AUDIOVOX
CDM-4500

Dual Mode CDMA/AMPS
Handheld Portable
Cellular Telephone

In today's fast paced world, it has become a necessity to have access to real-time information. Your communications tools must provide you with this access. With that in mind, Audiovox developed the CDM-4500.

This CDMA 800 MHz/Amps dual mode phone is our first with a built-in Web Browser. The CDM-4500 also features a Vibrating Alert Option, Voice Recognition and Data Capabilities. In addition, the phone features a Lithium Ion battery providing you with 190 minutes of talk time and 170 hours of stand-by, an Enhanced Phone Book with 99 Alpha/198 Numeric Memory Locations; One touch emergency dialing; 15 distinctive ring tones and Menu Driven Operation.

The CDM-4500 digital cellular telephone has several optional accessories available, including: leather carrying case, cigarette lighter plug-in charger, desktop holder, AC adapter, Hands-free car kit and earphone microphone.

And of course, your new CDM-4500 digital handset provides you with something only an Audiovox phone can: the proven reliability that has made us one of the leading wireless handset providers.

Please take a few moments to read the following pages of the user's operation manual. It will help you make the most efficient use of this valuable communications tool.

SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES

Read this information before using your handheld portable Cellular Telephone.

EXPOSURE TO RADIO FREQUENCY SIGNALS

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals.

In August, 1996, the Federal Communications Commission (FCC) adopted RF exposure guidelines with safety levels for handheld wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

*ANSI C95.1 (1992)
*NCRP Report 88 (1986)
*ICNIRP (1996)

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1). The design of your phone complies with the FCC guidelines (and those standards).

ANTENNA CARE

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

PHONE OPERATION

Normal Position: Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.

*The meanings of the acronyms are:
ANSI   : American National Standards Institute
NCRP : National Council on Radiation Protection and Measurements
ICNIRP: International Commission on Nonionizing Radiation Protection

Tips on Efficient Operation:

For your phone to operate most efficiently:
- Extend your antenna fully.
- Do not touch the antenna unnecessarily when the phone is in use. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed.

DRIVING

Check the laws and regulations on the use of wireless telephones in the areas where you drive. Always obey them. Also, if using your phone while driving, please:
- Give full attention to driving — driving safely is your first responsibility.
- Use handsfree operation, if available.
- Pull off the road and park before making or answering a call if driving conditions so require.

ELECTRONIC DEVICES

Most modern electronic equipment is shielded from RF signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.

Pacemakers

The health Industry Manufacturers Association recommends that a minimum separation of six (6") inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research.

Persons with pacemakers:
- Should ALWAYS keep the phone more than six (6") inches from their pacemaker when the phone is turned ON.
- Should not carry the phone in a breast pocket.
- Should use the ear opposite the pacemaker to minimize the potential for interference.
- If you have any reason to suspect that interference is taking place, turn your phone OFF immediately.

Hearing Aids

Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your service provider [or call the customer service line to discuss alternatives.]

Other Medical Devices

If you use any other personal medical device, consult the manufacturer of your device to determine if they are adequately shielded from external RF energy. Your physician may be able to assist you in obtaining this information.

Vehicles

RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

Posted Facilities

Turn your phone OFF in any facility where posted notices so require.

AIRCRAFT

FCC regulations prohibit using your phone while in the air. Switch OFF your phone before boarding an aircraft.

BLASTING AREAS

To avoid interfering with blasting operations, turn your phone OFF when in a "Blasting area" or in areas posted "Turn off two-way radio". Obey all signs and instructions.

POTENTIALLY EXPLOSIVE ATMOSPHERES

Turn your phone OFF when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.
Areas with a potentially explosive atmosphere are often but not always clearly marked. They include fueling areas such as gasoline stations, below deck on boats, fuel or chemical transfer or storage vehicles using liquefied petroleum gas (such as propane or butane), areas where the air contains chemicals or particles, such as: grain, dust, or metal powders, and any other area where you would normally be advised to turn off your vehicle engine.

For Vehicles Equipped with an Air Bag

An air bag inflates with great force. DO NOT place objects, including both installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

PRECAUTIONS

Your Handheld Portable Telephone is a high quality piece of equipment. Before operating the equipment, read all instructions and cautionary markings on (1) AC Adapter, (2) Battery and (3) Product using Battery.

1. DO NOT use this equipment in an extreme environment where high temperature or high humidity exists.

2. DO NOT abuse the equipment. Avoid striking, shaking or shocking. When not using the unit, lay down the unit to avoid possible damage due to instability.

3. DO NOT expose this equipment to rain or spilled beverages.

4. DO NOT use unauthorized accessories.

5. DO NOT disassemble the phone or its accessories; If service or repair is required, return the unit to an authorized Audiovox cellular service center. If the unit is disassembled, the risk of electric shock or fire may result.

6. To prevent injury or burns, DO NOT allow metal objects to contact or short circuit the battery terminals.

7. DO NOT open the battery case. If the battery is accidentally broken, avoid skin contact with the internal chemical contents. If there is skin contact, wash the affected area immediately and seek medical advice.

8. DO NOT put the battery close to, nor dispose it into fire.

9. The product that you have purchased contains a rechargeable Battery. At the end of its useful life, under various state and local laws, it may be illegal to dispose of this Battery into the municipal waste stream. Check with your local solid waste officials for proper disposal procedures in your area.

GETTING STARTED

Turning the Phone On/Off

Press ⟨☎⟩ for more than one second. All the indicators and the digit display will light momentarily, and a tone will be heard. The indicator T will stay while the phone is turned on.

To turn the phone off, press ⟨☎⟩ for more than one second.

Antenna Position

The antenna can be used in its fully extended or fully retracted position only. It is recommended that the antenna should be fully extended for optimum performance and signal strength or while operating in poor signal areas.

Receiving Signal Strength Indicator (T.ıɪl)

The number of lines indicates the Signal Strength in your area. Four lines show the maximum level. The display will vary as you move with the phone. If the signal is not strong enough to place a call, "No Service" will appear on the LCD display.

Battery Level Indicator

You can always monitor the battery charge condition with the constant battery level indicator. The number of blocks indicates the battery conditions as follows:

- ⟨🔋⟩ Full charge
- ⟨🔋⟩ Low charge
- ⟨🔋⟩ Flashing indicates discharged.

- **To Correct a Number**

Press ⟨CLR⟩ to clear the last digit.
Press and hold ⟨CLR⟩ to erase all the digits entered.

- **If the Call Fails to Go Through**

Press ⟨☎⟩, and ⟨✆⟩ to redial the number.

To Terminate a Call

Press ⟨☎⟩. The [IN USE] indicator will go out.

Last Number Redial

Press ⟨•Rd⟩ ⟨*/wad⟩ to recall the last number you dialed, then press ⟨✆⟩.

See **Call History** on page 42 for details.

To Dial the Last Number Received

Press ⟨•Rd⟩ ⟨#/wa⟩ to dial the last number with Caller ID you received, then press ⟨✆⟩.

See **Call History** on page 42 for details.

Phonebook Dialing

Press ⟨•Rd⟩ and enter an address (01 to 99) to recall a number from your phonebook, then press ⟨✆⟩.

See **Phonebook Recall** on page 31 for details.

To Mute a Phone Conversation

Press ⟨ᴾ⟩ ⟨ᴾ⟩ to mute your conversation at any time during a call. "**Mute**" will be displayed.

To return to normal conversation, press ⟨ᴾ⟩ ⟨ᴾ⟩ again.

Speed Dialing

If you know the phonebook address of the telephone number that you want to call, you may place a call without using (◄Rd) .

1. Enter the one or two digits of your Phonebook address (1 ~ 9 or 10 ~ 99).
2. Press ⌢ . The phone number will be displayed. The INUSE indicator will light, and the call will be placed.

Note: If two telephone numbers are stored in the address, the Primary Number will be dialed.

Quick Dialing

When this feature is on, the Primary number in your Phonebook address 02 to 09 can be dialed with just one push of the key. See **Quick Dialing (F01)** on page 73 to turn this feature on/off.

1. Press a digit key ((2ABC) to (9WXYZ)) for more than one second.
2. The number in your phonebook is automatically dialed. The phone number will be displayed. The INUSE indicator will light.

Note: The key (1) is not for Quick Dialing, but for One Touch Emergency Call, page 19.

Emergency Call

This feature permits you to place an emergency call even if your telephone is in **"Phone Lock"**, **"Keypad Lock"** or **"Restrict"** mode. Up to 3 numbers can be programmed as Emergency numbers. The emergency numbers **"911"** and **"*911"** are already preprogrammed. See **To Change Emergency Numbers (F62)** on page 69.

    Example: To Call 911 in **"Phone Lock"** or **"Keypad Lock"** mode.

1. Enter (9WXYZ) (1) (1) . The **"911"** will not be displayed, but **"Phone Lock"** or **"Keypad Lock"** will be displayed.
2. Press ⌢ .
   The **"911"** will be displayed. The INUSE indicator will light, and the call will be placed.

```

OneTouch Emergency Call

This feature permits you to dial an emergency number by a single key stroke, even in the **"Phone Lock"** or **"Restrict"** mode. This feature can be turned off to prevent unintentional calls to the emergency number.

See **To Turn On/Off OneTouch Emergency Call Feature (F63)** on page 69.

1. Press and hold (1) for more than 2 seconds. The number in emergency memory location "1" will be dialed.
2. Then the INUSE indicator will light, and the call will be placed. (The factory preset number is **"911"**.)

Note: This feature cannot be used if the Keypad Lock is on. You need to dial all the digits and ⌢ .

Emergency Call Mode

When you dial one of the 3 pre-programmed emergency numbers, your phone will enter the **"Emergency Call Mode"**. In this mode, the phone will attempt to complete the emergency call using any available cellular system from which it can obtain service.

After it places an emergency call, the phone will stay in the **"Emergency Call Mode"**, and will display **"Emergency Call Mode, END to exit"**. In the **"Emergency Call Mode"**, the phone will attempt to continue to receive service from the Cellular system that it used to complete the call. The phone will automatically exit the **"Emergency Call Mode"** after 5 minutes or after you press END.

Receiving Calls

To Receive a Call

When the telephone rings, press ⌢ to answer the call. The INUSE indicator will light.

Any Key Answering

This feature permits you to answer an incoming call by pressing any key on the key pad except ⌢⓪ and (◄Rd F►) .

Caller ID with Name

This feature allows you to preview in your display the number and name of the party calling you before you answer the call. The name is as you programmed it in your phonebook.

1. When the phone rings, the Calling Number appears in the display.

2. The last 10 Caller IDs are stored in the memory for your review and redial. See **Call History** on page 42 for details.

Scratch Pad Dialing

If you enter a telephone number during a call, the number will be stored in the Scratch Pad memory.

After terminating the call, the number you entered can be dialed by ⌒ .

Note: *You can deactivate "Sending DTMF" so that keypad tones will not be transmitted to the calling party. See **Sending DTMF (F35)** on page 59.*

Automatic Talk Timer

The talk time of the current call will be automatically displayed.
For example, "1h23m45s".

Call Waiting

Your service provider may provide Call Waiting service. When you are on a call, you may hear beep tone alerting you of another incoming call. Your phone displays "New Caller" and the new caller's ID with the name. The name is as you programmed it in your phonebook.

1. Press ⌒ to answer the new call.
2. Press ⌒ again to switch between the two calls.

Three-Way Calling

Your service provider may provide Three-Way Calling service. When a call is already in progress, you may call the third party.

1. Enter a number and press ⌒ to call the third party.
2. Press ⌒ again to connect all three parties.

Ask your service provider for the detailed information.

Standby

Clock Indicator (Digital Mode Only)

When the phone is in an area with digital service (Digital Mode), Date and Time are automatically displayed, if this feature is enabled. See **Clock Indicator (F42)** on page 62 to turn this feature on/off.

Example:

To Review Long Numbers

This feature allows you to review all the digits of very long numbers or numbers stored with Alpha Tags.

1. Use any of the previously described Phonebook search modes to recall a number.
2. Press (►) and scroll to "VIEW TEL#", and the entire digits of the number will be displayed.

To Review Long Names

This feature allows you to review whole Alpha Name Tag stored with dual numbers.

1. Use any of the previously described Phonebook search modes to recall a number.
2. Press (►) and scroll to "VIEW NAME". Press (►) again, and all the characters of the Name will be displayed.

Prepending Dialing

This feature will be convenient when you need to add an area code to the number in the phonebook.

Example: To add 1 2 3 to a number 4 5 6 7 8 9 0.

1. Recall the number.

```

3. Press (📞). Then the call is placed to 123-4567890.

Note: The added digits will not be stored in the phone-book memory.

Phonebook Edit

This section guides you how to modify, move, change priority and erase the phonebook contents.

To Modify Numbers and Names

You can modify any of the phonebook contents you have stored, including Phone Numbers, Names, Ring Type, Secret and Address.

To Modify Phone Numbers

Recall the number from the phonebook.

Press (ⁿ) to select "MENU", then scroll to "MODIFY" and press (ⁿ). Enter the new digit(s) and delete the old digit(s) by pressing (CLR). To move the cursor, press (˙) to left, (˙) to right.

To Modify Alpha Name Tag

Recall the number and proceed to "MODIFY" as above. Press (STO), and the Name Tag will appear by itself. Press (CLR) to clear the letter(s), and enter the new Name.

To Modify Address

After you modified number/name, just press (STO) without entering new address, and the current phonebook address will be overwritten. If you enter a new address, and press (STO), the modified number/name will be copied to the new address, while the original address will remain unchanged.

To Enter a Second Number

Example: To add the secondary number 9 8 7 6 5 4 3 2 1 0 in the address 07.

1. Recall the number stored in the memory address 07.

   `123-456-7890`

Link Dialing

This feature permits you to link groups of numbers to be sent in sequence. The linked numbers can be stored in memory. When dialed, the first group of numbers will be sent in digital signaling, and the rest of the numbers will be sent in Touch Tone™ group by group each time you press ⌒.

To Store Linked Numbers in Phonebook

Linked Numbers can be stored using any of the procedures described under memory operations (at a specific address, with a Name Tag, at the next vacant memory location or as secret). The only difference is, that a Link Mark " = " must be entered between the linked numbers. The link mark is entered using the key sequence (F) (F).

You can store Linked Numbers with Link Marks " = " up to 40 digits for the address 01 to 90, and up to 80 digits for the address 91 to 99 in the phonebook.

```
◀————— Up to 40 or 80 digits —————▶

31 digits or less  31 digits or less  31 digits or less
```

The example on the next page shows how to store a Linked number at a specific memory address.

1. Enter the first number.
2. Press (F) (F). A link mark " = " will be added at the end of the number.
3. Enter the second number. If you wish to link additional number(s), return to 2.
4. Press (STO) (STO), then enter the memory address (01 ~ 99).

Example: To link 3 numbers and store in Address 35

Note: While entering a linked number, you may review all the parts of that number, even those already entered.
Press (F), scroll to "VIEW TEL#" and press (F). The linked numbers you have just entered will be displayed one by one each time you press (F).

To Place Calls using Linked Numbers

1. Press (Rcl), and select the linked number you want to call. (See Phonebook Recall on page 31.)
2. Press ⌒. Then the IN USE indicator will light as the first number is dialed.
3. Press ⌒. The second linked number will be sent in Touch Tone™ signals. Succeeding numbers can be sent sequentially by pressing ⌒ again.

Voice Activated Dialing (VAD)

With this feature, you can make a call from your phonebook by just saying the name. You can register, in your own voice, names for up to 20 numbers in your phonebook.

Voice Registration

Example: Store the telephone number 1 2 3 4 5 6 7 8 9 0, and register the name "Katie".

1. Enter the telephone number (1 2 3 4 5 6 7 8 9 0).

2. Press (⌐) and scroll to **"REPLAY"**.
3. Place the phone near your ear, and press (⌐)
4. You will hear the registered name.

Note: Addresses with voice are marked with "V".

Voice Activated Dialing

Example: Dial the number by speaking "Katie".

1. Press and hold (✻/ᴠᴬᴰ).
2. Listen to the phone say **"Name, please"**, then speak into the microphone "Katie".
3. You will hear from the phone, **"Calling Katie"**.
4. Katie's number in the phonebook will be automatically dialed.
5. In case you wish to cancel the call, please say "No" within 2 seconds after you hear **"Calling Katie"**. You can start from the above step 2.

Notes: 1. *If you hear "Again" from the handset, please repeat the name.*

2. *If you hear "Did you say 'Katie' ?", please answer to it "Yes" or "No".*

3. *When you use this feature through car kit option, it is recommended that you speak slightly louder for better recognition.*

To Register a Name to a Number Stored in Memory

1. Press (⌐ᴬ⌐), and recall the number from the phonebook.

MESSAGING FEATURES

Your CDM-4500 Audiovox Cellular Telephone has been engineered to operate with the latest technology that will allow you to enjoy the benefit of Voice Mail Notification and Text Messages. Please note that operation of these features depends on the Cellular System and therefore may not be available in all areas.

Message Indicator

A message indicator ☑ shows you the current status as explained below.

☑ Flashing	You have new Text Messages or new Voice Mail Notification.
☑ Steady	You have Text Messages or Voice Mail Notification, which you have seen already.
☑ off	Neither Text Message nor Voice Mail Notification.

In addition to the ☑ indicator, whenever your Voice Mail contains unreviewed messages, you will occasionally hear a short beep as a reminder.

Voice Mail

Voice Mail Notification

Your cellular telephone notifies you when new messages are in your Voice Mail. When messages are left in your Voice Mail, the ☑ indicator at the upper right of the display flashes to alert you.

Normal Voice Mail Notification

When your phone is notified by the cellular system that there are messages in your Voice Mail, the following occurs.

1. The phone sounds a short beep tone.
2. The ☑ indicator at the upper right of the display flashes to alert you.
   The display indicates "NEW MESSAGE" with animation.

System Features

A/B System Selection (F51)

This feature permits you to select which Cellular system (A or B) your phone uses. When you turn the phone on, it remembers the last A/B setting and will scan the radio channels based on that setting.

Leave this setting as it has been preprogrammed unless you have a reason to alter the system selection.

To alter the system selection:

1. Press (ⁿ) (5ᴶᴷᴸ) (1) .
   The current mode will be displayed.

   ```
   A/B         F51
   SWITCH
   ✓AUTO ROAM ▶
    HOME
   ```

2. You can change the current mode by (˙) or (˙).

3. Press (ⁿ) to set.

- **AUTO ROAM – Auto Roam Mode**

The phone will scan the priority systems first, and then non-priority systems. For more information as to how this mode works, see **Enhanced Roaming** below.

- **HOME – Home Only Mode**

You can place or receive calls only within your home area or home affiliated area.

- **A-ONLY – A-System Only Mode**

The phone will scan the A-system only and prevents switching over to the B-system.

- **B-ONLY – B-System Only Mode**

The phone will scan the B-system only.

Note: If your LCD displays "AUTO ROAM ONLY", your phone has been pre-programmed to operate in the Auto Roam Mode only.

Enhanced Roaming

Cellular systems are identified by a number called System Identifier or SID. Your phone is equipped with a **Preferred Roaming List (PRL)** which can be programmed by your Carrier to take advantage of the families of cellular system (SIDs) that your Carrier owns, or has special billing arrangements with, in different cities.

In your Home System Area, both "No Service" and "Rm" are off in your display. Outside of the Home System in Service Areas closely associated with your Carrier, the phone's display may appear the same as when operating in the Home System.

In areas where your Carrier has Roaming agreements, your phone will display a steady "**Rm**" indication. If your display indicates a flashing "**Rm**", you are in a cellular system which is not associated with your Carrier (you can still make or receive calls).

If your display indicates "**(No Service)**", you may have to change your A/B System Selection or NAM Selection in order to obtain service. If your display indicates "**No Service**", you are in an area where there is no cellular service.

NAM Selection (F52)

Some Cellular users may find it beneficial to register their phones with multiple numbers, for different cities where they may frequently travel. To provide this ability, your phone has two NAMs (Number Assignment Modules) enabling up to two registrations.

If you have multiple registrations, the NAM Selection feature enables you to change the NAM being used by your phone. Do not use this feature, if you do not have multiple registrations.

To change NAMs:

1. Press (F) (5 JKL) (2 ABC) .

```
NAM        F52
CHANGE
✓#1 4567890▶
  #2 6543210
```

2. You can change the current NAM by (▲) or (▼)
3. Press (F) to set.

Force Analog Call (F53)

This feature temporarily directs the phone to use the Analog Mode even if the Digital Mode has been previously selected.

1. Press (F) (5 JKL) (3 DEF) .

```
FORCE      F53
ANALOG
[YES
 NO        ▶
```

2 Press (F) when scanning the Analog Mode.

Notes: *This feature automatically ends if:*

1) *The phone is turned off.*
2) *An outgoing call is made.*
3) *An incoming call is received.*
4) *After 10 minutes if items 1) – 3) did not occur.*

System Settings (F54)

This is a group of several functions for settings related to the system.

1. Press (F) (5 JKL) (4 GHI) . The Branch Menu is displayed.

```
           F54
1:NAM NAME  ▶
2:AUTO NAM
3:RETRY
```

NAM Name Display (F54-1)

You can program a greeting or a name of a maximum 10 to 12 characters in the second line of your LCD display. This will be displayed when the phone is turned on or when you change the NAM. (See **NAM Selection (F52)** on page 64.) As you can program different name for each NAM, you can tell which NAM is currently active when you turn the phone on.

1. Press (F) (5 JKL) (4 GHI) and (1) .

```

   (4 GHI) . | PRIVACY
                                     | ENHANCED
                                     |V STANDARD ▶|

2. To request the cellular system to provide the enhanced voice privacy service, select "EN-HANCED" with (⌃) or (⌄) , and press (⊮) .

3. When the phone is operating in the Enhanced Voice Privacy Mode, "VP" appears in the upper line of the display during talking.

4. To request the cellular system not to use the enhanced voice privacy service, select "STANDARD" with (⌃) or (⌄) , and press (⊮) .

Notes: 1. *This feature must be activated before the call is initiated.*

2. *Even if the standard mode is selected, the cellular system may direct the phone to use the Enhanced Voice Privacy Mode.*

Anti Fraud Security Features

Your new Audiovox Cellular telephone has been engineered with the latest technology to help protect from the fraudulent use of your cellular telephone number. Your phone is equipped with Authentication and PIN (Personal Identification Number) Dialing. (Availability of these features depends on your Service Provider). Should your Service Provider require use of a PIN, your PIN can be sent manually or programmed into the phone for more convenient use.

To Place a Call with the Manual PIN Entry

PROTECT YOUR WARRANTY

Read your Warranty carefully, with the special consideration to paragraph seven of the Limited Warranty for your unit.

"Warranty does not apply to...or to any product or part thereof which has suffered through alteration... mishandling, misuse, neglect, or accident".

Many companies are making look-alike accessories and in some cases, promoting that their product is equal to or better than the Audiovox product. Be careful. Some of these products may not be compatible for use with your Audiovox product and may damage the unit or cause it to malfunction. If service is required on your unit, and it is determined that a non-Audiovox accessory has created the problem with your unit, the Warranty will not apply. In addition, if the unit has already suffered irreversible damage by reason of a non-compatible accessory, the Warranty will be voided. To protect your Warranty, use only compatible accessories which cannot damage or interfere with the functioning of your Audiovox product.
