyboard, etc. by wiping with a dry cloth or a cloth soaked with detergent and wrung out thoroughly. Never use thinner or other volatile solvent for cleaning.
- At the end of the day, turn the power OFF, then clean and inspect the exterior of the machine.
- Try to avoid using this equipment on the same power supply as high voltage equipment or equipment likely to cause mains interference.
- USE ONLY TOSHIBA TEC SPECIFIED consumables.
- DO NOT STORE the consumables where they might be exposed to direct sunlight, high temperatures, high humidity, dust, or gas.
- When moving the machine, take hold of the drawer and lift the machine.
- Do not place heavy objects on top of the machines, as these items may become unbalanced and fall causing **injury**.
- Do not block the ventilation slits of the machines, as this will cause heat to build up inside the machines and may cause **fire**.
- Do not lean against the machine. It may fall on you and could cause **injury**.

Request Regarding Maintenance

- Utilize our maintenance services.

After purchasing the machines, contact your authorized TOSHIBA TEC representative for assistance once per year or so to have the inside of the machines cleaned. Otherwise, dust will build up inside the machines and may cause **fire** or **malfunction**. Cleaning is particularly effective before humid rainy seasons.

- Our maintenance service performs the periodic checks and other work required to maintain the quality and performance of the machines, preventing accidents beforehand.

For details, please consult your authorized TOSHIBA TEC representative for assistance.

- Using insecticides and other chemicals

Do not expose the machines to insecticides or other volatile solvents, as this will deteriorate the cabinet or other parts or cause the paint to peel.

1. TO OUR CUSTOMERS

Thank you for choosing the TEC electronic cash register FS-1450 series. This instruction manual provides a description of the functions and handling of this register and should be read carefully to ensure optimum performance. Since every consideration has been given to safety and reliability, there is no danger of damaging the machine by incorrect operation.

Please refer to this manual whenever you have any questions concerning the machine. This machine has been manufactured under strict quality control and should give you full satisfaction. However, if the machine is damaged during transit, or there are any unclear points in this manual, please contact your local TOSHIBA TEC representative.

- The specifications described in this manual may be modified by TOSHIBA TEC, if necessary.
- Be sure to keep this manual for future reference.

2. UNPACKING

- ① Paper Roll 45 mm x Ø50 mm (2 pcs.)
- ② Mode Key
(**REG** Key, **MGR** Key, **MA** Key,
S Key; 2 pcs. respectively)
- ③ Receipt Cover Key (2 pcs.)
- ④ Stamp Ink (1 pc.)

- ⑤ Ribbon Cassette (1 pc.)
- ⑥ Journal Reel (1 pc.)
- ⑦ Drawer Key (2 pcs.)
- ⑧ Owner's Manual (1 pc.)

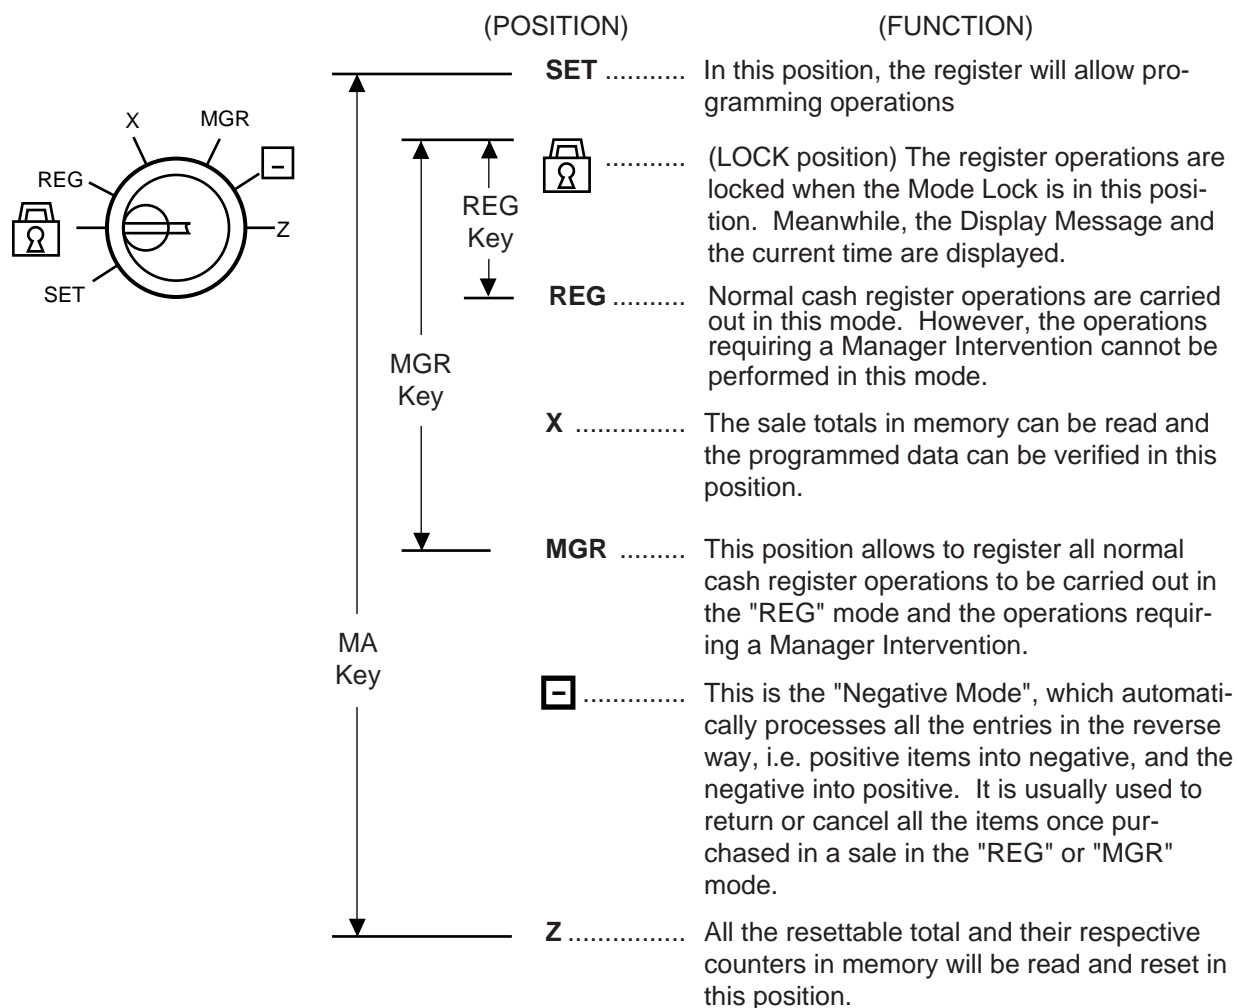

3. APPEARANCE AND NOMENCLATURE

- **Power Switch** The power switch is provided at the right-hand side of the cabinet. The AC power is turned on when the switch is pushed to ON, and turned off when the switch is pushed to OFF.

4. MODE LOCK AND MODE SELECTOR KEYS

4.1. MODE LOCK

4.2. MODE SELECTOR KEYS

REG Key: The REG Key is used by the cashier or clerk who operates the register.

MGR Key: The MGR Key is used by the store manager or a person authorized by the manager.

MA Key: The MA Key is used by the store manager who will daily supervise the collection of money and the printout of transactions recorded by the register. This key is also used when programming the register.

The keys may be inserted or pulled out at the "LOCK" or "REG" position.

In the OPERATOR'S GUIDE, functions and operations will be described within the range of the Mode Lock positions of LOCK and REG using the REG key. Since operations requiring other positions and keys are controlled by the store manager, they are described in the MANAGER'S GUIDE.

5. DISPLAY

The operator display is located at the top of the register just above the keyboard.

OPERATOR DISPLAY (Front Display)

The customer display can be fixed as a rear display or moved to form a remote display. It can be moved up, down, to the right, and to the left, and thus is fully adjustable according to the position of the customer.

CUSTOMER DISPLAY (Rear or Remote Display)

5.1. NUMERIC DISPLAY

- AMOUNT (7 digits): Displays the numeric data, such as amount, quantity, etc.
When the amount is negative, the symbol "-" is displayed as well.
- NOTE:** *When the following code is being entered, the digits for "RPT" and "DPT" may be used as well (all 10 digits). On exceeding the 10 digits, the lowest 10 digits are being displayed.
Non-add Number (max. 18 digits)*
- DPT (2 digits): Displays the Department Code of the department item just entered. It stays lit when repeating the same department item entry.
Program option allows an ECR to display a cashier No. instead of a department code. In this case, department code is not displayed even when department item is entered.
- RPT (1 digit): Displays the repeat count of the same Department or PLU item. The count is indicated from the second entry on, and only the lowest digit of the repeat count will be displayed even when the count exceeds nine (such as "0" for 10, "1" for 11, etc.)

5.2. TRIANGULAR LAMPS

- SIGN ON ◀ This lamp turns lit only when the Cashier Code Entry method is selected. It lights up when a cashier has signed ON or signed IN. It goes out when the cashier has signed OFF or signed OUT.
- ALM ◀ Lights up with the alarm buzzer generated to indicate that the last operation or numeric entry was an error. To clear the error status, depress the **[C]** key.
- R OFF ◀ Lights up when the Receipt-OFF mode is declared by the **[LOG/RECEIPT]** (or **[RECEIPT]**) key. In this condition, no receipts will be issued for a sale to be entered. It goes out by depressing the **[LOG/RECEIPT]** (or **[RECEIPT]**) key again for Receipt-ON mode.
- ▶ TL Lights up on a finalizing operation with the total amount displayed when the sale is finalized without any amount tendered.
- ▶ ST Lights up when the **[ST]** key is depressed, indicating that the displayed amount is subtotal. The lamp is also illuminated when the **[TXBL TL]** or **[FSTL/TEND]** key is depressed, indicating that the displayed amount is the taxable total or food-stampable total. It also lights up when the amount tendered is less than the sale total with the shortage amount (balance due) is displayed.
- ▶ CG When an amount tendering operation is performed, it lights up with the change due displayed.

5.3. STATUS LAMPS

- SLIP ● Lights up when a validation slip is properly inserted to allow validation print. It flickers to require a validation when the validation compulsory status has been programmed on the last operation. It also flickers to require an endorsement print using the Guest Check Printer or the Receipt/Journal Printer.
- IN-LINE ● Flickers when a PC job is being executed.

6. OUTLINE OF PREPARATION PROCEDURE BEFORE OPERATING THE ECR

This chapter shows the outline of set-up procedure of the ECR before actually starting the ECR operation.

WARNING!

Turn the **POWER SWITCH** to **OFF** before connecting the power cord.

1

Remove the cash register from the carton, referring to Chapter "2. Unpacking". And take out all the parts and accessories.

2

Remove the tapes and seals for holding parts or protecting the register surfaces.

3

Plug the power cord of the register into a wall outlet. Make sure that the outlet voltage matches that of the power required for the register.

4

Insert the **REG** key into the Mode Lock.

5

Turn the Mode Lock to the **REG** position with the power ON.

6

Install the Receipt and Journal rolls (referring to the following section "**Installing the Receipt/Journal Roll**").

Installing the Receipt/Journal Roll

WARNING!

Care must be taken not to injure yourself with the paper cutter.

Installing the Receipt Roll

1

Turn the Mode Lock to the **REG** position with power ON.

2

To remove the Receipt Cover, insert the Receipt Cover Key to the Receipt Cover Lock, and then turn it 90° clockwise.

3

Cut the paper end to make it sharp.

4

Hold the paper roll so that the paper end will be fed from the bottom.

- 5 Place the paper roll in the outer side holder of the two roll holders.

6

There are the following two ways of receipt paper feed procedure.

A: Manual installation

B: Installation using the **[RF]** key

A: Manual installation

- 1 Lift the green lever on the receipt side.

- 2 Insert paper from the rear of the printer until the leading edge of paper comes out by 10 cm.

- 3 Lower the green lever.

- 4 Attach the receipt cover.

B: Installation using the **[RF]** key

- 1 Insert paper from the rear of the printer until it won't go no further.

- 2 Press the **[RF]** key to feed paper until the leading edge of paper comes out by 10 cm.

- 3 Attach the receipt cover.

Installing the Journal Roll

Follow Steps 1 to 5 for "Installing the Receipt Roll" on the preceding pages, except that the paper roll should be placed inner side holder of the two holders.

There are the following two ways of a journal paper feed procedure.

A: Manual installation

B: Installation using the **[JF]** key

A: Manual installation

- ① Lift the green lever on the journal side.
- ② Insert paper from the rear of the printer until the leading edge of paper comes out by 30 cm.
- ③ Insert the leading edge of paper into the slit of the take-up reel to take up paper two or three times.
- ④ Place the take-up reel on the take-up holder.
- ⑤ Lower the green lever.
- ⑥ Attach the receipt cover.

B: Installation using the **[JF]** key

- ① Insert paper from the rear of the printer until it won't go no further.
- ② Press the **[JF]** key to feed paper until the leading edge of paper comes out by 30 cm.
- ③ Insert the leading edge of paper into the slit of the take-up reel to take up paper two or three times.
- ④ Place the take-up reel on the take-up holder.
- ⑤ Attach the receipt cover.

Setting the Ribbon Cassette

1 Detach the Ribbon Cover.

3 Set the Ribbon Cassette.
After setting the Ribbon Cassette, turn the knob of the Ribbon Cassette in the arrow direction several times to remove the slack on the ribbon.

4 Attach the Ribbon Cover.

- NOTES:**
1. *Sign-OUT may automatically be performed without operating "9 [LOG]" on finalizing each transaction including Check (or other non-cash media) Cashing, No-sale Exchange from/ to Foreign Currencies, No-sale, Received-on-Account, Paid-Out, Loan, and Pick Up if so set by a program option. When this option is selected, Sign-IN is always necessary before starting every transaction.*
 2. *When the finalizing media key is programmed with Validation Compulsory or Endorsement Compulsory status, the automatic Sign-OFF or Sign-OUT will be executed after taking the validation or endorsement print of the media data.*

(2) For Multi-drawer Machines

Operations are basically the same as those for Single-drawer Machines, except that a one-digit drawer No. is entered through the [@/FOR] key prior to the Sign-ON entry:

By entering a Drawer No., the designated drawer will open on finalizing each sale by that cashier. It will cause an error if a Drawer No. already used by another cashier is entered.

Sign-OUT }
Sign-IN } Same as those for Single-drawer machines.
Sign-OFF }

(3) Mode Changes With Signing Operations

When **Signed-ON** or **Signed-IN**:

The Mode Lock position changes are allowed within "LOCK", "REG", "MGR", and "☐". Changing to any other position will be an error.

When **Signed-OUT**:

The Mode Lock may be turned to any position. However, cashier reports of the cashier being signed OUT cannot be taken in the "X" or "Z" position.

When **Signed-OFF**:

The Mode Lock may be turned to any position. Therefore, it is best for the cashier (or all the cashiers on a Multi-drawer Machine) to sign OFF before the Mode Lock is turned to the "LOCK", "X", "Z" or "SET" position.

NOTE: A program option provides a selection not to print nor issue receipts on any signing operation.

7.2. CASHIER KEY METHOD (Hardware Option)

When the [LOG/RECEIPT] (or [LOG]) key is not installed, the Push-stay Cashier Keys may be provided at the side of the Mode Lock:

Push-stay Cashier Locks and Keys

Each key is assigned to each cashier. The register will not operate in the "REG", "MGR", or "☐" mode unless one of these keys is inserted and pushed on or pushed-and-locked at the corresponding Cashier Lock. The light is lit when the key is in the ON-status.

Each of the keys may be inserted and pulled out in the neutral position marked with "1" to "4" in the above figure, and two ways are provided to set the Cashier Key to ON status:

PUSH-ON

When simply pushed on and released, the Cashier Key is set to ON status. This ON condition will be cleared by any of the following conditions:

- 1) when no key-in operations follow in three seconds.
- 2) when the transaction is finalized.
- 3) when another Cashier Key is pushed-on when outside a sale.
- 4) when the Mode Lock is turned to another position.

PUSH-AND-LOCK

When pushed and turned to the right, the ON status is locked until it is turned back to release and another Cashier Key is set to ON.

When another Cashier Key is attempted to push-and-lock, the register will entirely be locked.

If a Cashier Key has already been set to ON and a sale is under way, another Cashier Key will be disregarded if attempted to ON.

Under the CASHIER KEY METHOD, no receipts are issued, nor will the drawer open by setting a cashier key to the ON status.

The multi-drawer feature may be taken with the Push-stay Cashier Keys. In this case, each of the drawers 1 and 2 are assigned to Cashier 1 and Cashier 2, respectively. (No drawers for Cashiers 3 and 4.)

The "SIGN ON" triangular lamp will not be lit in any occasion under the cashier key method. The light attached to each Cashier Lock will be lit instead.

7.3. CASHIER KEY METHOD ([CLK] Keys)

When the [LOG/RECEIPT] (or [LOG] key is not installed, [CLK 1] to [CLK 8]; max. 8 keys may be provided on the ECR keyboard.)

Sale entries will be possible only when one of the [CLK] keys is depressed (in "REG", "MGR", or "☐" mode). When the same [CLK] key is again depressed, the cashier is in Cashier OFF status.

A program option provides a selection to display or not display the ON-status cashier code (1 to 8) at the "DPT" digit on the Operator Display.

The multi-drawer feature may be taken with the [CLK] keys. In this case, each of the drawers is assigned to the cashier of the following keys.

Drawer 1 to [CLK 1]

Drawer 2 to [CLK 2]

No drawers for [CLK 3] to [CLK 8]

-- Cashier ID Print on Sale Receipts --

On every sale receipt (issued in "REG", "MGR", or "☐" mode), the name of the cashier who has operated the entries of the sale is printed. The cashier name is programmable corresponding to each manager-assign cashier code (under the CODE ENTRY METHOD) or Cashier Key No. (under the CASHIER KEY METHOD).

7.4. TRAINING MODE START AND END

When you have newly employed cashiers, you may provide some time for them to train their skills of operating the FS-1450. You are to start and end the Training Mode. Once entering the Training Mode, a cashier may operate just as ordinary sale entry operations. The data in the Training Mode are processed into the training cashier memory but not affect any actual sales data in business.

CONDITION

Outside a sale, and in Cashier Signed-OFF condition for CASHIER CODE ENTRY Method

OPERATION FOR TRAINING MODES START

■ Code Entry Method

[LOG/RECEIPT] (or **[LOG]**) A training-ON receipt is issued.
 | |
 | └─ 2-digit manager-assign code of a cashier with Training status (01 to 99)
 └─ 2-digit cashier's secret code (01 to 99)

■ Cashier Key Method

Case 1: Set the Cashier Key programmed with Training status

Case 2: 99 → **[LOG/RECEIPT]** (or **[LOG]**) A training-ON receipt is issued.
 └─ Fixed to 99 for training purposes.

ENTRIES IN TRAINING MODE

Registering operation are allowed by the trainees:

- All sale or transaction entry operations are possible in the Training Mode, except:
 - 1) The drawer will not open.
 - 2) The Consecutive No. on the receipt will not be incremented.
 - 3) Validation or Endorsement print is not available.
 - 4) Print occurs on receipt but not journal.

OPERATION FOR TRAINING MODE END

■ Code Entry Method, and Cashier Key Method Case 2

0 → **[LOG/RECEIPT]** (or **[LOG]**) A training-OFF receipt is issued in both cases.

■ Cashier Key Method Case 1

Change from the current Cashier Key to another Cashier Key.

Now the register is in a Signed-OFF condition. You may turn the Mode Lock to any position for its corresponding operations. To start sale entries, a cashier's sign-ON status is again necessary.

8. KEYBOARD LAYOUT

The following is typical keyboard layouts for the FS-1450 series. Since this series is designed to be capable of programming most of the keys to be placed in the desired place on the keyboard, this is merely example. The keyboard of your register should have its own layout according to the store's requirements.

---Flat Keyboard (US Standard) ---

PLU Preset-code Keys												Department Keys (Department Preset-code Keys)									
1	8	15	22	29	36	43	50	57	64	71	78

9. FUNCTIONS OF EACH KEY

This section briefly describes functions of each key for your quick reference purposes. See the reference pages in Section 10: REGISTERING PROCEDURE AND PRINT FORMAT for detail operation sequences.

TABLE OF KEY FUNCTIONS

KEY	FUNCTIONS	REFERENCE PAGE
	LOG key. Used in case of Cashier Code Entry method, to declare start or end of normal operation by cashier. For details, refer to Section 7.1.	12
	Receipt key. Used to change the receipt-ON/OFF mode.	28
	Log/Receipt key. This is a dual-function key that has both [LOG] and [RECEIPT] functions.	See pages for [LOG] and [RECEIPT]
	Receipt Post-issue key. Used to issue the receipt of a sale when the sale has already finalized in the Receipt-OFF mode.	52
	Receipt Feed key. Used to advance the receipt roll and operated by holding it down until the paper has advanced to the required position.	—
	Journal Feed key. Used to advance the journal roll in the same fashion as the [RF] key is used to receipt roll.	—
	Numeric keys. Used to enter numeric values. Depressing the [00] key once is the same as depressing the [0] key twice consecutively. Depressing the [000] key once is the same as depressing the [0] key three times consecutively. The [.] key is used to designate the decimal point of a percentage rate or a quantity.	—
	Department keys. Used to enter each item, serving for classifying merchandise by department.	29
	Department No. key. Used to access a department by designating the department code, instead of depressing the specific Department key.	See pages for [DEPT]
	PLU (Price-Look-Up) key. Used to enter a PLU that is linked to a department.	30
	Clear key. Used to clear numeric entries or a declaration key entry.	—

KEY	FUNCTIONS	REFERENCE PAGE
#	Non-add Number Print key. Used to print a non-add number (such as Customer No., Credit Card No., etc.) on the receipt and journal for future reference.	41
NS	No-sale key. Used to open the cash drawer without relating a sale.	28
AMT	Amount key. Used to enter a manual amount of PLU item. And also used to enter an amount or price for an open department when the department is accessed by the [DP#] key.	29
PR OPEN	Preset Open key. Used to release a preset-price department or PLU items for a manual price entry.	29
LC OPEN	Listing Capacity Open key. Used to release the high or low amount limit preprogrammed on each department or PLU.	42
OPEN	Preset and Listing Capacity Open key. This is a dual-function key that has both [PR OPEN] and [LC OPEN] functions.	See pages for [PR OPEN] and [LC OPEN]
@/FOR	AT-FOR (Quantity Extension and Split Package Pricing) key. Used to multiply a department, PLU, or Bottle Return item entry by a quantity. Also used to auto-calculate and enter a split-package price.	31
VND CPN	Vendor Coupon key. Used to enter the amount of vendor coupons received from the customer.	40
STR CPN	Store Coupon key. Used to subtract a store coupon amount redeemed through a department.	40
RTN MDSE	Returned Merchandise key. Used to refund money to a customer who has returned items already purchased.	38
BTL RTN	Bottle Return key. Used to enter a bottle return amount.	38
DOLL DISC	Dollar Discount key. Used to subtract an amount from the sale such as a discount during a sale.	39
% +	Percent Charge key. Used to add a percent rate to a sale.	39

KEY	FUNCTIONS	REFERENCE PAGE
% -	Percent Discount key. Used to subtract a percent rate from a sale.	39
ITEM CORR	Item Correct key. Used to remove the last item from the bill, printing a line through the item on the receipt and journal.	40
VOID	Void key. Used to delete an item entered previously (before the last item) in the current transaction.	41
ALL VOID	All Void key. Used to cancel all the items entered in the current sale.	41
R/A	Received-on-Account key. Used to enter payments received on account, i.e. not relating to a sale. Also used for change reserve amounts loaned from the store.	29,49
PO	Paid-Out key. Used to record amounts paid out of the cash drawer not relating to a sale. Also used for Pick Up operations, such as money collections for banking purposes.	49, 5 (MG)
ST	Subtotal key. Used to obtain subtotal of the current transaction.	43
TXBL TL	Taxable Total key. Used to obtain the taxable total (the sale total including taxes due) of the current transaction.	43
AT/TL	Cash Amount Tendered/Cash Total key. Used to record all cash paid transactions and will be able to finalize a sale operation.	45
CHK TND or CHECK TEND	Check key. This is one of non-cash media keys, and used to cash a check when the register is outside a sale, or to finalize the transaction as a check payment.	45
Chg	Charge key. This is another non-cash media key, and usually programmed as "Charge Sale Total" key. This key can also be used for payments in credit cards, if the [CARD No.] key is installed.	See pages for [CHECK TEND]
MISC or MISC TEND	Miscellaneous Media key. This is one of additional non-cash media keys that may be installed besides [CHK TND] and [Chg]. This key has the same functions and programmabilities as the [CHK TND] key, and usually used as Tender-only key.	See pages for [CHECK TEND]

<div style="text-align: center; border: 1px solid black; padding: 5px; width: fit-content; margin: 0 auto;">EX</div>	<p>Tax Exempt key. Used to declare the exemption of the taxes from the sale.</p>	<p>44</p>

KEY	FUNCTIONS	REFERENCE PAGE
SALES PERSON	Salesperson key. Used to record sales contribution data of each salesperson for report purpose.	50
RPT	Repeat key. Used to repeat a department or PLU item entry.	30
CUR 1 to CUR 5	Foreign Currency keys. Used in tendering or exchange with foreign currencies.	47
TAX	Manual Tax key. Used to enter an irregular tax amount that cannot be calculated on the basis of the programmed tax table, and to add it to the sale total.	43
FSTL TEND	Food Stamp Total Read/Tender key. Used to read the Food Stampable portion amount of the sale and to tender an amount in Food Stamps.	45
FS/M	Food Stamp Modifier key. Used to reverse the Food Stampable/Non-stampable status of a Department, PLU, and other function keys programmable with food-stampable status.	42
GST/M	GST Modifier key. Used to reverse the GST taxable/Non-taxable status of Department, PLU, and other function keys programmable with GST tax status.	42
CLK 1 to CLK 8	Cashier 1 to Cashier 8 keys. Used to declare start or end of normal operation by cashier (instead of using [LOG/RECEIPT] (or [LOG]) key).	16
FUNCTION 1 to FUNCTION 10	Function 1 to Function 10 keys. Used to execute a command of key string preprogrammed on each of these keys. An operation series of maximum 10 keys can be programmed on each key, thus eliminating time in daily operation routines.	50
PLU Preset-code Keys	Each of these keys is programmed with a PLU Code. That is, depressing one of those keys is equal to entering a PLU Code then depressing the [PLU] key.	See pages for [PLU]

KEY	FUNCTIONS	REFERENCE PAGE
TOTAL	Total key. Used to finalize the sales entries and transfer all the balance.	36
TRAY TOTAL	Tray Total key. Used to obtain the total of an individual guest tray in a guest party.	53
CHARGE TIP	Charge Tip key. Used to enter a tip amount for cashier.	51
TIP PAID	Tip Paid key. Used to enter a cash tip amount for cashier.	51
GCP LINE #	GCP Line No. key. Used to enter the number of printed lines for accessing the appropriate position to print additional data on a guest check.	37
GUEST NO.	Number-of-Guests key. Used to enter the number of guests.	42
CALL No.	Call No. key. Used to enter the call No. of order taking.	54
PRICE SHIFT 1 to PRICE SHIFT 3	PLU Price Shift key. Used to shift the PLU code.	34
MENU SHIFT 1 to MENU SHIFT 3	PLU Menu Shift key. Used to designate the keyboard No. for Preset-code PLU.	34
RECALL	Recall key. Used to recall the order table.	55

10. REGISTERING PROCEDURE AND PRINT FORMAT

Before starting sale entries, read through the following instructions:

TRAINING MODE is available:

If you are a beginner in operating this register, ask the store manager for practicing in the TRAINING MODE.

During your operations, the following may occur:

- **Errors ...**

A tone continuously sounds and the keys on the keyboard are locked. In this case, depress the **[C]** key to cancel the error status. Then remove the cause of the error and perform the operation again.

- **Other errors requiring Manager Intervention ...**

When an error occurs and you cannot think of the cause or the same error occurs again, call your manager.

- **Receipt or Journal Paper-End is detected ...**

When an error tone sounds and the "AMOUNT" portion of the display is flickering, the receipt or journal roll is about to end. In this case, the error cannot be canceled by the **[C]** key. Replace the paper roll with a new one, referring to the paper installing/removing operations in Chapter 15 and Chapter 6.

- **Printer Motor-Lock Condition is detected ...**

If "Error" is indicated in the display panel ("AMOUNT" portion), the Printer Motor is locked due to paper jam, etc. Turn the Power Switch to OFF, and remove the cause of the motor-lock. Refer to Chapters 12 and 13.

CONDITION SETTING TO START TRANSACTION ENTRIES

Mode Lock: Insert the "REG" key and set it to the "REG" position.

Cashier Sign-ON or Cashier Key to ON status:

If the **[LOG/RECEIPT]** (or **[LOG]**) key is installed, you must sign-ON or sign-IN. (See Section 7.1.)

If Cashier Keys or Cashier Locks are installed, you must set your cashier key to the ON status. (See Section 7.2. and 7.3.)

Now you are ready for sale entries.

On the following pages are patterns of entering operations, and receipt or journal print format samples due to the operations. In the operation sequence patterns, " " indicates an input through the numeric keys, "[]" indicates a depression of the function key, and "---" indicates other registering and/or finalizing operations.

Please note that these are merely sample operations. Especially, the receipt or journal print indications merely show the standard print format. The actual print format and contents may vary on your machine in accordance with the differences in specification, program selections, etc.

		WHEN A POWER FAILURE OCCURS	58

RECEIPT-ISSUE/NON-ISSUE SELECTION

Receipts are issued or not issued according to the "R OFF" lamp illuminated/extinguished status on the Operator Display panel.

"R OFF" (Receipt OFF) Lamp Status Change Operations ([LOG/RECEIPT] = [RECEIPT])

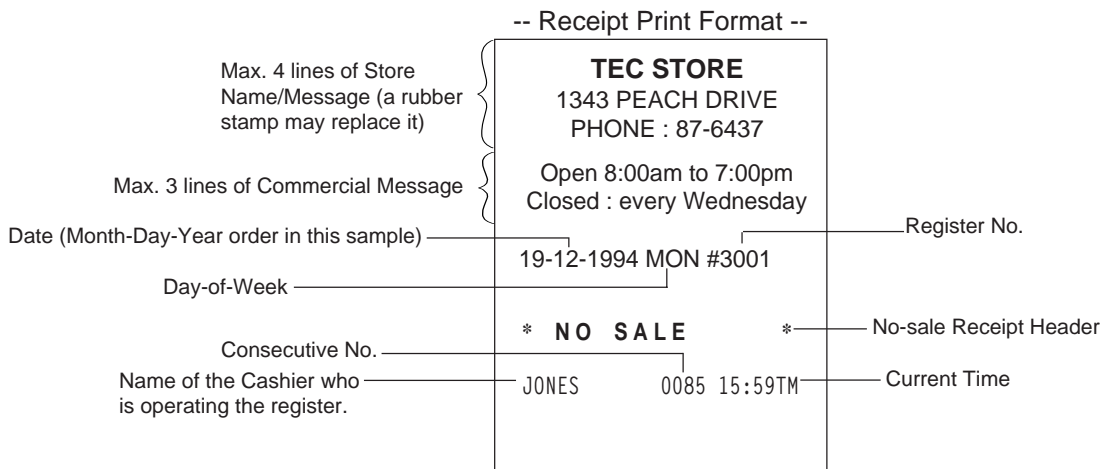

- NOTES:**
1. The "R OFF" lamp status at the starting of a transaction entry decides whether a receipt will be issued for the transaction or not. Switching the Receipt ON/OFF status during a transaction will not be effective.
 2. If a transaction entered with the "R OFF" lamp illuminated and finalized but a receipt is required, the **[RECEIPT ISSUE]** (Post-issue Receipt) key can be operated to issue a receipt.
 3. Simply depress the **[LOG/RECEIPT]** key without a numeric entry. If the key is depressed with a prior numeric entry in REG mode, it may turn out to be a Sign ON or Sign OFF operation (in case of Cashier Code Entry Method).

NO-SALE

The no-sale transaction is used to open the cash drawer without relating to any sales, such as for giving change, testing the receipt/journal print condition, etc.

OPERATION (must be operated outside a sale)

[NS]..... The drawer opens and a No-sale receipt is issued.

NOTE: The print format samples in this manual are not copies of actual receipts printed on an ECR but are merely indications of print formats. In those format samples, the bold-face characters indicate Double-sized Characters on actual receipts issued by the ECR. Also note that each Double-sized Character on actual receipts will be printed at the position half-character space rightward more than in the print format samples in this manual.

LOAN

This operation is used to record the cash amounts and food stamps loaned from the store as the change reserve in the drawer.

OPERATION (must be operated outside a sale)

Repeatable to add up amounts.

-- Receipt Print Format --

Loan Receipt Header	* LOAN *
Amounts loaned	CASH \$20.00
	CASH \$10.00
	CASH \$35.00
	SUBTL \$65.00
Total amount loaned	TOTAL \$ 65.00
	JONES 0095 15:59TM

DEPARTMENT ENTRY

Each department is preprogrammed as the "PRESET" type (with a price programmed) or "OPEN" type (with no price programmed). Perform operation depending on the type selected.

OPERATION

Open Department Type

- |Price| [**Open DEPT**]
- |Open-Dept Code| [**DP#**] |Price| [**AMT**]

Preset Department Type

- [**Preset DEPT**]
- |Dept Code| [**DP#**]

Preset-price Open through Preset Department Type

- [**PR OPEN**] (or [**OPEN**]) |Price| [**Preset DEPT**]
- [**PR OPEN**] (or [**OPEN**]) |Dept Code| [**DP#**] |Price| [**AMT**]

VEGETABLE	\$1.20TF
VEGETABLE	\$1.20TF

(2) PLU Repeat

Open PLU Type

- | Open-PLU Code | **[PLU]** | Price | **[AMT]** | **[AMT]** (or **[RPT]**)
- | Price | **[PLU Preset-Code key]** | **[Same key]** (or **[RPT]**)

Preset PLU Type

- | Preset-PLU Code | **[PLU] [PLU]** (or **[RPT]**)
- **[PLU Preset-Code key] [Same key]** (or **[RPT]**)

-- Receipt Print Format --

Hard Rolls-4	£0,70TF
Hard Rolls-4	£0,70TF

Preset-price Open Repeat

- **[PR OPEN]** (or **[OPEN]**) | Preset-PLU Code | **[PLU]** | Price | **[AMT] [RPT]**
- **[PR OPEN]** (or **[OPEN]**) | Price | **[PLU Preset-Code key] [RPT]**

- NOTES:**
1. If the first item of those repeated is modified with **[SI/M]**, **[LC OPEN]**, **[FS/M]**, **[TX/M]**, or **[GST/M]**, the modified status will be effective through the last item of the repeated.
 2. Please note that the Preset-price Open Repeat using a **[Preset DEPT]** key or a **[PLU Preset-Code Key]** can only be repeated by the **[RPT]** key.
 3. A negative Department/PLU cannot be repeated. Neither can any Set Menu PLU be repeated.

QUANTITY EXTENSION (MULTIPLICATION) FOR DEPTs/PLUs

OPERATION

(1) Department Multiplication

Open Department Type

- | Quantity | **[@/FOR]** | Price | **[Open DEPT]**
- | Quantity | **[@/FOR]** | Open-Dept Code | **[DP#]** | Price | **[AMT]**

Preset Department Type

- | Quantity | **[@/FOR]** | **[Preset DEPT]**
- | Quantity | **[@/FOR]** | Preset-Dept Code | **[DP#]**

Preset-price Open Type

- | Quantity | **[@/FOR]** | **[PR OPEN]** (or **[OPEN]**) | Price | **[Preset DEPT]**
- | Quantity | **[@/FOR]** | **[PR OPEN]** (or **[OPEN]**) | Preset-Dept Code | **[DP#]** | Price | **[AMT]**

(2) PLU Multiplication

Open PLU Type

- | Open-PLU Code | **[PLU]** | Quantity | **[@/FOR]** | Price | **[AMT]**
- | Quantity | **[@/FOR]** | Price | **[PLU Preset-Code key]** of Open-PLU

Preset PLU Type

- | Quantity | **[@/FOR]** | Preset-PLU Code | **[PLU]**
- | Quantity | **[@/FOR]** | **[PLU Preset-Code key]** of Preset-PLU

Preset-price Open Type

- **[PR OPEN]** (or **[OPEN]**) | Preset-PLU Code | **[PLU]** | Quantity | **[@/FOR]** | Price | **[AMT]**
- | Quantity | **[@/FOR]** | **[PR OPEN]** (or **[OPEN]**) | Price | **[PLU Preset-Code key]** of Preset-PLU

- NOTES:** 1. Quantity Max. 3 integral + 3 decimal digits
 (Use the [.] key for entering decimal digits.)
 Price (Unit Price)... Max. 6 digits
 (5 digits for Preset Point Feature)
 Product Must not exceed 8 digits.

-- Receipt Print Format --

5X	1.30@	
DAIRY		\$6.50TF
6X	0.45@	
BAKERY		\$2.70TF

- When the Quantity is 1-digit integer (1 to 9) followed by a Code-preset Department/PLU key with a price preset, the [@/FOR] key is omissible.
- The product obtained by multiplication cannot be repeated.
- The decimal portion of the Quantity entry itself is processed down to the two digits below the decimal point. The fraction rounding in this case is fixed to ROUND OFF.
- You can select the rounding process of the fractions of the product (result of multiplication) by a program option: ROUND OFF (initial setting), ROUND UP, or ROUND DOWN.

SPLIT PACKAGE PRICING ("Q'ty" = Quantity... in the patterns listed below)

OPERATION

(1) Department

Open Department

- | Purchased Q'ty | [@/FOR] | Whole Package Q'ty | [@/FOR] _____
 | Whole Package Price | [Open Dept]
 | Open-Dept Code | [DP#] | Whole Package Price | [AMT]

Preset Department

- | Purchased Q'ty | [@/FOR] | Whole Package Q'ty | [@/FOR] _____
 [Preset Dept]
 | Preset-Dept Code | [DP#]

Preset-price Open

- [PR OPEN] (or [OPEN]) _____
 | Purchased Q'ty | [@/FOR] | Whole Package Q'ty | [@/FOR] _____
 | Whole Package Price | [Preset Dept]
 | Preset-Dept Code | [DP#] | Whole Package Price | [AMT]

(2) PLU

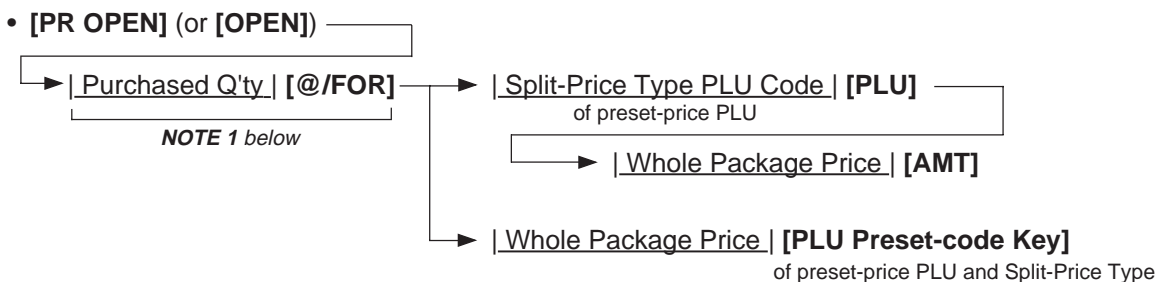

Open PLU

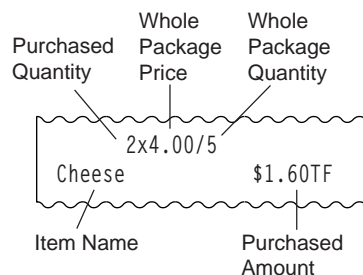

Preset PLU

Preset-Price Open

- NOTES:**
1. When this portion is omitted, the "Purchased Q'ty" value is regarded as "1" (i.e. one individual item but not the whole package quantity.)
 2. Purchased Quantity max. 3 digits integral only
 Whole Package Quantity max. 3 digits integral only
 Whole Package Price max. 6 digits
 3. One of two fraction rounding methods can be selected for the Split Package Pricing calculations -- Round Up PRODUCT (initial setting) or Round Up UNIT PRICE.

PLU PRICE SHIFT ENTRY

This operation is to register the PLU code which is added 1, 2, or 3 to the code of the entered PLU.

OPERATION

- [PRICE SHIFT 1] —————▶ [PLU] (PLU code plus 1)
- [PRICE SHIFT 2] —————▶ [PLU] (PLU code plus 2)
- [PRICE SHIFT 3] —————▶ [PLU] (PLU code plus 3)
- [PR OPEN] —————▶ [PRICE SHIFT 1 ~ 3] | PLU Code | [PLU] | Price | [AMT]

- NOTES:**
1. Error results when some operation other than PLU Price Shift entry is attempted after depressing the [PRICE SHIFT] key.
 2. Repeat entry after depressing the [PRICE SHIFT] key is unavailable.
 3. Program option allows an ECR to display PLU Price Shift No. together with PLU Menu No. instead of a department code.

PLU MENU SHIFT ENTRY

Max. 3 PLUs can be programmed on the respective PLU Preset-code keys of the flat keyboard. This operation designates the keyboard phase No.

OPERATION

- [MENU SHIFT 1] —————▶ [PLU] (PLU on keyboard phase No. 1)
- [MENU SHIFT 2] —————▶ [PLU] (PLU on keyboard phase No. 2)
- [MENU SHIFT 3] —————▶ [PLU] (PLU on keyboard phase No. 3)

- NOTES:**
1. After one PLU Menu Shift entry, the keyboard phase No. is automatically returned to the phase No. 1. However, the keyboard phase No. "Hold" spec. can be programmed by program option.
In this case, the keyboard phase No. can be shifted by the [MENU SHIFT] key only.
 2. Program option allows an ECR to display PLU Menu No. together with PLU Price Shift No. instead of a department code.

SINGLE-ITEM DEPARTMENT or SINGLE-ITEM PLU ENTRY

If a department (or PLU) is programmed as Single-item, the department (or PLU) entry sequence will immediately finalize the sale as cash sale when operated outside a sale.

OPERATION

Same as

DEPARTMENT ENTRY
PLU ENTRY

NOTE: *If operated inside a sale, it functions just as an ordinary itemized department or PLU.*

OTHER INCOME DEPARTMENT ENTRY, OTHER INCOME PLU ENTRY

This operation is used to enter items which do not directly become sales for the store, such as lottery, postage, gift wrapping fee, size adjustment fee, utility (payment of electricity and gas), and donation.

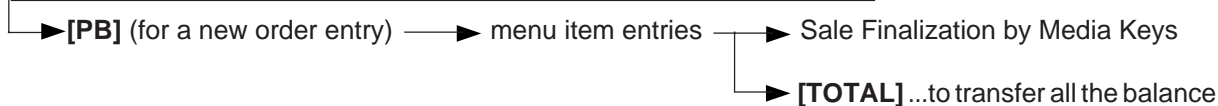

OPERATION

Same as DEPARTMENT ENTRY sequence using the Department Key which is programmed as an OTHER INCOME department. When a PLU is used for this purpose, the PLU must be programmed to link to a department with Other Income status.

ORDER ENTRY, PREVIOUS BALANCE ENTRY

OPERATION

Insert a slip into the Guest Check Printer (NOTE 1 below)

- NOTES:**
1. Previous Balance Entry can be executed even when a slip has not been inserted into the Guest Check Printer by a program option.
 2. Previous Balance Entry can be canceled. To end the entry, follow the procedure described below.

3. Previous Balance Entry is unavailable when the drive-through option is selected.

ADDITIONAL ORDER ENTRY

OPERATION

- NOTES:**
1. Previous Balance Entry can be executed even when a slip has not been inserted into the Guest Check Printer by a program option.
 2. When omitting the designation of the number of lines to be fed, lines will be fed with the preprogrammed value. When designating the number of lines to be fed, the specified number of lines to be fed should not exceed the preprogrammed maximum number of lines to be printed. For example, when 10 is input, the program feeds 10 lines and starts printing on the 11th line.

RETURNED MERCHANDISE

OPERATION

-- Receipt Print Format --

RTN	
BAKERY	-1.45TF
RTN	
CAN FOOD	-0.45TF

BOTTLE RETURN

OPERATION

| Bottle Return Amount | [BTL RTN]

| Quantity | [@/FOR] | Unit Amount | [BTL RTN]

└── max. 3 digit (integral value only)

NOTE: • *Must not exceed the sale total amount.... unless "Credit Balance" option is selected. (See REMARKS below.)*

REMARKS: *In using the [BTL RTN] key when the "Credit Balance" option is not selected:*

Bottle Return entry after a Department or PLU item

The bottle return amount must not exceed the preceding Department or PLU item amount.

Bottle Return entry after a subtotal

The bottle return amount must not exceed the subtotal amount.

(Operating the [BTL RTN] key after any other item ([%+], [%-], etc.) than those above, an error will result.)

-- Receipt Print Format --

BTR	-0.30

DOLLAR DISCOUNT

OPERATION

NOTES: The discount amount must not exceed the item amount or the subtotal unless the "Credit Balance" option is selected.

PERCENT DISCOUNT, PERCENT CHARGE (SERVICE CHARGE)

OPERATION

(1) Percent Discount

(2) Percent Charge (Service Charge)

- NOTES:**
1. Rate 0.001 to 99.999 (%)
 2. When the Dept or PLU item entry is modified with [RTN MDSE] or [VOID], the following % entry will also be modified with [RTN MDSE] or [VOID].
 3. No % + entry is allowed immediately after the input of a PB amount.
 4. A % entry will cause an error if operated after an Other Income Department/PLU.

-- Receipt Print Format --

-- Receipt Print Format --

- CAN FOOD - - - - -	\$1.00TF -
----------------------	------------

NOTES:

1. When [ITEM CORR] is depressed after a Repeat Entry, only the last item of those repeated will be deleted.
2. When [ITEM CORR] is depressed after a Quantity Extension entry, the entire product (result of multiplication) will be deleted.

VOID

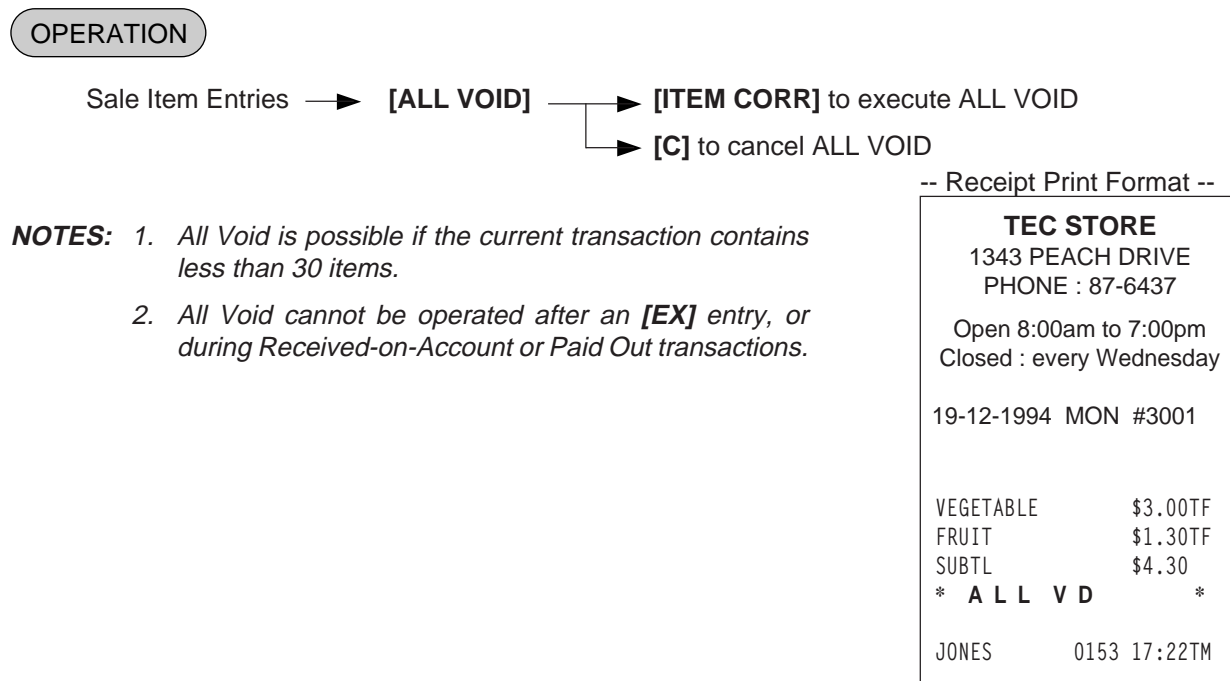

The VOID operation is used to delete an item already entered before the last item within the current sale. Such items cannot be deleted by the **[ITEM CORR]** key any longer.

NOTE: An amount exceeding the sale total cannot be entered unless the "Credit Balance" option is selected.

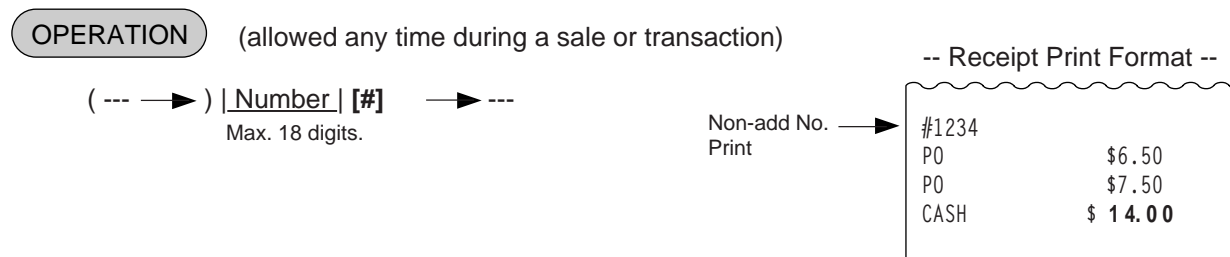

ALL VOID

When the current transaction being entered is found to be canceled before finalizing it, ALL VOID can be operated to delete all the items entered in the transaction.

NON-ADD NUMBER PRINT

Non-add numbers can be entered and printed for future references, to indicate codes or numbers of customers, media checks, credit cards, etc. The entered numbers do not affect any sale total data.

NUMBER-OF-GUESTS ENTRY

This operation is used to enter the number of guests of the sale.

OPERATION

(--- →) | Number of guests | **[GUEST No.]** → ---
Max. 3 digits

- NOTES:**
1. The Number-of-Guests entry is allowed at the start of or any time during a sale if before the sale finalization by media keys.
 2. When the operation is made more than once in a sale, the last entry is valid.
 3. The number entered is processed into the Tray Counter in the report memory.
 4. When the "No.-of-Guests Compulsory" option is selected, a sale cannot be finalized for payment until a number-of-guests entry is operated. However, the **[TOTAL]** key is operable even in this case.
 5. When a number-of-guests entry has not been made with the "No-of-Guests Not Compulsory" option, the count "1" is added to the Tray Counter in the report memory.

LISTING CAPACITY OPEN

For Department and PLUs

Depress **[LC OPEN]** (or **[OPEN]**) prior to or any time during an entry of an open-department, open-PLU, or preset-open department or PLU sequence (including REPEAT and QUANTITY EXTENSION entries). Please note that the **[LC OPEN]** or **[OPEN]** key must be pressed, at latest, before the final key of the entry sequence. The High Amount Limit for the department or PLU will be extended with two higher digits, and the Low Amount Limit will be extended with one lower digit. For entering an amount still exceeding these limits, you must call for a Manager Intervention.

For Media Tender Amounts

Depress **[LC OPEN]** (or **[OPEN]**) before or after the amount but Media Key. The High Amount Limit for the media tendering will be extended with one higher digit. In need of still exceeding this limit, you must call for a Manager Intervention.

For Amounts through [DOLL DISC], [VND CPN], [STR CPN], [BTL RTN]

To exceed their limits, you must always call for a Manager Intervention. The **[LC OPEN]** or **[OPEN]** key will not be effective. As for the **[STR CPN]** key only, the amount is limited by both High Amount Limit of the department through which the store coupon amount is entered and the amount limit for **[STR CPN]**. That is, when an amount cannot be entered using **[LC OPEN]** or **[OPEN]**, you must call for a Manager Intervention.

SELECTIVE ITEMIZER (SI) STATUS MODIFICATION

Depress **[SI/M]** (or **[SI1/M]** and/or **[SI2/M]**) for entering the required Department or PLU item, the same way as **[LC OPEN]** is operated for Departments and PLUs. The SI-net status is reversed to non-net status, and vice versa.

TAX STATUS or FOOD STAMP STATUS MODIFICATION

Depress **[TX/M]** (or **[TX1/M]**, **[TX2/M]**, **[TX3/M]**, **[TX4/M]**, **[GST/M]**), in the same way as **[LC OPEN]** is operated, prior to or any time during the entry sequence of the required Department, PLU, or any other tax-status-programmable item (**[DOLL DISC]**, **[%-]**, **[%+]**, **[STR CPN]**, **[VND CPN]**, **[BTL RTN]**, **[EAT IN]**, **[TAKE OUT]**). The taxable status is reversed to non-taxable, and vice versa. The **[FS/M]** key operates the same to reverse from the Food Stampable status to non-stampable, and vice versa, of the required item.

MANUAL TAX ENTRY (where irregular tax amount addition is applied)

OPERATION

---→ | Irregular Tax Amount to be Added | [TAX] →---

-- Receipt Print Format --

TAX5	\$0.50
------	--------

SUBTOTAL (Sale Total Pre-taxed) READ

OPERATION

---→ [ST] →---

-- Receipt Print Format --

SUBTL	\$6.00
-------	--------

The sale total (pre-taxed) of the items so far entered is displayed (and printed if so programmed), but the sale is not finalized. Additional item entries are allowed, if any.

TAXABLE TOTAL (Sale Total With Taxes) READ

OPERATION

---→ [TXBL TL] →---

-- Receipt Print Format --

TXBL TL	\$9.20
---------	--------

The sale total including taxes due of the items so far entered is displayed (and printed if so programmed), but the sale is not finalized. Additional item entries are allowed, if any.

NOTE: Taxable total including a PB amount is displayed during Previous Balance entry.

TAXABLE TOTAL READ and SUBTOTAL PRINT

(when only one of [ST] and [TXBL TL] keys, not both, is installed on the keyboard)

In this case, the key is usually programmed as [ST] key with [TXBL TL] functions. Since this key has both [ST] and [TXBL TL] functions, it may be labeled as "[ST]" in some stores or as "[TXBL TL]" in others.

OPERATION

---→ [ST] →---
(or [TXBL TL])

The sale total including taxes of the items so far entered is displayed (and the sale total pre-taxed is printed if so programmed), but the sale is not finalized. Additional item entries are allowed, if any.

SELECTIVE ITEMIZER (SI) TOTAL READ

OPERATION

---> **[SI/TL]** → --- (for Single-SI Machine)
 ([SI1/TL] and/or [SI2/TL] for Dual-SI machine)

⋮
 The SI total is displayed and printed on the journal
 (and printed on receipt if so programmed.)

SI Total Calculated

-- Journal Print Format --

SNACK	\$10.00TS
SI1 TL	-0.70
TAX	\$0.60
CASH	\$ 9.90

NOTE: The fraction process method is fixed to Round OFF.

TAX CALCULATION AND PRINT

Your register has been programmed with proper tax tables (tax breaks and/or tax rates). Each department or PLU has been programmed with proper tax status, i.e. taxable or non-taxable status of each Tax (of maximum 4 taxes of Tax 1 to Tax 4, and GST).

On finalizing a sale, the taxes due are automatically calculated and printed on the receipt, and thus added to the sale.

Whether all taxes (Tax 1 to Tax 4, and GST) are consolidated into one line print or individually printed in separate lines is a program option.

-- Receipt Print Format --

Example of Consolidated Print Line

TAX	\$3.14
CASH	\$ 16.34

Example of Separate Print Lines

TAX1	\$2.48
TAX2	\$0.66
CASH	\$ 16.34

TAX EXEMPTION

OPERATION

Exemption from Selective Taxes

Examples)

- [TX1/M] [EX]** → Sale Finalization ... to exempt from Tax 1 only
- [GST/M]** → Sale Finalization ... to exempt from GST only
- [TX1/M] [TX2/M] [EX]** → Sale Finalization ... to exempt from Tax 1 & Tax 2
- [TX1/M] [TX2/M] [TX3/M] [EX]** → Sale Finalization ... to exempt from Tax 1, Tax 2, & Tax 3

Exemption from All Taxes

- [EX]** → Sale Finalization
 - [TX1/M] [TX2/M] [TX3/M] [TX4/M] [EX]** → Sale Finalization
- } to exempt from all taxes.

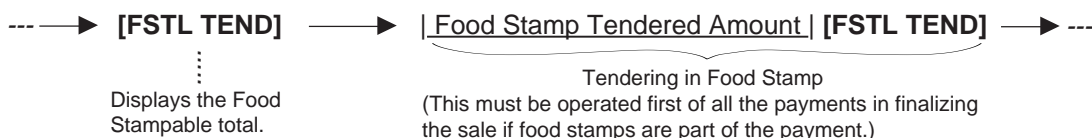

NOTE: On depressing **[EX]**, the sale total including the exempted tax(es) is displayed and pre-taxed amount of the sale portion subject to the tax exemption is printed.

-- Receipt Print Format --

Pre-taxed amount of the sale portion subject to Tax1 Exemption	→	TAX1EX	\$9.90
Pre-taxed amount of the sale portion subject to Tax2 Exemption	→	TAX2EX	\$3.30

FOOD STAMPABLE TOTAL READ, FOOD STAMP TENDERING

OPERATION

... When the Food Stamp tendered amount is less than the sale total, the sale is not finalized with the balance still due displayed. Then it can be finalized with cash or other media total or tendering operations.

-- Receipt Print Format --

Entire Sale Total	→	TOTAL	\$ 1 2 . 7 2
Food Stampable Total	→	FS/TL	\$12.72
Food Stamp Tendered Amount	→	F-STMP	\$15.00
Change in Cash	→	CHANGE	\$0.28
Change is Food Stamp	→	FS CHG	\$2.00

SALE FINALIZATION BY MEDIA KEYS

OPERATION

- NOTES:**
1. Whether each Media Key is depressed with a prior tendered amount entry or not is determined by the key status selections programmed for each media key.
 2. If the sale total is zero, any Media Key must be depressed without a tendered amount entry even if the key is programmed as "Tender" key.
 3. When a non-cash media key is programmed as "Tender-only" key, it cannot finalize a negative balance sale. Whether a "Total-only" or "Tender/Total" key can finalize a negative balance sale or not is a program option. Each of non-cash media key with Tender function may be programmed to prohibit Over-tendering and/or Short-tendering.

- NOTES:**
1. In both **MULTI-TENDERING** and **SPLIT TENDERING** operations, the sale is finalized and a receipt is issued on reaching the sale total amount.
 2. If a media key is depressed without an amount tender entry and the key is programmed to function as "Total" key, the sale is then finalized on that stage processing the balance at that moment into that media.

-- Receipt Print Format --

TAX	\$0.48
TOTAL	\$ 8 . 4 8
CHECK	\$5.00

SALE PAID IN FOREIGN CURRENCIES

OPERATION

- NOTES:**
1. The **[CUR 2]** to **[CUR 5]** keys operate the same as **[CUR 1]**, except that each of these keys has its own exchange rate programmed corresponding to each foreign currency.
 2. The amount tendered in the foreign currency and its exchange rate may be programmed to print by program options.
 3. Multi-tendering with the same foreign currency or Split-tendering with other medias or foreign currencies are possible.
 4. The foreign currency keys cannot be used to finalize Received-on-Account payments, Paid-out items, or Previous Balance Entry.

5. When a tendering by a foreign currency occurs during a short-tendered condition, the **[TXBL TL]** key will not be mandatory.
6. A sale of negative balance cannot be finalized using any of the foreign currency keys.

-- Receipt Print Format --

SALESPERSON ENTRY (Salesperson Sign-ON)

OPERATION

| Salesperson Code | [SALES PERSON] → --- ... The name of the person is displayed and printed on both journal and receipt.
1 to 99

Programmable options relating to Salesperson Entries:

- Salesperson's name non-print on receipt (print on journal only)
- Salesperson Entry compulsory before sale item entries
- Salesperson Entry Prohibited during a sale (i.e. allowed only one person entry at the starting of a sale but prohibits any other salesperson entry once the sale is started.) When this program is not selected, up to five salespersons can sign ON during one sale.

The salesperson entry status (salesperson Signed-ON condition) will be held until:

- Another salesperson entry is operated, or
- The sale is finalized.

FUNCTION KEY ENTRY

This operation will execute a string of key operations preprogrammed on each [FUNCTION] key.

OPERATION

--- → [FUNCTION] (→ ---)

⋮

[FUNCTION 1] to [FUNCTION 10]

- The following key operations are pre-programmed on the [FUNCTION 5] key in this example.

[1] [00] [DP1] [ST] [AT/TL]

NOTE: The following key operations are preprogrammed to the [FUNCTION 1] to [FUNCTION 4] keys as initial setting.

RECEIPT POST-ISSUE

OPERATION (must be operated outside a sale)

(A sale is finalized) —→ **[RECEIPT ISSUE]**

Programmable options:

- Post-issue receipt is available only when the sale has been finalized with the sale has been finalized in Receipt-OFF mode.
- Available regardless of Receipt-ON/OFF mode (in this case two receipts may be obtained for one sale.)
- Post-issue receipt is itemized receipt for a sale of maximum 50 lines. Exceeding 50 lines, the post-issue receipt is total-only receipt.
- Post-issue receipt is always total-only receipt regardless of the number of lines of a sale.
- Post-issue receipt is issued only once.
- Post-issue receipt can be issued any number of times.

- NOTES:**
1. *The post-issue receipt content will not be printed on the Guest Check Printer.*
 2. *The post-issue receipt is not available for Received-on-Account or Paid-Out transactions.*

CALL NO. ENTRY

This operation is used to enter the call No. of order, and to print its No. on the receipt and the journal.

OPERATION

(..... →) | CALL NO. | [CALL No.] →

Max. 3 digits

- NOTES:**
1. Call No. entry is allowed any time during a sale.
 2. Call No. entry is allowed any number of times during one sale.
 - On receipt and journal, all the Call Nos. entered during one sale are printed.
 3. Compulsion of Call No. entry can be programmed by the program option. In this case, the sale finalization is not allowed unless entering the Call No.
 4. Automatic creation of Call No. can be programmed by the program option. In this case, the Call No. is automatically created when a department/PLU item is entered.
 5. Call No. entry is unavailable when the drive-through option is selected.

DRIVE-THROUGH ENTRY

This operation is available only when the drive-through spec. is selected in the program option.

OPERATION

Same as

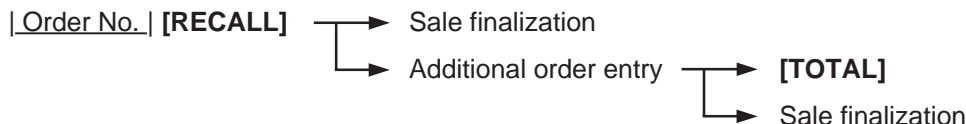

DEPARTMENT ENTRY
PLU ENTRY
SET MENU ENTRY

- NOTES:**
1. Order No. is automatically created when a department/PLU item is entered.
 - Number of order tables ——— Max.20
 - Order No. ————— 01 to 20
 2. Entry of a department/PLU item causes an error while all the order tables have been used.

RECALL ENTRY

This operation recalls a order table.

OPERATION

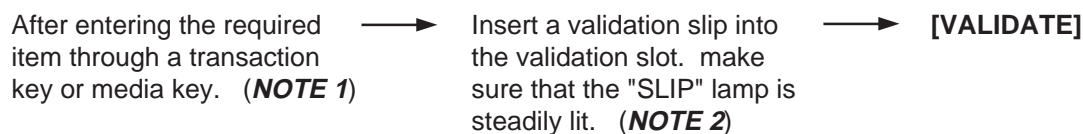

NOTE: Recall Entry can be canceled.
To end the entry, follow the procedure described below.

VALIDATION PRINT

OPERATION

NOTES: 1. If the "SLIP" lamp flickers during registrations, it indicates that the last item just entered is programmed to require validation print. In this case, no other operations can follow until the validation print of the item is first executed.

2. Because printing occurs on the front side of the slip, please be certain to insert the slip into the validation with the printing side forward.

3. No other operations can follow until the validation slip once printed is withdrawn.

4. The following are programmable selections relating to validation:

(1) PRINT FORMAT

- Date Print/Non-print
- Consecutive No. Print/Non-print
- Cashier No. Print/Non-print

(2) MULTI- or SINGLE-VALIDATION (Number of times of validation print allowed for the same item)

(3) VALIDATION COMPULSORY status on Media Keys and other transaction keys.

5. When the sale-finalizing media key is programmed with Validation Compulsory status and the key is used with over-tendering, the drawer will open on the compulsory validation print.

6. When the sale-finalizing media key is programmed with Validation Compulsory status and the key is used with equal-tendering or used as Total key, the drawer will open even if the status "Not Open" is programmed on the key.

GUEST CHECK PRINTER (hardware option) OPERATION

The TEC Guest Check Printer DRS-207 may be connected to the FS-1450 series ECR as an optional device. The Guest Check Printer will operate printing if a slip is properly inserted, regardless of the Mode Lock position (except that no print will occur in the "SET" mode or during program verification in the "X" mode).

1. The guest check printer will automatically activate printing when the slip has properly been set to the printer table.
2. The following are selective status programmable relating to the guest check printer. Ask the store manager and mark the status selected for your store.

SYSTEM OPTIONS RELATING TO GUEST CHECK CONTROL

- Guest Check Print compulsory for Previous Balance entry:
Standard: COMPULSORY
Option: FREE (Not compulsory)
 - Code No. (Check No.) Entry Before [**CHECK NO.**] key at Endorsement Print (Refer to ENDORSEMENT PRINT operation already stated.)
Standard: FREE (Not compulsory)
Option: COMPULSORY
 - Date on the guest check
Standard: PRINT
Option: NON-PRINT
3. The gap of the slip inlet is usually opened, and the slip may be inserted or withdrawn freely outside a receipt/journal print sequence.
When a slip is properly set to the guest check printer and the ECR is operated, the gap will be closed and printing will be performed. When the sale is finalized and the receipt is issued, the gap of the DRS-207 will be opened to allow the slip withdrawal. (The gap keeps closed during sale item entries.)
 4. The EJECT key on the DRS-207 may be used to open the closed gap in order to withdraw the slip and skip unnecessary item print. The EJECT key will be disregarded if the slip is set and the ECR receipt/journal printer is in a printing action.
 5. Printing on the guest check will be performed alternately with printing on the receipt/journal of the ECR.
 6. When printing of a check requires more than one page, operate as in the following for multi-page process:
 - 1) When printing reaches the last line (limit line) of the first page, printing stops, and the AMOUNT portion of the display flickers.
 - 2) Withdraw the first page, and insert the second page.
Then depress the [**C**] key on the ECR Keyboard. Printing resumes.
 7. To make an additional order(s) when an entry(ies) has already been made on the check slip, use the [**GCP LINE #**] key. For its entry procedure and receipt sample, refer to ADDITIONAL ORDER ENTRY already stated.

WHEN A POWER FAILURE OCCURS ...

If a power failure occurs, all sales data stored in the memory are automatically protected by the battery installed in the ECR. The battery is rechargeable and it is recharged when the AC power returns. As the power returns, the register revives to continue the work and displays the last item entered before the power failure. However, please note the following phenomena to occur on the register when the power is regained:

1. The printer will work to print the entered data without failure after the power recovery, if any data was being printed. However, one extra line may be fed on the power recovery depending on the power-recovery timing.

Example:

RTN	
VEGETABLE	-1.45TF
RTN	
Soup Can	-0.45TF

One extra line is fed here, i.e., a power failure occurred during printing the returned item of "VEGETABLE \$1.45".

2. The following are the display indications on the power recovery:

ECR CONDITION at the time of Power Failure		DISPLAY INDICATION on the Power Recovery
OUTSIDE A SALE	No key-in has been operated.	Displays zero. Operations may go on.
	Numeric or Declaration keys have been entered but not motorized keys.	Regains the display content that was obtained just before the power failure. The operations may be continued.
DURING A SALE	No Numeric or Declaration keys have been entered.	Regains the display content that was obtained just before the power failure. The operations may be continued.
	Numeric or Declaration keys have been entered.	

In the event of a power failure, it is suggested to check the receipt print content before the receipt is handed to the customer.

11. JOURNAL AND RECEIPT PAPER-END DETECTOR

- (1) This detects when either the journal or receipt paper is coming near the end. It is provided in order to prompt the operator to replace the old paper roll with a new one.
- (2) When the paper roll comes near the end (or the paper has not been set properly), no key operation will be accepted and the AMOUNT portion of the display will keep flickering.
- (3) When a new paper roll is set, only the **[RF]** and **[JF]** keys are allowed to operate. Next, when the **[C]** key is depressed, the display flickering will be cleared and normal key-in operations will be accepted. If any printing was suspended, it will continue printing.
- (4) If this detector senses a paper-end condition during printing, the printing will stop after the current line printing is completed.
- (5) If the **[C]** key is depressed in the paper-end condition, it will be ignored. The **[C]** key depression will be effective to clear the display flickering only after the new paper roll is set.

(For further details, refer to Chapter 15.)

12. ECR PRINTER MOTOR LOCK DETECTOR

- (1) This detects the printer motor lock condition caused by some trouble.
- (2) When such a condition is detected, the front display indicates "Error" and none of the keys (including **[RF]** and **[JF]**) will be accepted.
- (3) To regain the normal condition, turn the power of the ECR to OFF, remove the cause of the motor lock, and then turn the power to ON again.

13. GUEST CHECK PRINTER MOTOR LOCK DETECTOR

- (1) This detects the guest check printer motor lock condition caused by some trouble.
- (2) When such a condition is detected, the front display indicates "Error" and none of the keys (including **[RF]** and **[JF]**) will be accepted.
- (3) To regain the normal condition, turn the powers of the ECR and the guest check printer to OFF, remove the cause of the motor lock, and then turn the powers to ON again.

* If the cause cannot be found in the guest check printer and only the ECR may be required to work temporarily without the guest check printer, remove the guest check printer cable from the ECR, and turn the power of the ECR to ON.

14. PRINTER GUIDE OPEN DETECTOR

- (1) This detects the printer guide open condition.
- (2) When such a condition is detected, the front display indicates "Error" and none of the keys (including **[RF]** and **[JF]**) will be accepted.
- (3) To regain the normal condition, turn the power of the ECR to OFF, close the printer guide, and then turn the power to ON again.

15. PAPER ROLL REPLACEMENT AND OTHER MAINTENANCE OPERATIONS

WARNING!

Care must be taken not to injure yourself with the paper cutter.

Replacing the Receipt Roll

1

To remove the Receipt Cover, insert the Receipt Cover Key to the Receipt Cover Lock, and turn it 90° clockwise.

2

Cut the Receipt Paper as shown in the figure.

3

Depress the [RF] key to feed the remaining paper end.

CAUTION: *Never try to pull out the remaining paper end by hand. It may cause paper jamming.*

4

Load new paper roll as described in Chapter 6.

Replacing the Journal Roll

- 1** To remove the Receipt Cover, insert the Receipt Cover Key to the Receipt Cover Lock, and turn it 90° clockwise.

- 2** Depress the [JF] key to wind up enough of the Journal Paper, then cut the paper as shown in the figure. Depress the [JF] key to feed the remaining paper end.

CAUTION: *Never try to pull out the remaining paper end by hand. It may cause paper jamming.*

- 3** The wound-up portion of the paper can be easily removed from the Reel by pulling it sideways.

- 4** Load new paper roll as described in Chapter 6.

Replacing the Ribbon Cassette

When the print data on the receipt and journal becomes too dim, replace the Ribbon Cassette in the following order.

1

Remove the Ribbon Cover.

2

Remove the old ribbon cassette by pulling it in the direction of the arrow mark.

3

Install a new ribbon cassette by inserting it in the direction of the arrow mark.
Then, turn the knob of ribbon cassette several times in the arrow direction to take up the slack in the ribbon.

4

Attach the Ribbon Cover.

Replenishing Ink to the Store Name Stamp

1

To remove the Receipt Cover, insert the Receipt Cover Key to the Receipt Cover Lock, and turn it 90° clockwise.

2

Remove the Store Name Stamp by pulling it in the direction of the arrow mark.

3

Apply only two or three drops. Stamp may not print dark immediately. Allow time for ink to saturate the stamp.

4

Install the stamp by inserting it in the direction of the arrow mark.

5

Attach the Receipt Cover.

Manual Drawer Releasing

The drawer opens automatically when a transaction has been entered. In the event of a power failure or other trouble, the drawer can be opened manually in the following manner:

WARNING!

When opening the cash drawer, be careful not to let the drawer hit any person.

Fig. 1

1

Insert the Drawer Release Key into the drawer release lock and turn the key clockwise. The drawer will then open. (Fig. 1)

2

The Drawer Release Key can be taken out by returning it to the original position.

3

When the drawer is closed, it is automatically locked and will not open without the Drawer Release Key or a normal registering operation.

Removing the Drawer

Fig. 2

1

Pull the drawer out, and when it stops at the stopper, lift the drawer up and pull it further out (Fig. 2). When it stops again at the roller fixed in the drawer housing, lift it and pull it out (Fig. 3)

2

To return the drawer, follow the reverse procedure for removing.

Fig. 3

CDC (Cash Drawer Cover; Option) Lock

Locking (Fig.4)

Fig. 4

1

Push the Cash Drawer Cover to the back of the drawer.

2

Press the cover lightly, insert the key into the key hole on the cover, and turn it to lock.

Unlocking

Unlock the cover using the key, and lift the front end.

16. SPECIFICATIONS

Size	460 mm (width) x 450 mm (depth) x 318 mm (height) (height including rubber feet) (or 391 mm-height when Customer Display is popped up.)
Weight	15.5 kg
Power Required	AC 117 V – 10%; 60 Hz – 10% (varies depending on the destination)
Power Consumed	0.6 A at 117 V
Ambient Temperature	0 C to 35 C
Relative Humidity	10% to 90% RH
Size of Receipt and Journal Tape	45 mm (width) x Max. 80 mm (diameter)

MANAGER'S GUIDE

TABLE OF CONTENTS

	Page
1. DAILY OPERATION FLOW	1
2. MANAGER INTERVENTION	2
3. MANAGER'S OWN OPERATIONS IN "MGR" MODE	5
4. OPERATIONS IN "☐" MODE	7
5. READ (X) AND RESET (Z) REPORT	9
6. PROGRAMMING OPERATIONS	26
7. VERIFICATION OF PROGRAMMED DATA	67

1. DAILY OPERATION FLOW

The following shows the typical flow of daily operations on the ECR.

2. MANAGER INTERVENTION

2.1 ITEMS PROGRAMMED TO REQUIRE MANAGER INTERVENTIONS

During daily sale entry operations, the cashier may call for Manager Interventions. The following is the operation flow of a Manager Intervention.

- 1) During operations, the cashier comes across an item that requires a Manager Intervention. The cashier, already informed of it, may immediately call for a Manager Intervention. Or the cashier, without knowing of it, attempts the operation, and error results, clears the error by the **[C]** key, and then calls for a Manager Intervention.
↓
- 2) The manager goes to the cashier counter with the **MGR** or **MA** key.
↓
- 3) The cashier explains what kind of operation is attempted, and removes the **REG** key from the Mode Lock at the "**REG**" position.
↓
- 4) The manager inserts the **MGR** or **MA** key and turns it to the "**MGR**" position.
↓
- 5) The cashier operates the required item.
↓
- 6) The manager returns the **MGR** or key to the "**REG**" position and pulls it out.
↓
- 7) The cashier sets the **REG** key to the "**REG**" position again and continues registering operations.

The following are the tables of the keys and operations that are programmable with Manager Intervention. Fill in the table by marking in the "Not Required" or "Required" column of each item, referring to the documents, etc. listed in the table.

KEYS/OPERATIONS AND MANAGER INTERVENTION STATUS TABLE

KEY	Manager Intervention		Reference
	Not required	Required	
[DOLL DISC]			Chapter 7: VERIFICATION OF PROGRAMMED DATA • KEY STATUS READ As for changing the key status, ask your TOSHIBA TEC representative.
[VND CPN]			
[STR CPN]			
[BTL RTN]			
[%] (or [% II])			
[RTN MDSE]			
[VOID]			
[PO]			
[TIP PAID]			
[CHG TIP]			
[MENU SHIFT] (1 to 3)			
[EX]			
[NS]			
[ALL VOID]			
Credit Balance (NOTE 1 below)			These are program options for each store. Ask your TOSHIBA TEC representative for information and these status changes.
Negative-balance Sale Finalization by Media Keys except [AT/TL] and [FSTL TEND] (NOTE 2)			
Negative Department or negative PLU Entries (NOTE 3)			

- NOTES:**
- The "Credit Balance" means that amount entries through [DOLL DISC], [VOID], [VND CPN], [STR CPN], [BTL RTN] will result in over-subtraction of the subtotal amount at the time of the entry through any of those keys. If the status "Not required" is selected, over-subtraction using these keys will be allowed in the "REG" mode. The [RTN MDSE] key, negative departments, and negative PLUs are not subject to this "Credit Balance" status selection.
 - The "Negative-balance Sale" may be caused by:
 - Credit Balance if "Not required" is selected as the above Credit Balance status.
 - Amounts entered through the [RTN MDSE] key.
 - Other negative amounts.
 - The "Negative DEPT s or PLUs" are the DEPTs/PLUs programmed as negative status, but not normal DEPTs/PLUs through which Store Coupon or Returned Merchandise amounts are entered.

2.2 OTHER OPERATIONS REQUIRING MANAGER INTERVENTIONS

Amount Limit Release

Amount Limits may be programmed on Departments/PLUs, Tender Medias, **[DOLL DISC]**, **[VND CPN]**, **[STR CPN]**, **[BTL RTN]**. These limits are programmed to check an excessively high or low amount entry by cashier's mistake at the earliest stage. Guide your cashiers as in the following procedure:

(1) During sale entries by the cashier, an error occurs.

(2) The cashier clears the error by the **[C]** key. The cashier confirms the amount and operate the item again.

(3) If the same error occurs again, the cashier attempts to enter the amount using the **[LC OPEN]** or **[OPEN]** key.

(4) If the operation results in an error again, the Amount Limit cannot be solved by the **[LC OPEN]** or **[OPEN]** key.

(5) The cashier calls for Manager Intervention.

The procedure thereafter is the same as Steps 2) to 7) for the ITEMS PROGRAMMED TO REQUIRE MANAGER INTERVENTIONS. (Section 2.1)

■ In need of information of Amount Limits, see the following:

- 1) Individual Department High and Low Amount Limits (each PLU is restricted by the Amount Limits of its linked department): Ask your TOSHIBA TEC representative.
- 2) Departments Common High and Low Amount Limits, and High Amount Limits of Tender Media keys:
 - Chapter 7: VERIFICATION OF PROGRAMMED DATA
 - FUNCTION KEYS AMOUNT LIMIT READ
- 3) High Amount Limits for **[DOLL DISC]**, **[VND CPN]**, **[STR CPN]**, and **[BTL RTN]** keys:
 - Chapter 7: VERIFICATION OF PROGRAMMED DATA
 - NEGATIVE AMOUNT KEY AMOUNT LIMIT READ
- 4) For setting or changing the current Amount Limits, see the following:
 - Chapter 6: PROGRAMMING OPERATIONS
 - AMOUNT LIMIT SETTING FOR FUNCTION KEYS (Submode 8)
 - NEGATIVE AMOUNT KEY AMOUNT LIMIT SETTING OR CHANGING (Submode 35)

3. MANAGER'S OWN OPERATIONS IN "MGR" MODE

The following are operations possible only in the "MGR" position of the Mode Lock, which are performed by the manager or by a person under the manager's control.

3.1. PICK UP OPERATION

This operation is used when you collect money from the ECR drawer, during the day, for the banking purpose, etc. In order to record the money amounts collected and to subtract the amounts from the In-drawer Totals memory, this operation is necessary.

OPERATION Any time outside a sale, in a Signed-ON condition.

OPERATION Mode Lock: **MGR**

Repeat until all the collected media amounts are recorded.

- NOTES:**
1. As for each media and Food Stamp, its in-drawer limit amount can be programmed. On reaching this in-drawer limit when a sale is finalized, an alarm buzzer is generated to indicate that a Pick Up operation is necessary.
 2. Depress the media keys, **[VND CPN]** or **[FSTL TEND]** key corresponding to the collected media (**[AT/TL]** for cash). The media keys that can be operated here are those programmed to printed their media-in-drawer amounts in reports.
 3. Depress **[ST]**, if necessary, to obtain the subtotal amount of the medias so far collected.

Pick Up Operation Sample: The manager comes to the register and collects the cash amount of \$300.00 from the drawer:

Mode Lock: **MGR**

(must be in a signed-ON condition)

Depress **[PO]**.

Enter 30000, depress **[AT/TL]**.

Depress **[AT/TL]**.

3.2. ENFORCED SIGN-OFF A CASHIER (CODE ENTRY METHOD)

Each cashier signs-ON to start operations, signs-OUT for leaving the register for a while, signs-IN when comes back, and signs-OFF to end operations (refer to the OPERATOR'S GUIDE).

However, when a cashier once signed-ON and then signed-OUT for taking a break does not come back (or the cashier may have operated a sign-OUT by mistake instead of a sign-OFF), the register cannot be operated. No one else can operate sign-OFF, either, because the same cashier must sign-IN first before sign-OFF. In this case, the manager may operate an Enforced Sign-OFF.

CONDITION

In a Signed-OUT condition

OPERATION

Mode Lock: **MGR**

The 2 digit Cashier Code
(manager-assign potion)

[LOG/RECEIPT] ... The same will result as the normal sign-OFF.
(or **[LOG]**)

01 to 99

The 2-digit code assigned to each cashier. As for the code opening and assigned cashier names, refer to the following:

For verifying the code and the assigned cashier's name:

Chapter 7: VERIFICATION OF PROGRAMMED DATA

- CASHIER CODE AND NAME READ

4. OPERATIONS IN "☐" MODE

Instead of using the [RTN MDSE] or [VOID] keys in the "REG" or "MGR" mode for deleting individual items, the "☐" mode automatically processes positive items into negative and negative into positive. To operate, turn the Mode Lock to the "☐" position using the MA key, and enter the items, one by one, just as in the "REG" mode, as reading the sale receipt (issued at the time of the purchase) or tracing the returned items as if in the "REG" mode. A positive balance resulted in the "☐" mode indicates the amount to be paid back to the customer.

The "☐" mode operation may occur from time to time during day, on the cashier's request, just as in the case of ordinary Manager Interventions, when a customer to the cashier counter to return or cancel all the items that he once purchased. In using this mode, please be certain to read the following three cases of operation patterns. If you only turn the Mode Lock to the "☐" position and let the cashier operate the actual item entries in this mode, you should also inform the cashier of these three cases.

4.1. ORDINARY OPERATIONS IN "☐" MODE

All the sale items that were entered in "REG" or "MGR" at the time of purchase may be entered in the "☐" mode in the same way as operated at the time of purchase.

OPERATION AND RECEIPT SAMPLE

RECEIPT ISSUED IN "REG" or "MGR" MODE

TAX	\$0.30
CASH	\$ 5 . 1
7	
ITEM 2	
JONES	0252 18:51TM

These two receipts contain the same sale items and media finalization. The operations are also the same except the Mode Lock position.

The cashier merely follows the purchase receipt (on the left) and enters the same items in the ☐ position, finalizing with the same media in case a customer has returned or canceled the entire sale after the cashier had finalized that sale.

The ☐ mode header (*REG-* in this example) is printed at the top and the bottom of the sale contents in the ☐ mode receipt.

4.2. PROHIBITIVE OPERATIONS IN “☐” MODE

- NO-SALE ([NS])
- NO-SALE CASHING OF CHECK OR OTHER NON-CASH MEDIAS
- NO-SALE EXCHANGE from Foreign Currency to Domestic Currency, or vice versa
- LOAN
- PICK UP
- TRAINING MODE START/END
- VALIDATION PRINT
- ENDORSEMENT PRINT
- RECEIPT POST-ISSUE ([RECEIPT ISSUE])
- GCP FEED LINE NO. ENTRY ([GCP LINE#])
- Call NO. ENTRY

4.3. MANAGER INTERVENTION REQUIRED STATUS, AMOUNT LIMIT IN “☐” MODE

Since operations in the “☐” mode are performed under the manager’s control, the status requiring a Manager Intervention and Amount Limits (described in Chapter 2) will all be released, i.e., the same handling as in the “MGR” mode.

5. READ (X) AND RESET (Z) REPORTS

The following table shows the key operation to take each report. The “X” and “Z” reports have exactly the same print content if both are available, except that:

1. The “X” reports allow to read the sales data but not clear memories, while the “Z” reports allow to read the sales data and at the same time all the resettable memories will be cleared when the reports have been issue.
2. The symbol “X...” is printed on the top line of a Daily Read Report, “Z...” on a Daily Reset Report, “GTX...” on a GT Read Report, and “GTZ...” on a GT Reset Report, as initial settings.
3. A reset count is printed on the bottom of a “Z” report only.

WARNING!

When opening the cash drawer, be careful not to let the drawer hit any person.

- NOTES:**
1. When the mode set for taking combination reports does not match the mode of a report contained in the table, that report will be skipped.
 2. If no combination reports data have been programmed, Combination Report Table No.1 (which is issued by depressing the **[AT/TL]** key alone for Daily Reports and depressing 200 **[AT/TL]** for GT Reports) is auto-preset with All Department Report and Financial Report. It will be active as table No.1 content unless no data are programmed for Table No.1.
 3. The report output order is determined by the order programmed in each table.
 4. The drawer will open when a contained report is ruled to open the drawer.

GENERAL NOTES ON REPORT TAKINGS

1. The cashier signed-OFF or signed-OUT condition is required for taking any X or Z reports in the Code Entry Method. (Otherwise, an error will result when the Mode Lock is turned to the "X" or "Z" position.)
2. Reset reports will be printed on the receipt roll as well as on journal, and issued, regardless of the current Receipt ON/OFF status.
3. The **[ITEM CORR]** (or **[VOID]**) key may be depressed halfway during printing a report, for the purpose to abort the receipt issuance (except for some short reports). When a report-abort has been operated for a reset report, the memory of the report data will not be cleared.
4. The drawer will open at the starting of printing the reports which are stated with "(Drawer opens)" in the Daily and GT report table. However, the drawer may remain closed if so selected by a program option. This selection is applied only to the financial report.
5. The sales data of the following read reports will be cleared when the relevant reset reports are cleared. If those read reports are necessary, please be certain to take them before the relevant reset reports are taken:

READ REPORT (with no reset reports provided)	RELEVANT RESET REPORT that clears the read report data
Department Group Read	All Department Reset
Media Sales and In-drawer Total Read	Financial Reset
All Media Sales Total and Cash-in-drawer Read	Financial Reset
Inactive PLU Read	PLU Reset
Department Group GT Read	All Department GT Reset
Inactive PLU GT Read	PLU GT Reset

As you notice, "Financial Reset", "All Department Reset", and "PLU Reset" reports should be taken after all other reports (particularly read reports) on the respective levels of daily and GT, so that the required read reports data may not be cleared by those reset report takings.

FINAL READ or RESET (Daily or GT)

Mode Lock: **X** for read Enter 3, depress **[AT/TL]** (for Daily)
 Z for reset Enter 203, depress **[AT/TL]** (for GT)

Reset Report Format Sample

- NOTES:**
1. The numeric values placed in reports in this manual are merely examples to show the print format and may not balance correctly.
 2. The items attached with "*" outside the receipt frame are printed only on Daily Reports but not on GT Reports.
 3. The print or non-print status of each item on Financial Reports can be programmed.
 4. Non-printing of items with zero sales (i.e., zero skip) can be programmed by a program option.

GT REPORTS

The print form and item of a GT report are same as those of its corresponding daily report, except the report header portion. Please also note that some items provided in the daily report are not provided in its GT reports. The counters and totals in a GT report are records accumulated for a certain period (week, month, etc.) While those counters and totals in the daily report are usually records for a day. The accumulated record data in each GT report will be renewed when its GTZ report has been taken.

Header Example

6. PROGRAMMING OPERATIONS

This chapter is provided for the store programmer or the store manager who may have to change the programmed data of the FS-1450 series ECR on the daily, weekly, or monthly basis. Usually, all the basic program data required for your store should be set before delivering the product by your local TOSHIBA TEC representative. However, in need of changing or adding program data, please refer to this chapter. It is also recommended to read the OPERATOR'S GUIDE as well as other chapters of the MANAGER'S GUIDE in order to thoroughly understand the descriptions in this chapter. If there are any unclear points or program data other than listed here must be changed or added, please contact your TOSHIBA TEC representative.

BASIC KEY FUNCTIONS AND KEYBOARD VARIATIONS IN PROGRAMMING OPERATIONS

Basic Key Functions

1. The following are main keys and their functions to be used in programming operations:

[X] or **[@/FOR]** Used to enter the program Submode No. The **[X]** key is usually labeled as **[@/FOR]** on the ECR keyboard.

[ST] Used to enter the Address No. or Item Code. Also used to end the item data entries.

[#] Used to enter data for the address or item. Each character code is also entered through this key.

[AT/TL] Used to end the entire program Submode sequence.

2. Functions of the **[C]** key:

- When an entered program data is already printed, the **[C]** key cannot clear it any longer. To correct the data, re-enter it.
- Before the entered data is printed, the data may be cleared by the **[C]** key.

Keyboard Variations in Programming operations

The FS-1450 adopts a Flat keyboard.

The Flat keyboard will be set with the "Setting Mode Key Layout" in the programming operations including the character entries.

The following operations may be executed with the "Setting Mode Key Layout."

- STORE NAME/MESSAGE AND COMMERCIAL MESSAGE PROGRAMMING (Submode 1)
- CASHIER CODE AND NAME PROGRAMMING (Submode 2)
- PLU TABLE PROGRAMMING (Submode 4)
- SALESPERSON CODE AND NAME PROGRAMMING (Submode 20)

However, other operations (Which do not contain the character entries) should be operated with the ordinary "REG" mode key layout.

- NOTES:**
1. *If an option keyboard (PK-2) is connected, the DIRECT CHARACTER ENTRY method is allowed through both the ECR keyboard and the option keyboard.*
 2. *Any character not found in "Setting Mode Key Layout" should be programmed by following the CHARACTER CODE ENTRY procedure. (Characters on the key sheet can also be programmed by following this procedure.)*

CHARACTER ENTRIES

As already stated, there are two method of operations for character settings for names or messages: CHARACTER CODE ENTRY Method and DIRECT CHARACTER ENTRY Method.

CHARACTER CODE ENTRY Method

This method is to set a character by entering a Character Code and depressing the [#] key. This method is allowed only on the ECR keyboard.

DIRECT CHARACTER ENTRY Method

This method is to set a character by directly depressing the Character Key on any of the following keyboard:

- Flat Keyboard with "Setting Mode Key Layout" sheet.
- PK-2 Keyboard (PLU Keyboard; hardware option)

By using those character keys, the characters are directly entered. In this manual sample operations are attached to most of the programming operations. And at name or message programming portions, characters are entered by the DIRECT CHARACTER ENTRY method.

On the following pages, Character Code Tables under the CHARACTER CODE ENTRY Method and two different keyboards under the DIRECT CHARACTER ENTRY Method are shown. These pages are to be referred to, every time the "Character Entries" sequence is contained in various programming operations in this manual.

Read through these pages at least once first, so that you may know the appropriate method of character entries using the ECR keyboard and/or option keyboards.

Character Code Entry Method

Character Code Table 1: Standard Characters

		Column Code →													
		2	3	4	5	6	7	8	9	10	11	12	13	14	15
Row Code ↓	00		0	@	P	`	p			////	á	Å	\		fi
	01	!	1	A	Q	a	q				é	å	ll		<
	02	"	2	B	R	b	r			ø	í	Ø	lll		fl
	03	#	3	C	S	c	s			ß	ó	ø	ll		>
	04	\$	4	D	T	d	t			,	ú	Æ	—		$\frac{1}{2}$
	05	%	5	E	U	e	u			•	â	æ	—D		$\frac{1}{4}$
	06	&	6	F	V	f	v			Ä	ê	Œ	ƒ		★
	07	ç	7	G	W	g	w			Ë	î	œ			◊
	08	(8	H	X	h	x			Ö	ô	ß			kg
	09)	9	I	Y	i	y			Ü	û	ç			lb
	10	*	:	J	Z	j	z			É	à	£			No
	11	+	;	K	[k	{			ä	è	F			•
	12	,	<	L	¥	l				ë	ì				▽
	13	-	=	M]	m	}			ï	ç	,			△
	14	.	>	N	^	n	~			ö	Ñ	—			☐
15	/	?	O	_	o	◻			ü	ñ	⊖				

Character Setting Operations:

- To set a regular-sized character, enter the COL (column) code and then the ROW code, followed by the [#] key.

ex.) To set “%”, enter 205 and depress [#].
To set “kg”, enter 1508, and depress [#].

To set a blank instead of a character, simply depress [#] without a prior code entry, or enter 200 and depress [#].

Depress the [X] (or [@/FOR]) key once prior to a regular-sized character entry and it will be a double-sized character (a blank will also be double-sized).

ex.) To set “GROUP”, “G” in double-sized, and “ROUP” in regular-sized:

<u>[X] 407 [#]</u>	<u>502 [#]</u>	<u>415 [#]</u>	<u>505 [#]</u>	<u>500 [#]</u>
G	R	O	U	P

- Depress the [X] key twice prior to the first character code entry to set the entire message line or entry name with all double-sized characters.

ex.) To set “GROUP” all in double-sized:

<u>[X] [X]</u>	<u>407 [#]</u>	<u>502 [#]</u>	<u>415 [#]</u>	<u>505 [#]</u>	<u>500 [#]</u>
G	R	O	U	P	

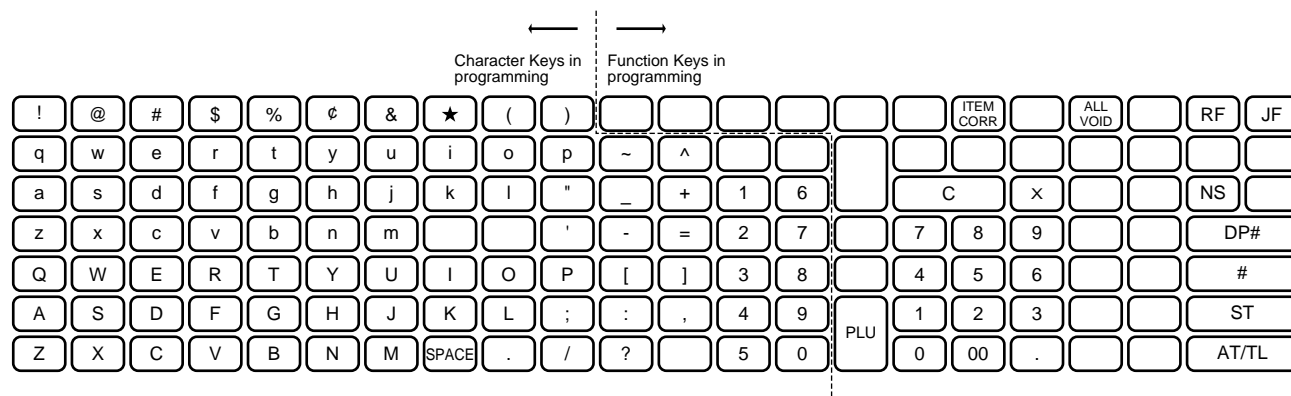

|
All Double-sized Declaration

Direct Character Entry Method

Using Flat Keyboard (installed as the ECR Main Keyboard):

-- Setting Mode Key Layout --

(Use the special template for this purpose and insert it between the film layers covering the Flat Keyboard. This key layout is applicable to only certain submodes.)

Character Keys: Simply depress the key to enter the character. (The [#] key should not follow.) The numerics 1 to 0 are entered as characters 1 to 0 but not as codes for PLU Item Codes, etc.

The One Double-size Declaration (by depressing [X] key once prior to the required character and the All Double-size Declaration (by depressing [X] twice before the characters) are the same as in the CHARACTER CODE ENTRY method.

Function Keys: These are function keys to be used in programming operations with the Setting Mode Key Layout. The Numeric Keys here are used to enter PLU Codes, etc. or numeric values as program data, but not to enter the numerics as characters.

Using PK-2 (PLU Keyboard; hardware option)

The PK-2 is used to enter a required PLU code by simply depressing the code-preset key on the PK-2 keyboard in the REG or MGR mode. In addition, the PK-2 can be used to enter characters directly during the programming operations that require character settings, such as STORE NAME/MESSAGE AND COMMERCIAL MESSAGE PROGRAMMING, PLU TABLE PROGRAMMING, etc.

The figure below shows the key indications of the PK-2 keyboard for the character setting purpose. Insert the template for this purpose between the film layers that cover the PK-2 keyboard.

Instead of entering a 3- or 4-digit character code and depressing the [#] key on the ECR keyboard, a simple depression of the appropriate key on the PK-2 keyboard will be the character entry.

All the function keys, such as [X], [ST], [AT/TL], etc. must be operated on the ECR side. Any characters not listed on the template may be entered by the CHARACTER CODE ENTRY method on the ECR keyboard (the characters even listed on the template may be entered as well by that method).

Please note also that keys "0" to "9" in the figure below function as character keys but do not function for code entries. Any code entries, for Menu Item Codes, Address Nos, etc. must be entered through the Numeric Keys on the ECR keyboard.

The One Double-size Declaration (by depressing the [X] key once prior to the required character) and the All Double-sized Declaration (by depressing [X] twice before all the characters) are the same as in the CHARACTER CODE ENTRY method.

CONDITION REQUIRED FOR PROGRAMMING OPERATIONS

At the top of each programming operation a "CONDITION" is given. Unless the register satisfies condition, the programming operations will not be allowed.

There are two types of conditions:

"Any time outside a sale"

It means that the programming operation is allowed when a sale is finalized before going into any other sale entry.

"After ... Reset"

It means that the designated reset report must be taken before entering the programming operation. And an error will result if the operation is attempted without taking the report. However, the words "After ... Reset" do not necessarily mean "immediately after ...".

When the designed reset report has already been taken and then some operations are performed in the SET, X or Z mode, the condition "After ... Reset" is still satisfied and the programming operation is still allowed.

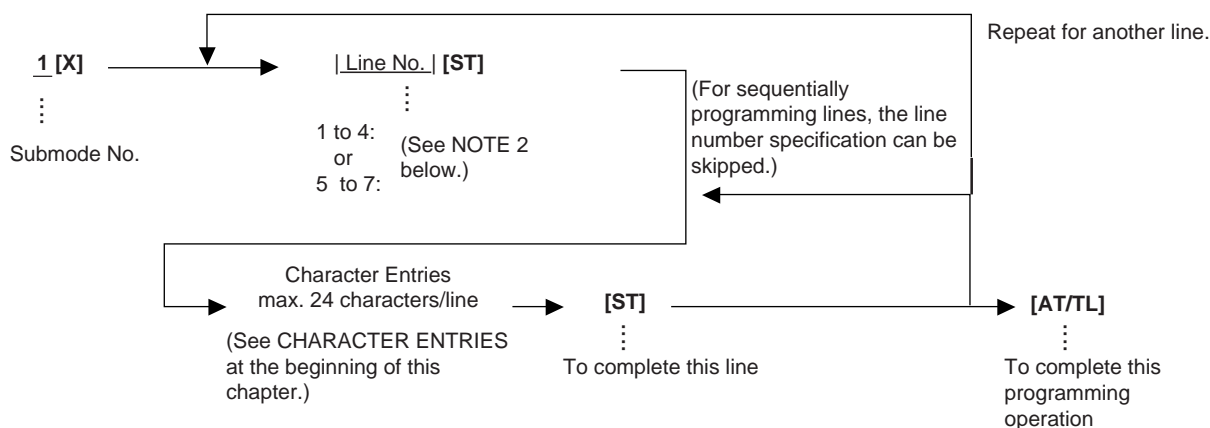

On the contrary, when the designated reset report has been taken but then some sales data relating to that report's output data are entered in the REG, MGR, or  mode, the programming operation will no longer be allowed and the same reset report must be taken.

Thus the condition "After ... Reset" indicates that all the sales data relating to the report data must be zero (except non-resettable memory data). Because of this "CONDITION" requirement, the report data will be protected from any inconsistencies of sales data entered in the period from a resetting of the report to another resetting of the same report next time.

STORE NAME/MESSAGE AND COMMERCIAL MESSAGE PROGRAMMING (Submode 1)

CONDITION Any time outside a sale

OPERATION Mode Lock: SET

NOTES:

1. For each line, a maximum of 24 regular-size characters or 12 double-sized characters may be entered. A combination of both types is also available.
2. Even if the option "Store Name Print by RUBBER STAMP" is selected, data can be programmed for the store name/message. However, the Rubber Stamp, instead of the programmed name/message will actually be printed for operations to issue receipts.
If the option "Store Name Print by DOT PRINTER" is selected, use 1 through 4 for the store name/message and 5 through 7 for the commercial message data, as Line No.
The range Line Nos. 5 to 7 is unavailable to a manual-cut printer.
3. If no commercial message is required on the receipt, program blanks for all three lines. As a result no extra lines will be fed. If any one of the three lines is programmed, the two other lines will cause line feeds.
4. The 4-line range assigned for the store name/message will be either printed or fed, regardless of any system option selection.
5. If any incorrect characters have been programmed, depress the [C] key to clear all the characters on a line and then re-enter characters from the beginning, or end the line with an [ST] and re-program the entire line. The new data will be active.
6. When all the lines have been programmed, do a check by issuing receipt. Only the lines with errors need to be re-programmed; other lines will not be affected.

ex.) To program the following draft as the Store Name/Message and Commercial Message (under the option "Store Name by DOT PRINTER"):

T E C	S T O R E	Line No. 1	Store Name/ Message portion, which can be replaced by a RUBBER STAMP print under the option "Store Name by RUBBER STAMP". Commercial Message portion.
1 3 4 3	P E A C H D R I V E	Line No. 2	
P H O N E :	8 7 - 6 4 3 7	Line No. 3	
		Line No. 4	
O p e n	8 : 0 0 a m t o 7 : 0 0 p m	Line No. 5	
C l o s e d :	e v e r y W e d n e s d a y	Line No. 6	
		Line No. 7	

OPERATION: Presumed that nothing has been programmed on each line.

CASHIER CODE AND NAME PROGRAMMING (Submode 2)

Programming

CONDITION Any time outside a sale

OPERATION Mode Lock: SET

NOTES:

1. The following table shows the Cashier Codes that can be entered. (The capacity is determined by the RAM Allocation Setting.)

Code Entry Type		1 to 10
Cashier Key Type	Push-stay	1 to 4, 99*
	[CLK] key	1 to 8, 99*

- * The Cashier Code 99 for the Cashier Key Type is fixed as a code of a cashier for Training Entries.
2. For the name of each cashier, a maximum of 12 regular-sized or 6 double-sized characters can be entered. A combination of both types is also available.
 3. When adopting the Push-stay Cashier Key, the cashier key "OFF" status is required for this programming.

- ex.) To program the following cashier data:
 Cashier Code 1: Name JONES, Status 0 (for Sale Entries)
 Cashier Code 2: Name SMITH, Status 0 (for Sale Entries)
 Cashier Code 3: Name MEAL, Status 1 (for Training Entries)
 Cashier Code 4: Name BROWN, Status 1 (for Training Entries)

PLU TABLE PROGRAMMING (Submode 4)

This submode can be operated when new PLU items are to be added, PLU program data is to be changed, or PLUs are to be deleted.

Programming or Changing

- CONDITION** To program new PLUs or to change any programmed contents of PLUs except the following case:
 Any time outside a sale
 To change the linked Department of a PLU with sales data not zero: After PLU Reset
- OPERATION** Mode Lock: SET

- NOTES:**
- 1) The "Address Nos" designation at the top after "4 [X]" can be skipped if not necessary. If entered, the designated Address (es) will automatically be accessed after the PLU Code designation.
 - 2) A maximum of 1100 PLUs are programmable (varies depending on the allocation of the RAM). The "[PLU]" key here indicates the key labeled simply as "PLU" but not any PLU Preset-code Keys.
 - 3) When the Address No. is sequential from the preceding address (if the Address Designation feature has not been used), the Address No. and the following [ST] can be omitted.
 - 4) The programming contents of each address are further described in the PLU TABLE PROGRAMMING CONTENTS below.

PLU TABLE PROGRAMMING CONTENTS

Address No.	Description of Programming Contents
1	<p><u>Linked Department Code</u> Enter the 2-digit code of the department to which the PLU is linked. When the PLU is newly programmed, this entry is compulsory (an error will result if this entry is skipped.)</p> <p style="text-align: center;">□□ [#] 1 to 60</p>
2	<p><u>Linked Department Code</u> Enter a maximum of 16 regular-sized or 8 double-sized characters. See the CHARACTER ENTRIES at the beginning of this chapter. End with [ST]. When no name is programmed for a PLU, the following will be the auto-program name for printing: PLUxxxxxx (PLU Code Max. 6 digits)</p>
3	<p><u>Preset Price</u></p> <ul style="list-style-type: none"> • For a preset PLU (preset-price PLU, enter a maximum of 6-digit price, and depress [#]. 1 to 999999 (result: \$0.01 to \$9999.99) When the option "Preset Point for one decimal digit allowed" is selected, the decimal digit can be entered after entering a maximum of 5 interger digits and the [•] key 1 to 99999 (result: \$0.01 to \$999.99) or 0.1 to 99999.9 (result: \$0.001 to \$999.999) • A zero-price (\$0.00) may be preset by entering 0 in the above operation. • When no numerics are entered and the [#] key is simply depressed, the PLU will be an open PLU (open-price PLU).

- NOTES:**
1. The date entry order may be Day-Month-Year or Year-Month-Day instead of Month-Day-Year if so selected in the program option.
 2. The Day-of-week is programmable not to be printed on receipts.

AMOUNT LIMIT SETTING FOR FUNCTION KEYS (Submode 8)

This submode sets the high amount limit in finalizing transactions by tendering through each media key and also sets the high and low amount limits in entering amount through departments.

CONDITION Any time outside a sale

OPERATION Mode Lock: SET

Key code	Item or Key to be applied	Key Code	Item or Key to be applied
1	[AT/TL] (Cash Tender)	7	[CREDIT 2] (Credit 2 Tender)
2	[CHK TEND] (Check Tender)	8	[CREDIT 3] (Credit 3 Tender)
3	[Chg] (Charge Tender)	9	[CREDIT 4] (Credit 4 Tender)
4	[MISC] (Misc. Tender)	10	[FSTL TEND] (Food Stamp Tender)
5	[CPN] (Media-Coupon Tender)	11	Common High Limit for all depts.
6	[CREDIT 1] (Credit 1 Tender)	12	Common Low limit for all depts.

- NOTES:**
1. If the individual High or Low Amount Limit of a department has been set, it prevails over the Common High or Low Limit for all departments here.
 2. The Amount Limit Set Value of each tender media is the high amount limit and is effective only when the media key is used for tendering but not when used as total key.

ex.) To set the Amount Limits of the following items:

Key Code	Amount Limit	Set Value
2 ([CHK TND])	\$99.99	9999
11 (Common High)	\$999.99	100000
12 (Common Low)	\$0.01	1

Mode Lock : SET, 8 [@/FOR]

SALESPERSON CODE AND NAME PROGRAMMING (Submode 20)

By programming Salesperson Codes here, those codes may be used in sales entries. In addition, the name of each salesperson can be programmed in maximum 12 characters.

Programming

CONDITION Any time outside a sale

OPERATION Mode Lock: SET

- NOTES:**
1. A maximum of 12 regular-sized or 6 double-sized characters may be programmed for a name. A combination of both types is also available.
 2. Even if no name is programmed (i.e. skipping the Character Entries before the second [ST] key) for a Salesperson Code, that code can be used in sale entries. Then, auto-preset ID symbol "S P xx" (xx = Salesperson Code) will be printed instead of a name on a receipt, etc.

ex.) To program the following Salesperson Codes and names:

Code	Name	Mode Lock: SET
1	White	20 [X]. 1 [ST] (Salesperson Code 1) W h i t e [ST]
2	Stacy	2 [ST] (Salesperson Code 2) S t a c y [ST]
3	Jansen	3 [ST] (Salesperson Code 3) J a n s e n [ST]

PLU PRESET-CODE KEY SETTING (Submode 27)

When there are any keys programmed as PLU Preset-code Keys on the ECR Keyboard, and/or when the PLU Keyboard PK-2 (hardware option) is connected to the ECR, a PLU code may be preset to each of those keys in this operation.

CONDITION Any time outside a sale

OPERATION Mode Lock: SET

- NOTES:**
1. If the PLU Code entry is skipped and a **[KEY]** is simply depressed in the above sequence, the preprogrammed PLU Code of the KEY will be displayed.
 2. A non-opened PLU Code (i.e. PLU non-existent in the PLU table file can be set on a KEY, however, pressing the KEY in sale entries will result in an error unless the code is opened in the PLU TABLE PROGRAMMING operation. Submode 4.
 3. If "0" is entered as PLU Code in the above sequence, the KEY will be closed. Pressing the closed KEY in sale entry will cause an error.
 4. The designation of the keyboard phase No. is omissible. In this case, the PLU code is automatically programmed on the keyboard phase No. 1. This designation is unavailable to the PK-2.

ex.) To set the following PLU Codes to KEYS on the ECR keyboard:

PLU Code

50321
50322

Mode Lock to SET.

%+ AND %- PRESET RATE SETTING

A preset rate may be set on each of the [%+] and [%-] keys, one independent rate for each key. Once a rate is preset, the % key will simply be depressed without a prior rate entry to activate the preset rate. If a rate is entered prior to the depression of the key, the entered rate (manual rate) will be activated instead.

CONDITION Any time outside a sale

OPERATION Mode Lock: SET

| Preset Rate | [% +] (For Percent Charge Preset Rate)

(0.001 to 99.999 (%); use the [.] key if a decimal portion is contained.)

| Preset Rate | [% -] (For Percent Discount Preset Rate)

ex.) To set 10% on [%+] key:

Mode Lock: SET, enter 10, depress [%+]

ex.) To set 5% on [%-] Key;

Mode Lock: SET, enter 5, depress [%-].

To reset the rate once set:

Enter 0, depress the required % key.

(Then the % key will always require a manual rate entry in sale entries.)

NOTE: When two [%+] keys or two [%-] keys are installed on the keyboard, two different % rates (one for each) may be preset, in the same manner as described above. The two rates may be the same or different from the other. Or only one key may be preset with a rate and other may remain non-preset.

Selective Itemizer Functions and Applications

The "Selective Itemizer" is a temporary total memory for each sale and is activated separately from the Main Itemizer (i.e. sale total memory). If certain Department or PLU items are programmed with the SI (selective itemizer) "net" status, the Selective Itemizer will function to add up amounts of the SI-net status items in registering the items, while the Main Itemizer will function to add up all the items in the sale. Thus, near the sale finalization, the operator may read the SI content by depressing the **[SI/TL]** key.

A preset % rate may be programmed for each of SI1 and SI2 (on the preceding page), and whether the calculated amount will add to, subtract from, or non-affect the sale total is a selective option. Whether the amount resulted by depressing the **[SI/TL]** key will print or non-print is another selective option.

The applications of this function may vary from store to store. Some stores may use it for counting the service stamps to be issued to the customers according to the sale amount of service-stampable items. In this case, the option "SI Total Non-affects Sale Total" should be selected, and a preset % rate, 1% for example, may be set to issue one service stamp for every \$1.00. Thus the number of stamps to be issued to the customer is displayed (and printed if so programmed) as a result of calculation with the preset % rate, but the resulted value (the number of stamps in this case) will not affect the sale total.

Example 1) With option "SI Total Non-affects Sale Total":

Key Operation in REG Mode

100 **[DEPT 1]** (SI-net)
 150 **[DEPT 2]** (non-SI)
 200 **[DEPT 3]** (SI-net)
[SI/TL] (1% is preset)
[AT/TL]

Receipt/Journal Print

DP 01	1.00 S
DP 02	1.50
DP 03	2.00 S
SI TL	0.03
CASH	4.50

"S": SI-net Symbol

Number of stamps to be issued.

Dept.1 and Dept. 3 are programmed with SI-net-status. On depressing **[SI/TL]**, "0.03" (which is 1 % of total amount of Dept. 1 "1.00" + Dept. 3 "2.00") is displayed and printed, and 3 stamps are to be issued to the customer in this case.

The sale total "4.50" is not affected by the SI calculation.

Other stores may use it for calculating the discount amount for certain sales items during a special discount sales period by presetting the discount % rate on the SI and programming SI-net status to certain Departments and PLUs which are subject to the special discount.

Example 2) With option "SI Special Discount":

Key Operation in REG Mode

100 **[DEPT 1]** (SI-net)
 150 **[DEPT 2]** (non-SI)
 200 **[DEPT 3]** (SI-net)
[SI/TL] (10% is preset)
[AT/TL]

Receipt/Journal Print

DP 01	1.00 S
DP 02	1.50
DP 03	2.00 S
SI TL	-0.30
CASH	4.20

Discount Amount resulted by SI %

On depressing **[SI/TL]**, "-0.30" (which is 10% discount from the total amount of Dept.1 + Dept. 3 items) is displayed and printed, and that amount is subtracted from the sale total. ($4.50 - 0.30 = 4.20$)

FOREIGN CURRENCY EXCHANGE RATE SETTING

In this program, the rate of each foreign currencies (corresponding to the [CUR1] to [CUR5] keys) will be set. By setting a rate on each Foreign Currency Key, reading the sale total and tendering in the foreign currency value will be possible for sale finalization.

CONDITION Any time outside a sale

OPERATION Mode Lock: SET

| Exchange Rate for Foreign Currency 1 | —▶ [CUR1]
0.000001 to 9999.999999
(Use the [.] key if decimal portion is contained in the rate.)

⋮

| Exchange Rate for Foreign Currency 5 | —▶ [CUR5]

As for how to calculate the Exchange Rate, see the description below.

Foreign Currency Exchange Rate Calculation

1. The rate must be calculated in the subsidiary currency unit values for both the domestic and the foreign currencies. (In calculating the rate from the domestic to a foreign currency with the same zero-suppress form, such as from U.S. \$ to French Franc. it will be no problem even if it is calculated in the main currency of \$ and Franc. However, in case of exchanging from a domestic currency such as \$ or Franc to Japanese yen or Italian Lira, or vice versa, this rule must be obeyed; otherwise a wrong rate will result.)
2. Calculate the required foreign currency value equivalent to the domestic currency value "1". Then the obtained value is the Exchange Rate value to be entered in the setting operation stated above.

For example, if the domestic currency is U.S. \$:

1¢ = xxxx.xxxxxx centimes (French Franc)
= xxxx.xxxxxx pfennings (Deutsche Mark)
= xxxx.xxxxxx yen (Japaneses yen)

etc.

Enter this value as each foreign currency rate.

ex.) To set three foreign currency rates:

Domestic Currency U.S. \$
 Assigning: **[CUR 1]** French Franc
[CUR 2] Deutsche Mark
[CUR 3] Japanese yen

Conditions given for Domestic Currency and Foreign Currencies
 (The rates here are merely examples.)

(DOMESTIC)		(CUR1)		(CUR2)		(CUR3)	
U.S. Dollar		French Franc		Deutsche Mark		Japanese Yen	
↓		↓		↓		↓	
\$1.00	=	F5.3729	=	DM1.7619	=	(145.50) ...	In Main Currency Values
↓		↓		↓		↓	
1 cent	=	5.3729 centimes	=	1.7619 pfennigs	=	1.4550 yen	In Subsidiary Currency Values (Enter these values for setting.)

KEY OPERATION for setting the rates above:

Mode Lock: SET

5 [.] 3729 **[CUR1]** (for French Franc)
 1 [.] 7619 **[CUR2]** (for Deutsche Mark)
 1 [.] 4550 **[CUR3]** (for Japanese yen)

Resetting a Foreign Currency Rate Once Set:

Enter "0" in place of the Exchange Rate for the Foreign Currency in the setting operation. Then the rate for that foreign currency will be reset. The Foreign Currency Key of the rate thus reset cannot be used in sales entries.

TAX TABLE PROGRAMMING

A maximum of four tables can be programmed (Tax 1, Tax 2, Tax 3, Tax 4) in accordance with installation of [TX1/M], [TX2/M], [TX3/M], [TX4/M] keys.

CONDITION After Financial Daily Reset

OPERATION Mode Lock: SET

TYPE 1: TAX 1 FULL BREAKS (COMBINATION OF NON-CYCLIC AND CYCLIC BREAKS)

| Max. amount non-taxable | [TX1/M]

| Max. amount for 1¢ tax levied | [TX1/M]

| Max. amount for 2¢ tax levied | [TX1/M]

⋮

Repeat up to the "A" Break

⋮

| Max. amount for N¢ tax levied | ... "A" Break (Non-cyclic Break Limit)

[ST] (to indicate the completion of Non-cyclic Breaks)

⋮

| Max. amount for N + 1¢ tax levied | [TX1/M] (beginning of Cyclic Breaks)

| Max. amount for N + 2¢ tax levied | [TX1/M]

⋮

Repeat up to the "B" Break ("B" Break - "A" Break = Multiple of \$1.00; max. \$9.00)

[AT/TL] (to complete this tax table programming)

NOTE: The break amount entry must be a maximum of 4 digits (1 to 9999 resulting in \$0.01 to \$99.99)

TYPE2: TAX 1 COMBINATION OF NON-CYCLIC BREAKS AND % RATE

First set the breaks up to the "A" Break entry and the [ST] key depression as shown in TYPE 1.

↓

| TAX RATE applied when exceeding the "A" Break amount |

(0.0001 to 99.9999 (%); use the [.] key if a decimal portion is contained. Examples: To set 5% , enter 5. To set 5.26%, enter 5.26. The fraction of the amount resulting from this % rate calculation will be rounded off.)

↓

[AT/TL] (to complete this tax table programming)

TYPE3: TAX 1% RATE ONLY

0 [TM1/M] → [ST] → | TAX RATE | → [AT/TL]

⋮

(The description for the TAX RATE in TYPE 2 is also applied to this case.)

- NOTES:**
1. For Tax 2, Tax 3, Tax 4 table programming, follow the same procedure in TYPE1,2, or 3 on the preceding page, using [TX2/M] or [TX3/M] or [TX4/M] instead of [TX1/M].
 2. If multiple tax tables are programmed, the Tax 1 table must be set first, then Tax 2, Tax 3 and Tax 4. The Tax 1 table setting will automatically reset all of the old Tax 1,2,3 and 4 tables if they have been programmed.
 3. No second depression of the [ST] key is allowed within one tax table programming.
 4. A maximum of 99 breaks can be entered for Tax 1 to Tax 4 tables altogether.

ex. 1) TAX 1 FULL BREAKS
