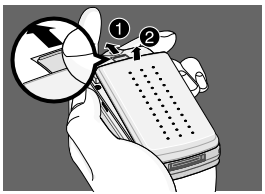
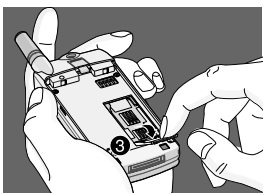
❶ Installing the SIM Card

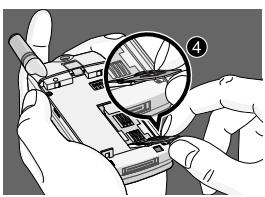
Locate the SIM card socket in the back of the phone. Follow the steps below to install the SIM card.



1. Unlock the battery cover ❶ and lift it off ❷.

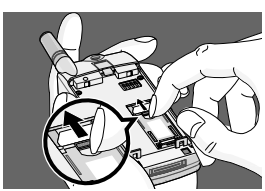


2. Flip the SIM holder ❸.



3. Slide the SIM card into the holder ❹.

- Ensure the angled corner is positioned correctly and the contact is made.

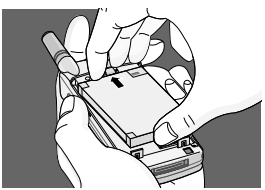


4. Close the SIM card holder, and move the holder lock lever up.

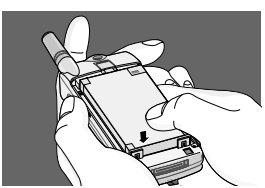
Notice

- Before installing SIM card, please make sure that the phone is switched off and the battery is removed.
- The metal contact of the SIM card can be easily damaged by scratches. Pay special attention to the SIM card when you handle and install. Follow the instructions supplied with the SIM card.

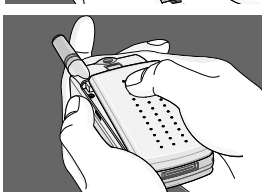
2 Installing the Battery



1. Place the top end of the battery on the phone. (See the picture left for purposes of illustration.)



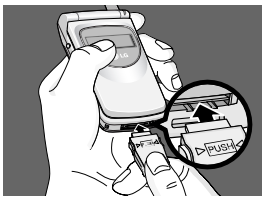
2. Push the battery in until you hear a “CLICK” sound.



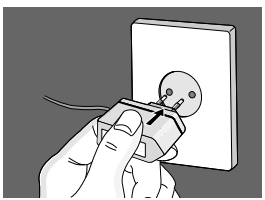
3. Close the battery cover.

❸ Charging the Battery

To connect the travel adapter to the phone you must install the battery.



1. Insert one end of the travel adapter into the bottom of the phone.

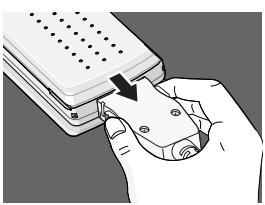


2. Connect the adapter to an AC wall outlet. Use only the included packing charger.

The usage times may be different depending on network service.

Battery Type	Charging Times	Usage Times	
		Standby	Talk
Standard	2 hours	150 hours	2 hours 30 min
Extended	3 hours	250 hours	4 hours

❹ Disconnecting the Charger



Disconnect the travel adapter from the phone by pressing its side buttons.

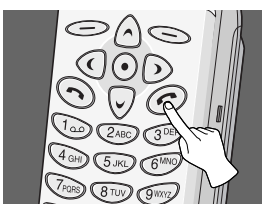
Notice

- Remember to charge the new battery fully after changing it.
- Do not remove your battery or SIM card while charging.
- “Battery Charging” is displayed on the screen after connecting the travel adapter. Only if the battery is totally empty, Call Indicator Light will be on without displaying “Battery Charging”.
- The moving bars of battery icon will stop after charging completely.

Note

- In case of the battery is not charged properly...
  1. After switching On/Off Power key, please try to recharge it.
  2. In case the battery is attached, please detach it from the phone. Then place it back to recharge it again.

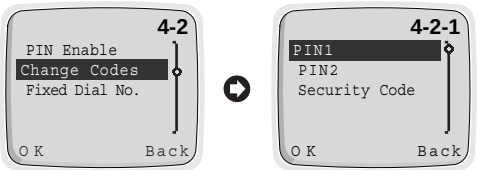
Powering On Sequence



In order to get started with your phone, follow the steps.

1. Press and hold button until you hear a tone from your phone to switch on.
2. If PIN code request of your SIM card is enabled, your phone asks you to enter PIN code. Enter the PIN code, then your phone connects to a GSM network and the network name appears on the display shortly.
3. And then your phone goes to standby mode. If the PIN code is disabled, your phone connects to the network without the request of entering PIN code.

You can use the access codes described in this section to avoid unauthorised use of your phone. PIN1 / PIN2 codes and Security code can be changed by using [Menu 4-2]. See the following section.



PIN1 code (4 to 8 digits)

The PIN (Personal Identification Number) code protects your SIM card against unauthorized use. The PIN code is usually supplied with the SIM card. When the PIN code request is enabled [Menu 4-1-1], the code is asked each time you try to change PIN code or enable/disable PIN code request, or your phone is switched on. If you change the PIN code, mark a note of it but keep separate from the phone.

PIN2 code (4 to 8 digits)

The PIN2 code, supplied with some SIM cards, is required to access some functions such as Advice of call charge, Fixed Dial number. These functions are only available if supported by your SIM card.

PUK1 code (4 to 8 digits)

The PUK(Personal Unblocking Key) code is required to change a blocked PIN code. The PUK code may be supplied with the SIM card. If not, contact your local service provider for the code. If you lose the code, also contact your service provider.

PUK2 code (4 to 8 digits)

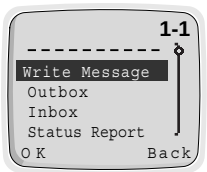
The PUK2 code, supplied with some SIM cards, is required to change a blocked PIN2 code. If you lose the code, also contact your service provider.

Security code (4 to 8 digits)

The security code protects the unauthorized use of your phone. It is usually supplied with the phone. This code is required to delete all phonebook entries.

Write Message

If you want to write the short message, you will follow the next procedure.



1. Press [Menu].
2. Select **Messages** in main menu by pressing [OK]. And then If you want to write a new message, select **Write Message** in the menu. If you want to modify the previous message, select **Outbox** in the menu, then you can edit the message by using eZi text editor or normal editor. If you want to write a reply message, select **Inbox** in the menu.

Read Message

If you want to read the previous stored short message received before, you will follow the next steps.

1. Press [Menu].
2. Then you can see the top menu. And select **Messages** by pressing [OK].
3. When **Messages** menu is displayed, scroll to **Inbox** by using and and press [OK].
4. Once you enter this menu, you can see the last received messages. Scroll to the desired message by using , .
   And if you want to exit Inbox menu, press [Back]. While reading message, press [Opt] to access the available options. You can see the explanation of **Option** in [Menu 1-3].

If you want to read the short message just received, you will follow the next steps.

1. When received a short message, will be displayed on the screen.
2. Press [OK], then you can read the just received message.

How to Use eZi Text

The eZi Text allows the user to type easily and quickly. Simply pressing each key once for each character, you can get the words you want. Furthermore, the candidate is predicted along with other candidates that fit the letters typed thus far. So, you don't need to input entire characters to make the word.

■ How to change mode

This phone supports three kinds of edit mode : **eZi mode, Numeric mode** and **Letter mode.** To change mode just press * key, then you can select the one among three modes.

■ How to use in eZi mode

To input text in eZi mode, simply press each key once for each letter.
After inputting the character, you can see that the candidate is appeared in text box, which has a high priority. Also you can choose other candidates using ◁ and ▷ .

E.g. If you want to enter "Meet at church after lunch".

To type "Meet", the user types the letters on the keys requiring only one key-hit per letter. The candidate "Meet" is predicted along with other candidates which fit the letters typed thus far. The user uses the select "Meet".

The user continues inputting characters in a similar manner for the rest of the message. Each candidate only requires a couple of key hits to find the target word.

Now lets demonstrate the predictive power. The word "lunch" is 5 letters long. Text input only requires 4 key hits before the word is predicted.

If at any time the user wants to input some punctuation, they press only 1 key to input punctuation.

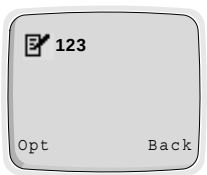
For example, if you want to enter “you”, then press 9 WXYZ key once. You can see “we”. Next, press 6 MNO key, then you can see “you” in the text box. If the word isn’t shown, press 8 TUV key, or search the word with ◁ and ▷ .

After entering characters, select the candidate you want with 0 + key.

Notice

- You can change a language with # . And you can also change the capital form with △ and ▽. For example : you → You → YOU → Y.O.U → y.o.u.

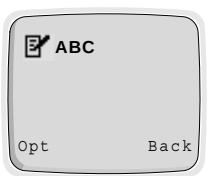
■ How to use in numeric mode



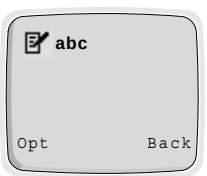
You can use this mode to input number, change another mode by * key.

1. Change the input mode to Numeric.
2. Press the key you want to enter.

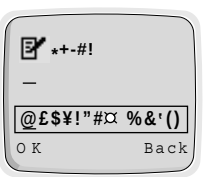
■ How to use in Letter mode



Capital Mode



Small Mode



Symbol Mode

There are three sub modes in Letter mode: **Capital mode, Small mode,** and **Symbol mode**.

Key	Description
	changes another mode e.g. eZi mode → Numeric mode.
	changes Capital mode to Small mode or Small mode to Capital mode.
	enters Symbol mode by pressing this key for a long time.
	moves next Symbol page in Symbol mode.

Notice

- In case of Symbol mode, after entering the character, mode is automatically converted to CAP letter mode.

■ **How to use user's dictionary**

You can use user's dictionary in case of writing SMS. The eZi Text has user's dictionary. You can add a few words to user's dictionary and then the word has a high priority.

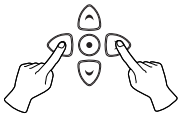
■ **How to add word to user's dictionary**

1. In the screen of eZi text mode press [Opt] key.
2. Scroll to **Dictionary** menu, press [OK] key.
3. Press [Opt] key after entering word you want.
4. Scroll to **Add to UPD** menu, press [OK] key.
5. If **Done** message is displayed in phone, it is added successfully to user's dictionary.
6. And you can check the word is added on **List Dictionary** menu.

■ **How to erase word from user's dictionary**

1. Scroll to **List Dictionary** menu.
2. Press [OK] key after selecting word you want to delete.
3. In next screen, press [Opt] key.
4. Press [OK] key after selecting **Del from UPD**.
5. If **Done** message is displayed in phone, then it is deleted successfully from user's dictionary.

Making Calls



1. Key in phone number including the area code. To edit a number on the display, press ◁ to move cursor to the left, and press ▷ to move cursor to the right.
2. Press ☎ to call the number.
3. Press ☎ to end the call (or to cancel the call attempt).

■ Voice Dial

1. If you select **Enable** in Setting [7-3], you can call by only voice.
2. When you open the flip, your phone display “Guide Message” and you will hear “Please say name”.
3. Then you must speak a programmed name which you want to call within 5 seconds.
4. Your phone will dial the number associated with that programmed name.

Note

- You have to associate your voice to the desired no. in order to use this function. Refer to Menu 7 (Voice Dial Menu) for further information.

■ International Calls

1. Press and hold the 0+ key for the international prefix. (+character replaces the international access code.)
2. Enter the country code, area code and phone number.
3. To call the number, press ☎ .

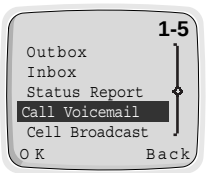
■ Making a Call using the Phonebook

1. In a standby mode, select **Names** by pressing [Names] key.
2. When phonebook menu is displayed, you can select **Search** by pressing [OK].
3. Key in the first letter of the name and press [Search].
4. Use ▲ and ▼ key, reach the desired name.
5. Press ☎ to dial.

■ **Last Number Redial**

1. Press and then you will see the last dialed number.
2. Then press one more if you want to dial to the number again.
3. If you want to dial the latest number by one key stroke, press and hold .

■ **Calling your Voicemail Service**

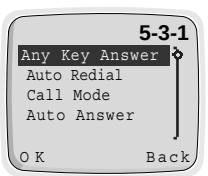


1. Press until your phone goes to calling mode. Or you can call it by using [Menu 1-5]. If you want to use menu, see [Menu 1-5]. (Voicemail Services must be set up with your network operator.)
2. If the phone asks for the voicemail number, key it in and press [OK]. You can obtain this number from your service provider. Also, you can edit this number later on.

■ **Making Call by Speed Dials**

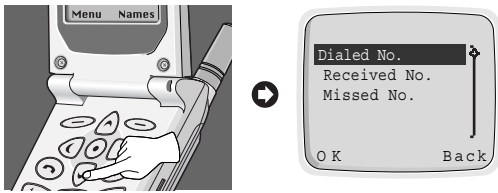
See the Section **Phonebook - Speed Dials**.

Answering Calls



1. The way to answer an incoming call is dependent on setting of [Menu 5-3-1].
2. If you select **On** in Any Key Answer [Menu 5-3-1], you can answer an incoming call by pressing any key except . If you select **Off**, you can do it by opening the folder. If folder is already opened, you can also answer the call by pressing .
3. Press or close folder to end the call.

In a standby mode, when you press ⌃ or ⌄ , these menu items below will be displayed. Dialed Number, Received Number and Missed Number can be saved in a Phonebook.



Dialed Number

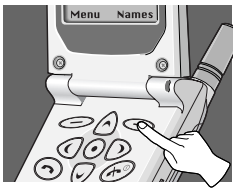
Shows recently dialed phone numbers that were not answered. After locating a phone number, you can make a call or erase the phone number.

Received Number

Shows recently received phone numbers up to 10. After locating a phone number you can make a call(if the network provides the service) or erase the phone number.

Missed Number

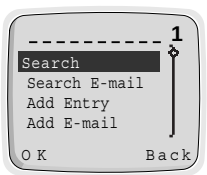
Shows recently missed incoming phone numbers up to 10. Those numbers that were called but were not answered. After locating a phone number, you can make a call or erase the phone number.



The phonebook has several menus from which you can choose. Press [Names] in a standby mode and then scroll to the desired item.

	Names	Description
1	**Search**	Allows you to search for a specific name.
2	**Search E-Mail**	Allows you to search for E-Mail address by name.
3	**Add Entry**	Allows you to add new names and numbers.
4	**Add E-Mail**	Allows you to add new names and E-mail address.
5	**Groups**	Allows you to show group list.
6	**Speed Dials**	Allows you to assign up to 8(2-9) one- touch dial allocations.
7	**Delete all**	Allows you to erase all the data in either your phonebook or the SIM card by selecting the memory.
8	**Memory**	Allows you to select the preferred memory of Phone/SIM card or to view the memory status.
9	**Copy**	Allows you to copy entries from your Phone memory to SIM card or from SIM card to Phone memory.
10	**SDN**	Allows you to show the Service Dial Number entries.
11	**Own Number**	Allows you to enter and show your own numbers

Search [Names 1]



(Calling from phonebook)

1. Open the phonebook first by pressing [Names] in a standby mode.
2. Select **Search** by pressing [OK] key.
3. Write the first letter or all character of required name and press [Search] then the name(s) will be displayed on the screen.

4. Scroll to highlight required name.
5. Press [OK] to display the name and phone number.
6. If you want to call, press .

Note

- In this menu, you can edit or delete the number you selected. If you do not enter the name and press [Search], then all entries will be displayed. If you want to find the name “David”, you may enter “D” by using the digit keys then you will see names starting with “D”, and you choose “David” by scrolling up/down to the required name “David”. On the window displayed name and phone number, you can edit or delete them by pressing [Opt].

Search E-Mail [Names 2]

1. Open the phonebook first by pressing [Names] in a standby mode.
2. Scroll to highlight **Search E-Mail**, and press [OK] to enter.
3. Write the first letter or all character of required name and press [Search], then the name(s) will be displayed on the window.
4. Scroll to highlight the desired name.
5. Press [OK] to display the E-mail address.

Note

- On the window displayed name and E-mail address, you can edit or delete the name and E-mail address by pressing [Opt].

Add Entry [Names 3]

You can add name and phone number by using this function. After editing, you can save either to the SIM card or to the Phone memory.

Phone memory capacity is 500 entries of personal number, and SIM card memory capacity of personal number depends on the service provider. You can also save 20 characters of name in the Phone memory and the SIM card memory each. The number of characters is dependent on SIM feature.

1. Open the phonebook first by pressing [Names] in a standby mode.
2. Scroll to highlight **Add Entry**, and press [OK] to enter.
3. Input a name to add.
4. Press [OK], then the window for inputting mumber will be displayed.
5. Edit phone number.
6. Press [OK], then memory selection window will be displayed. In this window, you can store the phone number in, either the SIM card or the Phone.
7. If the memory is available, you can add the entry. However, if the memory is full, then error message will be displayed and the menu will move to the previous step.

Add E-Mail [Names 4]

You can add name and E-Mail address by using this function. After editing, you can save E-mail address only to the phone memory.

You can save up to 30 characters of E-mail name and 50 characters of E-mail address only in a Phone memory.

1. Open the phonebook first by pressing [Names] in a standby mode.
2. Scroll to highlight **Add E-Mail**, and press [OK] to enter.
3. Input the name using the keypad.
4. Press [OK].
5. If Phone memory is available, then the message for inputting E-mail address will be displayed. However, if Phone memory is full, error message will be displayed. In order to add new entry, you need to delete old E-mail list first in Search E-mail menu.
6. Edit E-Mail Address.
7. Press [OK] to save.

Groups [Names 5]

By choosing this function, you can manage Group list, such as Member list, Add, Delete, Rename.
If you use **Add** menu, you can save up to 20 members in each group.

You can save up to 10 groups only in the Phone memory.

1. Open the phone book first by pressing [Names] in a standby mode.
2. Scroll to **Groups** item then press [OK] to enter this menu.
3. Every Group list will be displayed.
4. If you want to Add Group, select <Empty> and press [Add].
5. Select and input a Group name that you want.
6. After pressing [Opt] for a selected group, submenus below will be displayed.

Notice

- Selecting this item does not mean that you can add new entry in the Groups. In order to add new entry in the Group, you need to choose Member list.

■ **Member list:**

This menu item has three submenus: Add New Entry, Add Being Entry and Delete Entry.

1. Select **Member list**, then press [OK] to enter.
2. Then Member list will be displayed.
3. Select Member, and press [Opt] to enter.
4. Then **Add New Entry, Add Being Entry** and **Delete Entry** will show up.
   - **Add New Entry** : You can add a new entry in the selected Group or phonebook.
   - **Add Being Entry** : You can add an existing entry by searching from phone book.
   - **Delete Entry** : You can delete a selected entry in a Group.

■ **Delete:**

You can delete Group in the Group list.

1. Scroll to highlight **Groups,** then press [OK] to enter.
2. Scroll to highlight **Delete,** then press [OK] to enter.
3. Then confirmation message will be displayed.
4. Press [OK] to delete, or press [Back] to cancel.

Notice

- Even though you delete a Group in the Group list, the entries will remain in memory.

■ **Rename:**

You can change group name.

1. Scroll to highlight **Groups,** then press [OK] to enter.
2. Scroll to highlight **Rename** item, then press [OK] to enter.
3. Then Group Name editing window will be displayed.
4. Press [OK] to rename, and press [Back] to cancel.

Speed Dials [Names 6]

You can associate any of the keys 2 ABC to 9 WXYZ with a Name list entry to give you direct access, with a single long key press in a standby mode.

1. Open the phonebook first by pressing [Names] in a standby mode.
2. Scroll to **Speed Dials**, then press [OK] to enter this menu.
3. Then Speed Dials list will be displayed.
4. There are three submenus: **Add, Change** and **Delete**. If you want to add Speed Dials number, select **<Empty>** and press **[Add].** You can change the Speed Dials number allocation by entering **Change** and delete the allocated speed dials number by entering **Delete**.

Delete all [Names 7]

You can delete all stored numbers and names. This function may require Security code.

1. Open the phonebook first by pressing [Names] in a standby mode.
2. Scroll to **Delete all**, then press [OK] to enter this menu.
3. Then select the memory to erase: SIM card or Phone.
4. Warning message will be displayed to make sure your decision.
5. If you press [OK] then you may be requested to enter Security Code '0000'.
6. Press [OK] to erase, press [Back] to cancel.

Memory [Names 8]

Your phone offers the functions which allow you to tailor the phone to your needs. These functions are arranged in menus and submenus. The menus and submenus can be accessed by scrolling ◁ and ▷ or by using appropriate shortcut.

Menu Navigation by scrolling

The Main menu gives you access to all the other menus.

1. Press ◁ or ▷ to reach the desired main menu (e.g. Security). Then press [Menu] to enter the main menu; on the contrary, press [Back] to get out of the menus.
2. If you want to enter the submenu, find the one you want by pressing △ or ▽ . And press [OK] to enter the submenu, press [Back] to exit the submenu.

Shortcuts into Menus

When you know the menu numbers, you can use them to get into a menu quickly. In this book, the menu numbers are shown like this.

1. Press [Menu].
2. Key in quickly the index number of the menu function you want to access.

   For example, to set on the anykey function :

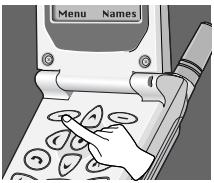
   : for **Entering the menu.**

   5 JKL : for **Setting.**

   3 DEF : for **Call Setting.**

   1 : for **Any Key Answer.**

This menu in your phone includes functions related to text message, voice message, cell broadcast message, as well as setting for message.



Write Message [Menu 1-1]

With the **Write Message** menu, you can write and edit text message up to 160 characters. When you have finished writing your message, press [Opt]. Then following menu will be displayed.

■ **Send : Sends the edited message.**

1. Once you enter this menu, your phone asks you to enter the number that you want to send it to.
2. After sending it, your phone asks whether you will store the edited message.
3. Press [OK] if you want to store it in Outbox and press [Back] if you don't want to.

■ **Store : Stores the message in Outbox.**

1. Your phone asks whether you will store the edited message or not.
2. Press [OK] if you want to store it in Outbox and press [Back] if you don't want to.

■ **Edit eZi Mode** : If you select this, you can write a message by eZi text input method.

■ **Edit LTR Mode** : If you select this, you can write a message in letter mode.

■ **Edit Num Mode** : If you select this, you can write a message in numeric mode.

■ **Dictionary :** In this option, you can add or delete a word to user's dictionary.

1. Press [Opt] key after entering word you want, then you can see the following menu.
   Add to UPD
   Del from UPD
2. Select **Add to UPD** if you want to add the word entered before in the user's dictionary of current selected eZi language. This word will be searched by the eZi when you edit in eZi mode.
3. Select **Del from UPD**, if you want to delete word entered before in the user's dictionary or current selected eZi language.

The added word will be searched by the eZi when you edit in eZi mode.

■ **List Dictionary :** If you select this, you can see additional words in user dictionary of current selected eZi language. Select a word which you want to edit or delete, and you can select to add or delete new edited word in the following the menu.

Outbox [Menu 1-2]

When you enter this menu, you can see the stored messages. Scroll to the desired message by using , and you can see upper or lower page using , . And if you want to exit Outbox menu, press [Back].

If you want to edit the message, press [Edit] and you can edit the message selected. When you have finished editing the message and press the [Opt], you can show the next menu: **Send, Save, Delete, Delete all.**

■ **Send:**

You can send the selected message. The sequence is identical with Send option in Write message.

■ **Save:**

You can save the selected message. The sequence is identical with Save option in Write message.

■ **Delete:**

The message is deleted.

■ **Delete all:**

All messages in Outbox will be deleted. In this menu, your phone will ask you if you really want to delete all messages for safety. Then press [OK] to remove all messages, and press [Back] if you don't want to.

Inbox [Menu 1-3]

When a text message is received, your phone shows and stores it in the incoming message list. It shows the symbol until you read the message. Once you enter this menu, you can see the last received message. Scroll to the desired message by using , and see upper or lower page by using , . If you want to exit Inbox menu, press [Back]. While reading message, press [Opt] to access the available options.

■ **Delete:**

The message is deleted.

■ **Reply:**

You can reply to the sender by message. Once you enter in this menu, you can edit the message you want to send and press [OK] to send it or press [Back] to cancel it.

■ **Forward:**

You can forward the selected message to another phone number. In this menu, your phone asks you to enter the number and then sends it.

■ **Return Call:**

You can call back to the sender who sent the message. If you select this item, your phone will dial automatically.

■ **Extract Number:**

If the selected message has a phone number within “ ”, you can not only extract it but also store it in a phone book.

■ **Delete all:**

All messages in Inbox will be deleted. Your phone asks you if you really want to delete all messages for safety. Then press [OK] to remove them, and press [Back] if you don’t want to.

Status Report [Menu 1-4]

You can receive a status report for sending message by setting it. When you receive a text message of status report, your phone stores it in the status report message lists.

If the memory for status report is full, the phone will delete the oldest status report automatically and store the latest status report.

Once you enter this menu, you can see the previous stored status report. Scroll to the desired message by using , and see upper or lower page by using , . And if you want to exit Status Report menu, press [Back]. While reading message, press [Opt] to access the available options.

■ **Delete**

The selected status report message is deleted.

■ **Delete All**

All messages in Status Report will be deleted. Your phone asks you if you really want to delete all messages for safety. Then press [OK] to remove all messages, and press [Back] if you don’t want to.

Call Voicemail [Menu 1-5]

In this menu, you can listen to your voice messages. If your phone stores voice message centre address, it will call automatically, otherwise, it will ask to enter address.

Cell Broadcast [Menu 1-6]

Cell broadcast messages are text messages broadcasted by the network to groups of GSM phone users. They provide general information such as weather reports, traffic news, and stock market prices. Each type of information has an associated information type number. When you receive broadcast message, you can read it following sequence :

1. When you receive broadcast message, it is automatically displayed on the window. If the message is so long that cannot be displayed all in a window, you can read it by scrolling ▲ and ▼ .
2. After reading the message, press [OK] to return to the Idle mode.
3. Your phone will store it until a new message of the channel is reached.
4. If you want to read it again, see the [Menu 1-6-2](Read).

■ **CB Option [Menu 1-6-1]**

- **On [1-6-1-1] :** If you select this menu, your phone will receive Cell Broadcast messages.
- **Off [1-6-1-2] :** If you select this menu, your phone will not receive the Cell Broadcast messages anymore.

■ **Read (Dependent on network and subscription) [Menu 1-6-2]**

You can read the stored broadcast messages in this menu. In addition, your phone stores only the last message of each channel.

1. If you select this menu, your phone will display the message.
2. You can read it. If it is so long that cannot be displayed in a screen, scroll by pressing ▲ and ▼ .
3. After reading, press key to read next message, and press [Exit] to exit this menu.

■ **Topics (Dependent to network and subscription) [Menu 1-6-3]**

SIM

If you select this menu, you can add or delete the CB message category in SIM memory. If you select the **Add** menu, you can enter the only category numbers which consists in a pair of number.
If you select **Delete** menu, you can see the list of CB message category and delete it by using [Delete].

Phone

If you select this menu, you will add, select and delete the CB message category in Phone memory. If you select the **Add** menu, you will add the CB message category numbers with its nickname. If you select **Select** menu, you can see the list of CB message category numbers with its nickname and select them by using [OK] to activate or deactivate them. If you select the **Delete** menu, you can see the list of CB message category numbers with its nickname and an delete them by using [Delete].

■ **Languages [Menu 1-6-4]**

You can select languages in this menu. Then your phone will receive the cell broadcast messages written in the selected language.

1. In this menu, you can see several languages. (e.g.- English, French, ...)
2. Scroll to highlight the language you want, select on/off.
3. You can select more than one item through the procedure of 1~2.

Memory Status [Menu 1-7]

If the user selects this menu, the phone shows an used memory and total amount of memory. The total memory is sum of SIM and Phone memory.

Setting [Menu 1-8]

■ Status Report [Menu 1-8-1]

In this menu, you can set the message service to receive messages which will be sent. This report is represented whether the message is sent to destination successfully or not.

- **On** : If you select this menu, you will receive the status report of message.
- **Off** : If you select this menu, you will not receive the status report of message.

■ Message Type [Menu 1-8-2]

:Text, Voice, Fax, X.400, E-mail, ERMES
Usually, this menu choice should be set to **"Text"**. Your message service may, however, offer you the facility of converting your text message into alternative formats which are suitable for the equipment that will be received messages. Contact your service provider for the availability of this function.

■ Expiry Period [Menu 1-8-3]

This network service allows you to set how long your text messages will be stored at the message centre while attempts are made to deliver them to you: **1 hour, 6 hours, 12 hours, 1 day, 2 days, 1 Week, Max.**

■ SMS Centre [Menu 1-8-4]

In this menu, your phone asks for the address of your SMS centre. This is needed for sending text messages.

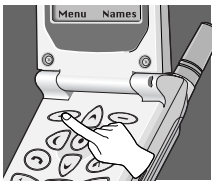
■ Voice Centre [Menu 1-8-5]

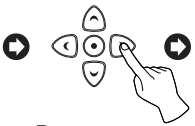
In this menu, your phone asks to enter the number for your voice message. This is needed for listening to your voice messages.

■ Alert [Menu 1-8-6]

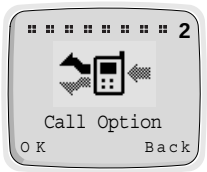
The user can set how many times and how often the phone alerts the user to incoming messages.

Use the “Call Option” menu to access supplementary services provided by the GSM network.





<Press once>



Note

- The Call Divert, Call Barring, and Call Waiting menus each contains an option for displaying the current status of the service. This function makes a call to the network. This call may be charged to you. Check with your service provider.

Call Divert [Menu 2-1]

(network and subscription dependent)

The Call Divert service diverts incoming voice calls, fax calls, and/or data calls to another number.

1. Press [Menu] in a standby mode.
2. Press 2ABC for direct access or use ◁ and ▷ to enter Call Option.
3. Select **Call Divert** menu and press [OK] to enter.
4. Select **Voice Calls**.

■ Voice Calls [Menu 2-1-1]

- **Divert All Voice Calls** : Divert calls unconditionally.
- **Divert if not Reachable** : Divert calls when the network cannot reach you.
- **Divert if Busy** : Divert calls when the phone is busy.
- **Divert if No Reply** : Divert calls which you do not answer.
- **Cancel All** : Only cancel voice call divert.

■ **All Data Call [Menu 2-1-2] : Divert all data calls unconditionally.**

1. Press [Menu] in a standby mode.
2. Press 2 ABC for direct access or use ‹ and › to enter Call Option.
3. Select **Call Divert** menu and press [OK] to enter.
4. Select **All Data Call**.

■ **All Fax Call [Menu 2-1-3] : Divert all fax calls unconditionally.**

1. Press [Menu] in a standby mode.
2. Press 2 ABC for direct access or use ‹ and › to enter Call Option.
3. Select **Call Divert** menu and press [OK] to enter.
4. Select **All Fax Call**.

■ **Cancel All [Menu 2-1-4] : Cancel all voice, data and fax call divert.**

1. Press [Menu] in a standby mode.
2. Press 2 ABC for direct access or use ‹ and › to enter Call Option.
3. Select **Call Divert** menu and press [OK] to enter.
4. Select **Cancel All**.

Call Barring [Menu 2-2]

(network and subscription dependent)

The Call barring service prevents your phone from making and/or receiving certain categories of calls. This function requires the call barring password obtained from your service provider.

1. Press [Menu] in a standby mode.
2. Press 2 ABC for direct access or use ◁ and ▷ to enter Call Option.
3. Scroll to highlight **Call Barring** menu and press [OK] to enter.
   - **All Outgoing Calls** : The barring service of all outgoing calls.
   - **Outgoing International Calls** : The barring service of outgoing international calls
   - **Outgoing International except Home** : The barring service of all international outgoing calls,except to your home network.
   - **All Incoming Calls** : The barring service of all incoming calls.
   - **Incoming Calls When Roaming** : The barring service of all incoming calls when roaming.
   - **Cancel All** : Only cancels the barring service of voice call.
   - **Password Change** : Changes Call Barring password.

Call Waiting [Menu 2-3]

(network and subscription dependent)

Activate or deactivate the Call Waiting service. If this service is activated, the user can accept a waiting(incoming) call. If this service is deactivated, the user cannot accept a waiting(incoming) call and cannot recognize it.

1. Press [Menu] in a standby mode.
2. Press 2 ABC for direct access or use ◁ and ▷ to enter Call Option.
3. Scroll to highlight **Call Waiting** menu and press [OK] to enter.

Sending Number [Menu 2-4]

(network and subscription dependent)

This menu is valid only when the user subscribes temporary mode.

If you Select **On**, you allow your phone number to be displayed to the other party. Also, you can change this mode On/Off you want.

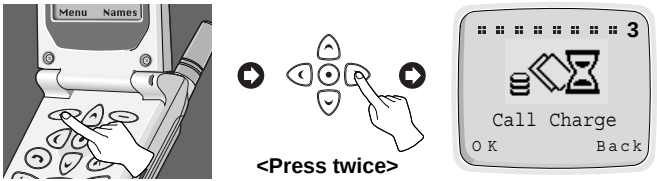
1. Press [Menu] in a standby mode.
2. Press 2 ABC for direct access or use ◁ and ▷ to enter Call Option.
3. Scroll to highlight **Sending Number** and press [OK] to enter.

Closed User Group [Menu 2-5]

(network dependent)

Use this function to restrict usage of the phone to calls with numbers that belong to certain user groups. When this function is used, every outgoing call is associated with a group index. If a group index is specified, it is used for all outgoing calls. If no group index is specified, the network will use the preferential index (a specific index that is stored in the network).

1. Press [Menu] in a standby mode.
2. Press 2 ABC for direct access or use ◁ and ▷ to enter Call Option.
3. Scroll to highlight **CUG** and press [OK] to enter.



Call Duration [Menu 3-1]

This function allows you to view the duration of your Last Call, All Calls, Incoming Call and Outgoing Call in hours, minutes and seconds. You can also clear the call timers.

1. Press [Menu] in a standby mode.
2. Press 3DEF for direct access or use ◁ and ▷ to enter Call Charge.
3. Select **Call Duration** and press [OK] to enter.
4. This menu has 5 submenus. You can choose the item that you want to see.

Call Costs [Menu 3-2]

This network service allows you to check the costs of your last call or all calls and clear the counters. To clear the counters you need the PIN2 code. The Costs are shown for each SIM card independently in terms of the unit set within [Menu 3-3-2].

Note

- The actual cost invoiced for calls by your service provider may vary depending upon network features, rounding-off for billing, taxes, etc.

1. Press [Menu] in a standby mode.
2. Press 3DEF for direct access or use ◁ and ▷ to enter Call Charge.
3. Scroll to highlight **Call Costs** and press [OK] to enter.
4. This menu has 3 Submenus. Select the item that you want to.

Cost Settings [Menu 3-3]

(SIM dependent)

■ Call Cost Limit [Menu 3-3-1]

This network service allows you to limit the costs of your calls to a selected number of charging units. If you have selected **On**, you can set cost limit in terms of unit and use your phone to a selected number of charging units. If you have selected **Off**, you can use your phone without cost limitation. When all units have been used, no calls can be made except emergency calls.
To set a call cost limit, you need the PIN2 code.

1. Press [Menu] in a standby mode.
2. Press 3DEF for direct access or use ‹ and › to enter Call Charge.
3. Scroll to highlight **Cost Settings** and press [OK] to enter.
4. Select **Call Cost Limit** to enter.

■ Set Tariff [Menu 3-3-2]

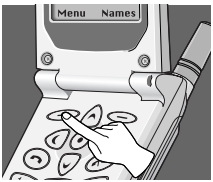
You can set currency name and unit price. Contact your service provider to set the chargeable unit prices. To select the currency or unit in this menu, you will need the PIN2 code.

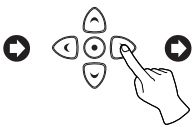
1. Press [Menu] in a standby mode.
2. Press 3DEF for direct access or use ‹ and › to enter Call Charge.
3. Scroll to highlight **Cost Settings** and press [OK] to enter.
4. Select **Set Tariff** to enter.

■ Sum. After Call [Menu 3-3-3]

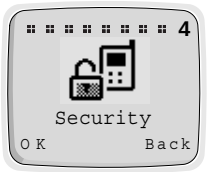
You can check the duration and the cost of call during a call or after ending a call if you set **On**.

1. Press [Menu] in a standby mode.
2. Press 3DEF for direct access or use to enter Call Charge.
3. Scroll to highlight **Cost Settings** and press OK to enter.
4. Select **Sum After Call.**





<Press three times>



PIN Enable [Menu 4-1]

Within this menu, you can set the phone to ask for the PIN code of your SIM card when the phone is switched on. To use this function, you will be requested to enter the PIN code.

1. Enter this menu by selecting **PIN Enable**. Then your phone requests to enter PIN code if PIN request is enabled.
2. Key in your PIN code.
3. Press [OK] to verify entered PIN code, and press [Back] to erase a character you entered.
4. Then following menu will be displayed.
   - **Enable** : Enable PIN code request.
   - **Disable** : Disable PIN code request.

Change Codes [Menu 4-2]

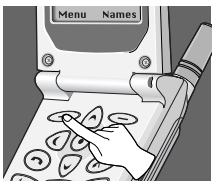
This menu provides you with the function of changing access codes : **PIN1, PIN2 code,** and **Security code '0000'.**

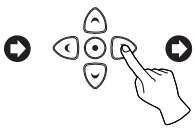
1. Enter this menu by selecting **Change Codes**.
2. And select **PIN1, PIN2,** or **Security Code.**
3. Input your original PIN codes and press [OK].
4. Your phone asks you to enter the PIN1/PIN2 code or Security Code which would replace ones and press [OK]. Then phone requests the new PIN codes or Security Code again.
5. If you key in correct original PIN1/PIN2 code or Security Code and make correct confirmation for new ones, they will be changed.

Fixed Dial Number [Menu 4-3]

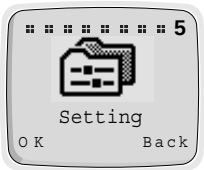
You can restrict your outgoing calls to selected phone numbers, if this function is supported by your SIM card. These numbers are protected by your PIN2.

1. Enter this menu by selecting **Fixed Dial No.** Your phone will request the PIN2 code.
2. Key in your original PIN2 code and press [OK]. If you key in PIN2 code is correct, following menu will be displayed.
   - **Enable** : Providing the function for you of restricting your outgoing calls to selected phone numbers, if it is supported by your SIM card.
   - **Disable** : No restriction on outgoing calls.
   - **Number** : Allows to add, to edit and to delete the Fixed Dial Number.





<Press four times>



Network Selection [Menu 5-1]

You can select the network which you will be registered either automatically or manually.

■ **Automatic [Menu 5-1-1]**

The phone automatically selects network which is available in the area.

■ **Manual [Menu 5-1-2]**

The phone will find the list of available networks and show it to you. Then you can select the network which you want to use if this network has a roaming agreement with your home network operator.

Phone Setting [Menu 5-2]

■ **Alert [Menu 5-2-1]**

This setting defines how the phone will notify you about an incoming voice call: **Ring, Vibrate, Vibrate & Ring, Ring After Vibrate,** and **Silent**. Once you select this menu, the following is possible.

This phone shows the menu : Ring, Vibrate, Vibrate & Ring, Ring After Vibrate, Silent by pressing ⌃ and ⌄ and select one.

■ **Backlight [Menu 5-2-2]**

You can set how long you want the keypad and display to light up each time you press a key : **Off, Always Open Flip, 20 seconds, 10 seconds, 5 seconds.**

■ **Key Tone Volume [Menu 5-2-3]**

You can set the volume level for the pressed key tone : **Level 1~5, and Off.**

■ **Ring Volume [Menu 5-2-4]**

You can set the volume level for the ringing tone : **Level 1~5, and Off.**

■ **LCD Contrast [Menu 5-2-5]**

You can set the color contrast of the characters on the LCD: Value 0~9.

■ **Ring Pattern [Menu 5-2-6]**

If you select this menu, you can select the various ring pattern and ring tone.

1. Enter this menu. Your phone will ask to select the ring tone and the ring pattern.
2. Your phone shows the list of ring pattern. Select one out of them by pressing ⌃ , ⌄ . Also, you can change the ring tone by pressing ‹ , › .

■ **Language [Menu 5-2-7]**

This menu provides you with selection of the language in which the display texts will be shown. If the setting Automatic is selected, the language used is chosen based on the current SIM card. English will be used if the language on the SIM card is not found in the phone.

■ **Welcome Display [Menu 5-2-8]**

This menu allows you to set the text or animation which is shown briefly when the phone is switched on.

1. Scroll to highlight **Welcome Display**.
2. Then following menu will be displayed.
   - **Text** : Your own text can be displayed. If you select this item, your phone asks you to edit the message.
   - **Animation** : Animation will be displayed.

■ **Standby Display [Menu 5-2-9]**

This menu allows you to select the standby window display. You can select one out of **Zodiac** (**User Own, Monthly**)**, Digital Clock, Analog Clock, Normal,** and **Text**. In text mode, you can edit the text.

Call Setting [Menu 5-3]

■ **Any Key Answer [Menu 5-3-1]**

- **On** : If you select this, you can answer the phone either by opening the folder or pressing any keys except END/PWR key while folder is opened.
- **Off** : If you select this, you can answer the phone only by pressing .

■ **Auto Redial [Menu 5-3-2]**

- **On** : When this function is set on, your phone will make up to 10 attempts to connect the call after an unsuccessful call attempt.
- **Off** : When this function is set on, your phone will not make any attempts to connect the call after an unsuccessful call attempt.

■ Call Mode [Menu 5-3-3]

In this menu, you can use the phone and a connected PC to send and receive faxes, data, and voice. Once you enter this menu, the following options are displayed.

- **Single Mode** :
  To use a data or a fax service, make sure that call mode is **Single mode**. In this mode, you can communicate voice, data or fax.
- **Voice and Fax** :
  In this mode, you can transmit voice and also fax.
- **(SINGLE NUMBER) RX VOICE AND FAX**
- **(SINGLE NUMBER) RX FAX**
- **(SINGLE NUMBER) RX DATA**

In case of single numbering service, you can use these modes. If you select mode, you can receive data, fax or fax with voice each mode.

Notice

- Single numbering service means that the number of fax or data service is identical with the number of voice service. And, these modes depend on network feature.

■ **Auto Answer [Menu 5-3-4]**

This function will be activated only when your phone is attached to the Handsfree kit or Portable Handsfree.

- **Off** : When the phone rings, you must actively answer it.
- **5 Seconds** : After 5 seconds, your phone will answer automatically.
- **10 Seconds** : After 10 seconds, your phone will answer automatically.

In this menu, it will show you the URL of current connected page.

■ **Reload**

Reloads current connected page.

■ **Empty Cache**

Refers to [Menu 8-4].

■ **Exit**

Disconnects and exits WAP.

Some telephone services(such as telephone answering machine and pager) require your telephone to transmit DTMF tones(Dual Tone Multi-Frequency), also known as “touch tones”. These are used to communicate passwords, call back numbers, and so on.

Wait Characters

To obtain a wait character, press and hold # . The display shows **P** for a wait. The phone always interprets the **P** as a wait character.
When you dial a number containing a wait character, your phone dials the first part(the phone number) and then waits for the call to be connected before sending the rest of the digits as DTMF tones.

Interrogating your Answering Machine(example)

For example: To hear all messages on your answering machine (password 5452) at phone number 12345678, you can call: 12345678P5452.The phone dials 12345678 and waits for the call to connect. When connected, the phone transmits 5452(the password).

During a Call

When you need to send DTMF tone, just press the numbers, then DTMF tone will be sent.

The phone provides a number of control functions that you can use during a call. You cannot utilize all of these functions at all times. Most of the In-Call options are network services. By pressing [Opt] during a call, the following In-Call options may be available:

■ Hold Call

(network dependent)

During a call, you can put an active call on hold.

1. During a call, press [OK] to enter In-Call Option.
2. Select **Hold Call** to put an active call on hold.

■ Retrieve Call

(network dependent)

If you have a call already on hold, you can retrieve that call.

1. During a call, press [OK] to enter In-Call Option.
2. Select **Retrieve Call** to retrieve a held call.

■ Swap Call

(network dependent)

When there are an active call and a held call, this menu places the active call on hold and the Held call on active. You may swap back and forth required.

1. During a call, press [OK] to enter “In-Call Option”.
2. Select **Swap Call** to swap an active call and a held call.

■ Conference Call

(network dependent)

This feature allows up to six persons to take part in a conference call (network dependent.).

1. While in a call, dial phone number and press . The first call is put on hold.
2. To join the first conference participant in the call, press [Opt], choose conference call, select join and press [OK].

3. To add a new participant to the call, repeat steps 1 and 2.
4. To drop a single participant from the call, press [Opt], choose conference call, select private and press [OK]. Select the participant that you want to drop and press .
5. To end the conference call, close the flip.

■ Disconnect

You can disconnect the call that is already on hold, currently active and all calls by scrolling up and down the menu items such as Active call, Hold call, and All calls.

- Active call

If you select this function, you can go to the message menu [Menu 1].

For details see <Message> [Menu 1].

1. During a call, press [Opt] to enter In-Call Option.
2. Select **Message** to send message.

■ SIM SERVICE

Your service provider can offer special application through SIM card, such as homebanking, stock market, etc. If you are registered for one of these services, the service name will appear at the end of the Main Menu. With the SIM Services menu your phone is future-proof and will support additions to your service provider's service. For further information contact your service provider.

To be able to data or fax service, you need the communicate software such as a data or a fax program. Before using these functions, you need to connect your phone to a computer or make sure that your phone is in connection with a compatible device.

Making a Data or Fax call

To use a data or a fax service, make sure that call mode is “single mode” (Setting → Call Setting → Call Mode → Single Mode). In this mode, you can communicate voice, data or fax. If you set call mode to be “voice & fax mode” (Setting → Call Setting → Call Mode → Voice & Fax mode), you can transmit voice and fax without voice call release.

■ Sending a data or fax call

1. Connect your computer to the phone.
2. After starting the communicate software, make a call and transmit a data or fax.
3. After the data or fax transmission, you can end the call by just ending of the communicate software, pressing or by closing the flip.

■ Receiving a data or fax call

1. Connect your computer to the phone.
2. After starting the communicate software, accept a call and receive a data or fax.
3. After the data or fax reception, you can end the call by just ending of the communicate software, pressing or by closing the flip.

Making a Voice & Fax call

In this mode, you can transmit voice and also fax without voice call release.

Note

- This mode is network feature. If the network doesn't support this mode, you can't use a voice & fax call.

■ Sending voice and fax calls

1. Connect your computer to the phone.
2. Select **Voice and Fax mode. Voice and fax mode** allows you to switch from voice mode to fax mode during call.
3. If **Selected** message is displayed in phone, it is ready for transmission.
4. Key in or recall the desired phone number and press .
5. After the voice transmission, you can start a fax transmission.
6. After the fax transmission, you can end the call by just ending of fax software, pressing or by closing the flip.

■ Receiving voice and fax calls

1. Connect your computer to the phone.
2. After the voice transmission, you can answer the fax call by starting the software program (if it does not answer automatically).

The voice memo features you to record up to 3 voice messages and each one is up to 30 seconds. This is useful when you don't have a pen and paper to hand for taking directions or a messages.

Voice Memo

1. To use this function, press ⊙ [Record Key] for a long time during a call or in a standby mode.
2. Recording is started and display will show the message **Recording** and the recording time.
3. If you want to finish recording, press ⊙ [Record Key] shortly.

Voice Memo Menu

The phone shows voice memo information which includes the recording time and date by pressing ⊙ [Record Key] for a short time. After you selected the memo by using ◁ and ▷ , press ⊂ [Opt], you can see this menu.

■ **Play [Voice Memo Menu 1]**

You can play the selected voice memo in this menu. Also, you can hear your voice memo through speaker on the rear of the phone.

■ **Delete [Voice Memo Menu 2]**

You can delete the selected voice memo.

■ **Delete All [Voice Memo Menu 3]**

Your phone will delete all recorded voice memos.

When using this unit, basic safety precautions as below should be always followed.

- Do not touch the adapter with wet hands.
- Do not disassemble this unit. (Take it to a qualified service technician when repair work is required.)
- Away from electrical appliance such as a TV, radio or personal computer.
- The unit should be situated from heat sources such as radiators or cookers.
- Do not drop.
- Do not subject this unit to mechanical vibration or shock.
- The coating of the phone may be damaged if covered with wrap or vinyl wrapper.
- Use dry cloth to clean the exterior of the unit. (Do not use solvent such as benzene, thinner or alcohol.)
- Do not subject this unit to excessive smoke or dust.

■ Caring for the Battery

- You do not need to completely discharge the battery before recharging. Unlike other battery systems, there is no memory effect that could compromise the battery's performance.
- Use only LG batteries and chargers. LG chargers are designed to maximize the battery life.
- Do not disassemble or short-circuit the battery pack.
- Keep the metal contacts of the battery pack clean.
- Replace the battery when it no longer provides acceptable performance. The battery pack may be recharged hundreds of times until it needs replacing.
- Recharge the battery if it has not been used for a long time to maximize usability.
- Do not expose the battery charger to direct sunlight or use it in high humidity, such as the bathroom.
- Do not leave the battery in hot or cold places, this may deteriorate the battery performance.
