# **Before Using**

# About LG EzSign 3.0 Editor

LG EzSign 3.0 Editor allows you to create advertising content quickly and easily.

Users can add their own pictures and texts to the default templates provided with the editor to create their own content. The content created can be compiled into a playlist and be exported to the TV by exporting to a USB device or using wireless network.

Such content can be played on an LG EzSign TV without any additional hardware or software. The images transmitted through external input, such as HDMI, IPTV, or USB, as well as the TV programs that are broadcasting in real time can be played along with user-created content.

LG EzSign 3.0 Editor is a software application running on a web browser. It supports running EzSign on multiple TVs in Remote Mode.

# About LG EzSign TV

You can view TV programs, images, and advertisement content simultaneously on an LG EzSign TV. Unlike conventional TVs, the LG EzSign TV supports playback of advertising content without any set-top box, dedicated monitor, or additional software.

# Installing LG EzSign 3.0 Editor

# **System Requirements**

ltem	Requirements	
CPU	Windows: Intel Pentium 4 processor 1.5GHz or higher, Mac OS: Multicore Intel processor or higher	
RAM	1 GB or higher	
HDD	1 GB or more free space	
OS	Windows XP, Windows 7 (32-bit / 64-bit) Mac OS X 10.7 (with Safari 6.0 or later), 10.8	

# Installing

#### Windows

- 1 Double-click the **setup.exe** file.
- 2 Click the drop-down menu in the pop-up window to select the preferred language, and click **OK**.

3 When the LG EzSign 3.0 Editor Wizard appears on the screen, click NEXT.

#### Note

- If a previous version of LG EzSign 3.0 is already installed on your computer, it should be removed before installing the current version. If the user clicks Yes, when asked whether to remove the previously installed version of LG EzSign 3.0 Editor, the program will be removed in order to continue installing the current version. All the content and program information stored in the previous version will be deleted. Ensure that you save any important content in My Computer before removing the program.
- When using operating systems that are not supported by LG EzSign 3.0 Editor, the program may not install correctly or it may not function correctly after installation.
- If your operating system is Windows 7, you need to install/run the program as an administrator.

4 When the License Agreement screen appears, click I Agree.

5 Select the directory in which to install the program, and click Install. The program will install automatically.

🗣 LG EzSign 3.0 Setup	
Choose Install Location Choose the folder in which to install LG EzSign 3.0.	<b></b>
Setup will install LG ExSign 3.0 in the following folder. To install in a diff Browse and select another folder. Click Install to start the installation.	erent folder, dick

6 When the installation is complete, click **Finish**.

#### Note

- After the installation is complete, the EzSign service for running Tomcat 7.0 is registered to the system. It starts automatically upon Windows start-up.
- If a firewall is enabled, to use the remote execution mode and message transmission function, EzSign 3.0 Editor is added to the firewall allowed program list.
- As EzSign 3.0 Editor uses the built-in Chrome Portable browser, the browser can be used independently without affecting how the Chrome browser that was previously installed on the PC runs, or the browser's settings.
- If you change the installation path to install the program under C:\Program Files, the pop-up message below may appear every time you start EzSign 3.0.

#### Mac OS

1 Double-click the LG EzSign 3.0.dmg file.

#### Note

- When you install LG EzSign 3.0, always use the LG EzSign 3.0.dmg file to start the installation. If not, the installation may not proceed normally.
- 2 Double-click the LG EzSign 3.0.pkg file in the LG EzSign 3.0 window.

000	LG EzSign 3.0
<b>\$</b>	
LG EzSign 3.0.pkg	
LG EzSign 3.0	

3 Click Continue in the LG EzSign 3.0 Installation window.

- If the program is already installed on the computer, the installation will terminate.Remove the previous program and then run installation again. (Refer to Deleting for how to remove the previous program.)
- If Java is not installed on the computer, the installation will terminate. Install Java and then run installation again.(Refer to the Mac OS help about how to install Java.)
- If the computer's operating system is not supported by LG EzSign 3.0, the program can continue to install, but LG EzSign 3.0 may not function correctly.

4 Click Continue on the Introduction screen.

5 Click Continue on the License Agreement screen.

6 Click I agree on the Terms & Conditions Agreement screen.

7 Click **Install** on the Installation Type guide screen. The program will install automatically.

8 When the installation is complete, click **Close**.

- The web server software, Tomcat 7.0, starts along with the LG EzSign 3.0 Editor.
- As the remote execution mode and message sending function are not available if a firewall is enabled, add LG EzSign 3.0 Editor to the firewall allowed program list by referring to the settings to use remote execution mode and message transmission function.
- The administrator's account information is required to install LG EzSign 3.0.

# Deleting

# Windows

To remove LG EzSign 3.0 Editor from your computer, click Start > All Programs > LG EzSign 3.0 Editor > Remove LG EzSign 3.0.

Use the uninstaller provided with EzSign to remove EzSign Editor from your computer.

You may not be able to remove LG EzSign 3.0 Editor correctly while the Chrome browser is running. Close all the Chrome browsers before uninstalling LG EzSign 3.0 Editor.

# Mac OS

To remove LG EzSign 3.0 Editor, go to Finder > Application > LG EzSign 3.0.

If Java is uninstalled while LG EzSign 3.0 is running, LG EzSign 3.0 may not terminate correctly. In this case, LG EzSign 3.0 cannot be deleted completely from the recycle bin, even if you try to delete it. Please be sure to stop the execution of LG EzSign 3.0 if you want to change the version of Java installed on the system. If you cannot delete LG EzSign 3.0 from the Recycle Bin because you have uninstalled Java while LG EzSign 3.0 is running, reboot the Mac OS and empty the Recycle Bin again.

#### Language setting

EzSign Editor supports 16 languages.

Supported	Korean, English, French, Italian,
Languages	Spanish, Portuguese (Europe),
	Chinese (Simplified), Chinese
	(Traditional), Arabic, Hebrew,
	Dutch, German, Russian,
	Portuguese (Brazil), Finnish,
	Turkish

The Windows version of LG EzSign 3.0 asks you to choose the user language at the beginning of the installation. The Windows version of LG EzSign 3.0 will be installed in the language specified by the user.

The Mac version of LG EzSign 3.0 will be installed in the language specified in the OS. If the language of the Mac OS is not supported by LG EzSign 3.0, the language setting is set to English by default for LG EzSign 3.0.

# Using LG EzSign 3.0 Editor

You can easily create and play advertising content using the LG EzSign 3.0 Editor.

# Running LG EzSign 3.0 Editor

#### Windows

To run LG EzSign 3.0 Editor on Windows, go to Start > All Programs > LG EzSign 3.0 > LG EzSign 3.0.

### Mac OS

To run LG EzSign 3.0 Editor on Mac OS, go to **Finder > Application > LG EzSign 3.0.app**. When you run LG EzSign 3.0.app, the following screen is displayed.

When you click on the image on the screen, LG EzSign 3.0 Editor starts via the Safari browser. This window must be running at all times in order to run the LG EzSign 3.0 Editor or to access the Remote Mode.

#### Note

- To close LG EzSign 3.0 Editor in Windows, click the in the top right of the window.
   For Mac OS, click the in the top left of the window.
- 1024 x 768 or higher resolution is recommended for LG EzSign 3.0 Editor. If not, the screen may not be displayed correctly.
- Hold the Ctrl key and press the + key to increase the zoom level of the browser above 100%. If you zoom out to 100% or below, the screen may appear abnormal.

# Using Quick Guide

When running LG EzSign 3.0 Editor for the first time, you will see the Quick Guide screen. Help for using LG EzSign 3.0 Editor is available.

#### Note

 If you do not want the Quick Guide window to appear automatically when LG EzSign 3.0 Editor starts, click the Do not show at startup checkbox at the bottom left of the Quick Guide window.

Exit the Quick Guide.

 To see Help while using LG EzSign 3.0 Editor, click Quick Guide at the top right of the window.

# Starting LG EzSign 3.0 Editor

You can create a TV content file by starting LG EzSign 3.0 Editor, or open and edit an existing content file. Newly created or edited content can be sent to the TV using USB or Wi-Fi for viewing on the TV.

- Click Make Content to go to the first step in creating an EzSign content file. You can select and edit a template and export the content file.
- Click Make & Export Playlist to go to the content export step without editing the template. After setting the playback duration for the existing content, you can export it to the TV using USB or Wi-Fi.

# **Creating EzSign Content**

You can easily create content using default templates provided by LG EzSign 3.0 Editor. For detailed information about creating EzSign content files, see the EzSign Editor Quick Guide. Make sure you read the Note below before creating a content file.

#### Note

 If you place the cursor over a menu or option item while creating content, a help balloon appears.

# Starting with a Template

You can select either user template or the default template provided by LG EzSign 3.0 Editor.

At the Make Content page, click the New Content button to bring up the template selection pop-up window.

After selecting a template layout, select an image from the background images provided to confirm the template to use for making your content.

- You can download a new template from the website provided by LG EzSign.
- Click Import Template in the bottom left of the screen to add a new template. (New templates are displayed with a New symbol for seven days.)
- You must check the template version before downloading. If the template set version does not match the version of the editor, the template will not be added to LG EzSign 3.0 Editor.

# **Loading Content**

You can open EzSign content from EzSign Workspace or 'My Computer.

By default, the content files are saved in and opened from EzSign Workspace.

In EzSign Workspace, content files can be viewed in list or thumbnail view.

Select a content file and press the Delete key on the keyboard to delete the content from the list in EzSign Workspace.

To send a content file to a specific folder on your computer or to an external device, you must save the content to a folder on your computer first.

My Computer

- Since content is saved as a folder, you must select a folder with the content name and then select Open to open content from My Computer. You cannot open the content from the subfolder.
- You cannot open a template file or an exported content file using Open. You can only open a saved file using the Save or Save As Content buttons.
- Only content created in EzSign Editor versions earlier than 3.0 can be opened.
- File names must not contain \, /, :, \*, ?, ", <, > or |.
- If you remove the EzSign 3.0 program, the content in EzSign Workspace is also deleted.
   Please save any content you need to restore when reinstalling EzSign 3.0 in My Computer.

# Editing Content

# **Editing Images**

Click an image area to edit the selected image. When adding an image, parts of it may be cropped if the aspect ratio of the image does not fit the selected area. If necessary, you can change the cropping border of the image or delete the image.

Transition Speed (sec.): 2	Content Name : Kew TVSignage Cont	eat Preview

**Changes images**. Click an image area to bring up the file explorer window. In the file explorer window, select an image file to upload.

- **Deletes images**. Click the Delete Image button to delete the image in the selected image area. After deleting the image, you can click the empty image area to upload a new image.
- Changes the cropping border of image area. If you add an image whose aspect ratio does not fit the image area, the parts of the image outside the area are cropped. Click the Crop Image button to view the original image and then drag the original image to crop desired parts of the image.

- The file formats supported for images are GIF, JPEG, PNG, and BMP.
- After you select GIF or BMP files, they are automatically converted to JPEG files before being shown. The quality of the converted images depends on the quality of the original image.
- To prevent degradation of image quality, use an image editing program to convert the image to PNG and then upload the image.
- We do not recommend 4-bit BMP, due to poor quality.
- Images larger than 4095 pixels in width or height are not allowed.
- You can upload desired images to image editing areas on any slide. Do use an image for all image areas. This may cause a static image to display on the TV screen for long periods of time resulting in image sticking. (See Panel Saver Content on page 14)
- Uploading photos saved in the Network folder to the image area may not work, depending on the network settings. If an error occurs, copy the photos to your local PC and then upload them.
- If a photo is bigger than the image area, its size is automatically adjusted, resulting in degrading the picture quality.
- Uploading an image larger than the image area may take a longer time than usual. File uploads taking longer than 90 seconds are usually not successful. Use an image editing program to save the image at a lower resolution to shorten the upload time.

# **Editing Text**

Click a text area to edit the text inside the area. You can also use the text properties edit pop-up window, which appears when you click a text area, to change the properties of the selected text area.

When a text area is selected, the properties editing pop-up window illustrated below appears. The following properties can be changed.

4	ά 📕
TODAY'S SPECIALS	
Text Flow:  None Slow Normal Fast	
Bold	
Underline	
Italic	
Color	
Font Size	
Font	
Text direction	
(left to right/right to left)	
Alignment	

- Alignment (left/center/right)
- Text flow
  - (None/Slow/Normal/Fast)

- For the font area, the input length may vary depending on the font size.
- If the text entered exceeds the maximum number of characters available for the input box and the Flow Speed function is not enabled, the text will be cut off when the content is displayed on TV.
- You can type only a limited amount of text. (Up to 2700 pixels). If the text you enter exceeds the maximum length, the input of text will be limited.
- The following elements affect the text length. Number of characters, font size, font type, and bold/italic properties
- When a font is installed on the system, it is also added to the Editor and displayed in the font list. We recommend installing general TTF (True Type Font). The fonts must be installed on the PC where the EzSign Editor has been installed.
- Some characters may not be entered, or may be entered but not displayed as normal on the screen depending on the font type or system installation environment.
   Please use the Preview function to see how the characters will appear on the TV screen.
- Once the text direction is set, the text flow direction is determined accordingly. When the direction is set from left to right, the text flows to the right, whereas the text flows to the left when the opposite direction is selected.
- If you use the same color as the panel saver content text font, image-sticking may occur on the panel. Therefore, we recommend using a different color.
- When Text Flow property is applied to a text, its content is applied uniformly to all slides.
- Editing for the selected text area is applied to the slide below when:
   exiting the text edit mode, manually entering the font size, changing the font type, and setting the flow property.
- After editing the text, you can use Preview to check how the content is displayed on the TV.

# Adding/Editing/ Deleting a Text Area

You can add or delete a text area in or from a desired location, and also move or resize it.

Note that adding/editing (moving or resizing)/ deleting a text area is not supported when you open and edit content that is originally created in an earlier version of the editor.

0	Adds a text area. Click the Add Text Area button and select an area to add text.
2	<b>Deletes a text area</b> . Click the Delete Text Area button to delete the selected text area.
8	<b>Moves a text area</b> . Click the Move Text Area button and drag a text area to move it.
	<b>Resizes a text area</b> . Drag the border of a text area to resize it.

# **Editing Slides**

You can add, delete or reorder the slides. You can also change the transition time (in seconds) of slides.

**Reorders slides**. Click a slide and drag it to move it to another location. The slides are displayed according to the new order.

- Up to 5 or 10 slides can be added depending on the template type. Place the cursor over a slide and click the x button to delete the slide.
- You can change the order of slides by dragging them with your mouse. The current slide page/total slide page is shown at the bottom of each slide.
- The slide transition speed (seconds) is applied to all slides within a template.

#### Panel Saver Content

Image sticking means that a previous image or the outline of a previous image still appears on the screen even after the image has changed. When playing content, LG EzSign 3.0 Editor displays the panel saver content image, the background and text colors of which are adjusted at regular intervals, for five minutes every hour to prevent screen burn-in.

User-created content

- The content is previewed according to the slide transition speed set by the user. (Same for the panel saver content)
- When previewing of the user-created content is complete, the panel saver content is displayed.
- A notification text is displayed when the panel saver content is displayed.

# Creating and Exporting Content Playlists

# **Creating Playlists**

You can add content files to a playlist and set the playback order.

You can select a schedule type and set the playback duration or start time and end time of the content.

You can set the TV On/Off time. When playing an exported playlist on a TV, you can set the TV to be turned on and off at specified times.

You can set the TV On/Off time. You can set the TV to be turned on and off at specified times. TV On/ Off times can be set within the 24-hour range.

0	Shows the name of the playlist being edited.			
2	Sets TV On/Off time.			
8	Sets the play type.			
	Duration			
	• Time			
4	Previews the selected content.			
6	Removes the selected file from the playlist.			
6	Sets playback duration or start time and end			
	time of the content.			
0	Uses this slot for TV/Movie.			
8	Adds a content to the playlist.			
9	Exports the playlist to a USB device.			
0	Sends the playlist wirelessly.			

- If you set the playback duration to 60 minutes or less, the Panel Saver function is disabled, which may cause image sticking on the screen. Therefore we recommend setting the playback duration to 70 minutes or longer.
- The playlist also contains the files required for the content file to be played.
- A playlist must be 20 MB or less, and up to ten content files can be saved in a playlist.
- You can set TV/movie to be played in full screen between content files.
- The total number of content files and TV/movie files cannot exceed 20.
- You can add the same content file to the playlist more than once.
- If a playlist cannot be added due to the size or number of content files currently being edited, the playlist cannot be exported.
- If Play Type is set to Time and TV On/Off time is set, the playback functions correctly only when the time set for the TV is correct.
- TV On/Off times can be set within the 24-hour range.
- If TV On time is set, the TV is turned on with the current channel and volume settings of the TV.
- The default channel and volume can be changed in TV Menu Time On Time menu.
- The content included in the playlist can be reordered by dragging and dropping the content. Select a content file to move using the mouse and place it over an existing content file in the location where you want to move it to. Then, slide the selected content file from left to right to reposition the content file.

# **Opening Playlist**

You can open playlists from EzSign Workspace or My Computer.

By default, playlists can be saved in and open from EzSign Workspace.EzSign Workspace supports a list view of the playlists.

			Playlist(s):
Name	Туре	Created	Modified
New Playlist	Folder	Thu May 23 15:56:00 KST 2013	Thu May 23 15:56 13 KST 2013

				Open Cancel

#### My Computer

#### Note

- A playlist is a list of playback content. When a content file is deleted, it is removed from all playlists that include it.
- Playlists created in earlier versions of the editor cannot be opened.
- Since a playlist is saved as a folder, you must select a folder with the playlist name and then select Open to open a playlist from My Computer. You cannot open the playlist from a sub folder.
- File names must not contain \, /, :, \*, ?, ", <, > or |.
- If you remove the EzSign 3.0 program, the playlists in EzSign Workspace are also deleted. Any playlists you need to restore when reinstalling EzSign 3.0 must be saved in My Computer.
- To ensure complete recovery of playlists when reinstalling EzSign 3.0, you should create a playlist that includes only the content files saved in My Computer.

# Exporting to a USB Device

You can export a playlist to a USB device and play it on the TV.

- 1 Plug a USB device into the PC and select Export to USB in EzSign 3.0 Editor.
- 2 In the USB list, select the USB device you want to export to.
- 3 After selecting a USB device, click the Export button to copy the EzSign content to the USB device.
- 4 When the exporting to the USB device is complete, the completion message will be shown.
- 5 Once the completion message is shown, you can use the USB device to play the content on the EzSign TV.
- 6 If the USB device is removed from the PC or the USB connection is poor during the export, the export process may not be successful.

- Content exported from the LG EzSign Editor cannot be opened in the Editor again. The export function is only used for playback on TVs.
- The actual playback duration on the LG EzSign TV and the playback duration set in the Editor may be a little different.
- If the USB device already contains a content list, the existing list is deleted and replaced by a new one.
- If multiple USB devices are connected to the PC, you can select the one you want to use by clicking the drop-down menu.
- If no USB device is connected, the **Please insert USB** message appears at the bottom of the drop-down menu.
- Do not change the default settings on the USB device for the save directory location. If the save directory is changed it will prevent the content from playing automatically.

# Sending via a Wireless Network

Using a wireless network, you can send content files saved on a PC to the TV without having to connect a USB device. To use this function, you must first connect a wireless dongle to the TV in order to connect to the wireless network. (See the Network Setting section.) The PC must also be connected to a router via a wired or wireless connection.

USB Wi-Fi Dongle

#### Note

- The wireless dongle must be connected to the wireless dongle slot among the USB slots on the TV.
- If a content file is sent via the wireless dongle, the file is immediately saved in the TV memory.
- The connection may not be established depending on wireless signal interference or strength.

# 

- If there is wireless signal interference, check whether the router is operating normally and connect it again. When there is a wall or another router between the router and the TV it may not work properly. Remove any obstacles before installing it.
- When multiple TVs are connected to a single router, make sure that the router is working properly before setting a network.
- Wi-Fi connection is available only through an AP.
- External Internet environments are not supported.

- New EzSign TV content will always replace existing content without a notification pop-up message.
- A password must be set for the router to prevent other devices from being connected.
- 1 Connect a wireless dongle to the TV that you are connecting to the router. You can check the network connection status from the TV's network menu. (The network must be connected to the minimum gateway.)
  - For details on network connections, see page 19.
- 2 Connect the PC to the router via a wireless/ wired connection.
- 3 In EzSign 3.0 Editor, select Send via Wireless Network.

And TV		··· •	Total : 1 TV
	TV Name	TV Status	IP
EZSIGN 10	rv	Connected	1922 1688 (0. 33
			Send Close

- 4 Use the Refresh button to automatically scan for TVs connected to the router. You can also select Add TV to manually enter the IP address of a TV.
- 5 Select a TV you want to connect and then select **Send**.

**6** When sending is complete, the sent content file is immediately played on TV.

 The first time the TV is shown on the list it is identified by its serial number. You can give it a new name (up to 16 characters) by clicking the TV name.

#### Note

- If you click the Cancel button while wireless transmission is in progress, the transmission will be canceled.
- If the network status is not normal, it may take some time for the transmission to be canceled after clicking the Cancel button. In this case, please wait until the transmission is completely canceled.
- In EzSign 3.0 Editor, you can select a TV to send content files to. After sending, all the existing content files saved on the TV are replaced with the new files.
- If an error occurs while sending, a pop-up message will appear and the previous file is played.
- The PC and the TV must be connected to the same router.
   The IP address of the router must be set as 192.168.XXX.XXX.
- To check the TV's serial number, select Menu > Customer Support > Product/Service Information.
- If this is the first time you are entering Send via Wireless Network, an empty TV list will be displayed.
- The **Refresh** function may take more than a minute depending on the network environment. If the network status is poor, clicking the **Refresh** button may not detect all the TVs connected to the router.

In this case, you can retry the automatic scan or select **Add TV** and enter the IP address manually.

- TVs which already exist in the list are not added again, even when detected during Auto Scan.
- To add a TV manually, enter its IP address.
- Depending on the network or TV condition, the IP search may fail.
- If this happens, check the network environment and try again.
- If a TV shown on the list is not found on the current network, it is marked as Disconnected in the Status column.
- You can remove a TV from the TV list by clicking Delete TV.

### Notes When Sending to a TV

- Depending on the size of content playlist to send or the network environment, it may take longer than 5 minutes.
- Even when sending to a TV in the list, the sending may fail depending on the network or TV condition. If the sending fails, check the error message displayed on the screen and follow its instructions.

#### **Error Descriptions**

Error Text	Error Description	Actions
TV or network failure	The TV is turned off, the network settings of the PC are incorrect, or there may be a problem with the wireless dongle or network equipment.	Please check the TV and network status.
Another work in progress	Other content has already been requested for the EzSign TV. The EzSign TV is currently processing other content that has already been requested.	Try again later. If the error persists even after retrying, please restart the TV.
Transfer file cre- ation error	Due to a transient issue, an error occurred while creating the files required for sending the content.	Please restart the editor.
System failure	The tasks required for operating the EzSign Editor cannot be performed because of an OS error.	Please reboot the system. If the prob- lem persists, please have an expert diagnose the OS.

When updating the EzSign content, do not use USB update and wireless update simultaneously. The TV may show unexpected behavior.

# **Network Setting**

#### **Wireless Network Connection**

Connect a wireless dongle to configure the wireless network.

A wireless router must be installed and operating at this time. Refer to the user manual of the wireless router to see how to install it.

The network settings and connection may be different depending on the network environment. Set up the router as instructed in its user manual.

# Wireless Network Setup

- 1 Press the **MENU SETTINGS** button on the TV remote control.
- **2** Use the  $\land, \lor, <$ , or > button to select the **Network** and press the **OK** button.
- 3 Use the  $\land, \lor, <$ , or > button to select **Network Setting** and press the **OK** button.
- 4 Use the  $\land$  or  $\lor$  button to select Setting from the **AP list** and press the **OK** button.

# **PIN mode connection**

- 1 Follow steps 1 4 in Wireless Network Setup.
- 2 Go to Connecting with PIN mode.
- 3 In the web page of the wireless router (AP) you want to connect, enter the PIN number displayed on the screen and select Connect.

Connecting with PIN mode		
Insert PIN number at the AP webpage and press [Connect] button.		
PIN Number: 19730704		
Connect		
For more information, check the AP manual.		
NEXT		

- 4 After the network setting is complete, if you need to configure the network settings again, select Reconnect.
- 5 Select IP Auto Setting or IP Manual Setting.
- If you select IP Manual Setting, manually enter information such as an IP address.
- 6 When this is complete, press Exit.

### Simple setting (WPS-button mode)

You can use a nearby wireless router, without having to select the wireless router's (AP) name.

- 1 Check if the wireless router (AP) supports the Quick Setting (WPS-button mode).
- 2 Follow steps 1 3 in Wireless Network Setup.
- 3 Use the ∧ or ∨ button to select Simple setting (WPS-button mode) and then press the OK button.
- 4 Press the WPS-button mode button of the wireless router (AP) you want to connect and then click Connect.
- **5** Follow steps 5 6 in PIN mode connection.

How to Enter Letters or Numbers

\* You can move the cursor on the screen to enter the required items, by pressing the Volume button on the remote control.

# Setting TV

Using the TV Management function, you can send messages to the TV, adjust the volume, show/hide EzSign, set the No Signal screen, etc.

TV Management		×

Select TV you want to send message or to			Delete message on TV	

- You can change the background image of the message box and properties of the text.
- You can set the number of seconds the message is displayed on the TV.
- After entering a message, click the [Send to TV] button to send the edited message immediately to the TV selected on the TV list on the left.
- If an error occurs while sending the message, please check the network status of the TV.

#### Note

- If a firewall is enabled on the PC, a message cannot be sent. To use the Instant Message function, please add EzSign Editor to the firewall exception list by referring to Settings for Using Remote Mode and Instant Message.
- When entering a message, some characters may not be entered, or may be entered but not displayed as normal on the screen, depending on the font type or system installation environment. Please use the Preview function to view how the messages entered will be displayed on the TV screen.

#### **Previewing Messages**

Using the preview function, you can view how the messages entered are shown on the TV.

#### **Deleting Messages on TV**

Click the Delete message on TV to make the message disappear within the set display time.

# **TV Control**

				_				
Contract The Select Th	/ you want to send	message or to co	otrol.			×	Apply to TV	

- Use the mouse or enter a number to adjust the TV volume.
- Use the On/Off button to show or hide the EzSign content on the TV.
- After selecting a control item in the left, click the [Apply to TV] button to have the setting applied to the TV.
- If an error occurs while applying to the TV, please check the network status of the TV.

- Instant Message and TV Control are supported only while the EzSign content is playing on the TV.
- The TV that sends or controls messages must be linked to the same router as the PC that has the EzSign Editor installed.

# **Setting No Signal Image**

You can set the image shown in the TV area of the EzSign content when the TV is in 'no signal' status.

#### Note

- If a no signal image is set, it is applied to the TV only after the playlist is exported to the TV.
- We recommend setting an image with an aspect ratio of 16:9 (width:height). If you set an image with another ratio, the image is stretched to the 16:9 ratio on the TV.

# **Using Remote Mode**

If you access PC in Remote Mode over a wireless network, you can create and edit the content on another PC without having to install EzSign Editor.

- Click Server Access Info. at the top left of the Quick Guide to view the URLs that are accessible in Remote Mode.
- Remote Mode is supported on Google Chrome (v24 or later) and Safari (v6.0 or later). Internet Explorer is not supported.
- When accessing in Remote Mode, content and playlists can only be saved in EzSign Workspace and not in My Computer.
- When accessing in Remote Mode, only the fonts in the PC installed with EzSign Editor can be used.
- If multiple users send content to the same TV, the last exported content is played.
- Remote Mode is available only when the PC installed with EzSign Editor is turned on and the EzSign server is running.
- For low-end PCs, the Editor may run slowly if multiple Editors are used simultaneously. We recommend that you limit the number of Editors that operate simultaneously to 10 or fewer.
- The PC that has the EzSign Editor installed, and any other PCs accessed via remote mode, must be connected through the same router.

# Settings for Using Remote Mode and Instant Message

Since Remote Mode and Instant Message functions cannot be used when a firewall is enabled, you must add EzSign Editor to the firewall allowed programs list by following the steps below.

### Windows 7 (32/64 bit)

 Control Panel > System and Security> Windows Firewall > Allow a program or function through Windows Firewall > Add Tomcat7.exe (If EzSign is installed in C:\LG EzSign 3.0\, add C:\LG EzSign 3.0\WebContainer\bin\tomcat7. exe.)

# Windows XP

 Control Panel > Windows Security Center > Windows Firewall > Exceptions > Add Programs > Add tomcat7.exe (If EzSign is installed in C:\ LG EzSign 3.0\, add C:\LG EzSign 3.0\ WebContainer\bin\tomcat7.exe.)

Browse								? 🔀
Look in:	🗀 bin		~	G	1	Þ	•	
My Recent Documents	bLG_EzSign_3.0.	.exe						
My Documents								
My Computer								
	File name:	tomcat7.exe				~		Open
My Network	Files of type:	Applications (*.exe;*.com;*.icd	ŋ			~		Cancel

# Mac OS

Since the firewall is turned off by default on the Mac, you can start using the functions without changing any settings.

If the firewall is enabled, you will not be able to use the Remote Mode or the Instant Message functions.

In this case, you must change the setting by following the steps below.

 System Preferences > Security & Privacy > Firewall > Firewall Options > Add Java

# **Managing Content**

\* The On-Screen Display (OSD) in this manual is an example to help you understand how to operate the product, and may be slightly different from your projector depending on models.

# Saving Content on TV Memory

 Insert the USB device containing the EzSign TV content into the USB port on the TV. The following is displayed on the TV screen.

USB			
EzSign TV	Movie List	Photo List	Music List

- 2 Select EzSign TV using the TV remote control.
- 3 Select Copy to TV Memory & Play in the USB tab to save the content files exported to the USB device in the TV memory.

The files are saved in the TV memory and the list of files available for playing is displayed automatically.

#### Note

- The **USB** tab is selected by default and shown when a USB device is connected to TV.
- If the TV memory does not have a sufficient free space, a Copy Failed! message is displayed for 5 seconds to return to the previous screen.

# 

• If the USB device or the USB dongle is removed by force while loading or copying through it, EzSign may not function correctly.

# **Viewing Content on TV**

You can play the content saved in the USB device or TV memory on LG EzSign 3.0 TV. If you play a file from the USB device while a file in the TV memory is being played, the currently playing file stops and the file on the USB device starts playing. You can play the TV content again while the USB content is playing.

# Viewing Content Saved in a USB Device

 Insert the USB device containing the EzSign TV content into the USB port on the TV. The following is displayed on the TV screen.

- 2 Select **EzSign TV** using the TV remote control.
- 3 Select Play from the USB tab.

You can set the schedule mode to either duration or time. If the schedule is set to duration, the content file is played in sequence from the first file in the list. If it is based on time, it is played according to the time set on the TV. In addition, when the schedule is set to time but no time is set up on the TV or if the time is not correct, the file may not be played at the expected time. Make sure you use the schedule mode after correctly setting the current time on the TV.

You can select the files you want to play from the file list using the TV remote control.

Press the Play button after selecting the files you want to play, and the selected files are played in order. (However, if the schedule mode is set to time, the files are played according to the time currently set.)

Once all the files have been played, the first one starts again.

0	Selects or deselects content files using the remote control.
2	Shows the file information of the files included in the list, such as name, playback duration, etc.
8	Checks the video list and select videos to play.
4	Current time set on the TV. If the time is not correct, you must set it again by going to <b>Menu &gt; Time.</b>
6	Plays the selected file.

#### Note

- We recommend copying files to the TV memory before playing them. Playing directly from USB device for an extended period of time may cause the device to overheat.
- The files in the playlist are played by either duration or time, according to the schedule.
- The Program GUIDE/INFO keys are always available.
- Press the CH and VOL Control keys to make adjustments. However, the content keys may not work while a channel is switched over.
- If you press the VOL or CH key while the panel saver is displayed, the screen may look abnormal.

# Viewing Content Saved on the TV Memory

You must first copy the content files to the TV memory.

- Press the MENU SETTINGS button on the TV remote control.
- 2 Select My Media using the remote control.
- 3 Select EzSign TV.

#### 4 Select TV Memory tab.

#### 5 Select Play.

The list of playable files is displayed as follows, and the files are played in sequence from the first one in the list.

You can set up the schedule mode to either duration or time. If the schedule is set to duration, the content file is played in sequence from the first one in the list; if it is based on time, it is played according to the time set on the TV. In addition, when the schedule is set to time but no time is set on the TV or if the time is not correct, the file may not be played at the expected time. Make sure you use the schedule mode after correctly setting the current time on the TV.

#### Note

- You can switch to EzSign mode or TV mode or see the file information while a file is being played from a USB device or the TV memory by pressing any button on the TV remote control.
- When you turn on a TV which has been set to the factory default, content files on the TV are played automatically.
- If there are several files in the playlist, you can proceed to the next page.

Exit	Returns to the previous TV mode or Movie mode when the file is being played.
Portal	Switches to EzSign mode and the file is played.
Program Guide	Displays or hides the file list and play- back information on the TV screen.
Info.	Displays or hides the information on the TV remote control buttons and the file status information while being played on the TV screen.

When you press the **INFO** button on the remote control, the following screen is displayed.

1	Shows the content title.
2	Displays the play mode. (with an EzSign mode / TV mode / Movie mode icon)
8	Provides the information on the remote control button.

- EzSign mode indicates that a content file is being played. You can play the file at any time since the **GUIDE** and **INFO** buttons are always available.
- In TV mode, the content file is stopped and a regular TV program is displayed in full-screen mode. You can play the file at any time since the **GUIDE** and **INFO** buttons are always available.

- In Movie mode, the content file playback is stopped, just as in TV mode, and the movie is played in full-screen mode. However, the control buttons (play, stop, rewind, etc.) related to playing movies are only available in this mode.
- Messages sent from the Editor are always displayed as long as content is playing on the TV regardless of the EzSign mode or TV mode.

# Checking the Location of the Content Being Played

- 1 Press the **MENU SETTINGS** button on the TV remote control while playing the content file.
- 2 Select **My Media** using the remote control.
- 3 Select EzSign TV.

4 The highlighted tab with the ✓ symbol indicates the location of the file currently being played.

✓ TV Memory	USB

# Deleting EzSign Content from the TV Memory

- 1 Press the **MENU SETTINGS** button on the TV remote control.
- 2 Select My Media using the remote control.
- 3 Select EzSign TV.

4 Select TV Memory tab.

- 5 Select Delete.
- 6 In the pop-up window, enter the 4-digit password for TV, and select **Close.**

After you enter the password, the message below appears for 5 seconds before the TV is turned off and on again automatically.

#### Note

 You cannot delete individual content files separately. All files saved in the TV memory are deleted when you select Delete.

# Lock enabled

- 1 Press the **MENU SETTINGS** button on the TV remote control.
- 2 Press the Up/Down/Left/Right button to select Lock and press the OK button.
- 3 Press the Up/Down/Left/Right button to configure the settings and press the OK button.

Item	Description
Set Password	You can change the 4-digit password. The default password is 0000. If the area is set to France, the password is not set to 0, 0, 0, 0 but to 1, 2, 3, 4.
Lock System	You can lock or unlock the system.
Lock Keys	You can lock or unlock the control keys on the TV set.

4 Press the Exit button when completed.

# **Playing Video from Content**

You can play a video file while playing a content file. Play the content file first.

Refer to the TV Manual for more information on how to play a video file.

- 1 Press the Menu SETTINGS button on the TV remote control.
- 2 Select My Media using the remote control.
- 3 Select EzSign TV.

- 4 Play a content file.
- 5 When a content file is played from USB, check if a video file is stored on the connected USB device. If a content file is played from the TV memory, you can connect a USB device which holds another video file.
- After pressing the GUIDE button on the remote control, select Open Movie on the screen.
   (See the figure on page 25)

Open Movie Launch Screen

7 When you select a video file to play, the video is played along with the content file.
