

Protect It!™ Surge Suppressors

- ▶ Up to 2280 Joules
- ▶ Up to €150 000 Ultimate Lifetime Protection
- ▶ Up to 8 Safety Outlets with Built-in Outlet Covers

- ▶ Energy-Saving Outlets (Select Models)
- ▶ Tel/Network & Coaxial Line Protection (Select Models)
- ▶ USB Charging Ports (Select Models)

Provide Economical & Reliable Protection

Tripp Lite Protect It! Surge Suppressors are the best defense against equipment damage caused by surges, spikes and line noise. They offer strong, cost-effective protection for valuable equipment in any home or work environment, including computers, peripherals, office equipment, power tools and more. Up to 8 convenient AC outlets (either Type F "Schuko" or Type E "French") include built-in safety covers that automatically seal unused outlets to prevent electric shock. A high-quality CEE 7/7 plug provides maximum safety and wall outlet compatibility. Widely spaced transformer outlets accommodate bulky AC adapters without blocking adjacent outlets. High-impact housings provide rugged durability.

Protect Every Connection

All models protect against surges, spikes and line noise on the AC power line and select models (TLP82NSATF, TLP82NSATD, TLP82MASF and TLP82MASD) also protect equipment connected to telephone, network, coaxial and TV aerial lines.

Charge USB Devices

USB Charging Ports

Models TLP2USBF and TLP2USBD include a convenient 2-port USB charger for devices such as mobile phones, MP3 players, handheld games and PDAs, eliminating the need for a computer connection or bulky AC adapters.

Guarantee Lifetime Protection

Up to €150 000 Ultimate Lifetime Protection* covers connected equipment against surge damage—including direct lightning strikes—for life. Ultimate Lifetime Protection coverage begins the moment you purchase your Protect It! Surge Suppressor, with no forms to fill out. All Protect It! Surge Suppressors are also backed by a lifetime product warranty.**

* Not available in all regions. See www.tripplite.com for terms and conditions.
 ** 10-year product warranty in Germany.

Save Energy & Protect the Environment

Energy-Saving Master/Subordinate Outlets

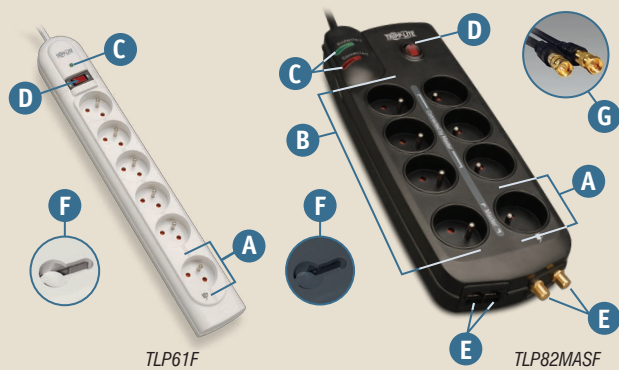

Models TLP82MASD and TLP82MASF include an energy-saving feature that allows one "Master" outlet to control power to three "Subordinate" outlets. When a computer connected to the "Master" outlet is switched on or off, the "Subordinate" outlets are also switched on or off. This feature turns off idle peripherals (such as printers, monitors and scanners) that aren't needed when your computer is off. Because these "phantom loads" continue to consume electricity while connected to live outlets, turning off the outlets prevents them from wasting energy.

All Protect It! surge suppressors meet the requirements of the RoHS Directive, which improves environmental conditions worldwide by restricting the use of hazardous substances in manufacturing. Tripp Lite is an industry leader in RoHS compliance.

- A Transformer Outlets**
Accommodate bulky AC adapters without blocking adjacent outlets.
- B Master/Subordinate Outlet Array**
Saves energy by turning off energy-wasting "phantom loads." When a computer connected to the "Master" outlet is switched on or off, the "Subordinate" outlets are also switched on or off.
- C Diagnostic LEDs**
Identify power problems before they harm connected equipment. "GROUNDED" LED indicates a properly grounded wall outlet. "PROTECTED" LED indicates that surge suppression is active. "CONNECTED" LED indicates that devices are connected to "Master/Subordinate" outlets and working properly.
- D Lighted On/Off Switch with Circuit Breaker**
Provides one-touch power control over all connected components. Breaker protects against dangerous system overload.
- E Tel/Network & Coaxial Line Protection**
Prevents damage caused by surges on telephone, network or coaxial lines connected to your equipment.

- F Keyhole Mounting Slots**
Provide convenient wall or cabinet mounting (optional).
- G TV Aerial Adapters**
Allow coaxial protection jacks to connect to TV aerial plugs (PAL connectors) and protect a TV aerial line.
- H USB Charging Ports**
Charge devices such as mobile phones, MP3 players, handheld games and PDAs, eliminating the need for a computer connection or bulky AC adapters.
- I Safety Outlets**
Include built-in safety covers that automatically seal unused outlets to prevent electric shock.
- J CEE 7/7 Plug**
Provides maximum safety and wall outlet compatibility.

Specifications

Model	AC Safety Outlets	Protection Rating (Joules)	Transformer Capacity (Typical)	Tel/Network Protection (RJ45)	Coaxial Protection (F Connectors)	USB Charging Ports	Diagnostic LEDs	Cord Length	Outlet Type	Included Features (See Above)	Ultimate Lifetime Protection*
