Q1: I inserted the Utility & Driver CD-ROM into my computer's CD-ROM Drive and the installation menu does not appear automatically. What should I do?

A1: If the installation menu does not appear automatically, click Start, click Run, and type D:\setup.exe where "D" in "D:\setup.exe" is the letter assigned to your computer's CD-ROM Drive. And then click OK to start the installation.

Q2: When I open up the utility, all the buttons are greyed out.

A2: Verify that the device is installed properly. Right click on **My Computer** -> **Properties**. Click on **Hardware**, then **Device Manager**. Double click on **Network Adapters**. Make sure that **802.11g Wireless Network Adapter** is listed and there is no yellow question mark or exclamation point. Also perform a reboot on the computer.

Q3: When I click on Scan, I can not see my SSID.

A3: Log on to your wireless router or access point and make sure that the SSID broadcast option is not disabled. Make sure the wireless light on your wireless router or access point is on.

Q4: I completed all the steps in the Quick Installation Guide, but my Wireless USB Adapter isn't connecting to my access point. What should I do?

A4: First, verify that the Network Name (SSID) matches your wireless router or wireless access point's SSID. Second, check your TCP/IP properties to ensure that Obtain an IP address automatically is selected. Third, click **Profile Management** -> **Scan** in the Wireless Client Utility to check and see if there are any available wireless networks listed. Third, click **Profile Management** -> **Scan** in the Wireless Client Utility to check and see if there are any available wireless networks listed.

Q5: The utility program shows good signal strength, but I can not get onto the Internet.

A5: First, log on to your wireless router or access point and check to see if encryption is enable. If encryption is enabled, go to **Profile Management** -> **Modify** -> **Security**. Select the proper **Security Options**, click on **configure**, then put in the proper **encryption key**. Then click **Ok**. Second, make sure to disable any firewall programs. Third, make sure that your router is properly configured for Internet.
