HOW TO USE THIS MANUAL

This manual contains the following sections:

- HOW TO USE THIS MANUAL
- SAFETY
- OPERATIONS
- MAINTENANCE
- PARTS LIST

The HOW TO USE THIS MANUAL section will tell you how to find important information for ordering correct repair parts.

Parts may be ordered from authorized Windsor dealers. When placing an order for parts, the machine model and machine serial number are important. Refer to the MACHINE DATA box which is filled out during the installation of your machine. The MACHINE DATA box is located on the inside of the front cover of this manual.

MODEL
DATE OF PURCHASE
SERIAL NUMBER
SALES REPRESENTATIVE #
DEALER NAME
OPERATIONS GUIDE NUMBER
PUBLISHED

The model and serial number of your machine is on the bottom back-end of the machine.

The SAFETY section contains important information regarding hazard or unsafe practices of the machine. Levels of hazards is identified that could result in product or personal injury, or severe injury resulting in death.

The OPERATIONS section is to familiarize the operator with the operation and function of the machine.

The MAINTENANCE section contains preventive maintenance to keep the machine and its components in good working condition. They are listed in this general order:

- Daily Maintenance
- Periodic Maintenance
- Vacuum Motor Replacement
- Pump Replacement
- Machine Troubleshooting
- Service Schedule

The PARTS LIST section contains assembled parts illustrations and corresponding parts list. The parts lists include a number of columns of information:

- **REF** column refers to the reference number on the parts illustration.
- **PART NO.** column lists the part number for the part.
- **PRV NO.** reference number.
- **QTY** column lists the quantity of the part used in that area of the machine.
- DESCRIPTION column is a brief description of the part.
- SERIAL NO. FROM column indicates the first machine the part number is applicable to. When the machine design has changed, this column will indicate serial number of applicable machine. The main illustration shows the most current design of the machine. The boxed illustrations show older designs. If column has an asterisk (*), call manufacturer for serial number.
- **NOTES** column for information not noted by the other columns.

NOTE: If a service or option kit is installed on your machine, be sure to keep the KIT INSTRUCTIONS which came with the kit. It contains replacement parts numbers needed for ordering future parts.

NOTE: The number on the lower left corner of the front cover is the part number for this manual.

SAFETY INSTRUCTIONS IMPORTANT SAFETY INSTRUCTIONS When using an electrical appliance, basic precaution must always be followed, including the following:

READ ALL INSTRUCTIONS BEFORE USING THIS MACHINE. This machine is for commercial use.

To reduce the risk of fire, electric shock, or injury:

Connect to a **properly grounded outlet**. See Grounding Instructions.

Do not leave the machine unattended. Unplug machine from outlet when not in use and before maintenance or service.

Use only indoors. Do not use outdoors or expose to rain.

WARNING:

Do not allow machine to be used as a toy. **Close attention** is necessary when used by or near children.

Use only as described in this manual. Use only manufacturer's recommended components and attachments.

Do not use damaged electrical cord or plug. Follow all instructions in this manual concerning grounding the machine. If the machine is **not working properly**, has been dropped, damaged, left outdoors, or dropped into water, return it to an authorized service center.

Do not pull or carry machine by electrical cord, use as a handle, close a door on cord, or pull cord around sharp edges or corners.

Do not run machine over cord. Keep cord away from heated surfaces.

Do not unplug machine by pulling on cord. To unplug, grasp the electrical plug, not the electrical cord.

Do not handle the electrical plug or machine with wet hands.

Do not operate the machine with any openings blocked. Keep openings free of debris that may reduce airflow.

This machine is intended for cleaning carpet only.

Do not vacuum anything that is burning or smoking, such as cigarettes, matches, or hot ashes.

This machine is not suitable for picking up health endangering dust.

Turn off all controls before unplugging.

Machine can cause a fire when operating near flammable vapors or materials. Do not operate this machine near flammable fluids, dust or vapors.

This machine is suitable for commercial use, for example in hotels, schools, hospitals, factories, shops and offices for more than normal housekeeping purposes.

Maintenance and repairs must be done by qualified personnel.

If foam or liquid comes out of machine, switch off immediately.

SAVE THESE INSTRUCTIONS

D100 86038260 05/21/07

HAZARD INTENSITY LEVEL

The following symbols are used throughout this guide as indicated in their descriptions:

HAZARD INTENSITY LEVEL

There are three levels of hazard intensity identified by signal words -**WARNING** and **CAUTION** and **FOR SAFETY.** The level of hazard intensity is determined by the following definitions:

A WARNING

WARNING - Hazards or unsafe practices which COULD result in severe personal injury or death.

CAUTION - Hazards or unsafe practices which could result in minor personal injury or product or property damage.

FOR SAFETY: To Identify actions which must be followed for safe operation of equipment.

Report machine damage or faulty operation immediately. Do not use the machine if it is not in proper operating condition. Following is information that signals some potentially dangerous conditions to the operator or the equipment. Read this information carefully. Know when these conditions can exist. Locate all safety devices on the machine. Please take the necessary steps to train the machine operating personnel.

FOR SAFETY:

DO NOT OPERATE MACHINE: Unless Trained and Authorized. Unless Operation Guide is Read and understood. In Flammable or Explosive areas. In areas with possible falling objects.

WHEN SERVICING MACHINE:

Avoid moving parts. Do not wear loose clothing; jackets, shirts, or sleeves when working on the machine. Use Windsor approved replacement parts.

GROUNDING INSTRUCTIONS

THIS PRODUCT IS FOR COMMERCIAL USE ONLY. **ELECTRICAL:**

In the USA this machine operates on a standard 15 amp 115V, 60 hz, A.C. power circuit . The amp, hertz, and voltage are listed on the data label found on each machine. Using voltages above or below those indicated on the data label will cause serious damage to the motors.

GROUNDING INSTRUCTIONS:

This appliance must be grounded. If it should malfunction or break down, grounding provides a path of least resistance for electric current to reduce the risk of electric shock. This appliance is equipped with a cord having an equipmentgrounding conductor and grounding plug. The plug must be inserted into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances. This appliance is for use on a nominal 115-volt circuit, and has a grounded plug that looks like the plug in "Fig. A". A temporary adaptor that looks like the adaptor in "Fig. C" may be used to connect this plug to a 2-pole receptacle as shown in "Fig. B", if a properly grounded outlet is not available. The temporary adaptor should be used only until a properly grounded outlet (Fig. A) can be installed by a qualified electrician. The green colored rigid ear, lug, or the like extending from the adaptor must be connected to a permanent ground such as a properly grounded outlet box cover. Whenever the adaptor is used, it must be held in place by a metal screw.

WARNING:

Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or service person if you are in doubt as to whether the outlet is properly grounded. Do not modify the plug provided with the appliance - if it will not fit the outlet, have a proper outlet installed by a qualified electrician.

PROPER GROUNDING

NOTE: In Canada, the use of a temporary adaptor is not permitted by the Canadian Electrical Code

Alkalis Aldehydes Detergents Aromatics Hydrocarbons Hydroxides SP Butyls Soaps Carbon Tetrachloride Vinegar Clorox* Chlorinated Bleaches Chlorinated Hydrocarbons Lysol* Methyl Ethel Ketone (MEK) Perchorethylene (perc)	CHEMICALS Suitable Chemicals	Non-Compatible

Dimensions - Height	36" (91.44 cm)
Dimensions - Width	16" (40.64 cm)
Power Cable	2-25' (6.35m)

OPERATIONS

CARPET INSPECTION:

Determine precisely what areas you are going to clean. Note problem areas in the carpet or tack strip. Look for loose carpet, heavily damaged areas, discolored stains, or grease spots that will require prespotting. Note the carpet type. Check the availability of hot water, drains, and suitable electrical outlets. If the carpet is loose or worn, have it repaired **before** attempting to clean it.

Plan the cleaning route, work from the most remote area towards the exit. Try not to travel over the cleaned areas when getting fresh water or dumping old. Furniture should be moved out away from the walls before cleaning. If furniture is moved back in place before carpet is completely dry, place plastic or foil protectors under the legs to prevent possible carpet staining. When possible use a Windblower (AM3) and open all windows and doors to speed carpet drying.

ACCESSORIES:

The D100 can be used with the following Windsor equipment: Deluxe Hand Tool (86000020 – PRV NO. HT), Pile Jogger (86041760 – PRVNO. PJ2A), Standard Floor Wands(SFW, 86000610 – PRV NO. 89227, 86000600 PRV NO. 89226, & Wind Blower carpet dryer(AM3). Contact an authorized Windsor dealer for assistance in choosing the right equipment.

GENERAL INFORMATION:

On heavily soiled carpets, or on areas of high foot traffic, it may be necessary to use a prespray or traffic lane cleaner applied with a Pro-Spray. Do not add presprays to the machine's solution tank. If a spotter is used, follow the manufacturer's instructions exactly as printed on the label. Remove the spotter with the floor tool when done, spotter left in the carpet may bleach or brown it permanently.

As the carpet is being cleaned, check to see if there is foam building up in the recovery bucket. Add a little defoaming compound to the recovery tank but never to the solution tank.

For infrequent use or long periods of

storage, flush the system with a neutralizing solution of 1 quart white vinegar mixed with 2 gallons hot water. Flush the system with clean hot water after neutralizing.

For hose fitting lubrication, use a light silicone lubricant which will not damage o-rings.

PROTECT THIS MACHINE FROM FREEZING.

EQUIPMENT SET-UP:

1.) Plug power cable from machine into properly grounded wall outlet.

2.) Turn vacuum motor switch on and off to make sure there is electrical power at machine.

3.) Connect vac hose to machine. Slide the swivel cuff over the outlet on the tank.

4.) Connect the hose set to your machine and wand. Pull back the knurled collar on the quick disconnect coupler and push onto the connection on the chassis. To avoid leaks, check to be sure a positive connection was made.

5.) Using a clean container, fill the solution tank with clean, hot water. Mix in a nonfoaming cleaning concentrate for use in hot water extraction machines following the manufacturer's instructions, as printed on the container. When using a powder cleaner, premix with hot water in a clean container before adding to the solution tank.

- 6.) Turn pump and vacuum switch to the on position.
- 7.) Start cleaning.

MAINTENANCE

DAILY MAINTENANCE:

(At the end of each working day) :

- 1) Flush the entire system, including floor tool, hand tool, etc., with 1 to 3 gallons of clean, hot water.
- 2) Vacuum out the solution tank .
- Rinse tank with fresh water. Periodically inspect the recovery tank and decontaminate if necessary, using a Hospital Grade Virucide or a 1-10 bleach to water solution. Waste water should be disposed of properly.
- Remove lint build-up from the float shut-off screen in the recovery tank. (Occasionally check filter screen at the bottom of the solution tank and rinse clean with hot water if necessary).
- 5) Inspect hoses for wear. Frayed or cracked hoses should be replaced to avoid vacuum or solution pressure loss.
- Inspect power cord for wear or damage. This cable will lay on wet carpet. To prevent electrical shock replace cords that are frayed or have cracked insulation immediately.
- 7) Ensure automatic shut-off ball is working properly.
- Clean all dirt and obstructions from drain valve and gaskets to prevent possible leakage and premature wear.
- 9) Run clean water through solution pump when work is complete.
- 10) Empty both tanks and rinse, run vacuum(s) for at least one minute to dry motor(s).
- 11) Store with access covers removed to allow tanks to dry.

PERIODIC MAINTENANCE

- Twice a month, flush a white vinegar solution (One quart vinegar to two gallons of water) or anti-browning solution (mixed as directed) through the extractor, turning pump switch on/off several times, flush with clean water. This will prevent build-up of alkaline residue in the system.
- Check hoses for wear, blockages, or damage. Frayed or cracked hoses should be repaired or replaced to eliminate vacuum or solution pressure loss.
- Check all handles, switches, knobs, electrical cables and connections on your machine for damage. If the cable insulation is broken or frayed, repair or replace it immediately. Don't take chances with electrical fire or shock.
- 4) Clean out solution tank and remove and clean solution screen.
- 5) Clean outside of all tanks and check for damage.

Monthly Maintenance

- 1) Check all bearings for noise and wear.
- 2) Check all gaskets for wear and leakage.
- Check pump pressure; observe spray pattern and check with gauge if necessary.
- 4) Check overall performance of machine.

SEMI-ANNUALLY

1) Check vacuum motor brushes.

MAINTENANCE

WARNING ONLY QUALIFIED MAINTENANCE PERSONNEL ARE TO PERFORM THE FOLLOWING REPAIRS.

VACUUM MOTOR REPLACEMENT

- 1. Turn off all switches and unplug machine.
- 2. Remove recovery tank.
- 3. Locate the vacuum motor wires and disconnect at the connector.
- 4. Remove the vacuum motor.
- 5. Reverse process to install vacuum motor.

MAINTENANCE

ONLY QUALIFIED MAINTENANCE PERSONNEL ARE TO PERFORM THE FOLLOWING REPAIRS.

PUMP REPLACEMENT PARTS FOR SHURFLO 100 PSI (86201430 - PRV NO. 250-64A)

PUMP REPLACEMENT PARTS FOR FLOJET 100 PSI (86251110 - PRV NO. 65219)

SOLUTION PUMP REPLACEMENT

- 1. Turn off all switches and unplug the machine.
- 2. Remove recovery tank.
- 3. Remove solution hoses from fittings in pump.
- 4. Remove the (2) screws that fasten the pump to the frame.
- 5. Reverse process to install pump.

D100 86038260 05/21/07

TROUBLESHOOTING

PROBLEM.	CAUSE	SOLUTION
No power to machine.	Faulty power cord.	Replace.
	Dead electrical circuit.	Check building circuit breaker or fuse box.
Electrical shock.	Equipment not grounding.	Follow grounding instructions exactly.
	Receptacle not grounded.	Contact an electrician to check building's wiring.
	Internal wiring problem.	Have a trained service technician check machine's wiring.
Vac motor speed varies or doesn't run.	Worn motor brushes.	Replace.
	Motor worn out.	Replace.
	Faulty switch.	Replace.
Loss of vacuum.	Loose vacuum dome.	Center and seal dome over tank.
	Crack in dome or poor joint.	Replace or repair using acrylic plastic cement only.
	Lint or dirt clogging vacuum screen.	With power off, clean screen.
	Loose cuffs on vacuum hose.	Tighten cuffs turning counterclockwise.
	Vac motor seals leaking.	Replace.
	Floor tool vac chamber clogged.	Wash out with hose. Pick lint out with a wire.
	Vac motor, hose or gasket.	Replace.
Solution hose fitting hard to connect.	Corrosion on fittings.	Clean with steel wool. Soak in acetic acid (white vinegar). Lubricate lightly with silicone base lubricant.
Carpet not getting clean.	Severe soil conditions.	Make several passes at right angles to each other. Use a prespray.
Carpet too wet.	Over saturation.	Adjust solution pressure to lower settings. Make several passes with spray.
Carpet browning.	Leaving carpet too wet.	Check for loss of vac pressure.
	Too much chemical in.	Check label for correct solution concentration.
	Light carpet with no brown prevention.	Go over carpet with browning prevent only.
Solution not flowing properly.	Solution hose connection.	Check for positive connection.
· · ·	Faulty pump.	Repair or replace.
	Faulty floor tool valve.	Repair or replace.
	Faulty pump switch.	Repair.
