## RANGE COMPOSITION

The range consists of 2 models with a capacity of 1170 plates per hour and is the ideal space saving multi-purpose dish/utensil washer designed to wash plates, cutlery, glasses, cups and gastronorm trays. Model LS7EP features a traditional (pressure) rinse system whereas LU7ADP and LU7ADPWS features the Active Guaranteed Rinse System. Model LU7ADPWS also has a built-in continuous water softner, activated automatically without intervention by the operator. 503020 (LU7PDP) - basic model 503021 (LU7ADP) - ACTIVE model 503022 (LU7ADPWS) - ACTIVE model with built-in continuous water softner

## FRONT LOADING DISHWASHERS ZANUSS

## FUNCTIONAL AND CONSTRUCTION FEATURES

◆ For LU7ADP, the rinsing is always at a temperature of 84°C throughout the rinse cycle thus guaranteeing the complete sanitization of the tableware in line with current international standards. The 12 liter atmospheric boiler guarantees the constant rinsing water temperature independent of the water pressure of the network and incorporates a waiting boiler device. Rinse cycle duration of 16 seconds, modifiable to 35 seconds.

◆ LU7PDP incorporates a non-return valve, positioned at the back of the appliance that conforms to DVGW regulations, prevents dirty water present in the machine being syphoned back as a result of a sudden drop in mains pressure.

◆ For LU7ADPWS, the two resin containers automatically alternate during regeneration to provide non-stop washing. When the regeneration salt container is empty, the machine sounds an alarm. 100% of rinse water regenerated with no pressure drop during rinse to ensure full detergent removal and sanitisation of items.

◆ Load bearing frame, top, front and side panels panels, control panel, base, tank, washing chamber, tank filter, basket support, washing and rinsing arms and jets and screws are all made of 304 AISI stainless steel. Double skin insulated walls.

◆ Three different wash cycles depending on the type of tableware to be washed and the level of soil, ensure optimum washing performance. All cycles can be programmed. The 3rd cycle can be re-programmed to perform a longer & hotter rinse for HACCP compliance or a lower temperature for rinsing crystal glasses. Soft Start system incorporated to offer additional protection to delicate items and increase wash pump reliability.

◆ The one-piece pressed double-walled tank has rounded corners and no welds, joins or screws in the area in contact with the water. The new 2 pieces wash tank filter can be removed without taking out washing and rinsing arms to facilitate cleaning.

◆ Thanks to the new electronic board a fault diagnosis system is activated and the appliances are pre-arranged for HACCP connection. The electronic board includes a digital display of rinse and washing temperatures.

• Temperature thermometer indicating both wash & rinse temperatures, and rinse aid dispenser.

♦ A self-cleaning cycle is possible, just pushing a button, to wash and sanitize the machine using hot-fresh water. Boiler can be drained for periods of non use. Quick initial heat-up time due to pre-heating of wash water via boiler.

◆ The machines are supplied as standard with the following: 1 plate basket (CEP 18P), 1 cup basket (CET 24), 1 wire basket for pizza plates, trays and utensils and 8 cutlery containers (CEP 460). Further baskets are available as accessories (see the specific technical sheet).

 Pre arrangement for external detergent dispenser. It is possible to add the detergent dispenser on site.

• For machines without drain pump it is possible to add the drain pump on site.

♦ All models comply with the standards required by the main international approval bodies and are CE marked.

\* Declared actual cycle duration times can extend when water supply temperature is lower than indicated

OPTIONAL ACCESSORIES	·
