# Introduction

## FCC (USA)-INFORMATION

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.  
Shielded interface cables must be used in order to comply with emission limits.

**USER-INSTALLER CAUTION:** Your authority to operate this FCC verified equipment could be voided if you make changes or modifications not expressly approved by the party.

Thank you for purchasing the IK-WR05A Network Camera. Before using the camera, read this quick start guide carefully to ensure correct usage. After reading this quick start guide, save it for future reference.

The design, specifications, software, and quick start guide contents are subject to change without prior notice.

## Terms

- The term "OS" is used in this manual to indicate operating systems compatible with this product.
  - Microsoft® Windows Vista® Business Edition
  - Microsoft® Windows® 7 Professional Edition

### **NOTE**

---

- The performance of the network camera may vary depending on the network environment.

# Important Safeguards

## 1. Read Instructions

Read all the safety and operating instructions before operating the product.

## 2. Retain Instructions

Retain the safety instructions and user's manual for future reference.

## 3. Warnings

Comply with all warnings on the product and in the user's manual.

## 4. Follow Instructions

Follow all operating and use instructions.

## 5. Cleaning

Disconnect this camera from the power supply before cleaning.

## 6. Attachments

Do not use attachments not recommended by the camera manufacturer as they may pose safety risks.

## 7. Accessories

Do not place this camera on an unstable cart, stand, tripod, bracket or table. The camera may fall, causing serious injury to a person, or serious damage to the product. Use only with stand, tripod, bracket, or table recommended by the manufacturer, or sold with the camera. Any mounting of the product should follow the manufacturer's instructions, and should use a mounting accessory recommended by the manufacturer.

## 8. Ventilation

This camera should never be placed near or over a radiator or heat register. If this product is placed in a built-in installation, verify that there is proper ventilation so that the camera temperature operates within the recommended temperature range.

## 9. Power Sources

This camera should be operated only from the type of power source indicated on the information label. If you are not sure of the type of power supply at your location, consult your product dealer.

## 10. Power-Cord Protection

Power cords should be routed so that they are not likely to be walked on or pinched by items placed upon or against them. Pay particular attention to cords at plugs, screws and the point where they exit the product.

## 11. Installation

Install this camera on a secure part of the ceiling or wall. If installed on an unsecured location, the camera could fall causing injury and damage.

## 12. Lightning

For additional protection on this camera during a lightning storm, or when it is left unattended and unused for long periods of time, unplug it from the wall outlet and disconnect the power supply and cable system. This will prevent damage to the camera due to lightning and power-line surges. If lightning occurs, do not touch the unit or any connected cables in order to avoid electric shock.

## 13. Overloading

Do not overload the power supply or extension cords as this can result in a risk of fire or electric shock.

## 14. Object and Liquid Entry

Never push objects of any kind into this camera through openings as they may touch dangerous electrical points or short-out parts that could result in a fire or electrical shock. Never intentionally spill liquid of any kind on the camera.

## 15. Servicing

Do not attempt to service this camera yourself as opening or removing covers may expose you to dangerous electrical or other hazards. Refer all servicing to qualified service personnel.

## 16. Damage Requiring Service

Disconnect this camera from the power supply and refer servicing to qualified service personnel under the following conditions.

- a. When the power-supply cord or plug is damaged.
- b. If liquid has been spilled, or objects have fallen into the camera.
- c. If the camera has been submerged in water.
- d. If the camera does not operate normally by following the operating instructions in the user's manual. Adjust only those controls that are covered by the user's manual as an improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the camera to its normal operation.
- e. If the camera has been dropped or the cabinet has been damaged.
- f. When the camera exhibiting a distinct change in performance which indicates a need for service.
- g. Other trouble.

## 17. Replacement Parts

When replacing parts, be sure the service technician uses parts specified by the manufacturer or have the same characteristics as the original part. Unauthorized substitutions may result in fire, electric shock or other hazards.

## 18. Safety Check

Upon completion of any service or repairs to this camera, ask the service technician to perform safety checks to determine that the camera is in proper operating condition.

## Important Safeguards (Cont.)

CAUTION TO REDUCE THE RISK OF ELECTRIC SHOCK.  
DO NOT REMOVE COVER. NO USER SERVICEABLE PARTS INSIDE. REFER  
SERVICING TO QUALIFIED SERVICE PERSONNEL.

The lightning flash with arrowhead symbol, within an equilateral triangle, is intended to alert the user to the presence of uninsulated "dangerous voltage" within the product's enclosure that may be of sufficient magnitude to constitute a risk of electric shock to persons.

The exclamation point within an equilateral triangle is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

**WARNING:**

TO REDUCE THE RISK OF FIRE OR  
ELECTRIC SHOCK, DO NOT SUBMERGE  
THIS CAMERA IN WATER.

**FIELD INSTALLATION MARKING:**

WORDED: "THIS INSTALLATION SHOULD BE MADE BY A QUALIFIED SERVICE  
PERSON AND SHOULD CONFORM TO ALL LOCAL CODES."

This product is intended to be supplied by a Listed Power Adapter with LPS, rated  
12V DC, 0.37A minimum or 48V DC, 0.11A (for POE) minimum.

The product is not likely to require connection to an Ethernet network with outside  
plant routing, including campus environment; and the installation instructions clearly  
state that the ITE is to be connected only to PoE networks without routing to the  
outside plant.

# Notes on Use and Installation

- **Do not aim the camera at the sun**

Never aim the camera at the sun even with the camera power off.

- **Do not shoot intense light**

Intense light such as a spotlight may cause a bloom or smear. A vertical stripe may appear on the screen. However, this is not a malfunction.

- **Treat the camera with care**

Dropping or subjecting the camera to intense vibration may cause it to malfunction.

- **Never touch internal parts**

Do not touch the internal parts of the camera other than the parts specified.

- **Do not submerge in water**

The camera has some protection to water (see IP rating), and can be used indoors or outdoors. If the camera was submerged in water, turn off the power and contact your dealer.

- **Keep the camera installation away from video noise**

If cables are wired near electric lighting wires or a TV set, noise may appear in images. In this event relocate cables or reinstall equipment.

- **Check the ambient temperature and humidity**

Avoid using the camera where the temperature is hotter or colder than the specified operating range. Doing so could affect the internal parts or cause the image quality to deteriorate. Special care is required to use the camera at high temperature and humidity.

- **Should you notice any trouble**

If any trouble occurs while you are using the camera, turn off the power and contact your dealer. If you continue to use the camera when there is something wrong with it, the trouble may get worse and an unpredictable problem may occur.

# Setting the Network Camera Environment

## Items needed for network camera monitoring

- **Administrator's personal computer**

The personal computer that allows setting, operating, monitoring and other functions with the network camera is called the "administrator's personal computer" in this guide.

\* The personal computer for viewing monitored images is called the "user's personal computer" in this quick start guide. The network camera can be viewed by more than one personal computer at the same time.

- **Recommended personal computer system requirements:**

- Windows Vista® Business, or Windows® 7 professional.
- Internet Explorer® Ver 8.0
- CPU: Intel® Core™ 2 Duo 2GHz or greater
- Memory: 1GB RAM or greater

- **Connection equipment such as LAN cables, and switch or router.**

- The LAN cable type differs depending on the connection method.

- **Camera search application "Installation Wizard"**

- Install this application from the CD-ROM supplied as an accessory (Double-click "Setup.exe" in the CD-ROM and install the application by following the onscreen instructions.)
- This application is the tool to discover the IP address of a camera. Using this application, the IP address of a camera can be easily determined.

# Package Contents

- IK-WR05A

- Video Out Cable

- CD-ROM

- Alignment Sticker

- Warranty Card

- Quick Start Guide and Important Safeguards

- Clamp Filter and Screw Driver

- Silica Gel and tape, Screws and Anchors, RJ45 Female / Female Coupler

# Physical Description

General I/O Terminal Block

Pin	Name
+	Digital Input
-	GND

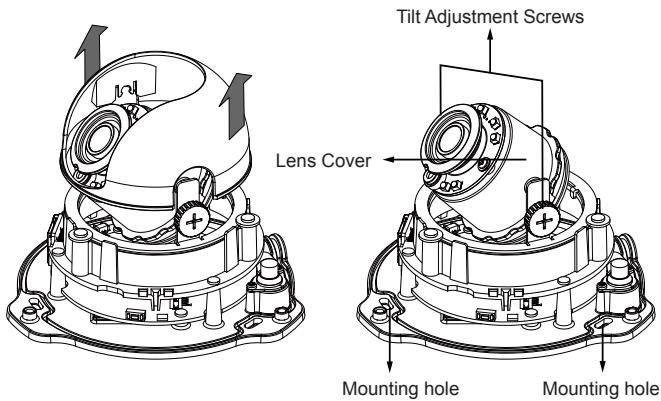

# Hardware Installation

First, follow the instructions below to remove the dome cover.

Record the MAC address before installing the camera.

Then remove the black cover as shown below.

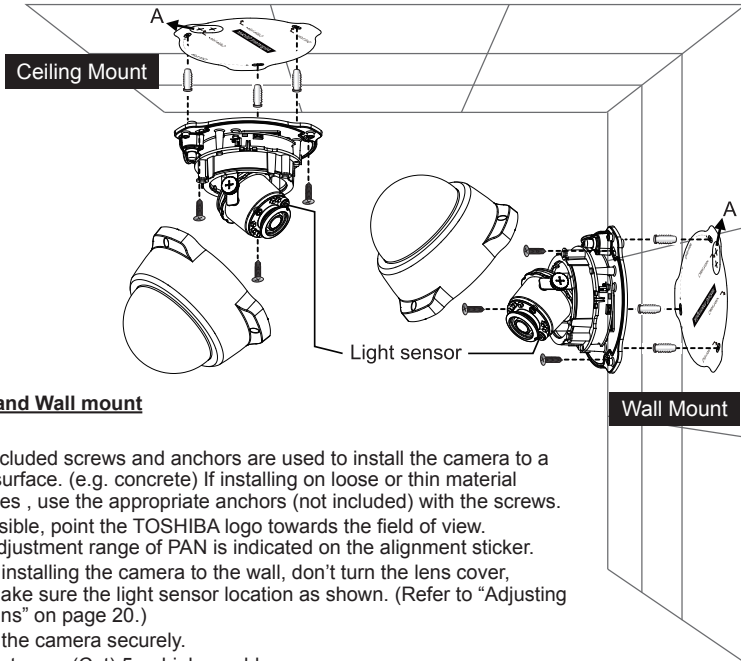

## NOTE

Protection film is placed on the lens at the factory. In order to protect the lens, do not remove until lens adjustment is completed.  
(Refer to “completion” on page 21.)

Install the supplied clamp filter onto the cable to prevent EMI radiation.

### **Ceiling and Wall mount**

#### **Notes:**

- The included screws and anchors are used to install the camera to a solid surface. (e.g. concrete) If installing on loose or thin material surfaces, use the appropriate anchors (not included) with the screws.
  - If possible, point the TOSHIBA logo towards the field of view. The adjustment range of PAN is indicated on the alignment sticker.
  - When installing the camera to the wall, don't turn the lens cover, and make sure the light sensor location as shown. (Refer to "Adjusting the Lens" on page 20.)
  - Install the camera securely.
  - Use Category (Cat) 5 or higher cable.
1. Attach the supplied alignment sticker to the ceiling or wall.
  2. Drill three pilot holes ( $\varnothing 0.19\text{inch} \times 1.02\text{inches (D)}$  ( $\varnothing 4.8\text{mm} \times 26\text{mm (D)}$ )) through the three circles on the sticker. Then hammer the three supplied plastic anchors into the holes.
  3. Drill a cable hole A ( $\varnothing 1.1\text{inch}$  ( $\varnothing 28\text{mm}$ )) as shown in the above picture, and lead the cables through this hole.
  4. Align the three mounting holes of the Camera with the three plastic anchors; insert the included three screws to the corresponding holes and tighten them with a driver securely.

#### **Cable installation**

If possible, lead all cables behind the camera body through a wall or ceiling.  
If this is not possible, route it through the side.

#### **CAUTION:**

If the cable is routed outdoors, ensure UL certificated tube is used to protect the cable.

#### **Operating environment**

$-20\text{ }^{\circ}\text{C} \sim +50\text{ }^{\circ}\text{C}$  { $-4\text{ }^{\circ}\text{F} \sim 122\text{ }^{\circ}\text{F}$ }

When the camera is installed and operated in low temperatures below  $-10\text{ }^{\circ}\text{C}$  ( $14\text{ }^{\circ}\text{F}$ ), normal images may not be obtained immediately after startup. In such a case, wait until the camera warms up (taking more than 1 hour) and start adjustment after turning on the power again.

### CAUTION

- Installation should be done only by qualified personnel and conform to all local codes.
- Install this camera on a firm and solid part of the ceiling or wall.  
If installed improperly or on a weak surface, the camera could fall causing injury and damage.
- Although the camera and the cable on the camera's end are waterproof, the cable molding at the other end is not waterproof.  
Measures should be taken to prevent water from leaking in through the cable-end molding, such as the use of expanding foam sealant, putties, and so on.  
Note that the cable on the camera should also be securely fastened to attain its waterproof functionality.

# Network Deployment

## Power over Ethernet (PoE)

### • When using a PoE-enabled switch

The camera is PoE-compliant, allowing transmission of power and data via single LAN cable. See the following illustration to connect the camera to a PoE switch via LAN cable.

### • When using a non-PoE switch

Use a PoE power injector (not supplied) to connect between the camera and a non-PoE switch.

## General Connection (without PoE)

1. Connect the camera to an Ethernet switch via LAN cable.
2. Connect the power cable from a power unit (not supplied) to the power socket.
3. Connect the PC to an Ethernet switch via Ethernet cable.

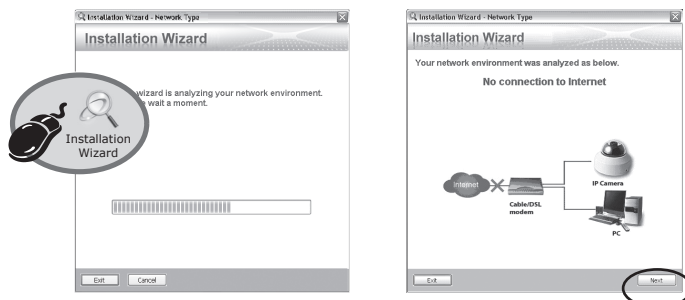

### NOTE

- The recommended power supply for this camera is 6 watts minimum.
- When PoE is connected, don't supply 12V DC.
- Spec of DC plug is mentioned below.

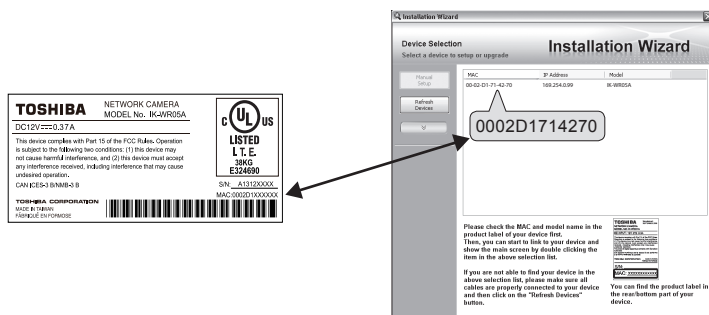

# Assigning IP Address

1. Install the "Installation Wizard" under the Software Utility directory from the CD-ROM.
2. The program will analyze your network environment. After your network is analyzed, please click on the "Next" button to continue the program.

3. The program searches for other Network Cameras on the same network.
4. After searching, the main installer window will pop up. Double click on the MAC address of the appropriate device to connect to the Network Camera.

## NOTE

- If "Installation Wizard" does not find the camera during the search, try turning off the wireless LAN of a PC.
- Installation Wizard can search the location of the Network Camera even though DHCP is not used on the network. In this scenario, assign the camera a static IP address because the IP address of the Network Camera has been assigned 169.254.\*.\* by default.

# Retrieving Images

1. Access the Network Camera from the network.
2. Retrieve live video through Internet Explorer®.

**For more information on camera configuration, please refer to user's manual on the CD-ROM.**

# Adjusting the Lens

Based on the live image retrieved from the camera, adjust the camera lens by performing the following:

## Using an analog monitor

This camera is able to output an analog NTSC video signal from the Video Out connector.

Adjustment of Viewing angle is possible using a portable monitor without using a personal computer when installing.

Use the included Video Out cable for this purpose.

## To adjust the viewing angle

1. Turn the lens module left and right.
2. Loosen the tilt adjustment screws on both side of the camera and then turn the lens module up and down. Upon completion, tighten the screws.
3. Turn the lens cover to adjust the image orientation. (Ceiling mount)

## NOTE

### Wall mounting

This camera is adjusted to the optimal position for ceiling mounting by default.

When installing to the wall, don't turn a lens cover 180 degrees.

And change the following setup of the camera.

Video>Image>General setting>Video orientation:

Video orientation:

- Flip
- Mirror

### Lens Focus

- This camera is using the deep focus lens. This camera comes into focus from 1.5m to infinite distance. No need to readjust the focus.
- The surrounding part of image is a bit out of focus if compared to the central part, due to the lens spec. It is not failure.
- There may be a difference of focus if compared to the left, right, top and bottom of image. It is not failure.

# Completion

1. Align the inner side of the black cover with the notches on both sides of the lens, fix the black cover.

**Note:** The black cover cannot be attached if installed in the wrong orientation.

2. You will find a silica gel bag attached to the camera.  
Replace this old silica gel with a new silica gel. The new silica gel is supplied in the aluminum foil bag. Remove it from the foil bag before installing.  
(Please replace the silica gel with a new one if you open the dome cover after installation.)
3. Attach the dome cover to the camera as shown below. The dome cover cannot be attached if installed in the wrong orientation. Align the side cover (or side cutout) with where the cable comes out from the camera. Push the dome cover to join with the camera.

**Note:** Don't touch the lens and clear cover when installing. Before attaching the dome cover, remove the protection film on the lens. Clean the clear cover if you touch it. After attaching the dome cover, make sure not to cover the light sensor with dome cover.

4. Secure the three dome screws with the supplied screw driver. Make sure all parts of the camera are securely installed.

The supplied screw driver is exclusively designed to match the dome screws. Do not discard the screw driver.

Treat silica gel bag with care. Do not tear the silica gel package.

**WARNING:**

*Keep the silica gel out of the reach of babies, infants, and children.  
DO NOT EAT, HARMFUL IF SWALLOWED*
