ENT-VGER
4-in-1 Cable TV Remote Control
for Pioneer® Voyager BD-V1000 & 3000

Use this guide in conjunction with your cable converter manual

VISIT US ON THE WEB
YOU CAN FIND PROGRAMMING INSTRUCTIONS AND CODES FOR ALL OF OUR REMOTE CONTROLS, AS WELL AS INFORMATION ABOUT OUR OTHER PRODUCTS ON OUR WEBSITE:
www.uselectronics.com

---

1 CONGRATULATIONS!

This 4 mode remote control has been programmed to control your Pioneer cable converter and can be programmed to control up to three additional entertainment components by following these easy instructions.

The volume and channel controls are set to control the cable converter. This can be modified by following the instructions in sections 7 and 9. This remote has a master power feature for powering all components together. See details in section 9.
2 BEFORE YOU BEGIN

Please plug your television power cord into a separate wall outlet instead of the power outlet on the cable box.

Tune your television to channel 2, 3 or 4 as directed by your cable provider.

3 INSTALL BATTERIES

Two AA batteries must be installed before you can program or operate the remote control.

1. Remove the battery compartment cover located on the back of the remote control.

2. Place the batteries in the compartment in positions matching the picture below.
3. Replace the battery compartment cover.

! IMPORTANT NOTE

Use only new AA **Alkaline** batteries to insure consistent operation

---

4 KNOW YOUR REMOTE

The diagram below provides a brief description of each key on your universal remote control. US Electronics provides these function descriptions as a general guide to allow you to become more familiar with your remote. Functions may vary between different services. Please refer to your cable converter manual for descriptions of specific functions.

INFO displays channel and program information

MENU displays the main on-screen menu

FOUR-WAY CURSOR KEYS allow you to navigate through the on-screen menus

PAGE +/− moves the on-screen guide forward and backward one page

HELP displays the on-screen help system

SELECT chooses the highlighted item in the menu

VOL +/− increases or decreases the volume

MUTE turns volume on and off

TRANSPORT KEYS perform standard functions for video recording for VCRs and DVD players and controls VOD functions in cable mode if the service is available

NUMBER KEYS allow direct access to specific channels and menu options

TV/VCR switches the VCR between TV and VCR modes

BYPASS functions differently depending on what mode the remote control is in:
• While in VCR mode, switches TV/VCR input
• While in TV mode, switches TV/Video input
• While in CBL mode, controls Bypass function

POWER turns the currently selected device on and off; also activates **Master Power**

DEVICE KEYS allow you to select which device to setup and operate

GUIDE displays the program guide

SETTINGS displays cable settings

FAV steps through favorite channels

EXIT exits out of on-screen menus

A, B, C access on-screen program guide menus. Depending on what program guide (if any) your cable provider offers, these keys will perform differently. Consult the set-top box manual for more information on these keys.

CH +/− changes the channel up and down

LAST recalls the last channel that was viewed

VOD allows quick access to a specific channel set by your cable provider for making video-on-demand selections

DAY +/− moves the on-screen guide forward and backward one day

ENTER key for certain TVs and VCRs that require an enter command after the direct input of a channel using the number keys.

The Enterprise remote control is already programmed with the code for your Pioneer® Cable Converter. The following sections will help you program your remote to control your other entertainment components.

---

5 SMART SCAN™ AUTOMATIC PROGRAMMING

The Smart Scan™ programming instructions can also be found on the battery cover of the remote control. Smart Scan™ will allow you to easily try all the available programming codes for the selected device and find the best match. If you prefer manual programming or already have the device codes you may also program the remote manually using the steps in section 6.

1 Turn on power for the device to be programmed.

2 Begin the Smart Scan™ procedure by pressing and holding the associated device key (AUX, VCR, TV) until all device keys on the remote begin to flash (approximately 3 seconds). Release the power key.

3 If the device your are attempting to program matches the selected device key (e.g. TV component with the TV device key) proceed to step 5.

4 If the device your are attempting to program does not match the selected key (e.g. a second VCR programmed to the AUX device), locate the correct prefix code for the device you wish to program from the table listed below. Press and release the prefix code.

Prefix	Device
0	TV
1	VCR/DVD/PVR
4	Audio Receivers
5	Combo Units

5 Press and release the POWER key. The device key will stop flashing and remain on.

6 Point the remote control at the component.

7 Press and hold the UP ARROW key until the component turns off. While holding the UP ARROW key the remote will send a new code approximately once every second. The device button will blink each time a new code is sent. If you pass the code that turns off the component, press the DOWN ARROW key to return to the previous code.

8 When the device turns off, you have found a candidate code. Press the POWER key to turn device back on. Test various functions using the remote control to determine if this code will work. If primary functions do not work, make sure the device is still on then resume Smart Scan™ by pressing the UP ARROW key to find another device code.

9 Once you have found a satisfactory code, press SELECT to lock the code. The power of the device must be on. The device key will then flash three times. Go to section 10 to recall and record your device codes. When all the codes have been attempted the device button will flash rapidly.

6 MANUAL PROGRAMMING

To manually set up the Enterprise to operate a device, find the manufacturer of the device in the list of manufacturers' codes. The codes are logically grouped by device type in section 12. Then perform the following steps:

1 Press and hold the device key to be programmed until all device keys begin to flash (approximately 3 seconds). Release the key. The selected device key will continue to flash.

2 Enter the four digit code for the desired component using the number keys. After pressing the first digit, the device key should light and remain on. If the programming is successful. After the last digit is pressed the device key should flash three times and turn off.

---

3 Test the code by trying various functions. If the primary function keys fail to respond satisfactorily try the next code listed for the manufacturer.

If you have tried all the codes listed for the manufacturer and the device does not respond, try to program the device using Smart Scan™ as described in section 5. Remember to record your device codes in section 11 when you are done.

7 PROGRAMMING VOLUME CONTROL

By default, your Enterprise remote controls cable volume through the Cable Box, and the VCR and DVD through the Television. To allow volume control through a different device:

1 Press and hold the CBL device key until all the device keys begin to flash. Release the CBL key. The CBL key will continue to flash.

2 Press and release the VOLUME UP key, the CBL key will remain on.

3 Press and release the VOLUME DOWN key. The CBL key will turn off when VOLUME DOWN is pressed, and will turn on when released.

4 Press and release the key corresponding to the device you wish to use to control volume. (TV or AUD) After you release the key, the CBL key will flash three times and turn off.

To return volume control to the default state:

1 Press and hold the CBL device key until all the device keys begin to flash. Release the CBL key. The CBL key will continue to flash.

2 Press and release the VOLUME UP key. The CBL device key will stop flashing and stay on. Press and release the VOLUME DOWN key, and then press and release the OK key. After you release the OK key, the CBL device key will flash three times and turn off.

8 MASTER POWER CONTROL

The Master Power function allows you to turn off and on two or more devices simultaneously with a single press of the power button. The following steps describe how to program the Master Power Control function:

1 Press and hold the CBL device key until all the device keys begin to flash. Release the CBL key. The CBL key will continue to flash.

2 Press and release the POWER key.

3 Individually press and release each device key corresponding to the components you wish to be controlled by Master Power. NOTE: If no keys are pressed in this step, no change will occur in Master Power programming.

4 Press and release the POWER key. The CBL key will flash three times and turn off.

5 Manually turn on all devices. Then test the Master Power control by pressing the POWER key.

To disable Master Power, repeat the previous steps selecting only one device for Master Power (any device can be selected). The remote will now control the power ON/OFF of each device separately.

NOTE: Once Master Power has been programmed for two or more devices, pressing the POWER key in normal operation will cause the remote to transmit the POWER on/off commands for those devices selected during Master Power programming,

To override this and transmit a POWER on/off command for a device not included in the Master Power selection, press the DEVICE key for that device and immediately press the POWER key.

9 CHANNEL LOCK

Channel Lock causes channel up and down functions to always operate the cable converter independent of the device (TV, CBL, VCR, or AUD) currently selected. The Enterprise comes with Channel Lock activated. If you want the remote control to operate the channel function on your TV or VCR, you will need to deactivate Channel Lock:

1 Press and hold the CBL device key until all the device keys begin to flash (approximately 3 seconds). Release the CBL key. The CBL key will continue to flash.

2 Press and release the CHANNEL UP key.

3 Press and release the CHANNEL DOWN key.

4 Press the OK key. The CBL device key will flash three times to confirm the procedure.

Repeat these steps to reactivate Channel Lock.

10 RECALLING A DEVICE CODE

Use the following steps to read the code set for a device. This is useful for determining a device code that was set using the Smart Scan™ procedure described in section 4.

1 Press and hold the device key to be read until all device keys begin to flash (approximately 3 seconds). Release the key. The selected device key will continue to flash.

2 Press and release the OK key. The device key flashes each of the four digits in the code. A pause separates each digit. For example, three flashes represent the number 3, and a rapid flicker represents 0. A code of 1032 will be shown as:

FLASH ‹pause› FLICKER ‹pause› FLASH... FLASH... FLASH ‹pause› FLASH... FLASH

Count and record the sequence of flashes to determine the four-digit code.

11 RECORD YOUR DEVICE CODES

Now that your have programmed your remote control, write the codes below for later reference:

TV code: ___ ___ ___ ___ AUD Code: ___ ___ ___ ___
VCR Code: ___ ___ ___ ___ DVD Code: ___ ___ ___ ___
AUX Code: ___ ___ ___ ___ (device _____)

If necessary use the recall instructions to determine the code.

Any of the AV components listed in SECTION 12 can be programmed to any device key by following the steps above. Note: VCR and DVD devices require a TV first be programmed to one of the device keys.
