## INSTALLATION \& SAFETY

Choosing the best location for your phone
When choosing a location for your phone there are a number of appliances the phone should not be near, and areas you should avoid

This symbo indicates important operating and servicing instructions.

The earcapo this telephone may attract and retain small metallicobjects.

$\qquad$

## Here! ${ }^{(2)}{ }^{3}$

This page is a very condensed version of the Owners Manual. It is designed to allow you to get your phone installed and operating as quickly as possible - however it does not attempt to explain any of the advanced features of the XSA975.

1. Installing the Base Unit

Make sure the AC Adaptor/s remains switched ON at all times. Use only the Uniden AC Adaptor/s supplied with this unit.

- Plug the telephone cord into the Base Unit, then into the telephone socket on the wall.
- Plug the AC Adaptor cord into the Base Unit, then the AC Adaptor into the wall
 power point.
- Press the AC Adaptor cord into the curved recess under the Base Unit
- Raise the antenna

## Installing the Charge Cradle

- Plug the AC Adaptor cord into the Charge Cradle then the AC Adaptor into the wall power point.

## 2 Installing the Handset Battery

- Press the battery cover and slide it off.

- Connect the battery plug to the socket at the rear of he battery compartment.
- Make sure the plug is the right way round
- The RED and BLACK battery wires must match the RED and BLACK printed on the phone case for the plug to fit properly.
- Press firmly until it clicks into place.
- Position the battery in the compartment and slide the cover into place

## Repeat process for second handset

- Place one handset on the main base and place the other handset in the extra charging cradle. It does not matter which handset is placed on the main base and extra charging cradle.

## 3. Making a Call

## Registration of Dual Handset

- After fully charging the handsets, remove the handset from the extra charging cradle and place it on the main base. (The in use/charge LED will begin to flash indicating registration is occurring)
- Wait for at least 5 seconds before removing the extra handset from the main base

The registration has been completed, and your dual handset cordless phone is ready for use

- Pick up the handset and press talk. Dial the phone number OR

Dial the phone number - then press talk

- To hang up - press end OR
Place the handset on the Base Unit
- To use the speakerphone on the Base Unit press speaker) then dial the phone number.

## Answering a Call

- Handset on the Base Unit:

Remove the handset from the base and speak (Autotalk on)

- Handset off the Base Unit:

Pick up the handset, press talk and speak.

- To hang up - press end

OR
Place the handset on the Base Unit.

- If using the speakerphone on the Base Unit press (speaker) to answer a call and press speaker) to end a call.

## Setting Up the Answering System

To turn the answering system on:

- Press anger -the pre-recorded greeting will play and your system is ready to accept calls.

To record your outgoing message.

- Press and hold greetins. After you hear a short tone, release the key
- "Record Greeting" is announced followed by a long tone.
- Record your greeting while speaking within 15 cm of the base.
- Whenfinished press greeting again

## Using the Answering System

To play your message.

- Press - new messages play first.

To repeat a message:

- Press $\mathbb{1}<$ during playback of messages.

To skip a message:

- Press $\geqslant>$ anytime during playback to skip to the next message. The system beeps and begins to play the next message.

To delete messages:

- Delete one message:

Press (0) during a message. The system beeps and begins to play the next message.

- Delete all messages: After reviewing all messages. Press © "To delete all messages, press delete again" is announced. Press (0) again.

## CALL TRANSFER

To have the ability to transfer calls from one handset to the other handset:

## Initial Setup:

(Important - Please make sure you have registered your dual handset - refer to instructions on page iv)

## TO TRANSFER CALL

To transfer your call from handset 1 to handset 2 :

- Press transer
- The call is placed on hold on the first handset, while handset 2 begins to ring. The call is transferred when the 2nd handset is answered.
- Repeat the process to transfer the call back to handset 1. Calls can be transferred from either handset
- If the transferred call is not answered, you can retrieve the call by pressing talk or transfert.

## 3 Way Conference

- During Handset talk mode press the speaker button on the Base then you can talk 3 ways If you are already using the Base speaker phone, press the talk button on one Handset.

## WELCOME

Congratulations on your purchase of this Uniden cordless telephone. This Product is designed for reliability, long life and outstanding performance utilising the latest in 900 MHz Technology.

## FEATURES

- Multiple Handsets (up to 2 )
- 900 MHz SCR Technology (Sound Clarity and Range)
- Caller ID Display*
- Digital Telephone Answering Device
- Pop Up Name - Caller Name Identification \#
- 30 Caller ID Memories
- Alphanumeric Memory Dialing
- Alphanumeric Mem
- Super Chat Battery
- Maxi-Sound - Extra Loud Hands
- Rocketdial - One

## NOTES

* Caller ID feature only works if you subscribe to the service by your local telephone company. There is usually a fee for this service.
\# Pop Up Name feature only works if you subscribe to your telephone company Caller ID service and record names into your phones memory

## INCLUDED IN YOUR PACKAGE

Make sure you have received the following items in the package. If any of these items are missing or damaged, contact the Uniden Parts Department.

2nd Handset

2nd AC Adaptor

Page 4

## MOUNTING THE BASE UNIT ON A WALL

If you are usit an optional must still use the handset keypad for phone operations.

## Direct Wall Mounting

You can mount your phone directly to the wall. Before doing this, consider the following:

- Avoid electrical cables, pipes or other items behind the mounting location that could cause a hazard when inserting screws into the wall.
- Mount your phone within distance of a working phone jack
- Make sure the wall material is capable of supporting the weight of the base and handset
- Use screws with anchoring devices suitable for the wall material where the base unit will be placed.

1. Insert two mounting screws into $a$ wall (with their appropriate anchoring device), 85 mm apart. Allow about 3 mm between the wall and screw heads for mounting the phone.
2. Plug the AC adaptor into the Base Unit and then into a power point.
3. Plug the telephone cord into the Base Unit and then into the telephone socket on the wall.
4. Align the mounting slots on the base with the mounting posts on the wall.
5. Then push in and down until the phone is firmly seated.

## INSTALIJNG THE BELTCLIP

## To attach the beltclip:

Insert the beltclip into the holes on each side of the handset. Press down until it clicks To remove the beltclip:
Pull both sides of the beltclip to release the tabs from the holes.

## HEADSET INSTALLATION

Your phone may be used with an optional headset. To use this feature, simply plug the headset into the headset jack.

## BATTERY MAINTENANCE

## Battery use time (per charge)

- 10 hours continuous use - 12 days when handset is in the standby mode

## When the Battery charge becomes low

If the phone is not in use, 'Low Battery' flashes and none of the keys will operate. If the phone is in use, 'Low Battery' flashes and the handset beeps. Complete your conversation as quickly as possible and return the handset to the base unit for charging.

- You cannot overcharge the battery.
- You may return the handset to the charger after each call or when the battery is low.

Cleaning the battery contacts
To maintain a good charge, it is important to clean the battery contacts on the handset and base unit with a dry cloth or a penci eraser about once a month. Do not use any liquids or solvents.

## Genuine Handset Batteries

The high quality rechargeable batteries supplied with your phone will perform for up to two years or more. In order to enjoy the best performance from your phone, we recommend you replace your batteries every two years with a genuine Uniden battery.

Simply visit our website to order a replacement battery:

Number Deleted

## CALLER ID

You must subscribe to a Caller ID service to use these facilities. When the telephone rings, the Caller ID feature allows you to view the caller's name and phone number on the display before you answer the telephone. The handset displays the phone number of the incoming call, the name, time and number of calls. Additionally, you can dial the displayed number and store the information for memory dialing.

## WHEN THE TELEPHONE RINGS

When the Caller ID message is received, the display shows the caller's phone number along with the date and time. The incoming call information is stored in the Caller ID record. If the Caller ID service includes the callers name, the caller's name appears on the display (currently not supported in Australia or New Zealand).

If you answer a call before the Caller ID message is received (i.e: before the second ring), the Caller D message not appear.

Here are some typical displays:

Page 16

## VIEWING THE CALLER ID MESSAGE LIST

In Caller ID operation, if no more than 30 seconds, an error tone sounds and the telephone returns to the standby mode.

If you get an incoming call or page, the deleting operation is cancelled so you can answer the call or page.

Caller ID numbers need to be deleted from each handset separately.

The Caller ID list stores information for up to 30 incoming calls - even unanswered calls.

1. Press (ieith). The summary screen appears. The screen shows the number of new messages and total messages.
2. Press $V$ to display the latest Caller ID message
3. Press $\sqrt{ }$ to see the next message. Or press © to see the previous message
4. Press end to return to standby mode.

## DELETING INFORMATION FROM THE CALLER ID LIST

The XSA975 stores up to 30 messages. If the phone receives the 31st message, the oldest one in the list is automatically deleted Caller ID data can also be deleted manually.

## DELETING A CALLER ID MESSAGE

1. Press gienurn) . Display the message to be deleted from the Caller ID list by pressing © or V.
2. Press delete

A tone sounds and the Caller ID message is deleted.
3. Press $\boldsymbol{\wedge}$ or $\mathbf{V}$ to select'Yes' or 'No'. The next Caller ID message is then displayed.
3. Press $\wedge$
delete.

## DELETING ALL CALLER ID NAMES AND NUMBERS

1. Press (Gidenu).
2. Press (delete).

When the pointer is at 'Yes':
4. Press select or delete

A tone sounds all stored Caller ID messages are deleted
When the pointer is at ' No ':
The display returns to the summary screen.

## CALLING A PARTY FROM THE CALLER ID LIST

You can place a call from the Caller ID list.

New Zealand Calling from the Caller ID list may not be functional.

2. Press talk. The displayed phone number dials automatically.

## DIAL EDIT

You can temporarily edit the Caller ID number that is displayed by pressing select. A cursor appears in the display. Press delete) to move the cursor left, make your changes and then press talk. This will not change the number in the Caller ID list memory

## STORED CALLER ID MESSAGES IN MEMORY DIALING

Messages shown in the Caller ID list can be stored in memory dialing. Using the incoming call information (i.e., Caller ID list), the phone number of the party on the Caller ID can be stored in memory.

1. Press
2. Press mem.
3. Press $\boldsymbol{\wedge}$ or $\mathbf{V}$ or enter a number (0)-(9) to select the memory location to be stored.
4. Press select. A confirmation tone sounds and the number is stored in memory. The display returns to the Caller ID list.
5. Press end to return to standby mode

If a message has already been stored in the selected memory number location, a confirmation screen is displayed. Press $\AA$ to select'Yes'. Press select to replace. The display returns to the Caller ID list.

## ANSWERING SYSTEM

You can use your answering systems to leave a voice memo message for others who use the phone, or to announce a special message to callers when you're away from your phone.

## FEATURES

- Digital Tapeless Recording
- Call Screening
- Time and Day Announcement
- 13 minutes of Recording Time
- Time and Day Announcement - Selecting Outgoing Messag
- Toll Saver
- Remote Message Retrieval
- Voice Memo

Digital Tapeless Recording allows you to quickly review, save or delete the messages you choose. You will never have to worry about a tape wearing out, jamming or resetting improperly. The Integrated Answering System is easy and convenient to use, but please read through all of the instructions carefully.

## TURNING THE ANSWERING SYSTEM ON/OFF

1. To turn the answering system on, press awyer . The current greeting message will be played and you will hear a confirmation tone. The message counter displays the number of messages stored in memory. If the display flashes, then there are new messages waiting for you.
2. To turn the answering system off, press /off. 'Answer Off', is announced and the message counter display will no longer be illuminated.

## SETTING THE TIME

1. Press menv. 'Time' is announced along with the current time. The message counter displays the current numbers [1] through [7] indicating the day of the week.
2. Press $\ll \mathbb{1}$ or until the correct day is announced. The numbers [1] through [7]ar displayed on the base.
3. Press set.
4. The current recorded hour is announced. Press $\lll$ or $\mathbb{\ll}$ until you hear the correct hour setting. The numbers [1] through [12] are displayed on the base as each hour is announced.
5. Press set
6. The current recorded minute is announced. Press $\approx \gg 1$ or $\mathbb{C}$ until you hear the correct minute setting. The numbers [00] through [59] are displayed on the base as each minute is announced
7. Press set.
8. The current recorded AM or PM setting is announced. Press $<\gg$ or $\mathbb{R <}$ until you hear the correct AM or PM setting. The message counter displays [A] or [P]

9. Press set. A confirmation tone sounds, then the announcement 'Time' and the time and day are announced for your review. The base LED displays the number that corresponds with the day of the week.
10. Press to exit menu options.

## SETTING A PERSONAL SECURITY CODE (PIN)

To play your messages from a remote location, you will need to enter a two-digit Personal Identification Number (PIN) code (00-99). To select a PIN, perform the following steps:

1. Press meny twice. 'Security Code' and the current PIN code is announced as it is displayed on the base.
2. Press $<><1$ or $\mathbb{\ll}$ until the desired number appears.
3. Press set to select the PIN code. A confirmation tone sounds, then the announcement 'Security Code' and the new PIN code is announced
4. Press to exit menu options.
5. Record your PIN number on pages 31 and 35 for future reference.

When using the Announce Only feature, you may want to change your outgoing
message if the message, if the message prompts the caller to leave precorded precsured automatically

## SETTING THE RING TIME

The ring time setting allows you to set the number of rings the caller hears before your answering system plays the outgoing message. You can set the ring time to answer after six, nine or twelve rings. Setting $t 5$ (Toll Saver), the answering system picks up after six rings if you have new messages, and after nine rings if there are none. This way, if you make a long distance call to check your messages, you can hang up after the seventh ring to avoid billing charges.

1. Press menv three times. You hear 'Ring Time' and the current ring time ([6] 6, [9] 9 [12] 12, [t5] Toll Saver), and it is displayed on the base
2. Press $\mathbb{> <}$ or $\mathbb{\ll}$ until the desired ring time appears.
3. Press set/ringer to select the new ring time, a confirmation tone sounds, then the announcement 'Ring Time' and the new ring time is announced.
4. Press to exit menu options.

## SETTING THE MESSAGE RECORD TIME

You have three record time options. The options '1 minute' or '4 minutes' set the duration for recording incoming messages. 'Announce Only' answers the call with the preset greeting or your personal greeting but prevents the caller from leaving a message.

1. Press menv four times. 'Record Time' is announced and the current recording time ([1] 1 minute, [4] 4 minutes, [A] Announce Only) and it is displayed on the base.
2. Press $\lll 1$ or $\mathbb{R}$ until the desired time appears.
 Press set to select the new recording time, a confirmation tone soun
announcement'Record Time' and the new recording time is announced.
3. Press to exit menu options.

## ANNOUNCE ONLY FEATURE

The 'Announce only' feature plays a prerecorded outgoing message, "Hello, no one is available to take your call. Please call again," but it will not allow the caller to leave a message.

## SETTING THE MESSAGE ALERT TONE

The Message Alert feature lets you know that you have new messages by sounding a short beeping tone. If the Message Alert has been set to 'On' and a new message has been received, the alert tone will sound every 15 seconds. Set the Message Alert tone to 'On' or 'Off' by using the following procedure:

1. Press meny five times. 'Message Alert' is announced and the current setting ([GF] Off or [Gr] On), and it is displayed on the base.
2. Press $\mathbb{\geq 1}$ or $\mathbb{R}$ to select.
3. Press set to select the new setting, a confirmation tone sounds, then the announcement 'Message Alert' and the current setting you have selected is announced. When the first new message is received, the beeping tone will begin to sound.
4. Press /stop to exit menu options.

- To quickly turn 'Message Alert' tone off, press any key on the base unit and the
 Tone will automatically deactivate. To reset, go back into the menu setup mode.
- When all new messages are played using the remote playback feature (page 28) the 'Message Alert' tone will automatically deactivate

## SETTING YOUR OUTGONG MESSAGE (GREETING)

When you receive a call, the answering system automatically plays either a preset message or your own greeting.

## Preset Message

The following message is prerecorded, "Hello, no one is available to take your call. Please leave a message after the tone."

## Recording A Personal Outgoing Message (Greeting)

1. Press and hold greeting . 'Record Greet ing' is announced and a confirmation tone is heard. $[--]$ flashes on the message counter. Release key
2. Start recording your message. You have 30 seconds, and the message counter starts to count down [30] to [1] every second.
3. When you are finished recording your greeting, press greeting a confirmation tone sounds, and then your greeting plays back for you-

## Choosing Between the Two Outgoing Messages

Press greeting once quickly. Then press greeting again when the outgoing message played. This switches between the prerecorded greeting or the personal greeting. After finishing playing back the message, a confirmation tone is heard

## SETTING THE BASE RINGER VOLUME

You have three ringer options. One allows you to turn the ringer off. The other two are volume levels.

1. Press set /ringer. You hear the ringer at the current volume level ([Hi] High, [Lou] Low, [TF] Off) (if you set the base ringer volume to off, ' $O f f^{\prime}$ ' is announced) and it is displayed
2. Press set /ringer while the current ring volume is being played until the desired ringer option appears.
3. The system displays new ringer volume.

ADJUSTING THE ANSWERING SYSTEM SPEAKER VOLUME LEVEL
You can adjust the volume of the Answering System speaker by pressing the 'Volume' keys on the base. Press for softer or for louder while the base speaker is being used.

The numbers $0-9$ are displayed on the base indicating the volume levels. 0 being the softest and 9 being the loudest.

## USING YOUR ANSWERING SYSTEM

The message counter displays the number of messages stored in memory. If the display flashes, then there are new messages waiting for you. The flashing number represents the number of new messages, not total messages. After you play all your new messages, you can then play your old messages.

## PLAYING YOUR MESSAGES

1. Press. The system announces the number of new and old messages. The LED displays the number of new messages. The day and time that each message was received is announced after the message is played. The message counter displays the number of current messages stored.
When all new messages have been played, a confirmation tone sounds and "End of Messages" is announced. The system returns to standby
2. After you have reviewed your new messages, you can play your old messages by again pressing . Once you have listened to a new message, it becomes an old message. The old messages will be played in the order in which they were received.

## REPEATING A MESSAGE

1. While a message is being played, press $\mathbb{\ll}$, to replay the message. If you have several messages, press $\mathbb{R}$ repeatedly until you return to the message you want to replay.
2. Press at any time to stop reviewing messages and return to standby. The message counter shows the number of messages stored in memory.

To quickly scroll backwards through a message, press and hold

## SKIPPING A MESSAGE

1. Press to review your messages. The number of messages is announced.
2. Press $\approx>\boldsymbol{\text { at }}$ anytime to skip to the next message. Each time $\geqslant>\boldsymbol{\infty}$ is pressed, the system scans forward one message. If you have several messages, press $\geqslant>$ to find the message you want to play.
3. Press at any time to stop reviewing your messages and return to standby. The message counter shows the number of messages stored in memory.

To quickly scroll forwards through a message, press and hold

## DELETING A MESSAGE

To maintain maximum recording time, delete any old messages.

1. Press to review your messages
2. Press anytime during the message to delete.
3. A confirmation tone sound after the message has been deleted

You can also delete all the messages.

1. Press © "To delete all messages, press delete again" is announced.
2. Press again. A confirmation tone sounds after all the messages have been deleted.

If you try to delete all messages without first listening to your new messages, you will hear several short beeps followed by the announcement "Please playback all messages". This protects you from accidentally erasing messages you have not yet reviewed.

## VOICE MEMO

The voice memo function allows the user to record messages (up to 10 minutes).

1. Press and hold memo. "Record memo message" is announced and a
confirmation tone sounds. [--] flashes on the message counter
2. Start your recording.
3. When you have finished, press or memo to stop recording. A confirmation tone sounds and the system returns to standby.

Page 27

## REMOTE ACCESS AWAY FROM HOME

You can operate your answering system from a remote location using any touch-tone telephone. Use this function to check for recorded messages, to play or delete messages, even to record a new greeting message.

1. Call your telephone number.
2. During the greeting message, press (\#) and enter your PIN code (Factory Setting: 80) (See "Setting a Personal Security Code", page 20)
3. The answering system announces the current time and the number of messages stored in memory Then you hear "To play incoming messages, press (\# 2. For help, press \# 0)"
4. You may continue to listen to the Help Guidance, or you may select a command from the following chart:

| Command | Function | Command | Function |
| :---: | :---: | :---: | :---: |
| \# then (1) | Repeat a Message | \# ${ }^{\text {d }}$ then (6) | Answering System On |
| (\#) then (2) | Playing Incoming Messages | (\#)then (7) | Memo Record/Stop* |
| \# then (3) | Skipping a Message | \# then 8 | Greeting Message Record/Stop* |
| \# then (4) | Deleting a Message | \# then (9) | Answer System Off |
| \# then (5) | Stop Operation | \# then (0) | Help Guidance |

*For Memo Record and Greeting Message Record function, the first time you enter the corresponding command, it starts the Recording function. If you want to stop the recording, enter the command again
5. After all of the Help Guidance prompts have played, you hear intermittent beeps indicating that the system is in the command waiting mode. You may enter another command at this time from the chart.
6. When you are finished, hang up to exit the system. The answering system automatically returns to standby.

## TURN ON THE ANSWERING SYSTEM REMOTELY

If you have forgotten to turn on your answering system, you can turn it on remotely from any touch-tone telephone.

1. Call your telephone number.
2. After 15 rings, the system will answer. A tone sounds.
3. Press \# and then enter your PIN code. The answering system announces the number of messages stored in memory. You hear "To play incoming messages, press \# 2. For help press \# 0."
4. Press \# then (6) to turn the answering system on. You will hear the outgoing message and a confirmation tone sounds.
5. Hang up the phone and subsequent calls will be answered by the system
