Portable Radio
# Quick Reference Card

Product Safety and RF Exposure Compliance

> **Caution** ⚠ Before using this product, read the operating instructions for safe usage contained in the Product Safety and RF Exposure booklet enclosed with your radio.

ATTENTION!

This radio is restricted to occupational use only to satisfy FCC RF energy exposure requirements. Before using this product, read the RF energy awareness information and operating instructions in the Product Safety and RF Exposure booklet enclosed with your radio (Motorola Publication part number 6881095C98) to ensure compliance with RF energy exposure limits.

- 3-Position Rotary Switch
- Channel Select Knob
- On/Off/ Volume Knob
- Top Button
- Top Side Button
- Speaker/Mic
- PTT Button
- Side Button 1
- Side Button 2

Write your radio's programmed features on the dashed lines.

Radio On/Off

1	On - On/Off/Volume knob clockwise.
2	Off - On/Off/Volume knob counterclockwise.

Zones/Channels

1	Zone - Move **Zone** switch to desired zone.
2	Channel - Turn **Channel Selector** knob to desired channel.

Receive/Transmit

1	Radio on and select zone/channel.
2	Listen for a transmission. **OR** Press and hold **Volume Set** button. Release **Volume Set** button. **OR** Press **Monitor** button and listen for activity.
3	Adjust volume, if necessary.
4	Press and hold **PTT** to transmit; release to listen.

Send Emergency Alarm

1	Radio on and press **Emergency** button. You see red LED; you hear short, medium-pitched tone.
2	When dispatcher's acknowledgment is received, you hear four tones; alarm ends; radio exits emergency.

Send Silent Emergency Alarm

1	Radio on and press **Emergency** button. You see no LED; you hear no tone.
2	Press **PTT**.
3	Alarm continues until you exit by: • Press and hold **Emergency** button for one second **OR** • Press and release **PTT**.

Send Emergency Call

1	Radio on and press **Emergency** button. A short, medium-pitched tone sounds.
2	Press and hold **PTT**. Announce your emergency into the microphone.
3	Release **PTT** to end call.
4	Press and hold **Emergency** button for one second to exit.

Computer Software Copyrights

The Motorola products described in this manual may include copyrighted Motorola computer programs stored in semiconductor memories or other media. Laws in the United States and other countries preserve for Motorola certain exclusive rights for copyrighted computer programs, including, but not limited to, the exclusive right to copy or reproduce in any form the copyrighted computer program. Accordingly, any copyrighted Motorola computer programs contained in the Motorola products described in this manual may not be copied, reproduced, modified, reverse-engineered, or distributed in any manner without the express written permission of Motorola. Furthermore, the purchase of Motorola products shall not be deemed to grant either directly or by implication, estoppel, or otherwise, any license under the copyrights, patents or patent applications of Motorola, except for the normal non-exclusive license to use that arises by operation of law in the sale of a product.

Documentation Copyrights

No duplication or distribution of this document or any portion thereof shall take place without the express written permission of Motorola. No part of this manual may be reproduced, distributed, or transmitted in any form or by any means, electronic or mechanical, for any purpose without the express written permission of Motorola.

Disclaimer

The information in this document is carefully examined, and is believed to be entirely reliable. However, no responsibility is assumed for inaccuracies. Furthermore, Motorola reserves the right to make changes to any products herein to improve readability, function, or design. Motorola does not assume any liability arising out of the applications or use of any product or circuit described herein; nor does it cover any license under its patent rights, nor the rights of others.

Notes

General Radio Operation

Notations Used in This Manual

You will notice the use of **WARNINGS**, **CAUTIONS**, and **Notes** throughout this manual. These notations are used to emphasize that safety hazards exist and that care must be taken or observed.

WARNING

An operational procedure, practice, condition, etc. exists which may result in injury or death if not carefully observed.

Caution

An operational procedure, practice, condition, etc. exists which may result in damage to the equipment if not carefully observed.

Note: An operational procedure, practice, or condition, etc. which is essential to emphasize.

The following special notations identify certain items:

Example	Description
Top button	Buttons are shown in **bold** print.

PR1500 Radio
Physical Features of the PR1500 Radio

Item	Page	Item	Page
1 Antenna	10	**8** **On/Off/Volume Control** Knob	14
2 **Top** Button (programmable)		**9** Microphone	
3 Light Emitting Diode (LED)	5	**10** **Top Side** (**Select**) Button (programmable)	
4 Speaker		**11** **Push-to-Talk** (**PTT**) Button	
5 Universal Connector	12	**12** **Side Button 1** (programmable)	
6 **Channel Selector** Knob (programmable)		**13** **Side Button 2** (programmable)	
7 **3-Position Concentric** Switch (programmable)		**14** Battery	8

Programmable Features

The programmable controls on your radio can be programmed by a qualified technician to operate certain software-activated features. The features that can be assigned to these controls, and the page numbers where these features can be found, are listed below.

Table 1: Programmable Features

Feature	*Page*	*Feature*	*Page*
Call Response	29	PL Defeat	21
Channel Selection	15	Repeater/Direct	29
Emergency	23	Scan On/Off	28
Monitor	18	Site Lock/Unlock	viii
Mute	29	Site Search	viii
Nuisance Delete	28	Volume Set	17
Phone	28	Zone Selection	15

As an additional guide, please use the empty spaces provided in your Quick Reference Card to indicate the features that are programmed to the various controls for your radio. Additionally, in this manual, all reference to a programmed control is made with reference to the actual feature (for example the Volume Set button).

Any references in this manual to controls that are "preprogrammed" means that a qualified radio technician must use the radio's programming software to assign a feature to a control.

Light Emitting Diode (LED) Indicators

Table 2: LED Indicators

This LED Color:	indicates:
RED (Non-flashing)	Transmitting
RED (Flashing)	• Channel Busy OR • Low Battery (lights while transmitting)
GREEN (Flashing)	Receiving Individual Call

Alert Tones

Your radio uses alert tones to inform you of radio conditions.

Table 3: Alert Tones

You hear:	Tone Name	Heard:
Short, Low-Pitched Tone	Invalid Key-Press	when the wrong key is pressed.
	Radio Self-Test Failed	when the radio fails the power-up self test.
	Reject	when an unauthorized request is made.
	Time-Out Timer Warning	four seconds before time out.

Table 3: Alert Tones (Continued)

You hear:	*Tone Name*	*Heard:*
Long, Low-Pitched Tone	No ACK Received	when the radio does not receive an acknowledgment.
	Time-Out Timer Timed Out	after time out.
	Talk Prohibit/ PTT Inhibit	when the PTT button is pressed, and transmissions are prevented.
	Invalid Mode	when the radio is set to an unprogrammed channel.
	Individual Call Warning Tone	when the radio is in Individual Call without any activity for more than 6 seconds.
A Group of Low-Pitched Tones (Busy Tone)	Busy	when the system is busy.
Short, Medium-Pitched Tone	Valid Key-Press	when the correct key is pressed.
	Radio Self-Test Pass	when the radio passes its power-up self-test.
	Priority Channel Received	when activity on a priority channel is received.
	Emergency Alarm Entry	when entering the emergency state.
	Central Echo	when the central controller has received a request from a radio.

Table 3: Alert Tones (Continued)

You hear:	*Tone Name*	*Heard:*
Long, Medium-Pitched Tone	Volume Set	when volume changed on a quiet channel.
	Emergency Exit	upon exiting the emergency state.
A Group of Medium-Pitched Tones	Talk Permit	(When pressing the PTT button) verifies the system is accepting transmissions.
	Console Acknowledge	when a status, emergency alarm, or reprogram request acknowledgment is received.
	Received Individual Call	when a Call Alert, or Private Conversation Call is received.
Short, High-Pitched Tone (Chirp)	Low-Battery Chirp	when the battery is below the preset threshold value.
Ringing	Phone Call Received	when a landline phone call is received.

Standard Accessories

Battery

>
>
> **WARNING**
>
> **To avoid a possible explosion:**
> - **DO NOT replace the battery in any area labeled "hazardous atmosphere".**
> - **DO NOT discard batteries in a fire.**

Charge the Battery

The Motorola approved battery shipped with your radio is uncharged. Prior to using a new battery, charge it for a minimum of 16 hours to ensure optimum capacity and performance.

For a list of Motorola approved batteries available for use with your PR1500 radio, see "Batteries" on page 37.

Note: When charging a battery attached to a radio, turn the radio off to ensure a full charge.

Battery Charger

To charge the battery, place the battery, with or without radio, in a Motorola-approved charger. The charger's LED indicates the charging progress; see your charger's user guide. For a list of chargers, see "Chargers" on page 39.

Attach the Battery

1   With the radio off, fit the
    three extensions at the
    bottom of the battery into the
    bottom slots on the radio.
2   Press both sides at the top of
    the battery against the radio
    until both latches click into
    place.
Remove the Battery

1   With the radio off, slide down
    the latches on the sides of
    the battery.
2   Pull the top of the battery
    away from the radio.
Antenna

For information regarding other available antennas, see page 37.

Attach the Antenna

With the radio off, turn the antenna clockwise to attach it.

Remove the Antenna

With the radio off, turn the antenna counter-clockwise to remove it.

Belt Clip

Attach the Belt Clip

1   Align the grooves of the belt
clip with those of the battery.
2   Press the belt clip downward
until you clear a "click."

Remove the Belt Clip

1   Use a flat-bladed screwdriver
to press the belt clip tab
away from the battery.
2   Slide the belt clip upward to
remove it.

Universal Connector Cover

The universal connector cover is located on the antenna side of the radio. It is used to connect certain accessories to the radio.

Note: To prevent damage to the connector, shield it with the connector cover when not in use.

Remove the Connector Cover

1 Insert a flat-bladed screwdriver into the area between the bottom of the cover and the slot below the connector.

2 Hold the top of the cover with your thumb while you pry the bottom of the cover away from the radio with the screwdriver.
Attach the Connector Cover

1 Insert the hooked end of the cover into the top of the connector. Press downward on the cover's top to seat it into the slot.

2 Press the cover's lower tab below the connector until it snaps in place.

Rainure supérieure

Extrémité à crochet

Tab tte

Rainure inférieure
Remote Speaker Microphone Adapter

The Remote Speaker Microphone (RSM) adapter is located on the back of the radio, just above the battery. **It must be used to connect the RSM accessories (see page 39) to the radio.** If the RSM is not used, the adapter should be removed.

Remove the Adapter

Lift the larger side (below the antenna port) of the adapter away from the radio using your finger.

If you cannot easily remove the adapter with your finger, use a small, flat blade screwdriver to pry the larger end side of the adapter away from the radio.
Attach the Adapter

1   With the Motorola side of the adapter facing out, snap the smaller end of the adapter into place in the shroud indent, below the **On/Off Volume Control** Knob.
2   Snap the larger end of the adapter into place in the shroud indent, below the antenna port.
Radio On and Off

Turn the Radio On

Turn the **On/Off/Volume Control** knob clockwise.

- If the radio turns on successfully, you hear a medium-pitched tone.

- If the radio detects any errors, you hear a low-pitched tone. Turn off the radio, check the battery, and turn the radio on.
Turn the Radio Off

Turn the **On/Off/Volume Control** knob counterclockwise until it clicks.
Zones and Channels

A zone is a grouping of channels. A channel is a group of radio characteristics, such as transmit/receive frequency pairs.

Before you use your radio to receive or send messages, you should select the zone.

Select a Zone

1	If a control on your radio has been preprogrammed as the **Zone** switch, move the **Zone** switch to the position for the zone you want.	
2	If the zone you selected is unprogrammed, you hear a long, medium-pitched tone until you select a programmed zone.	• Long, medium-pitched tone

Select a Channel

1	After you selected the zone you want, turn the preprogrammed **Channel Selector** knob to the desired channel.	
2	If the channel you selected is unprogrammed, you hear a long, medium-pitched tone until you select a programmed channel.	• Long, medium-pitched tone
Receive / Transmit

This section emphasizes the importance of knowing how to monitor a channel for traffic before keying-up to send a transmission.

Without Using the Volume Set and Monitor Buttons

1 Turn the radio on and select the desired zone and channel.

2 Listen for a transmission.

3 Adjust the **Volume Control** knob if necessary.
4 Press and hold the **PTT** button to transmit. The LED lights RED while transmitting.

5 Release the **PTT** button to receive (listen).

Use the Preprogrammed Volume Set Button

1   Turn the radio on and select the desired zone and channel. See **Turn the Radio On**, page 14 and **Zones and Channels**, page 15.

2   Press and hold the **Volume Set** button to hear the volume set tone.

3   Release the **Volume Set** button.

4   Adjust the **Volume Control** Knob if necessary.
5   Press and hold the **PTT** button to transmit. LED lights RED while transmitting.

6   Release the **PTT** button to receive (listen).

Use the Preprogrammed Monitor Button

1   Turn the radio on and select the desired zone and channel.

2   Press the Monitor button and listen for activity. (See the following **Conventional Mode Operation**.)

3   Adjust the **Volume Control** knob if necessary.
4   Press and hold the **PTT** button to transmit. The LED lights RED while transmitting.

5   Release the **PTT** button to receive (listen).

Conventional Mode Operation

Your radio may be programmed to receive Private-Line® (PL) calls.

1 Momentarily press the
       Monitor button to listen for
       activity.

2 Press and hold the **Monitor**
       button to set continuous
       monitor operation. (The
       duration of the button press
       is programmable.)

3 Press the **Monitor** button
       again, or the **PTT** button, to
       return to the original squelch
       setting.

Note: If you try to transmit on a
           receive-only channel,
           you will hear an invalid
           tone until you release the
           PTT button.

Notes

Common Radio Features

Conventional Squelch Options

Analog Squelch

Tone Private Line (PL) and carrier squelch can be available (preprogrammed) per channel.

When in...	this condition occurs:
Carrier squelch	You hear all traffic on a channel.
PL	The radio responds only to your messages.

PL Defeat

With this feature, you can override any coded squelch (PL or network ID) that might be programmed to a channel.

Place the preprogrammed **PL Defeat** switch in the **PL Defeat** position. You can now hear any activity on the channel. The radio is muted if no activity is present.

Time-out Timer

The time-out timer turns off your radio's transmitter. The timer is set for 60 seconds at the factory, but it can be programmed from 0 to 7.75 minutes (465 seconds) by a qualified radio technician.

1	Hold down the **PTT** longer than the programmed time. You will hear a short, low-pitched warning tone, the transmission is cut-off, and the LED will go out until you release the **PTT**.	• Short warning tone • Transmission is cut-off • LED goes out
2	Release the **PTT** button.	• LED re-lights • Timer resets
3	Press the **PTT** to re-transmit. Time-out timer restarts.	• Timer restarts • RED LED

Emergency

If the top (orange) button is programmed to send an emergency signal, then this signal overrides any other communication over the selected channel.

Your radio can be programmed for the following:

- Emergency Alarm
- Emergency Alarm with Emergency Call
- Silent Emergency Alarm
- Emergency Call

Consult a qualified radio technician for emergency programming of your radio.

Send an Emergency Alarm

An Emergency Alarm will send a data transmission to the dispatcher, identifying the radio sending the emergency.

1	With your radio turned on, press the **Emergency** button. The red LED lights, and you hear a short, medium-pitched tone.	• Red LED • Short tone

Note: To exit emergency at any time, press and hold the **Emergency** button for about a second.

2	When you receive the dispatcher's acknowledgment, you hear four tones, the alarm ends, and the radio exits the emergency mode.	• Four tones • Alarm ends • Radio exits emergency
	If no acknowledgement is received, the alarm ends after the number of retries is performed, and the radio exits the emergency mode.	• Alarm ends • Radio exits emergency

Note: **For Emergency Alarm with Emergency Call:** The radio enters the Emergency Call state either after it receives the dispatcher's acknowledgment, or if you press the **PTT** button while in Emergency Alarm. Go to step 2 of "Send an Emergency Call" on page 25.

Send a Silent Emergency Alarm

1	With your radio turned on, press the **Emergency** button. The LED does not light, and you hear no tones.	• LED does not light • No tones
Note:	To exit emergency at any time, press and hold the **Emergency** button for about a second.	

2	The silent emergency state continues until you:	
	Press and hold the **Emergency** button for about a second to exit the emergency state.	• Press and hold **Emergency** button
	OR	**OR**
	Press and release the **PTT** button to exit silent emergency and enter regular dispatch or emergency call.	• Press and release the **PTT** button

Send an Emergency Call

An Emergency Call will send a type of dispatch giving your radio priority access to channels.

1	With your radio turned on, press the **Emergency** button. A short, medium-pitched tone sounds.	• Short tone
Note:	To exit emergency at any time, press and hold the **Emergency** button.	

2	Press and hold the **PTT** button and announce your emergency into the microphone.

3	Release the **PTT** button to end the transmission and wait for a response from the dispatcher.
4	Press and hold the **Emergency** button for about a second to exit emergency.

The radio operates in the normal dispatch manner while in Emergency Call, except, if enabled, it will return to one of the following:

Using this operation:	*means you will talk...*
1. Tactical/Non-Revert	on the channel you selected before you entered the emergency state.
2. Non-Tactical/Revert	on a preprogrammed emergency channel. The emergency alarm is sent to this same channel.

Note: For ALL Emergency signals:

- You can change channels while in Emergency operation if the new channel is also programmed for Emergency. The emergency alarm or call continues on the new channel.

- If the new channel is NOT programmed for Emergency, an invalid tone sounds until you exit the Emergency state or change to a channel programmed for emergency.

Emergency Keep-Alive

With Emergency Keep-Alive enabled, if the radio is in the Emergency state, you cannot turn off the radio by using the **On/Off Volume Control** knob.

With Keep-Alive, the radio will only exit the Emergency state using one of the ways mentioned in the previous sections (Emergency Alarm, Silent Emergency Alarm, or Emergency Call).

Scan

The scan feature allows you to monitor traffic on different channels by scanning a preprogrammed list of channels. The list must be preprogrammed by a qualified technician.

Turn Scan On and Off

Use the Preprogrammed Scan On/Off Switch

Place the **Scan On/Off** Switch or Button in the "scan on" or "scan off" position.

Delete a Nuisance Channel

When the radio scans to a channel that you do not wish to hear (nuisance channel), you can temporarily delete the channel from the scan list.

1 When the radio is locked onto the channel to be deleted, press the preprogrammed **Nuisance Delete** button.

Repeat this step to delete more channels.

Note: You cannot delete priority channels or the designated transmit channel.

2 The radio continues scanning the remaining channels in the list. To resume scanning the deleted channel, change channels or turn scan off and then back on again.

Repeater or Direct Operation

Also known as TALKAROUND operation, DIRECT lets you bypass the repeater and connect directly to another radio. The transmit and receive frequencies are the same.

REPEATER operation increases the radio's range by connecting with other radios through a repeater. Transmit and receive frequencies are different.

Select Repeater or Direct Operation

Place the preprogrammed **Repeater/Direct** switch in Repeater or Direct position.

Mute

Mute is a programmable option available on one of the radio's switches.

Notes

Helpful Tips

Radio Care

Cleaning

To clean the external surfaces of your radio:

1 Combine one teaspoon of mild dishwashing detergent to one gallon of water (0.5% solution).

2 Apply the solution sparingly with a stiff, non-metallic, short-bristled brush, making sure excess detergent does not get entrapped near the connectors, controls or crevices. Dry the radio thoroughly with a soft, lint-free cloth.

3 Clean battery contacts with a lint-free cloth to remove dirt or grease.

⚠️	**Do not use solvents to clean your radio. Spirits may permanently damage the radio housing.**
C a u t i o n	**Do not submerge the radio in the detergent solution.**

Handling

• Do not pound, drop, or throw the radio. Never carry the radio by the antenna.

• Avoid subjecting the radio to an excess of liquids.

• Avoid subjecting the radio to corrosives, solvents or spirits.

• Do not disassemble the radio.

• Keep the accessory-connector cover in place until ready to use the connector. Replace the cover immediately once the accessory has been disconnected.

Service

Proper repair and maintenance procedures will assure efficient operation and long life for this product. A Motorola maintenance agreement will provide expert service to keep this and all other communication equipment in perfect operating condition. A nationwide service organization is provided by Motorola to support maintenance services. Through its maintenance and installation program, Motorola makes available the finest service to those desiring reliable, continuous communications on a contract basis. For a contract service agreement, please contact your nearest Motorola service or sales representative, or an authorized Motorola dealer.

Express Service Plus (ESP) is an optional extended service coverage plan, which provides for the repair of this product for a period of three years from the date of shipment from the factory, or the date of delivery if purchased from an authorized Motorola two-way radio dealer. For more information about ESP, contact the Motorola Radio Support Center, 2204 Galvin Drive, Elgin, IL 60123, 1-800-227-6772.

Battery

Battery Life

Battery life is determined by several factors. Among the more critical are the regular overcharge of batteries and the average depth of discharge with each cycle. Typically, the greater the overcharge and the deeper the average discharge, the fewer cycles a battery will last. For example, a battery which is overcharged and discharges 100% several times a day, will last fewer cycles than a battery that receives less of an overcharge and is discharged to 50% per day. Further, a battery which receives minimal overcharging and averages only 25% discharge, will last even longer.

Charging the Battery

Motorola batteries are designed specifically to be used with a Motorola charger and vice-versa. Charging in non-Motorola equipment may lead to battery damage and void the battery warranty. Motorola-authorized battery chargers may not charge batteries other than the ones listed on page 37.

The battery should be at about 77°F (25°C) (room temperature), whenever possible. Charging a cold battery (below 50° F [10°C]) may result in leakage of electrolyte and ultimately in failure of the battery. Charging a hot battery (above 95°F [35°C]) results in reduced discharge capacity, affecting the performance of the radio. Motorola rapid-rate battery chargers contain a temperature-sensing circuit to ensure that batteries are charged within the temperature limits stated above.

Battery Charge Status

Your radio can indicate your battery's charge status by the following:

LED and Sounds

- you see the LED flash red when the PTT Button is pressed indicating low battery
- you hear a low-battery "chirp" (short, high-pitched tone)

Battery Recycling and Disposal

Nickel-cadmium (NiCd) rechargeable batteries can be recycled. However, recycling facilities may not be available in all areas. Under various U.S. state laws and the laws of several other countries, NiCd batteries must be recycled and cannot be disposed of in landfills or incinerators. Contact your local waste management agency for specific requirements and information in your area.

Motorola fully endorses and encourages the recycling of NiCd batteries. In the U.S. and Canada, Motorola participates in the nationwide Rechargeable Battery Recycling Corporation (RBRC) program for NiCd battery collection and recycling. Many retailers and dealers participate in this program.

For the location of the drop-off facility closest to you, access RBRC's Internet web site at www.rbrc.com or call 1-800-8-BATTERY. This internet site and telephone number also provide other useful information concerning recycling options for consumers, businesses, and governmental agencies.

Antenna

Radio Operating Frequencies

Before installing the antenna, make sure it matches your radio's operating frequency. Antennas are frequency sensitive and are color coded according to their frequency range. The color code indicator is located in the center of the antenna's base.
color

The following antenna types are compatible with your radio:

Antenna Type	Approx. Length		Insulator Color Code	Frequency Range (MHz)	Antenna Kit No.
	in.	mm			
VHF whip, wide-band	8	203	RED	136–174	NAD6563
VHF helical	7.6	193	YELLOW	136–150.8	NAD6566
VHF helical	7	178	BLACK	150.8–162	NAD6567
VHF helical	6.5	165	BLUE	162–174	NAD6568
UHF helical	3.3	83	RED	380–435	NAE6546
UHF helical	3.1	78	GREEN	435–470	NAE6547
UHF helical	2.8	71	BLACK	470–520	NAE6548
UHF whip, wideband	5.2	133	GRAY	380–520	NAE6549

Notes

Accessories

Motorola provides the following approved accessories to improve the productivity of your PR1500 portable two-way radio.

For a list of Motorola-approved antennas, batteries, and other accessories, visit the following web site which lists approved accessories: http://www.motorola.com/cgiss/index.shtml

Antennas

NAD6563	VHF whip (136–174 MHz)
NAD6566	VHF (136–150.8 MHz)
NAD6567	VHF (150.8–162 MHz)
NAD6568	VHF (162–174 MHz)
NAE6546_R	UHF (380–435 MHz)
NAE6547_R	UHF (435–470 MHz)
NAE6548_R	UHF (470–520 MHz)
NAE6549_R	UHF whip (380–520 MHz)

Batteries

NTN9815_R	NiCD 1525 mAh 7.5 V
NTN9816_R	NiCD 1525 mAh 7.5 V, Intrinsically Safe
NTN9857_R	NiMH 1800 mAh 7.5 V, Intrinsically Safe
NTN9858_R	NiMH 1800 mAh 7.5 V

Carry Accessories

Carry Cases

NNTN4115	Carry Case, Leather with 3" Swivel Belt Loop and T-Strap
NNTN4116	Carry Case, Leather with 2.5" Swivel Belt Loop and T-Strap
NNTN4117	Carry case, Leather with 3" Belt Loop and T-Strap
NLN6349	Shoulder Strap
NTN5243	Shoulder Strap
TDN9675	Wrist Strap

Belt Clips

Headsets

BDN6635	Heavy-duty VOX headset with boom mic (requires BDN6673 adapter cable)
BDN6636	Heavy-duty VOX headset with throat mic (requires BDN6673 adapter cable)
BDN6645	Heavy-duty push-to-talk headset with boom mic (requires BDN6673 adapter cable)
NMN1020	Light-weight headset with boom mic to be worn on a helmet or safety glasses (requires BDN6676 adapter)
NMN6245	Single-muff lightweight headset with boom mic and in-line PTT (requires BDN6676 adapter)

NMN6246	Ultra-light headset with boom mic and in-line PTT; ear bud style receiver (requires BDN6676 adapter)
NMN6258	Medium-weight headset, over-the-head with in-line PTT
NMN6259	Medium-weight headset, behind-the-head with in-line PTT
RMN4049	Temple Transducer

CommPort™ Integrated Microphone Receiver System

NTN1624	CommPort with palm PTT (includes BDN6676 adapter)
NTN1625	CommPort with PTT on radio adapter (includes BDN6676 adapter)
NTN1663	CommPort with ring PTT (includes BDN6676 adapter)
NTN1736	CommPort with snap-on side PTT (includes BDN6676 adapter)

Surveillance Kits

BDN6664	Receive only earpiece with standard earphone earloop (1-wire), beige
BDN6665	Receive only earpiece with standard earphone earloop (1-wire),exceeds OSHA limits, beige
BDN6666	Receive only earpiece with volume control (1-wire), beige
BDN6667	Earpiece with mic and PTT combined (2-wire), beige
BDN6668	Earpiece with mic and PTT separate (3-wire), beige
BDN6669	Earpiece with mic and PTT combined (2-wire), exceeds OSHA limits, beige

BDN6670	Earpiece with mic and PTT separate (3-wire), exceeds OSHA limits, beige
BDN6719	Earpad, with 3.5mm threaded plug
BDN6726	Receive only earpiece with standard earphone earloop (1-wire), black
BDN6727	Receive only earpiece with standard earphone earloop (1-wire),exceeds OSHA limits, black
BDN6728	Receive only earpiece with volume control (1-wire), black
BDN6729	Earpiece with mic and PTT combined (2-wire), black
BDN6730	Earpiece with mic and PTT separate (3-wire), black
BDN6731	Earpiece with mic and PTT combined (2-wire), exceeds OSHA limits, black
BDN6732	Earpiece with mic and PTT separate (3-wire), exceeds OSHA limits, black

Earpieces

BDN6780	Single earbud with mic and PTT (requires BDN6676 adapter)
BDN6781	Receive only earbud (requires BDN6676 adapter)
BDN6719	Flexible ear receiver

Ear Microphone System (EMS)

BDN6677	Ear mic, standard, noise up to 95 dB (must order BDN6671 interface module), black
BDN6678	Ear mic, standard, noise up to 95 dB (must order BDN6671 interface module), beige
BDN6641	Ear mic, high noise level up to 105 dB, grey (must order BDN6671 interface module)
0180358B38	Push-to-Talk Ring Switch
0180300E83	Push-to-Talk Body Switch
0180300E25	Earguard with Adjustable Loop

Radio Interface Modules for Ear Microphones

BDN6671	Push-to-talk (PTT) and voice-activated (VOX) interface module (for use with BDN6641, BDN6677 and BDN6678)
BDN6708	PTT interface module (for use with BDN6641, BDN6677 and BDN6678)

Switches

NTN7660	Tilt / man down switch

Adapters

BDN6673	Headset adapter cable
BDN6676	3.5mm jack adapter with quick disconnect latch
NTN8613	Surveillance accessory adapter

Appendix: Maritime Radio Use in the VHF Frequency Range

Special Channel Assignments

Emergency Channel

If you are in imminent and grave danger at sea and require emergency assistance, use **VHF Channel 16** to send a distress call to nearby vessels and the United States Coast Guard. Transmit the following information, in this order:

1   "MAYDAY, MAYDAY, MAYDAY."

2   "THIS IS _____, CALL SIGN _____."

   *State the name of the vessel in distress **3 times**, followed by the call sign or other identification of the vessel, stated **3 times**.*

3   Repeat "MAYDAY" and the name of the vessel.

4   "WE ARE LOCATED AT _____."

   State the position of the vessel in distress, using any information that will help responders to locate you, e.g.:

   • *latitude and longitude*
   • *bearing (state whether you are using true or magnetic north)*
   • *distance to a well-known landmark*
   • *vessel course, speed or destination*

5   State the nature of the distress.

6   Specify what kind of assistance you need.

7   State the number of persons on board and the number needing medical attention, if any.

8   Mention any other information that would be helpful to responders, such as type of vessel, vessel length and/or tonnage, hull color, etc.

9   "OVER."

10   Wait for a response.

11   If you do not receive an immediate response, remain by the radio and repeat the transmission at intervals until you receive a response. Be prepared to follow any instructions given to you.

Non-Commercial Call Channel

For non-commercial transmissions, such as fishing reports, rendezvous arrangements, repair scheduling, or berthing information, use **VHF Channel 9**.

Operating Frequency Requirements

A radio designated for shipboard use must comply with Federal Communications Commission Rule Part 80 as follows:

- on ships subject to Part II of Title III of the Communications Act, the radio must be capable of operating on the 156.800 MHz frequency
- on ships subject to the Safety Convention, the radio must be capable of operating:
  - in the simplex mode on the ship station transmitting frequencies specified in the 156.025–157.425 MHz frequency band, and
  - in the semiduplex mode on the two frequency channels specified in the table below.

Note: Simplex channels 3, 21, 23, 61, 64, 81, 82, and 83 **cannot be lawfully used** by the general public in US waters.

Additional information about operating requirements in the Maritime Services can be obtained from the full text of FCC Rule Part 80 and from the US Coast Guard.

Table A-1: VHF Marine Channel List

Channel Number	Frequency (MHz)	
	Transmit	**Receive**
1	156.050	160.650
2	156.100	160.700
*	156.150	160.750
4	156.200	160.800
5	156.250	160.850
6	156.300	–
7	156.350	160.950

Table A-1: VHF Marine Channel List (Continued)

Channel Number	Frequency (MHz)	
	Transmit	**Receive**
8	156.400	–
9	156.450	156.450
10	156.500	156.500
11	156.550	156.550
12	156.600	156.600
13**	156.650	156.650
14	156.700	156.700
15**	156.750	156.750
16	156.800	156.800
17**	156.850	156.850
18	156.900	161.500
19	156.950	161.550
20	157.000	161.600
*	157.050	161.650
22	157.100	161.700
*	157.150	161.750
24	157.200	161.800
25	157.250	161.850
26	157.300	161.900
27	157.350	161.950
28	157.400	162.000
60	156.025	160.625
*	156.075	160.675
62	156.125	160.725
63	156.175	160.775
*	156.225	160.825
65	156.275	160.875
66	156.325	160.925

75	***	***
76	***	***
77**	156.875	–
78	156.925	161.525
79	156.975	161.575
80	157.025	161.625
*	157.075	161.675
*	157.125	161.725
*	157.175	161.775
84	157.225	161.825
85	157.275	161.875
86	157.325	161.925
87	157.375	161.975
88	157.425	162.025

*   *Simplex channels 3, 21, 23, 61, 64, 81, 82, and 83 **cannot be lawfully used** by the general public in US waters.*

**   *Low power (1 W) only*

*** *Guard band*

Note: *A – in the Receive column indicates that the channel is transmit only.*

Glossary

This is a list of specialized terms used in this manual.

ACK	Acknowledgment of communication.
Active Channel	A channel that has traffic on it.
Analog Signal	An RF signal that has a continuous nature rather than a pulsed or discrete nature.
Carrier Squelch	Feature that responds to the presence of an RF carrier by opening or unmuting (turning on) a receiver's audio circuit. A squelch circuit silences the radio when no signal is being received so that the user does not have to listen to noise.
Central Controller	A software controlled, computer-driven device that receives and generates data for the trunked radios assigned to it. It monitors and directs the operations of the trunked repeaters.
Channel	A group of characteristics such as transmit/receive frequency pairs, radio parameters, and encryption encoding.
Control Channel	In a trunking system, one of the channels that is used to provide a continuous, two-way/data communications path between the central controller and all radios on the system.
Conventional	Typically refers to radio-to-radio communications, sometimes through a repeater.
Digital Signal	An RF signal that has a pulsed, or discrete nature, rather than a continuous nature.
Dispatcher	An individual who has radio system management duties.

Dynamic Regrouping	A feature that allows the dispatcher to temporarily reassign selected radios to a single special channel so they can communicate with each other.
FCC	Federal Communications Commission.
Hang Up	Disconnect.
LED	Light-emitting diode.
Monitor	Check channel activity by pressing the Monitor button. If the channel is clear, you will hear static. If the channel is in use, you will hear conversation. It also serves as a way to check the volume level of the radio, as the radio will "open the squelch" when pressing the monitor button.
NiCd	Nickel Cadmium.
NiMH	Nickel Metal Hydride.
Non-tactical/Revert	The user will talk on a preprogrammed emergency channel. The emergency alarm is sent on this same channel.
Page	A one-way alert, with audio messages.
Personality	A set of unique features specific to a radio.
Preprogrammed	A feature that has been assigned in advance by a qualified technician.
Private Line (PL)	A sub-audible tone that is transmitted such that only receivers decoding this tone will hear the message.
Programmable	A radio control that can have a radio feature assigned to it.
PTT	Push-To-Talk — the **PTT** button engages the transmitter and puts the radio in transmit (send) operation when pressed.

Radio Frequency (RF)	The part of the general frequency spectrum between the audio and infrared light regions (about 10 kHz to 10,000,000 MHz).
Repeater	A conventional radio feature, where you talk through a receive/transmit facility (repeater), that re-transmits received signals in order to improve communications range and coverage.
Squelch	Special electronic circuitry added to the receiver of a radio which reduces, or squelches, unwanted signals before they are heard in the speaker.
Standby	An operating condition whereby the radio's speaker is muted but still continues to receive data.
Tactical/Non-revert	The user will talk on the channel that was selected before the radio entered the emergency state.
Talkaround	Bypass a repeater and talk directly to another unit for easy local unit-to-unit communications.
Talkgroup	An organization of radio users who communicate with each other.
Zone	A grouping of channels.

Notes

Commercial Warranty

Limited Warranty

MOTOROLA COMMUNICATION PRODUCTS

I. WHAT THIS WARRANTY COVERS AND FOR HOW LONG:

MOTOROLA INC. ("MOTOROLA") warrants the MOTOROLA manufactured Communication Products listed below ("Product") against defects in material and workmanship under normal use and service for a period of time from the date of purchase as scheduled below:

PR1500 Portable Units	Two (2) Years
Product Accessories	One (1) Year

Motorola, at its option, will at no charge either repair the Product (with new or reconditioned parts), replace it (with a new or reconditioned Product), or refund the purchase price of the Product during the warranty period provided it is returned in accordance with the terms of this warranty. Replaced parts or boards are warranted for the balance of the original applicable warranty period. All replaced parts of Product shall become the property of MOTOROLA.

This express limited warranty is extended by MOTOROLA to the original end user purchaser only and is not assignable or transferable to any other party. This is the complete warranty for the Product manufactured by MOTOROLA. MOTOROLA assumes no obligations or liability for additions or modifications to this warranty unless made in writing and signed by an officer of MOTOROLA. Unless made in a separate agreement between MOTOROLA and the original end user purchaser, MOTOROLA does not warrant the installation, maintenance or service of the Product.

MOTOROLA cannot be responsible in any way for any ancillary equipment not furnished by MOTOROLA which is attached to or used in connection with the Product, or for operation of the Product with any ancillary equipment, and all such equipment is expressly excluded from this warranty. Because each system which may use

the Product is unique, MOTOROLA disclaims liability for range, coverage, or operation of the system as a whole under this warranty.

II. GENERAL PROVISIONS:

This warranty sets forth the full extent of MOTOROLA'S responsibilities regarding the Product. Repair, replacement or refund of the purchase price, at MOTOROLA's option, is the exclusive remedy. THIS WARRANTY IS GIVEN IN LIEU OF ALL OTHER EXPRESS WARRANTIES. IMPLIED WARRANTIES, INCLUDING WITHOUT LIMITATION, IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE LIMITED TO THE DURATION OF THIS LIMITED WARRANTY. IN NO EVENT SHALL MOTOROLA BE LIABLE FOR DAMAGES IN EXCESS OF THE PURCHASE PRICE OF THE PRODUCT, FOR ANY LOSS OF USE, LOSS OF TIME, INCONVENIENCE, COMMERCIAL LOSS, LOST PROFITS OR SAVINGS OR OTHER INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF THE USE OR INABILITY TO USE SUCH PRODUCT, TO THE FULL EXTENT SUCH MAY BE DISCLAIMED BY LAW.

III. STATE LAW RIGHTS:

SOME STATES DO NOT ALLOW THE EXCLUSION OR LIMITATION OF INCIDENTAL OR CONSEQUENTIAL DAMAGES OR LIMITATION ON HOW LONG AN IMPLIED WARRANTY LASTS, SO THE ABOVE LIMITATION OR EXCLUSIONS MAY NOT APPLY.

This warranty gives specific legal rights, and there may be other rights which may vary from state to state.

IV. HOW TO GET WARRANTY SERVICE:

You must provide proof of purchase (bearing the date of purchase and Product item serial number) in order to receive warranty service and, also, deliver or send the Product item, transportation and insurance prepaid, to an authorized warranty service location. Warranty service will be provided by Motorola through one of its authorized warranty service locations. If you first contact the company

which sold you the Product, it can facilitate your obtaining warranty service. You can also call Motorola at 1-888-567-7347 US/Canada.

V. WHAT THIS WARRANTY DOES NOT COVER:

A) Defects or damage resulting from use of the Product in other than its normal and customary manner.

B) Defects or damage from misuse, accident, water, or neglect.

C) Defects or damage from improper testing, operation, maintenance, installation, alteration, modification, or adjustment.

D) Breakage or damage to antennas unless caused directly by defects in material workmanship.

E) A Product subjected to unauthorized Product modifications, disassemblies or repairs (including, without limitation, the addition to the Product of non-Motorola supplied equipment) which adversely affect performance of the Product or interfere with Motorola's normal warranty inspection and testing of the Product to verify any warranty claim.

F) Product which has had the serial number removed or made illegible.

G) Rechargeable batteries if:

- any of the seals on the battery enclosure of cells are broken or show evidence of tampering.

- the damage or defect is caused by charging or using the battery in equipment or service other than the Product for which it is specified.

H) Freight costs to the repair depot.

I) A Product which, due to illegal or unauthorized alteration of the software/firmware in the Product, does not function in accordance with MOTOROLA's published specifications or the FCC type acceptance labeling in effect for the Product at

the time the Product was initially distributed from MOTOROLA.

J) Scratches or other cosmetic damage to Product surfaces that does not affect the operation of the Product.

K) Normal and customary wear and tear.

VI. PATENT AND SOFTWARE PROVISIONS:

MOTOROLA will defend, at its own expense, any suit brought against the end user purchaser to the extent that it is based on a claim that the Product or parts infringe a United States patent, and MOTOROLA will pay those costs and damages finally awarded against the end user purchaser in any such suit which are attributable to any such claim, but such defense and payments are conditioned on the following:

A) that MOTOROLA will be notified promptly in writing by such purchaser of any notice of such claim;

B) that MOTOROLA will have sole control of the defense of such suit and all negotiations for its settlement or compromise; and

C) should the Product or parts become, or in MOTOROLA's opinion be likely to become, the subject of a claim of infringement of a United States patent, that such purchaser will permit MOTOROLA, at its option and expense, either to procure for such purchaser the right to continue using the Product or parts or to replace or modify the same so that it becomes non-infringing or to grant such purchaser a credit for the Product or parts as depreciated and accept its return. The depreciation will be an equal amount per year over the lifetime of the Product or parts as established by MOTOROLA.

MOTOROLA will have no liability with respect to any claim of patent infringement which is based upon the combination of the Product or parts furnished hereunder with software, apparatus or devices not furnished by MOTOROLA, nor will MOTOROLA have any liability for

the use of ancillary equipment or software not furnished by MOTOROLA which is attached to or used in connection with the Product. The foregoing states the entire liability of MOTOROLA with respect to infringement of patents by the Product or any parts thereof.

Laws in the United States and other countries preserve for MOTOROLA certain exclusive rights for copyrighted MOTOROLA software such as the exclusive rights to reproduce in copies and distribute copies of such Motorola software. MOTOROLA software may be used in only the Product in which the software was originally embodied and such software in such Product may not be replaced, copied, distributed, modified in any way, or used to produce any derivative thereof. No other use including, without limitation, alteration, modification, reproduction, distribution, or reverse engineering of such MOTOROLA software or exercise of rights in such MOTOROLA software is permitted. No license is granted by implication, estoppel or otherwise under MOTOROLA patent rights or copyrights.

VII. GOVERNING LAW:
This Warranty is governed by the laws of the State of Illinois, USA.
