

SD-V55HT DVD/VHS Home Theater

KEY FEATURES

- ColorStream Pro® Component Video Output
- Digital Cinema Progressive (3:2 Pulldown)
- Digital Picture Zoom
- JPEG Viewer
- 4-Head/19-Micron Design

- 400 Watts Total System Power
- Full Decoding of Dolby® Digital, Dolby® ProLogic® II, and DTS®
- Multi-Channel Speaker Package
- WMA & MP3 Playback
- VHS Hi-Fi Stereo

- Simultaneous DVD playback and VHS Record
- Auto Clock
- Front A/V Inputs
- Auxillary A/V Input with Optical Digital
- Universal Remote Control w/TV Controls

ADVANTAGE TOSHIBA

- Combines the picture and sound advantages of a progressive scan DVD player, convenient recording and playback options of a videocassette recorder and a full-featured home theater audio package including multi-channel A/V receiver and matching speaker compliment
- ColorStream Pro® Component Video Outputs compatible with today's finest analog and digital televisions for delivery of stunningly colorful images
- Simultaneous DVD playback and VHS Record for watching a DVD while recording a TV program
- Six channel Audio/Video receiver (60-watts x 5 + 100-watt subwoofer) with Digital AM/FM Tuner
- Acoustically-matched speaker package including five satellites and separate subwoofer
- DVD-Video/CD/Video CD playback. DVD-R/CD-R/CD-RW* Compatible playback ensures discs made with personal computers can be played back in the home theater system, too
- JPEG Viewer enables a user to display digital photographs on a television set in the JPEG digital format

SD-V55HT

TECHNOLOGY & BENEFITS

VIDEO

ColorStream Pro® Component Video Outputs - These outputs allow the highest quality video signal to be sent from the DVD player to a component video equipped progressive scan TV. When this connection is utilized with today's HD-compatible sets, typical NTSC artifacts-like video noise, dot crawl, and flicker-are virtually eliminated, resulting in a low-noise, highly detailed picture with unequaled color purity.

Digital Cinema Progressive (3/2 Pulldown) - Delivers the smoothest, most film-like images to any progressive scan television, such as an HD-compatible one, and ensures maximum resolution.

JPEG Viewer -Enables the display of digital photographs captured in the JPEG format. Simply load the CD with your favorite photos and create custom slide shows with a few simple clicks of the player's remote control.

4-Head/19-Micron Head System - Offers superior slow motion effects over conventional 2 head VCR designs. Toshiba's 19-Micron Heads match precisely the width of the SP and EP azimuths and read only the signal recorded on each azimuth (not adjoining tracks). The benefit is significantly enhanced SLP and EP performance so good, it rivals the quality of tapes recorded in the SP Mode.

S-VHS Quasi Playback - This features will allow tapes that were recorded in a Super VHS deck to be played back in the Toshiba deck without a significant reduction in quality.

AUDIO

Full Decoding of Dolby® Digital, Dolby® ProLogic® II, and DTS® - Since all of the audio decoding is done internally by the SD-V55HT, you are assured that all of today's most popular formats are processed including the signature Dolby® Digital, Digital Theater Systems (DTS®), as well as Dolby's latest matrix surround system, ProLogic® II - offering a full-bandwidth stereo surround output.

WMA & MP3 Playback - Recordable Compact Discs (CD-R & CD-RW) with music stored in either the Windows Media™ Audio or MP3 file formats can be enjoyed.

Six Channel Audio/Video Receiver - The SD-V55HT packs a punch with 400 total watts of power. 60-watts per channel for all five main channels (Left, Center, Right, Left Rear, Right Rear), and additional 100-watt output is reserved for the sixth (subwoofer) channel.

System Designed Speaker Package - Acoustically timbre-matched satellite speakers ensures the smoothest sound reproduction within the sound stage. The subwoofer, with its dedicated low-frequency amplifier housed in the center unit, faithfully reproduces the low frequency information of today's finest digital soundtracks.

VHS Hi-Fi Stereo - Delivers the highest quality stereo sound from tapes recorded with a high fidelity soundtrack. This provides the ability for the internal Dolby® ProLogic II surround sound decoder to reproduce the surround sound content encoded on the tapes.

CONVENIENCE

Auto Clock - This feature ensures that your VCR never blinks "12:00" again. A special data stream in your local broadcast source (where available) automatically sets the clock display and keeps it accurate-even when time changes to daylight savings and back.

VHS Recordings From The DVD Player

Provided the selected DVD disc has not been encoded with the Macrovision copy protection system, you can record DVDs to VHS without color distortion.

SPECIFICATIONS

SD-V55HT

DVD	
Disc Qty	1
Disc Play	DVD-Video/CD/CD-R/CD-RW*/VCD/DVD-R
Video D/A	10-Bit/27MHz
Component Video Output	ColorStream Pro®
Resolution	500 Lines
Audio D/A	24-bit/96kHz
Dolby® Digital/DTS® Compatible	x
WMA & MP3 Playback	x
JPEG Viewer	x
