# Important User Information

## Important Safety Instructions

This device is designed and manufactured to assure personal safety. Improper use can result in electric shock or fire hazard. The safeguards incorporated into this unit will protect you if you observe the following procedures for installation, use, and servicing.

- Read these instructions.
- Keep these instructions.
- Heed all warnings.
- Follow all instructions.
- Do not use this apparatus near water.
- Clean only with dry cloth.
- Do not block any ventilation openings. Install in accordance with the manufacturer's instructions.
- Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
- Do not expose the batteries or the remote control with batteries installed to excessive heat (direct sunlight, fire, etc.).
- Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
- Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
- Only use attachments/accessories specified by the manufacturer.
- Unplug this apparatus during lightning storms or when unused for long periods of time.
- Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.
- Carefully read and follow the Quick Install Guide and User Manual.
- Do not operate this device outside the temperature range of 5°C–35°C (41°F–95°F).
- Do not drop or shake the device.
- Do not move the device when it is powered on.
- Power supply cords should be routed so that they are not likely to be walked on or pinched by items placed upon them or against them.
- Do not overload wall outlets.

For additional safety information, refer to [www.wdc.com](http://www.wdc.com).

## Product Overview

The WD Elements Play multimedia drive is an easy, affordable way to supersize your movies and photos on your big-screen TV and play your music collection on your home entertainment center. Save your media collection on the multimedia drive, then simply connect the drive to your TV and you're ready to enjoy all your digital media in Full-HD 1080p resolution.

**Full-HD 1080p resolution** – Experience spectacular Full-HD video picture quality and crystal-clear Dolby TrueHD and DTS 2.0 digital audio. The HDMI port lets you connect to the highest quality HDTV or home theater.

**Plenty of room for your media collection** – The built-in high capacity hard drive offers room for tons of media. If you need more space, plug USB drives into the available ports.

**Supports a wide variety of file formats** – Most popular formats are supported including RMVB, H264, DTS, Dolby TrueHD, and MKV.

**Camera compatible** – Connect your digital camera or camcorder and play or transfer content from your camera to the drive.

**Intuitive user interface** – Simple, intuitive and beautiful, the user interface provides the following navigation options:

- DVD navigation with complete menu navigation, chapter listings, special features, and subtitles
- Photo slideshow with unique transitions and music on your HDTV
- Supports photo thumbnails, video cover art and music album art
- Music playlist support for PLS, M3U, WPL file types
- Preview your video during navigation
- Multi-language subtitle support for video playback

**Automatic play** – Set the player to play a selected media file automatically when the unit is turned on. Perfect for living art on your HD TV or for digital signage.

**Composite video connection** – Composite (RCA) outputs ensure compatibility with virtually all television sets.

**Digital optical audio** – High fidelity audio or pass-through digital audio signal to your AV receiver for surround sound experience. Supports S/PDIF and Dolby Digital native playback.

PAL and NTSC versions available.

**Compatibility** – DTS 2.0, AAC, MP3, JPEG, USB 2.0, Real Media, HDMI, H.264, MKV, Dolby Digital, Dolby Digital Plus, Dolby TrueHD, Mac OS X, Win Vista/7.

.....  
*Note:* Compatibility may vary depending on the user's hardware configuration and operating system.

## Getting Started

## Package Contents

Multimedia Drive

USB cable

Remote control and  
Two AAA batteries

AC power adapter

Quick Install Guide

## Installation Requirements

- Standard or HD TV with an HDMI or composite audio/video input
- Computer with a USB 2.0 connector

Optional: Stereo or AV receiver with a digital optical (S/PDIF) cable.

## Operating System Compatibility

The multimedia drive is compatible with the following operating systems:

**Windows®**

- Windows XP
- Windows Vista®
- Windows 7

**Mac® OS X®**

- Tiger®
- Leopard®
- Snow Leopard™
- Lion

.....  
*Note:* Compatibility may vary depending on user's hardware configuration and operating system.

.....  
**Important:** For highest performance and reliability, it is recommended that you install the latest updates and service pack (SP). For Windows, go to the **Start** menu and select **Windows Update**. For Mac, go to the **Apple** menu and select **Software Update**.

## Multimedia Drive Reformatting

The multimedia drive is preformatted as a single NTFS partition for compatibility with all updated Windows operating systems. Go to <http://support.wdc.com> and refer to Knowledge Base Answer ID 3865 for reformatting the drive to Mac OS X format. See “Troubleshooting” on page 57 for more information about reformatting a drive.

.....

**Important:** Reformatting the multimedia drive erases all its contents. If you have already saved files on the multimedia drive, be sure to back them up before reformatting it.

You may not be able to reformat a 3 TB drive and access the full capacity due to a 2.19 TB capacity barrier encountered with some operating systems. Go to <http://support.wdc.com> and refer to Knowledge Base Answer ID 2754 for details.

## Installation Procedure

The multimedia drive installation procedure is outlined below:

1. Connect the power cable.
2. Transfer content from your computer to the multimedia drive.
3. Disconnect the multimedia drive from your computer, then connect it to your TV or entertainment unit through the desired interface option.
4. Insert the batteries into the remote control.
5. Connect a USB device containing media content (optional).

## Step 1 - Connecting the Power Cable

1. Connect the power clip to the power cable plug.

The AC power adapter will vary, depending on your location. Some locations do not require a power plug clip. Units sold in those locations will have a fixed power plug. Refer to the illustration below.

2. Connect the power cable to the multimedia drive's DC connector, and then plug the opposite end into an AC power outlet. The multimedia drive powers up automatically.

## Step 2 - Loading Content On Your Multimedia Drive

Transfer your favorite content from your computer to your multimedia drive. You can also transfer files from your multimedia drive to your computer.

### Windows

1. Turn on your computer.
2. Connect the drive's power cable (see "Step 1 - Connecting the Power Cable" on page 11) and USB cable as shown below.
3. Drive utilities are installed automatically. If a security alert is displayed during this installation, click **Accept** or **Continue**.
4. The multimedia drive appears as a new drive volume in **Computer** (Windows 7 or Windows Vista) or **My Computer** (Windows XP).
5. Drag and drop your media files from your computer to the multimedia drive or from the multimedia drive to your computer.
6. When finished, right-click the Safely Remove Hardware icon in your system tray and select **Safely Remove Hardware**.

### Macintosh

**Important:** To transfer content to or from the multimedia drive using a Mac, you must reformat the drive. See "Multimedia Drive Reformatting" on page 10 for details.

1. Turn on your computer.
2. Connect the drive's power cable (see "Step 1 - Connecting the Power Cable" on page 11) and USB cable as shown below.
3. The drive mounts to the desktop and a WD Multimedia icon appears. Double-click the WD Multimedia drive icon.
4. Drag and drop your media files from your computer to the multimedia drive or from the multimedia drive to your computer.
5. When finished, drag the WD Elements Play icon to the Trash icon for proper dismount.

### Step 3 - Connecting the Multimedia Drive

The following figures illustrate the cable connections supported by the multimedia drive.

.....  
*Note:* Composite, HDMI, and S/PDIF (optical) cables are sold separately.

#### Choosing the Best Connection

The quality of the picture produced by your TV depends on the quality of your TV and its connection to the multimedia drive.

Connection	Quality	Connectors
Composite	Good (480i/576i)	<ul style="list-style-type: none"> <li>■ Yellow = video</li> <li>■ Red = right audio</li> <li>■ White = left audio</li> </ul>
HDMI	Best (up to 1080p)	Specialized, high-definition connector

Composite (Standard Definition)

HDMI (High Definition)

### Composite AV Connection (Standard Definition)

To use a composite connection (composite cable sold separately):

1. Plug the composite connectors into the input ports on your multimedia drive, yellow to yellow, red to red, and white to white
2. Plug the opposite ends into the composite input ports on your TV, yellow to yellow, red to red, and white to white.

3. Select the appropriate TV input source.

Wait a few seconds for your TV to detect the multimedia drive. If the multimedia drive is not detected, you may need to change the input source on your TV to HDMI or composite, depending on your connection. Check the user documentation of your TV for more information.

Once the multimedia drive is detected, the splash screen displays to indicate system bootup, then the home screen of the user interface opens. Go to “Using the Multimedia Drive Menu” on page 19.

## HDMI Video and Audio (High Definition)

HDMI combines high-definition video, multi-channel audio, and inter-component control in a single digital cable. This interface provides video quality resolution of up to 1080p.

To connect your multimedia drive using an HDMI cable:

1. Plug an HDMI cable (sold separately) into the HDMI connector on the multimedia drive.
2. Plug the opposite end into the HDMI port on your TV or audio/video system (if available).

Wait a few seconds for your TV to detect the multimedia drive. If the multimedia drive is not detected, you may need to change the input source on your TV to HDMI or composite, depending on your connection. Check the user documentation of your TV for more information.

Once the multimedia drive is detected, the splash screen displays to indicate system bootup, then the home screen of the user interface opens. Go to “Using the Multimedia Drive Menu” on page 19.

## S/PDIF Digital Audio

An S/PDIF connection can send digital audio to a receiver capable of decoding multi-channel audio through an AV receiver.

1. Complete the composite or HDMI video connection as described in “Composite AV Connection (Standard Definition)” on page 14 or “HDMI Video and Audio (High Definition)” on page 15.
2. Plug a S/PDIF cable (sold separately) into the S/PDIF digital optical port on your multimedia drive.
3. Plug the other end of the S/PDIF cable into the digital optical port on your AV receiver.
4. Select the appropriate audio source on your AV receiver.

## Step 4 (Optional)- Connecting a USB Device

Transfer your favorite content from your computer to your external USB drive, such as My Passport® or My Book® (external USB drive not included).

The multimedia drive has one USB port that supports playback from an external USB storage device.

.....  
*Note:* Certain USB hubs have been tested to ensure compatibility. For a list of supported USB devices, see Article #5675 in our knowledge base at <http://support.wdc.com>.

1. Connect the USB device to the multimedia drive's USB port. If the USB device is password-protected, the on-screen keyboard appears (see "To use the on-screen keyboard:" on page 48). Enter the password to continue.

2. Wait for a few moments while the multimedia drive scans the USB device for media files. (Scanning is enabled by default). This may take several minutes, depending on the storage capacity of the USB device and the number of available media files. Press **STOP** to stop scanning storage if you do not want the scan to complete.

### For Apple Users

For HFS+, Journaling must be disabled on the storage device connected to the multimedia drive. For instructions on how to disable Journaling, see Article #2615 in our knowledge base at <http://support.wdc.com>.

### Removing a USB Device

To prevent data loss, it is highly recommended that you first press the **EJECT** button on the remote control before removing a USB device.

To remove a USB device:

1. Press the **EJECT** button on the remote.
2. Select the name of the storage device you want to eject, then press **ENTER**.
3. Disconnect the USB device from the multimedia drive.

## 5

# Operating the Multimedia Drive

## Using the Remote Control

The multimedia drive remote control lets you navigate the Home screen, browse for media files, enable playback options, and customize the system settings. The infrared sensor detects infrared signals from the remote.

**Important:** Make sure there are no obstructions between the remote control and the infrared sensor on the multimedia drive.

<b>FF</b> (fast forward)	Scans forward through the audio/video playback. Supports the following speeds: 1.5x, 2x, 4x, 8x, 16x, and 32x for video. 2x, 4x, and 8x for audio.
<b>NEXT</b> (next track)	Skips to the next audio, video, or image file.
<b>EJECT</b>	Switches to safe mode so you can safely remove a USB device.

## Using the Multimedia Drive Menu

The multimedia drive Home screen menu is displayed when you press **HOME** on the remote control. The icons on this screen let you browse your media library and configure the multimedia drive's settings.

### Home Screen Options

The five main Home options (icons) are:

- Videos
  - Music
  - Photo
  - File Manager
  - Setup
- The Videos, Music, and Photo icons represent folders for the different media types. Media contents are displayed as files/file folders. Music files may contain metadata information that gets picked up and compiled by auto scan (see “Auto Scan Storage” on page 44). For example, media compilation by auto scan allows music files with metadata to be searched based on genre or the artist's name.
  - Setup lets you customize the way you use the multimedia drive and set preferences for media playback. For more information, see “Setup and Advanced Features” on page 41.

### Home Screen Navigation

Use the following keys to navigate through the menu screens.

Button	Function
▲▼ UP/DOWN arrow	Select a media type (photos, video, or music) or settings
◀▶ LEFT/RIGHT arrow	Moves within a category
ENTER	Launches your selection

# File Manager

## Operations

### Copying Files

Follow the steps listed below to copy a file to or from an attached USB memory device. The procedure is the same for all types of media files, movies, photos or music.

1. Connect a USB storage device to the USB port on the multimedia drive. The multimedia drive begins scanning the attached storage for media files.
2. In the Home menu, browse to locate the **File Manager** category, then press **ENTER**.

3. Press the left or right arrow to select **HDD** (multimedia drive) or the attached **USB** storage device (location you want to copy files from), then press **ENTER** to view the folders in the storage location selected.

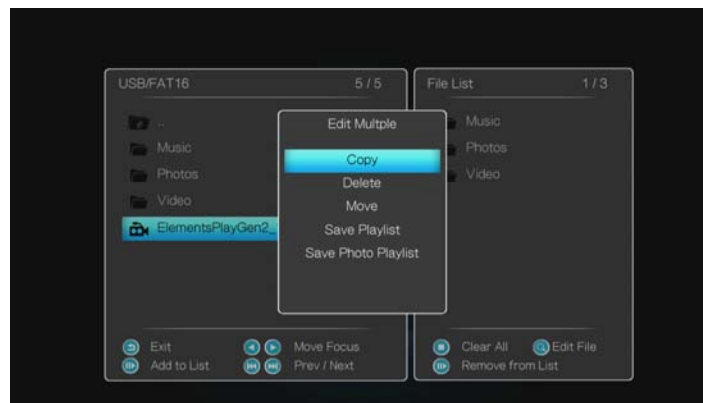

- Press the navigation buttons to find the location of and select the folder or file you want to copy, then press the **SEARCH** button. The list of operations displays.

- To copy your selection, select **Copy**, press **ENTER**, and proceed to step 7. To select multiple files and folders, select **Select Multiple** then press **ENTER**.
- Select multiple files using the buttons on the remote as shown on-screen. When finished, press **SEARCH**. Select **Copy**, then press **ENTER**.

- Select the destination (**USB** device or **HDD**), then press **ENTER** to start copying the file.

- Navigate to the directory where you want to copy the files/folders, then press **PLAY/PAUSE** to confirm the copy.

9. Press **ENTER** to finish the copy operation.

## Moving and Deleting Files

To move a file on the multimedia drive or USB storage device, follow the steps above for copying files, substituting **Move** for **Copy** in steps 5 and 6. The procedure is the same for all types of media files, videos, photos or music.

To delete a file, follow steps 1-7 above, then select **Yes** to confirm file deletion. Press **OK**.

## Rename

You can rename files and folders using the Operations user interface. Follow steps 1-4 above, select **Rename**, then use the on-screen keyboard to rename your files and folders.

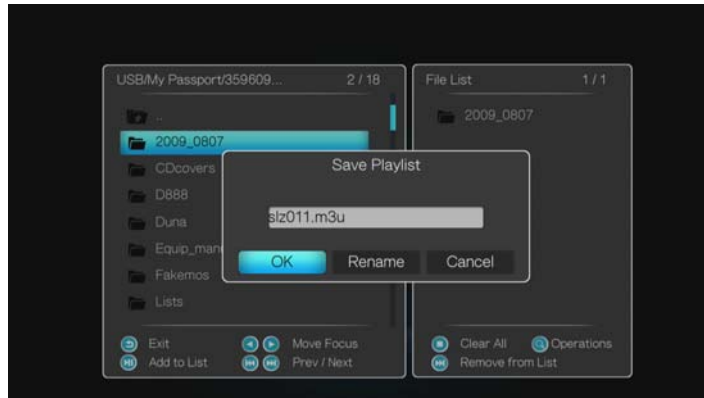

## Save & Edit Playlist

You can save a playlist using the **Edit Multiple** function.

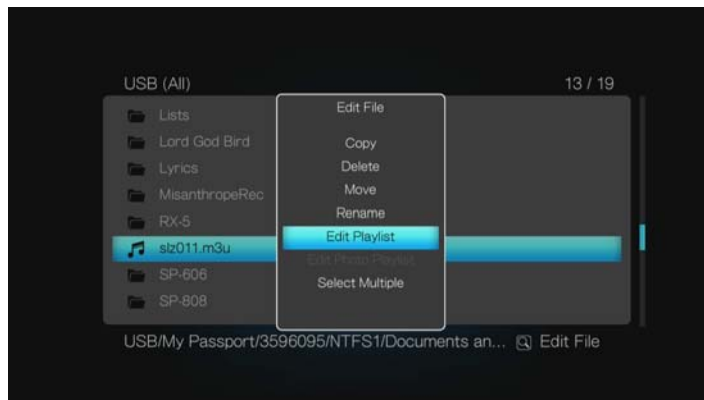

1. Follow steps 1-6 under "Copying Files" on page 20 and, in a location containing music files, use the buttons on the remote as shown on-screen. When finished, press **SEARCH**, then select **Save Playlist**.

2. Accept the default playlist name by selecting **OK**, then press **ENTER**. To rename the playlist, select **Rename**, press **ENTER**, then enter the new playlist name using the on-screen keyboard. When finished, select **OK**, then press **ENTER**.

3. To edit an existing playlist, select **Edit Playlist** with a playlist selected (\*.m3u file).

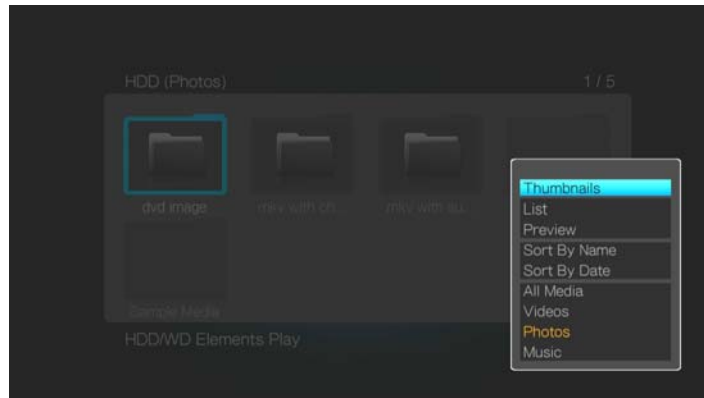

4. Select files to add to the playlist using the buttons on the remote as shown on-screen. Repeat step 2 above.

## Save & Edit Photo Album

Follow the same steps under “Save & Edit Playlist” on page 22. Be sure you are in a location containing photos. Select **Save Photo Playlist** and **Edit Photo Playlist**; name, rename, and edit the \*.alb file as needed.

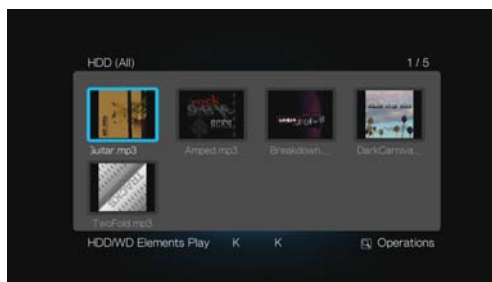

## Options

Navigate to a location on the HDD internal drive or attached USB storage then press **OPTION** to bring up the options menu.

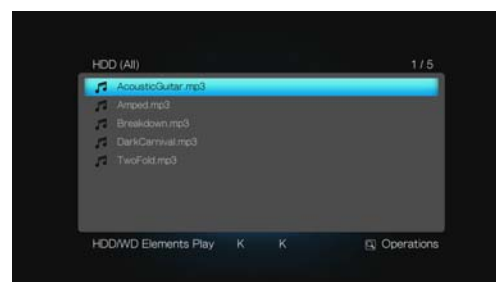

## View Options

Set your preferred view option by selecting **Thumbnails**, **List**, or **Preview**.

## Playing Music From Your iPod®

Apple® uses a proprietary naming scheme and because of this the multimedia drive is unable to display the original names for the folders and files as they are in your iPod. The multimedia drive instead reassigns new names for the folders and files, but only while in use with the multimedia drive. The original file information is preserved in your iPod. You can view the original file information when you play a file where the screen displays the metadata.

.....  
*Note:* The multimedia drive does not support playback of protected premium content such as movies or music from the iTunes® Store, Cinema Now, Movielink®, Amazon Unbox™, and Vongo®.

To use your iPod with the multimedia drive, simply plug your iPod in to the USB port and navigate through the interface menu.

.....  
*Note:* The multimedia drive only supports USB mass storage mode. iPod Touch is not a USB mass storage device and is therefore not supported.

## Viewing Photos

With the multimedia drive you can view your digital photo album in the comfort of your living room. It's perfect for sharing fun times with your friends and family. The following image file formats are supported:

- GIF (Animated GIFs are not supported)
- BMP (non-compressed)
- JPEG (grayscale, RGB, YCbCy)
- TIF/TIFF (RGB)
- PNG (Non-alpha channel only)

### Photo Display

1. Select the Photos icon, then press **ENTER**.

2. Use the navigation buttons on the remote control to scroll through the list of photos. The screen displays thumbnails of all available picture files and photo folders. Only image files supported by the multimedia drive are displayed. Press **OPTION** and select **Preview** to see the photo and info such as resolution and file size on the left side of the screen.

3. Locate the picture file you want to view.
  - To open a single picture file for viewing, select the file, and then press **ENTER**.

- To view the next picture file in the photo folder, press **NEXT** (photo).
- To view the previous picture file in the photo folder, press **PREV** (previous).

## Photo Menu Options

The music menu options allow you to search, set view modes, sort, and filter your music files.

- Press **OPTION** in a directory containing photos.
- Press **ENTER** to select an option.
- To hide options, press **BACK** or **OPTION** again.

- Select a view mode (**Thumbnails**, **List**, or **Preview**). See “View Options” on page 24
- Filter photos by selecting **Photo Directory** (to only show photos in a directory), **All Photo Folders** (to only show folders containing photos), **Date View**, **All Photos**, or **Photo Playlist**.
- Sort results by **Recently Played**, **Recently Added**, and **Name**.

## Photo Playback Options

Photo playback options allow you to customize the way you watch your videos.

- To display the photo options, press **OPTION** during playback.
- Press **ENTER** to select an option.
- To hide options, press **BACK** or **OPTION** again.

### Photo Slideshow

The multimedia drive lets you create a slideshow using the contents of a photo folder.

To start a slideshow:

1. Locate the photo folder containing the image files you want in the slideshow. (See “Photo Display” on page 36.)
2. Select the photo folder, then press **PAUSE/PLAY**.
3. Press **OPTION** to select **Slide Timing**, then press **ENTER**.
4. Slide timing is set to **Off** by default. Select a slideshow timing interval (from 3 seconds to 2 minutes), then press **OK**.

### Slideshow Playback Controls

Use these buttons on the remote control to control slideshow playback:

Button	Function
<b>STOP</b>	Discontinue the slideshow
<b>PAUSE/PLAY</b>	Pause or resume the slideshow
<b>NEXT</b> (photo)	Display the next picture file in the slideshow
<b>PREV</b> (previous photo)	Play the previous picture file in the slideshow
<b>UP/DOWN</b> buttons	Rotate the currently playing photo

## Slide Transition

Use this option to select from a wide variety of slideshow transition effects.

## Repeat and Shuffle Options

Use these options to set the slideshow to **Repeat All**, **Repeat Off**, or **Shuffle**.

## Zoom & Pan

Use this option to change the viewing scale of the image display. Select **Zoom**, then press **ENTER** repeatedly until the scale you want is shown. You can also use the remote control navigation buttons (left, right, up, down) to pan the display.

## Rotating the Photo

Select **Rotate Left** or **Rotate Right** to rotate the image clockwise or counter-clockwise. These settings do not affect the original file's orientation.

## Background Music

Use this option to set background music for the slideshow.

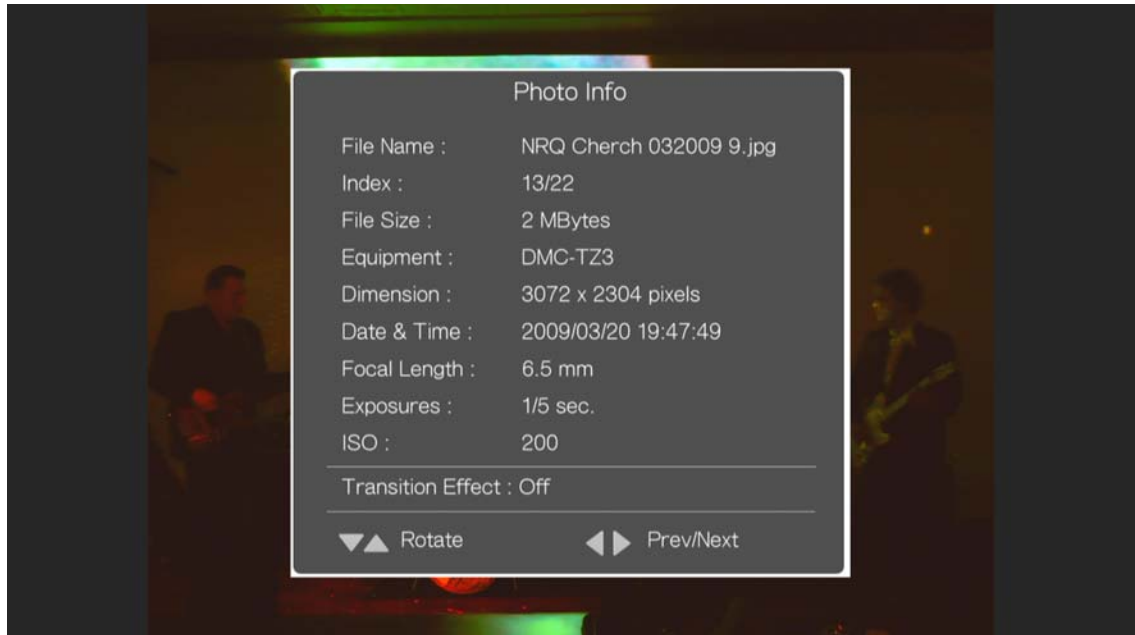

1. Select **Background Music**, then press **ENTER**.
2. Select **Select Music**, then press **ENTER**.
3. Select a song or directory of music files you want to use for background music, then press **ENTER**.

# Setup and Advanced Features

## Setup

The Setup menu lets you customize the way you use the multimedia drive and set preferences for media playback.

To select a Setup category:

1. Press **HOME**, then select the Setup icon.

2. Press **ENTER**. The Setup menu opens.
3. Use the left and right navigation buttons to select a Setup category, then press **ENTER**. Use the up and down navigation buttons to select options within each category.

There are four Setup categories, including **System**, **Audio**, **Video**, and **Others**.

## Setup Navigation Buttons

Use these buttons on the remote control to navigate within and between the Settings screens.

Button	Function
Navigation ▲▼◀▶	<ul style="list-style-type: none"> <li>■ Select a menu</li> <li>■ Select a menu setting in an option screen</li> </ul>

Press <b>ENTER</b> . A confirmation prompt appears. If your entertainment unit cannot support the selected setting, no change is made and the original setting is retained.	Applies the selected menu setting
<b>BACK</b>	Displays the previous menu screen

## System Setup

The following system setup options are available:

### Menu Language

Use this menu to select the menu language for your multimedia drive user interface. Language options may include:

- English (default)
- French
- German
- Italian
- Japanese
- Korean
- Portuguese
- Russian
- Spanish
- Simplified Chinese
- Traditional Chinese
- Albanian
- Thai
- Arabic
- Hebrew
- Polish
- Czech
- Slovak
- Hungarian
- Romanian
- Bulgarian
- Serbian
- Croatian
- Ukranian
- Greek
- Turkish
- Hindi

### Text Encoding

Use this menu to select the text encoding for the multimedia drive user interface. Encoding options include Unicode, Simplified Chinese, Traditional Chinese, Western European, Turkish, Central European, Greek, Cyrillic, Hebrew, SE European, Japanese, Korean, Arabic, and Thai.

## Autoplay DVD-ROM

*Note:* Autoplay does not support USB hubs.

Use this menu to turn Autoplay **On** or **Off** for a DVD ROM device connected to the USB port. After it is set, and the multimedia drive restarted, Autoplay starts each time the multimedia drive is powered on.

*Note:* Autoplay will ignore all unsupported files without displaying any system warning messages during playback.

## Autoplay USB Storage

*Note:* Autoplay does not support USB hubs.

Use this menu to set Autoplay to **Autoplay Video** (a video file must be stored in the USB root directory), **Autoplay Music+Photo** (a music and/or photo file must be stored in the USB root directory), or **Off** for a USB storage device connected to the USB port. After it is set, and the multimedia drive restarted, Autoplay starts each time the multimedia drive is powered on.

Save the media files at the root directory of the attached USB storage device.

*Note:* Autoplay will ignore all unsupported files without displaying any system warning messages during playback.

## Screen Saver

Use this menu to set screen saver options.

### Screen Saver Timing

Set timing to **Off** (no screensaver), **2 Minutes**, **5 Minutes**, or **10 Minutes**.

### Screen Saver Options

Set screen saver options to **Default** (WD logo) or select a **Photo Folder** to use for your screen saver.

## Keyboard Language

Use this menu to set the language for the on-screen keyboard. Options include **English**, **Traditional Chinese (Zhu Yin)**, **Traditional Chinese (Han-Yu)**, and **Simplified Chinese (Han-Yu)**.

## Unlock External HDD

Use this menu to unlock an attached password-protected USB device. Enter the password for the external drive using the on-screen keyboard, select **OK**, then press

**ENTER.** The **Unlock External HDD** menu is grayed out after the external drive has been unlocked or when a password is not being used.

## Auto Scan Storage

When set to **Auto Scan On** (default setting), auto scan builds/updates a media compilation/database file stored on the internal hard drive. Scanning allows content browsing via the metadata in the Videos, Music, and Photos menus.

You can set the multimedia drive to **Auto Scan Off**, or press **STOP** on the remote while in the Home screen to stop the database scan. **Resume Scan** lets you resume the database scan that you stopped previously.

## Resume Play

Use this menu to set the resume play function (see “Resuming Playback” on page 26) to **On** or **Off**.

## Format Storage

**Important:** Formatting a drive erases all its contents. If you have already saved files on the drive, be sure to back them up before formatting it.

You may not be able to reformat a 3 TB drive and access the full capacity due to a 2.19 TB capacity barrier encountered with some operating systems. Go to <http://support.wdc.com> and refer to Knowledge Base Answer ID 2754 for details.

Use this menu to format the internal or external (attached) drive. Select **Internal HDD** or **External HDD**, then press **ENTER**. Select **OK**, then press **ENTER**.

## Device Auto Shut Down

Use this menu to shut down the multimedia drive after a certain period of time. This works like the “SLEEP” function in your TV, which automatically turn off the device after the set timeframe. Options include: **OFF, 10 Min, 30 Min, 1Hr, 3Hr**.

## Reset to Factory Default

Use this menu to restore all multimedia drive system preferences and playback settings to their default factory values. This may correct problems caused by a failed firmware upgrade or faulty configuration settings.

*Note:* Factory Default only clears user settings from the device. To clear all the data and content from the internal drive, you need to reformat the drive. See “Format Storage” on page 44

## Audio Setup

The following audio settings are available:

### Set Maximum Volume Limit

Use this menu to set the dynamic range control, which reduces or increases sound levels. Options are **Off**, **Medium**, and **High**.

### HDMI Output

Set the audio output for the HDMI connection to **Downmix to Stereo** (stereo, composite connection), **Uncompressed Digital Output**, or **Auto** (auto-negotiates with the connected TV to set up the HDMI connection automatically).

### S/PDIF Output

Set the audio output for the S/PDIF connection to **Downmix to Stereo** (stereo, composite connection) or **Uncompressed Digital Output**.

### Surround Sound Output

Set your surround sound preferences. Options include **Any Available Audio Stream** (auto-negotiate with your TV), **5.1 CH Only**, or **Dolby TrueHD Only**.

### HDMI A/V Sync

Use this menu to adjust timing so the audio can better sync up to the video. Options include **HDMI A/V (AUTO)** (auto-negotiate with your TV), **HDMI A/V (MANUAL)** (use the up navigation button on the remote to increase the sync value, and **Off**).

## Video Setup

The following video settings are available:

### Aspect Ratio

Use this menu to select the way videos are displayed. Options include:

- Normal (**Pan Scan 4:3, Letter Box 4:3**)
- Widescreen (**16:9, 16:10**)

.....

*Note:* The media player's default setting is **16:9**. Make sure your TV can support widescreen resolution, or this default setting can result in a distorted video display. See "Aspect Ratio" on page 62 in the Appendix for further details.

### TV System

Use this menu to select a video signal. Default setting is **HDMI Auto** (auto-negotiate with your TV). Highest resolution setting is **1080P 60Hz** in this menu. After you finish making your selection, press **ENTER**.

.....

*Note:* The further down the list the setting, the higher the resolution and clearer the picture.

You can also use this menu to select the TV standard applicable to your device. This setting depends on your regional location.

Options include:

- **NTSC** – United States, Canada, Japan, Mexico, the Philippines, South Korea, and Taiwan.
- **PAL** – Europe, Greenland, parts of Africa and South America, the Mideast, China, India, Australia, and Indonesia

## Scale Video Output to 90%

Setting this menu to **On** shrinks the video output to 90% for better viewing on legacy TVs that have a problem showing full resolution. Also, see “Video Zoom” on page 31.

## 1080P 24Hz

1080P 24Hz improves video content playback on the TVs that support it. When set to **On**, the option is applied only when the video content is 24Hz and the TV supports 24Hz.

## Others Setup

The following additional settings are available:

### Version Info/About

Use this menu to display the current firmware version and serial number.

### Firmware Upgrade

Use this menu to do a manual firmware upgrade. See “System Firmware Upgrade” on page 51

## Locating Media Content

To perform a media search:

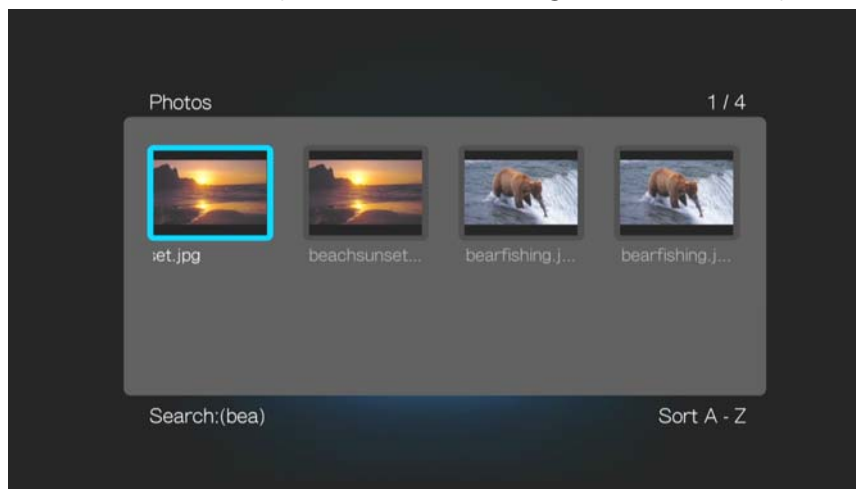

1. If you want to search for particular type of media (for example, video files only), go to the Home screen for that media type (i.e., select **Videos** in the main screen then press **ENTER**).
2. Press **SEARCH** on the remote control. An on-screen keyboard displays.

- To use the on-screen keyboard:
- Use the arrow keys to select a character, then press **ENTER** to copy it to search field.
  - Highlight the globe icon then press **ENTER**, or press **NEXT** to input characters in a different language. Press **NEXT** again to cycle through the input options.
  - Highlight **Move L** or **Move R** then press **ENTER**, or press **REW** or **FF** to move the cursor within the search field.
  - To erase the last character in the search field, highlight **DELETE** then press **ENTER**, or press **STOP**.
  - Highlight **Aa** then press **ENTER**, or press **SEARCH** to input characters in a different case.
  - Highlight **@#** then press **ENTER**, or press **PREV** to display the symbol keyboard for inputting numbers, symbols, and special characters.
  - Press **Space** to insert a space between search terms.
  - Press **Clear** to delete all text/characters in the search field.
  - Use the arrow keys to select a term in the Input history list, then press **ENTER** to relaunch the search. Select **Input history** and press the right arrow on the remote to clear input history.
3. Define the search parameters in the search field. The more information provided, the better the search results. After you have defined the search term, highlight **OK** on the bottom of the on-screen keyboard then press **ENTER**, or press **PLAY/PAUSE**. The search results are shown, clearing the search field and moving search term to input history.

- All files with filenames that begin with the characters entered in the search field are included in the search results. For example, searching for 'glo' could result in these matches:  
Global party.jpg  
Glow of the Field.jpg  
Gloss.jpg
- All files with filenames that include the characters entered in the search field are listed in the search results. For example, searching for 'un' provides could result in these matches:  
Land of the Rising Sun.jpg  
shunt\_1a.jpg  
Unite.jpg.

If no media files match the search, press **OPTION** then select the search function to display the on-screen keyboard again and redefine the search parameters. If media files matching your search parameters are found, they will be listed as shown below (the result of entering 'bea' in Photos).

4. Press the navigation buttons to select the media file you are looking for, then press **ENTER** or **PAUSE/PLAY** to start playback.

## MedialInfo - Examining Your Files

MedialInfo (free software) can provide technical and tag information about your video or audio files.

MedialInfo provides the following kinds of information:

- General—title, author, director, album, track number, date, and duration
- Video—codec, aspect, fps, and bitrate
- Audio—codec, sample rate, channels, language, and bitrate
- Text—language of the subtitles
- Chapters—number and a list of chapters

MedialInfo supports the following formats:

- Video—MKV, OGM, AVI, WMV, QuickTime, Real, MPEG-1, MPEG-2, MPEG-4, DVD (VOB) (Codecs: XviD, MSMPEG4, ASP, H.264, AVC)
- Audio—OGG, MP3, WAV, RA, AAC, M4A, AU, AIFF
- Subtitles—SRT, SSA, ASS, and SAMI

With MedialInfo, you can:

- Read many video and audio file formats
- Use several methods of viewing information, such as text, sheet, tree, and HTML
- Customize views
- Export information as text, such as CSV and HTML

To examine your files:

1. Use your browser and go to <http://mediainfo.sourceforge.net/en>.
2. Download the software and install it on your computer.
3. Follow the instructions as prompted.

## System Maintenance

The system firmware of your multimedia drive can be upgraded to the latest release, which can improve support for media file playback and includes bug fixes and product enhancements. To ensure that you receive the latest update, we recommend registering your product at <https://register.wdc.com>.

This chapter describes how to upgrade the system firmware and perform simple troubleshooting. If you encounter an error message, refer to the “Common Error Messages” on page 55 for possible corrective action.

Solutions to more serious problems may require contacting your dealer or an authorized service center for assistance. For more information, refer to WD Service and Support on the second page of this user manual.

### System Firmware Upgrade

Firmware is an important set of instructions that tells your multimedia drive how to operate, what the interactive screens look like, and how to do what you tell it to do. Upgrading the firmware is important because WD is always developing newer, faster, and more efficient ways of doing things that your multimedia drive needs to know.

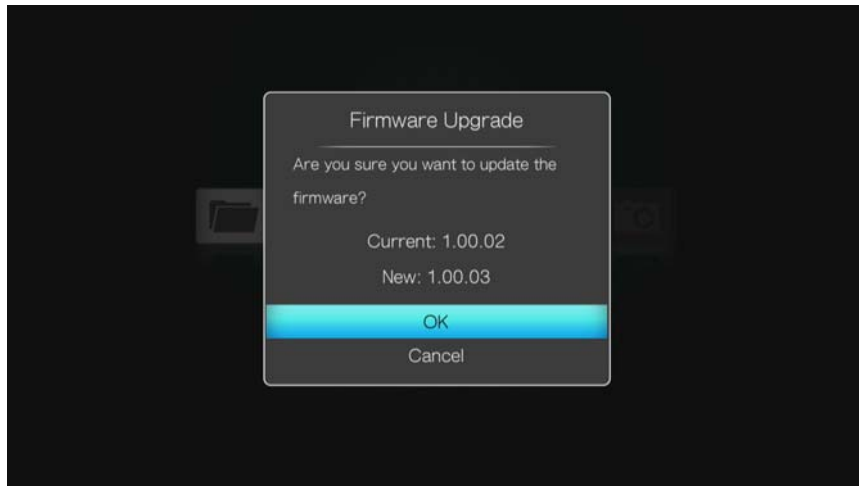

.....  
**Important:** Make sure the multimedia drive's AC power adapter remains connected during the firmware update. A power disruption during the update process can corrupt the system firmware. Also, make sure that you do not unplug the USB storage device if it contains the firmware file.

### Upgrade Firmware Using the Internal Drive

1. Go to <http://support.wdc.com>.
2. Click **Downloads**, then the multimedia drive name (or photo).
3. Copy the firmware update file to a location on your computer.
4. Connect the multimedia drive to your computer (see “Step 2 - Loading Content On Your Multimedia Drive” on page 12).
5. Using an unzip utility, extract the zip file contents to the root directory of the multimedia drive's internal HD.
6. Reconnect the multimedia drive to your TV if necessary, then turn it on. If the multimedia drive is already on, be sure you are in the **HOME** screen.

- The firmware upgrade screen displays. Select **OK**, then press **ENTER**. This restarts the system.

- After restarting, the system automatically enters firmware upgrade mode.
- Once the update process finishes, the multimedia drive restarts. The new firmware loads automatically.

### Upgrade Firmware Using USB Storage

- Go to <http://support.wdc.com>.
- Click **Downloads**, then the product name (or photo).
- Copy the firmware update file to a location on your computer.
- Using an unzip utility, extract the zip file contents to the root directory of a USB device connected to your computer.
- Safely remove the USB device from the computer.
- Connect the USB device to the multimedia drive's USB port.
- Automatic firmware upgrade:* Turn off autoplay USB storage (see "Autoplay USB Storage" on page 43 for details). Proceed to step 10 below.  
*Manual firmware upgrade:* Proceed to step 8.
- Press **HOME**, then select **Setup**. Press **ENTER**.
- Use the navigation buttons to select **Others**, select **Firmware Upgrade**, and then press **ENTER**.
- Select **OK**, then press **ENTER** again. This restarts the system.
- After restarting, the system automatically enters firmware upgrade mode.
- Once the update process finishes, the multimedia drive restarts. The new firmware loads automatically.

## Installing, Partitioning, and Formatting the Drive

How to	Answer ID
■ Install, partition, and format the drive in Windows XP and Vista	3865
■ Install, partition, and format the drive to Mac OS X 10.4.11 and 10.5+	3865
■ Reformat from Mac GPT to Windows XP NTFS	3645
■ Reformat the drive from Mac GPT to Windows Vista NTFS format	3647
■ Format the drive to the FAT32 file system*	1364
■ Use the drive on a Mac and a PC simultaneously	291

.....

\*The FAT32 file system has a maximum individual file size of 4 GB and cannot create partitions larger than 32 GB in Windows; however, Windows users can overcome these file size limitations by formatting the drive to NTFS using the Disk Management utility. See answer ID 1287 at <http://support.wdc.com> and article IDs 314463 and 184006 at <http://support.microsoft.com> for further details. To create partitions larger than 32 GB in FAT32 when reformatting the drive, download the External USB/FireWire FAT32 Formatting Utility from <http://support.wdc.com/download>.

## Frequently Asked Questions

**Q:** *How do I play or modify media on my computer?*

**A:** Several multimedia drive applications are currently available, such as Winamp and iTunes, that let you play, arrange, and edit media files. These multimedia drives also let you edit the metadata information for media files. You can search the Internet with your browser to locate where these applications are available for download.

**Q:** *How do I convert my media files?*

**A:** Converting media files requires the use of a media converter application, many of which are available for download. Search the internet with your browser to locate these applications.

**Q:** *How do I copy the files from my music CD to my computer?*

**A:** Digital audio extraction, or *Ripping*, is the process of copying audio (or video) content to a hard drive, typically from removable media, such as CDs or DVDs, or from media streams.

To rip music from CDs to a computer:

1. Insert the CD into the optical drive of your computer.
2. Open the program that you use to rip the music to your computer, such as iTunes or Windows Media Player.
3. Press the **Import** button (using iTunes),  
- OR -  
Press the **Rip** button (using Windows Media Player).
4. Click the music you want to copy (Windows Media Player) and note where the music files are saved after they are copied. iTunes imports the entire CD into your iTunes music library.
5. Click the **Start Rip** button (Windows Media Player).
6. When ripping is complete, remove the CD. The music is now on your computer.

.....  
*Note:* Some music may be covered by copyright laws which prevent its copying or distribution.

**Q:** *Can I use a universal remote control with the multimedia drive?*

**A:** You can use most popular universal remote control devices such as the Logitech Harmony models.

**Q:** *How do I determine whether or not my system supports USB 2.0?*

**A:** Refer to your USB card documentation or contact your USB card manufacturer.

.....  
*Note:* If your USB 2.0 controller is built into the system motherboard, be sure to install the appropriate chipset support for your motherboard. Refer to your motherboard or system manual for more information.

**Q:** *What happens when a USB 2.0 device is plugged into a USB 1.1 port or hub?*

**A:** USB 2.0 is backward compatible with USB 1.1. When connected to a USB 1.1 port or hub, a USB 2.0 device operates at the USB 1.1 full speed of up to 12 Mbps.

**Q:** *Why is the data transfer rate slow?*

**A:** Your system may be operating at USB 1.1 speeds due to an incorrect driver installation of the USB 2.0 adapter card or a system that does not support USB 2.0.

If your system includes a PCI slot, you can achieve Hi-Speed USB transfer rates by installing a USB 2.0 PCI adapter card. Contact the card manufacturer for installation procedures and more information.

.....  
*Note:* If an additional external drive is connected to the WD product, USB bandwidth is shared and may affect performance.

**Q:** *Why does the multimedia drive not power up?*

**A:** Be sure the drive is plugged in to a power source. A special cable may be needed for computers with limited bus power. For more information in the U.S., visit our website at <http://store.westerndigital.com>. Outside the U.S., contact WD Technical Support in your region.

**Q:** *Why is the multimedia drive not recognized under My Computer or on the computer desktop?*

**A:** If your system has a USB 2.0 PCI adapter card, be sure that its drivers are installed before connecting your WD USB 2.0 external storage product. The drive is not recognized correctly unless USB 2.0 root hub and host controller drivers are installed. Contact the adapter card manufacturer for installation procedures.

## Regulatory Compliance

### FCC Class B Information

This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the manufacturer's instruction manual, may cause interference with radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, you are encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the retailer or an experienced radio/television technician for help.

### ICES-003/NMB-003 Statement

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

This device complies with Canadian ICES-003 Class B.

### Safety Compliance

Approved for US and Canada. CAN/CSA-C22.2 No. 60065:03, UL-60065, 7th Ed: Audio, Video and Similar Electronic Apparatus - Safety Requirements.

Approuvé pour les Etats-Unis et le Canada. CAN/CSA-C22.2 No. 60065:03, UL-60065 7th Ed. Appareils audio, vidéo et appareils électroniques analogues - Exigences de sécurité.

This device is only for use with the compatible UL Listed AC adapter.

Cet appareil n'est destiné qu'à des adaptateurs compatibles marqués "UL Listed."

本设备经过测试，结果表明符合 GB-8898（安全）、GB13837（电磁兼容性）和 GB17625（谐波）。

本裝置通過測試並符合 CNS-13439 (EMC) 和 CNS-14408 (Safety) 規範。

### CE Compliance for Europe

Marking by the CE symbol indicates compliance of this system to the applicable Council Directives of the European Union, including the EMC Directive (2004/108/EC) and the Low Voltage Directive (2006/95/EC). A "Declaration of Conformity" in accordance with the applicable directives has been made and is on file at Western Digital Europe.

Die Markierung mit dem CE-Symbol zeigt an, dass dieses Gerät mit den anwendbaren Richtlinien der Europäischen Union übereinstimmt. Hierzu zählen auch die EMV-Richtlinie (2004/108/EG) sowie die Niederspannungsrichtlinie (2006/95/EG). Eine "Konformitätserklärung" in Übereinstimmung mit den anwendbaren Richtlinien ist erstellt worden und kann bei Western Digital Europe eingesehen werden.

Le symbole CE indique que ce système est conforme aux directives du Conseil de l'Union Européenne, notamment à la Directive CEM (2004/108/CE) et la Directive Basse tension (2006/95/CE). Une "déclaration de conformité" aux directives applicables a été déposée auprès de Western Digital Europe.

I marchi con il simbolo CE denotano la conformità di questo sistema alle direttive del Consiglio dell'Unione europea, ivi compresa la Direttiva EMC (2004/108/CE) e la Direttiva Bassa Tensione (2006/95/CE). In adempimento con le vigenti direttive è stata rilasciata una "Dichiarazione di conformità", depositata presso Western Digital Europe.

La marca con el símbolo CE indica el cumplimiento de este sistema con las correspondientes directivas del Consejo de la Unión Europea, que incluye la Directiva CEM (2004/108/CE) y la Directiva de bajo voltaje (2006/95/CE). Se ha realizado una "Declaración de conformidad" de acuerdo con las directivas correspondientes y se encuentra documentada en las instalaciones de Western Digital en Europa.

Märkning av CE-symbolen anger att detta systemet uppfyller kraven enligt det Europeiska Parlamentet och Rådets direktiv, inklusive EMC-direktivet (2004/108/EC) och Direktivet om Lågspänning (2006/95/EC). En "Försäkran om Överensstämmelse" har gjorts enligt de gällande direktiven och har registrerats hos Western Digital Europa.

Merking med CE-symbolet indikerer dette systemets overholdelse av gjeldende direktiver for EU, inkludert EMC-direktivet (2004/108/EC) og lavspenningsdirektivet (2006/95/EC). En "samsvarserklæring" i henhold til gjeldende direktiver har blitt skrevet og finnes arkivert hos Western Digital Europe.

CE-merkintä osoittaa tämän järjestelmän yhdenmukaisuuden sovellettavissa olevien Euroopan unionin neuvoston direktiivien kanssa, mukaan lukien EMC-direktiivi (2004/108/EC), sekä alijännitedirektiivi (2006/95/EC). "Yhdenmukaisuusvakuutus" sovellettavien direktiivien kanssa on tehty ja se on arkistoituna Western Digital Europe:ssa.

Маркировка символом CE свидетельствует о соответствии настоящей системы положениям применимых директив Совета Европейского Союза, в том числе Директивы об электромагнитной совместимости (2004/108/EC) и Директивы о низковольтном оборудовании (2006/95/EC). Заявление о соответствии положениям применимых директив, сделанное компанией Western Digital, находится в архиве её европейского подразделения

يشير التمييز بوضع الرمز CE إلى توافق هذا النظام مع توجيهات المجلس القابلة للتطبيق والخاصة بالاتحاد الأوروبي، بما في ذلك توجيهات التوافقية الكهرومغناطيسية (EMC) (2004/108/EC) وتوجيهات الجهد الكهربائي المنخفض (2006/95/EC) وتم وضع "إعلان المطابقة" وفقاً للتوجيهات القابلة للتطبيق وهو موجود في ملف على Western Digital Europe.

## Warranty Information

### Obtaining Service

WD values your business and always attempts to provide you the very best of service. If this Product requires maintenance, either contact the dealer from whom you originally purchased the Product or visit our product support Web site at <http://support.wdc.com> for information on how to obtain service or a Return Material Authorization (RMA). If it is determined that the Product may be defective, you will be given an RMA number and instructions for Product return. An unauthorized return (i.e., one for which an RMA number has not been issued) will be returned to you at your expense. Authorized returns must be shipped in an approved shipping container, prepaid and insured, to the address provided on your return paperwork. Your original box and packaging materials should be kept for storing or shipping your WD product. To conclusively establish the period of warranty, check the warranty expiration (serial number required) via <http://support.wdc.com>. WD shall have no liability for lost data regardless of the cause, recovery of lost data, or data contained in any Product placed in its possession.

### Limited Warranty

WD warrants that the Product, in the course of its normal use, will for the term defined below, be free from defects in material and workmanship and will conform to WD's specification therefor. The term of your limited warranty depends on the country in which your Product was purchased. The term of your limited warranty is for 2 years in the Europe, the Middle East and Africa region, and 3 years in the Asia Pacific region, unless otherwise required by law. The term of your limited warranty period shall commence on the purchase date appearing on your purchase receipt. WD may at its discretion make extended warranties available for purchase. WD shall have no liability for any Product returned if WD determines that the Product was stolen from WD or that the asserted defect a) is not present, b) cannot reasonably be rectified because of damage occurring before WD receives the Product, or c) is attributable to misuse, improper installation, alteration (including removing or obliterating labels and opening or removing external enclosures, unless the product is on the list of limited user-serviceable products and the specific alteration is within the scope of the applicable instructions, as found at <http://support.wdc.com>), accident or mishandling while in the possession of someone other than WD. Subject to the limitations specified above, your sole and exclusive warranty shall be, during the period of warranty specified above and at WD's option, the repair or replacement of the Product with an equivalent or better Product. The foregoing warranty of WD shall extend to repaired or replaced Products for the balance of the applicable period of the original warranty or ninety (90) days from the date of shipment of a repaired or replaced Product, whichever is longer.

The foregoing limited warranty is WD's sole warranty and is applicable only to products sold as new. The remedies provided herein are in lieu of a) any and all other remedies and warranties, whether expressed, implied

or statutory, including but not limited to, any implied warranty of merchantability or fitness for a particular purpose, and b) any and all obligations and liabilities of WD for damages including, but not limited to accidental, consequential, or special damages, or any financial loss, lost profits or expenses, or lost data arising out of or in connection with the purchase, use, or performance of the Product, even if WD has been advised of the possibility of such damages. In the United States, some states do not allow exclusion or limitations of incidental or consequential damages, so the limitations above may not apply to you. This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.
