1. Warnings

- When the battery icon is blinking, download the pictures to your computer immediately and change the batteries, otherwise you image will be lost.
- Do not use batteries other than those specified for use with the camera. The use of unsuitable batteries may result in the batteries splitting or leaking and causing a fire, injury, or soiling of the battery compartment.
- When placing batteries in the camera, check the polarity of the batteries (- and +) to ensure proper orientation. Incorrect polarity may result in the batteries splitting or leaking and causing a fire, injury, or soiling of the battery compartment.
- Remove the batteries if the camera will not be used for an extended period of time. The batteries may leak and cause a fire, injury or soiling of the battery compartment. If the batteries leak clean and wipe the battery compartment carefully and install new batteries. Wash your hands carefully if you touch the battery fluid. Please note that when you remove the batteries your images will be lost from the camera memory.
- Do not use manganese batteries. Manganese batteries cannot supply sufficient power to support camera operation. Replace all batteries at the same time. Never mix old and new batteries.

WARNING: Handling the USB cable on this product may expose you to lead, a chemical known to the State of California to cause birth defects or other reproductive harm. Wash your hands after handling.

2. System's Requirements

- . Personal computer, laptop, desktop, or IBM compatible with Pentium 166 MHz minimum, and with an active USB (Universal Serial Bus) port.
- . Windows 98 SE / ME / 2000 / XP, CD ROM drive, color monitor, mouse and keyboard.
- . Color printer for printing color pictures.
- . For transferring still images, or for videoconference, your computer must have modem and communication software for Internet connection.

5. Operating The VQ1100

- **Open the battery cover and insert batteries.**

Step 1: Slide open the battery door by lifting the tab on the door.

Step 2: Insert three AAA batteries with the polarity as shown:

Step 3: Slide close the battery cover.

Warning: Do not open the battery door when the camera is powered ON. This will cause all images in memory to be lost immediately. Please download The pictures to your computer if you want to turn on the battery cover.

Notes:

1. Always download your images to your computer soon after you have captured them. Never assume your images will be retained for more than three or four days. If the batteries are depleted, your images will be lost.
2. If you must change the batteries, make sure the camera is OFF and then change the batteries in less than thirty (30) seconds.
3. If you will not use the camera for a long time (several days, or more) remove the batteries. The batteries will discharge slowly if left in the camera. This may cause complete battery discharge as well as loss of images. The batteries may corrode if left in the camera for extended periods of time.
4. Dispose of batteries properly in accordance with local laws and regulations. Do not place them in fire.
5. The digital camera has an automatic power-saving feature. The camera will turn off automatically if it has not been used after approximately thirty (30) seconds.

When the camera is connected to a computer using a USB cable, it is not necessary to use batteries because the camera uses the power provided by the computer through the USB interface

- **Press and hold the ON/OFF button for 2 second to start the camera.** The camera will beep once, indicating that it is ready. The LCD screen will display digits and symbols.
- Aim the camera and compose the scene by looking through the viewfinder (2).
- **Press the shutter button to take a picture.** Buzzer will sound as the confirmation of the taken picture. LCD will show number of pictures taken.
- **Sleep mode:** With the power ON, if you do not take another picture within 60 sec., camera will turn to the "Sleep" mode to save batteries. The blank LCD screen identifies the "Sleep" mode. (Press the ON/OFF button held 2 second can manual turn on/off the "Sleep" mode.)
- **Re-activating** camera from "Sleep" mode. Press the ON/OFF button (9) held 2 second to re-activate the camera for taking next picture.

Please note, that when batteries disconnected or discharged, the memory, and all taken pictures will be erased.

Power Consumption

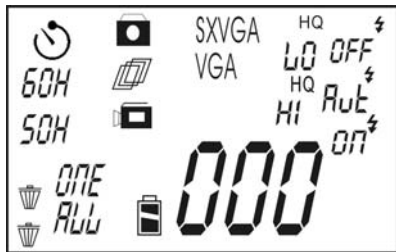

- The batteries allow you to take, and store all pictures inside the memory for approximately two weeks (camera stays in the "Sleep" mode)
- After that, LCD screen starts to blink, informing you that the batteries are low. You must download the stored pictures into the computer within a day; otherwise all pictures will be lost.

6. Using Camera's Modes

Press the mode button to select the function you want to set, and then press the shutter button to confirm. Then press the mode button again to change the option, and then press the shutter button to confirm and you will see the result on the LCD.

Aut

3. **Auto Flash Mode:** Flash fires when the lighting conditions require it. Press the mode button once and then press the shutter button to confirm. Press the mode button again to select the icon , and then press the shutter button to confirm.

ON

4. **Force Flash Mode:** Flash fires every time you take a picture, regardless of the lighting conditions. Press the mode button once and then press the shutter button to confirm. Press the mode button again to select the icon , and then press the shutter button to confirm.

LO

5. **High Resolution Mode:** Take few pictures but big picture size. Press the mode button twice and then press the shutter button to confirm. Press the mode button again to select the icon , and then press the shutter button to confirm.

HI

6. **LOW Resolution Mode:** Take more pictures but small picture size. Press the mode button twice and then press the shutter button to confirm. Press the mode button again to select the icon , and then press the shutter button to confirm.

SXVGA 7. **SXVGA Mode:** Take pictures about 1.3M pixels. Press the mode button three times and then press the shutter button to confirm. Press the mode button again to select the icon **SXVGA**, and then press the shutter button to confirm.

VGA 8. **VGA Mode:** Take pictures about 0.3M pixels. Press the mode button three times and then press the shutter button to confirm. Press the mode button again to select the icon **VGA**, and then press the shutter button to confirm.

9. **Single Mode:** Press the mode button four times and then press the shutter button to confirm. Press the mode button again to select the icon  and then press the shutter button to confirm.

10. **Continuous Capture Mode:** Press the mode button four times and then press the shutter button to confirm. Press the mode button again to select the icon , and then press the shutter button to confirm. Press the shutter button again and camera will take 3 pictures sequentially.

11. **AVI Video Mode:** Press the mode button four times and then press the shutter button to confirm. Press the mode button again to select the icon , and then press the shutter button to confirm. Press the shutter button still to recording and the camera will beep during recording. The recording is finished when you release the shutter button. [The video resolution is QVGA (320x240) default and you cannot change

the video resolution; The capture mode return to single mode automatically when finish recording.]

9. **Self-Timer Mode:** Press the mode button five times and then press the shutter button to confirm. Press the mode button again to select the icon ON (reactive the Self-Timer mode), and then press the shutter button to confirm. Press the shutter button again and camera will take a picture automatically after 10 seconds.

10. **60Hz Mode:** Press the mode button six times and then press the shutter button to confirm. Press the mode button again to select the icon 60H. You should set up to this mode if you use 60Hz power.

11. **50Hz Mode:** Press the mode button six times and then press the shutter button to confirm. Press the mode button again to select the icon 50H. You should set up to this mode if you use 50Hz power.

12. **Delete One Picture Mode:** Press the mode button seven times and then press the shutter button to confirm. Press the mode button again to select the icon , press the shutter button and the icon will blink, press the shutter button again to confirm and camera will delete (erase) last stored picture from the memory.

13. **Delete All Pictures Mode:** Press the mode button seven times and then press the shutter button to confirm. Press the mode button again to select the icon , press the shutter button and the icon will blink, press the shutter button again to confirm and camera will delete (erase) all stored pictures from the memory.

can

14. **PC camera mode:** Press the shutter button to turn on the camera, and then connect the camera and the computer with the USB cable. You will see the icon **PC** on the LCD. Then you can download the pictures. (see page 14)

- Note:**
- 1.The erased pictures cannot be recovered. Make sure you have selected the images you want to erase.
 - 2.If the battery low the camera will beep when you turn on the camera; “ FULL ” message appears on the LCD when the memory is full. Please download the pictures to your computer.

7. Installing Your VQ1100 Driver and Software

• Installing Driver

1. Turn on the computer.
2. Insert installation CD into the CD-ROM drive and the installation CD menu will appear.
3. When you see the following screen, choose **“Camera Driver”**.
4. Follow the on-screen instructions.
5. Restart the computer.

For Windows 2000/XP only:

During installation of the driver or software, computer may display the message: **“The software you are going to install doesn't contain the Microsoft signature, and may not work correctly.**

Do you want to continue? Y / N”

Please select Y to continue the installation.

• Installing Software

1. Insert installation CD into the CD-ROM drive and the installation CD menu should appear.
2. When you see the following screen, choose **“Arcsoft Software”** to install the software.
3. Follow the instructions on screen.
4. Installed software will automatically create **“Videolmpression 2”** or **“Photolmpression 5”** logo on your desktop.

8. Checking the Connection of Your VQ1100

Plug the USB cable to your camera then to the computer's USB Port.

WARNING: DON'T using USB cable to connect two computers or two USB ports in one computer at same time.

NOTE: Windows 98 SE users: If the first time you connect the USB cable to the computer you see the **Insert Disk** dialog box "Please insert the disk labeled 'Windows 98 Second Edition CD-ROM', and then click OK." Please follow the instructions on screen.

For Windows 98/Me only:

- Double click "My Computer" icon  -> Control Panel -> System -> Device Manager -> Imaging Device; if you see "Mega Pixel Camera (8101 SXGA)", that means your camera is installed now.

For Windows 2000/XP only:

- Double click "My Computer" icon  (Windows 2000) or go to Start Button and select "My Computer" (Windows XP) -> Control Panel -> System -> Hardware -> Device Manager -> Imaging Device; if you see "Mega Pixel Camera (8101 SXGA)", that means your camera is installed now.

9. Uninstalling Software

For Windows 2000/98 SE/Me:

• Uninstalling Software

1. Click "Start" on the task bar and choose "Settings".
2. Choose "Control Panel" and double click "Add/Remove Programs".
3. Select the program to be uninstalled: "ArcSoft PhotoImpression 5" or "ArcSoft PhotoImpression 2".
4. Click "Remove Program" and follow the instructions on screen.

• Uninstall the Camera Driver

1. Click "Start" on the task bar and choose "Settings".
2. Choose "Control Panel" and double click "Add/Remove Programs".
3. Select the program to be uninstalled "Mega Pixel Camera (8101 SXGA)".
4. Click "Remove Program" and follow the instructions on screen.

For Windows XP:

• Uninstalling Software

1. Click "Start" on the task bar and choose "Control Panel".
2. Double click "Add or Remove Programs".
3. Select the program to be uninstalled: "ArcSoft PhotoImpression 5" or "ArcSoft PhotoImpression 2".
4. Click "Remove" and follow the instructions on screen.

• Uninstall the Camera Driver

1. Click "Start" on the task bar and choose "Control Panel".
2. Double click "Add or Remove Programs".
3. Select the program to be uninstalled "Mega Pixel Camera (8101 SXGA)".
4. Click "Remove Program" and follow the instructions on screen.

10. Transfer Images with PhotoImpression 5

Follow the instructions below to transfer the pictures using PhotoImpression 5.

1. Connect the DIGITAL CAMERA to your computer.
2. Launch PhotoImpression 5 application: Start → Programs → Arcsoft software suite → PhotoImpression 5.
3. Click “folder”. 
4. Select “Camera/Scanner” → “Mega Pixel Camera (8101 SXGA)”.
5. Click on “Get DSC ” to browse the pictures in the camera.
6. Click on “Download” to download the pictures.
7. The Picture Manager allows you to view each individual image saved on your camera. You can use the arrow keys to scroll to the previous or the next picture. Click on the “Transfer ALL” button to download the images to your computer.

11. Using the VQ1100 in PC Camera mode

Note: Please install camera drive before you can use the camera in PC-Cam.

Setting Up PC-Cam

1. Turn the VQ1100 power on and connect the camera and the computer use the USB cable.
2. There are many methods to view your image in PC-Cam mode if you have Video software. For example:

A. Click "NetMeeting" → "Start Video". 

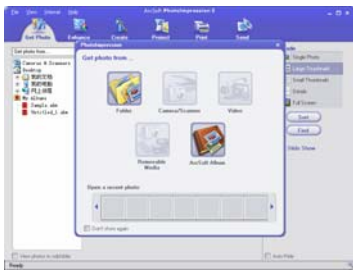

B. About Arcsoft software:

a. PhotoImpression 5: Click "file" on the function menu → Click "Get photo" → an icon  on the browse pane as shown on the right → "Live" → "DONE".

b. VideoImpression 2: Click "Create a new video" → "Get from Album" → "Capture Video"  → "DONE".

12. ArcSoft PhotolImpression 5

ArcSoft PhotolImpression 5 is a complete digital image editing application designed with real people in mind. Easy-to-use “Getting Start” guides, user-friendly UI, complete image editing functionality, give users wonderful experience to organizing, viewing, enhancing, editing, printing and sharing photos.

Click “Start”→ “Program”→ “ArcSoft Software Suite“→ “PhotolImpression 5” to launch PhotolImpression 5 or double click PhotolImpression 5 icon on the desktop and you will see a window as the screenshot above.

Select the picture source. For example: 1. Click “Folder”  for acquiring photos from your computer 2. Select the file path. 3. You can start editing them.

1. **Get Photo** – Choose how to view or acquire photos.
2. **Enhance** – Crop, brighten, rotate, resize and modify photos.
3. **Create** – Add clip art, special effects, frames and more.
4. **Project** – Make calendars, photo books and greeting cards.
5. **Print** – Print multiple images per page and multiple pages at one time.
6. **Send** – Email photos or upload them to online photo sharing accounts.

Note: For more detailed information, please refer to the Help section.

13. ArcSoft VideImpression 2

ArcSoft VideImpression 2 creates home movies and slide shows by combining existing videos, still images, exciting scene transitions, and multiple audio tracks. Though simple to use, the program provides intense and broad video editing and export options perfect for owners of digital still cameras, desktop and digital video cameras, and camcorders.

Click “Start”→ “Program”→ “ArcSoft Software Suite”→ “VideImpression 2” to launch VideImpression 2 or double click VideImpression 2 icon on the desktop and you will see a window as the screenshot above.

Open a Project – Let you browse the project files in the VideImpression system folder. By “project,” we mean to say a file that contains all of the settings and each individual component on the Storyboard. When you save your work as a project, you can go back and swap components, add and

remove them, alter audio, etc.

Create a Video – Create a new video project. You can retrieve media materials from the device connected or choose media files from system folder. You can choose video materials from your photo album as well.

Create a Slide Show – Create a slide show project. You can retrieve media materials from the device connected or choose media files from system folder. You can choose slide show materials from your photo album as well. If the box “Always show this wizard when VideoImpression starts.” at the bottom of the wizard is checked, the wizard will appear each time you run the program. If you'd like to skip the wizard the next time, uncheck the box.

Select the item you desire and the picture and videos you need then you will enter the editing interface as below.

You can use the six steps in the Function Menu to create video clips and slide shows.

1. **Media** - Select the videos and images that will comprise your final movie or slide show.
2. **Edit** - Modify video and image color and adjust the duration of each movie component. Only available for video projects.
3. **Effects** - Add neat special effect transitions between each component, or apply a pre-made theme.
4. **Text** - Place animated text on any movie component. Only available for video projects.
5. **Narrate** - Record audio directly from the program and add it to your movie.
6. **Produce** - Combine all components to create your final video; save it in a variety of ways or email it to friends.

The Storyboard - The backbone of the creation process, it's where you assemble your movie.

The Player - Preview and modify your movies in this area.

Working with Albums - Albums let you organize your media for easy access.

Note: *For more detailed information, please refer to the Help section.*

14. Internet Video Conferencing

To run a video conference with another person, you and the other person must have the computer station configured with web camera, microphone, speakers, and have access to the Internet.

You have to download video conference software, purchased or free, such as basic software like I-phone or Microsoft NetMeeting.

For example: to download Windows NetMeeting, go to www.microsoft.com search for NetMeeting and follow the download procedure.

Starting NetMeeting, you have to follow the simple set up procedure on the computer screen, enter your personal information and adjust the microphone volume. Here's how video conferencing works:

To receive video:

- 1.Call someone you want to see/hear.
- 2.On the **Tools** menu, point to **Video**, and then click **Receive**.

If you have a video camera, you can send video to the person you are calling.

To send video

- 1.Call someone you want to see/hear.
- 2.Click the **Start Video** button.

Note: 1.You can also send video by clicking the **Tools** menu, pointing to **Video**, and then clicking **Send**. After starting the video, the button changes to **Stop Video**. To stop the video, click the **Stop Video** button again.

- 2.Windows XP user should upgrade **MSN Messenger 6.0** to work with the camera.

For software support please contact www.ArcSoft.com
