

ENJOYING THE LAUNDRY

ZANUSSI

6.

Now you can sit back and relax and let Zanussi take the strain out of your washing. Jetsystem+, big load capacities and special programmes will help make your washing chores easier and give you the time to do other things.

JETSYSTEM+

Innovative laundry products offer you the benefit of unique Jetsystem+ wash technology. Thanks to clever new intelligent technology, Jetsystem+ saves you time, energy and water based on your wash load size, providing the cleanest, most economical and efficient performance ever. So although the size of your wash load may vary, the results will always be perfect!

BIG CAPACITY

You can now wash a bigger load more easily and less often thanks to Zanussi 7kg washing machines. It also makes washing big items such as your duvets or bed linen much easier. This results in less washing and drying loads, saving you time, energy and water to make your life easier. Not to mention less visits to the laundry!

AUTO HALF LOAD

For extra convenience, Zanussi half load option gives you flexibility to wash small loads in a quicker time, using less energy and water.

ENERGY LABEL

Help the environment and your pocket by saving energy and water. A-rated machines mean Zanussi offers a low level of energy consumption coupled with reduced water consumption, proving that every little helps.

7.

EVEN MORE TO OFFER...

MODERN DESIGN

Zanussi laundry range offers a balance between design, aesthetics and convenience. The washing machine and washer dryer electronics have been intelligently designed to be attractive and easy to understand. Controls are logically laid out ensuring easy programming and precise control, with a range of easy to read LCD displays on a number of models.

HIGH SPIN SPEED

Zanussi offers a range of different spin speeds. With the 1600rpm the maximum amount of water is spun out of clothes resulting in minimum drying time. Practically every 200rpm more means 10 minutes less tumble drying, so you can save not only on energy, but also on time.

A CHOICE OF USEFUL PROGRAMMES & OPTIONS

-  **EASY IRON** By keeping your wash load moving and using a cool down phase with cold water, Easy Iron protects delicate and synthetic fabrics from developing permanent creases.
-  **DELAY START** Zanussi features a Delay Start option, allowing you to wash when it suits you or when lower rate electricity is available.
-  **WOOL** The wool programme reduces the drum rotation so that clothes are gently and constantly moved in the water to reduce matting and stretching of delicate fabrics and woollens.
-  **HANDWASH** For use with 'Handwash Only' labelled woollens, this is an extremely gentle programme whereby clothes are moved gently through the wash solution.
-  **MINI 30'** Wash clothes in 30 minutes. Ideal for clothes 'worn once' and for clothes you need in a hurry, such as school gym kit.
-  **SILK** Especially designed for silk items, this programme provides a very gentle wash for loads up to 1kg. The silk is gently spun for a short time at the end of the programme for maximum fabric care.
-  **DUVET** Designed to wash your duvets and other large bulky items such as padded jackets, this special programme provides a gentle and effective wash.
-  **SPORT SHOES** This programme effectively removes heavy soiling, and the gentle drum movement makes it ideal for washing all types of sport shoes
-  **SPORTS** Using a pre-wash, this programme helps get rid of tougher stains like grass. Ideal for outdoor sports wear such as football shirts, shorts etc.
- SUPER QUICK** Allows a shorter programme by pressing the Super Quick button just the once for a quicker wash.
- PREWASH** For extra dirty clothes, the prewash will loosen the dirt and remove it from the clothes prior to the main wash.
- RINSE HOLD** Suspends the laundry in the final rinse water until a convenient time for spinning. Reduces creases and saves time.
- NIGHT CYCLE** This programme option eliminates spinning for a silent wash.

Washing machines

ZWF16581W

7kg Jetsystem+ washing machine

Laundry Features

- Jetsystem+
- 21 programmes
- LCD display
- Inverter motor
- Big 7kg load
- 1600rpm
