2. FEATURES & TECHNICAL EXPLANATION

2-1.FEATURES

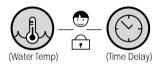

Jumbo drum

Jumbo drum can wash about 40% more per load than conventional washing machine. A bigger drum improves the wash performance.

More economical by Fuzzy Logic System

FUZZY Logic System detects the amount of load and water temperature, and then determines the optimum water level and washing time to minimize energy and water consumption.

Child-Lock

The Child-Lock system has been developed to prevent children from pressing any button to change the programme during operation.

Low noise speed control system

By sensing the amount of load and balance, automatical distributes load evenly to minimize the spinning noise level.

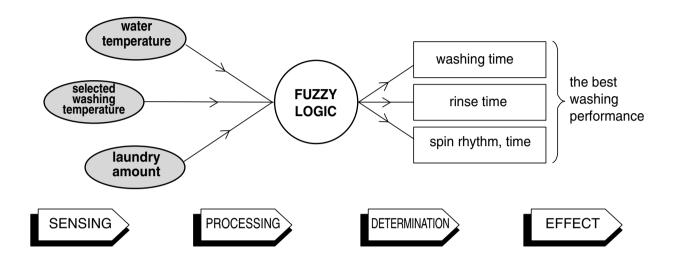

Auto Restart

Although the washing machine is turned off by a power failure, it restarts automatically where it stopped process when power is supplied again. It will be the same when the machine is unplugged and is plugged in again.

2-2.DETERMINE WASHING TIME BY FUZZY LOGIC

To get the best washing performance optimal time is determined by sensing of water temperature, selected washing temperature and laundry amount.

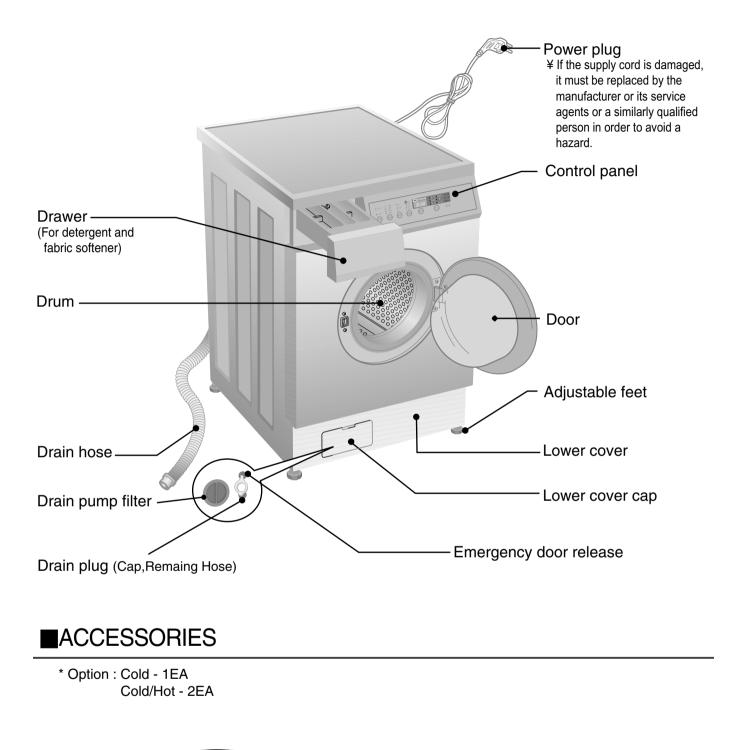

2-3.WATER LEVEL CONTROL

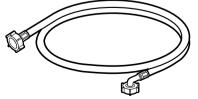

- This model adopts a pressure sensor which can sense the water level in the tub.
- When the water level reaches to the preset level the water supply is stopped, then the washing program proceeds.
- Spinning does not proceed until the water in the tub reduces a certain level.

2-4.THE DOOR CAN NOT BE OPENED

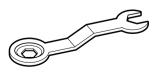

- While program is operating.
- While Door Lock light turns on.

4. INSTALLATION

- 1 Before servicing ask the customer what the trouble is.
- 2 Check the adjustment (power supply is 220-240V, remove the transit bolts....)
- 3 Check the troubles referring to the troubleshooting.
- (4) Decide service steps referring to disassembly instructions.
- 5 Then, service and repair.
- 6 After servicing, operate the appliance to see whether it works O·K or NOT.

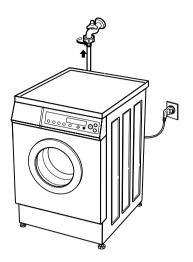

STANDARD INSTALLATION

The appliance should be installed as follows.

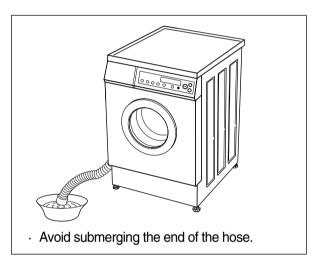

■ HOW TO CONNECT INLET HOSE

- Check that the rubber washer is inside of the valve connector.
- Connect the inlet hose firmly to prevent leak.

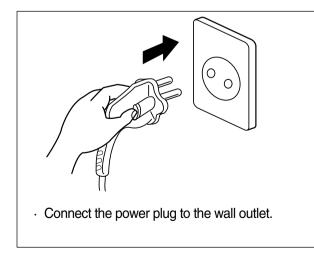

CONNECT DRAIN HOSE

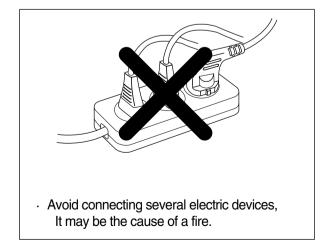

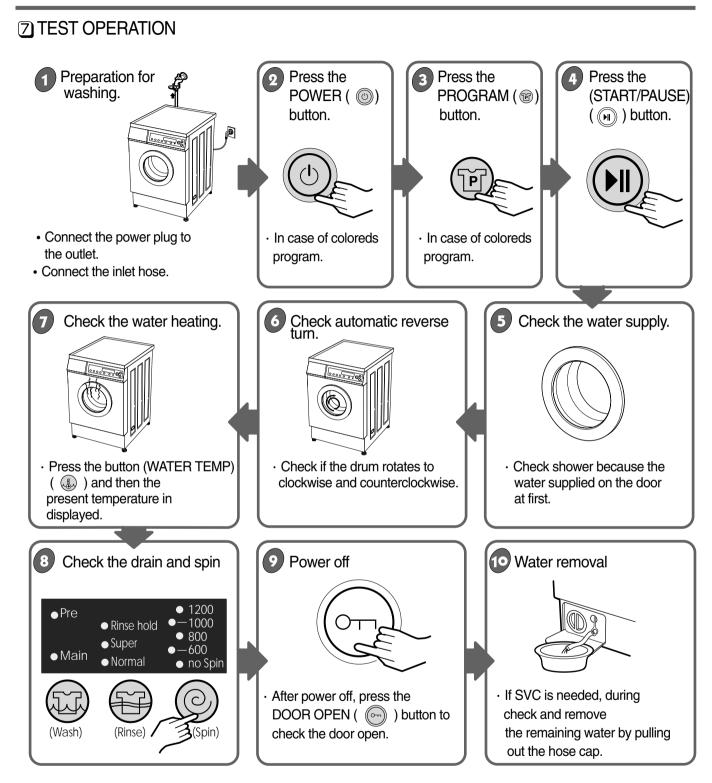

% The drain hose should be placed under 100cm from the floor.

CONNECT POWER PLUG

• Troubleshooting refer to (8-4.ERROR DISPLAY)

Assemble and disassemble refer to (10.Disassembly Instructions)
