FUNCTIONAL AND CONSTRUCTION FEATURES

◆ All models are ACTIVE and feature the Guaranteed Rinse System. The rinsing is always at a temperature of 84°C throughout the rinse cycle thus guaranteeing rinse quality of the tableware in line with current international standards. The atmospheric boiler guarantees a constant high rinse temperature indipendent from the network water pressure (with a minimum of 0.5 bar).
◆ 4 second (variable) pause after washing and before rinsing ensures that no drops of unclean water will fall on the clean items at the end of the rinsing cycle.

◆ Three dishwashing programs: 1st cycle of 90 seconds for lightly soiled items, 2nd cycle of 120 seconds for normally soiled items and 3rd cycle of 240 seconds for heavily soiled items.

◆ Fault auto-diagnosis system.

◆ An effective rinse system that uses only 3 litres of clean hot water per rack to ensure lower running costs (in energy, water and chemical consumption).

* Declared actual cycle duration times can extend when water supply temperature is lower than indicated.

◆ Double skinned insulated wall ensures a low noise level and a reduction in heat loss from the machine.

◆ All the machines have smooth surfaces to facilitate cleaning.

◆ Large deep drawn wash tank and internal wash area with round corners and no pipes to avoid dirt built-up.

◆ The boiler drain facilitates the evacuation of stagnant water after long periods of inactivity to ensure a higher level of hygiene.

 The fully automatic self-cleaning cycle avoids the risk of bacteria proliferation.

 High efficiency air gap (class A) in water inlet circuit to avoid water being siphoned back into the network as a result of a sudden drop in main pressures.

◆ Front, side and back panels, door, wash tank, tank filter and wash/rinse arms made in heavy duty anti-corrosive AISI 304 stainless steel to guarantee appliance durability.

 304L stainless steel boiler with higher welding protection improves the resistance against corrosion from chlorinated water.
PVC water supply hose with metal

The IPX4 water protection prevents

external infiltrations.

◆ The incorporated Soft Start feature offers additional protection to delicate items such as glassware and crockery and increases wash pump reliability. ◆ Simple control panel with digital display allows on-site personalization of washing and rinsing cycle times and temperatures as well as precise rinse aid and detergent quantities depending on the customers needs.

• Three phase or single phase electrical connection, convertible on-site.

◆ All machines are pre-arranged to accept external dispensers.

• Counterbalanced door with springs to

lighten the load when opening and closing. The wash tank filters can be removed

without extracting the washing and rinsing arms.

 Pre-arrangement for HACCP system implementation and Energy Management device.

Completely closed on the reverse by a cover plate.

- ◆ 98% recyclable by weight.
- ◆ CFC free packaging.
- ♦ In compliance with C€ requirements.
- ◆ Low noise level.

• Developed and produced in ISO 9001 and ISO 14001 certified factory.

CONTINUOUS WATER SOFTENER

 Two resin containers automatically alternate between softnening and regenerating to provide non-stop washing.

Regeneration activated automatically – no operator intervention.

♦ 100% of rinse water softened with no pressure drop during rinse to ensure full detergent removal and perfect rinse quality of items.

• Comfortable front loading of regeneration salt.
