Note: An EXPLODED DRAWING is attached in the center of this manual.

### **IMPORTANT PRECAUTIONS**

**WARNING:** To reduce the risk of burns, fire, electric shock, or injury to persons, read the following important precautions and information before operating the treadmill.

- 1. It is the responsibility of the owner to ensure that all users of this treadmill are adequately informed of all warnings and precautions.
- 2. Use the treadmill only as described in this manual.
- 3. Place the treadmill on a level surface, with at least eight feet of clearance behind it. Do not place the treadmill on any surface that blocks air openings. To protect the floor or carpet from damage, place a mat under the treadmill.
- 4. Keep the treadmill indoors, away from moisture and dust. Do not put the treadmill in a garage or covered patio, or near water.
- 5. Do not operate the treadmill where aerosol products are used or where oxygen is being administered.
- 6. Keep children under the age of 12 and pets away from the treadmill at all times.
- 7. The treadmill should not be used by persons weighing more than 250 pounds.
- 8. Never allow more than one person on the treadmill at a time.
- Wear appropriate exercise clothing when using the treadmill. Do not wear loose clothing that could become caught in the treadmill. Athletic support clothes are recommended for both men and women. Always wear athletic shoes. Never use the treadmill with bare feet, wearing only stockings, or in sandals.
- 10. When connecting the power cord (see page 8), plug the power cord into a surge suppressor (not included) and plug the surge suppressor into a grounded circuit capable of carrying 15 or more amps. No other appliance should be on the same circuit. Do not use an extension cord.

- 11. Use only a single-outlet surge suppressor that is UL 1449 listed as a transient voltage surge suppressor (TVSS). The surge suppressor must have a UL suppressed voltage rating of 400 volts or less and a minimum surge dissipation of 450 joules. The surge suppressor must be electrically rated for 120 volts AC and 15 amps. To purchase a surge suppressor, call 1-800-366-7278 and order part number 146148.
- 12. Keep the power cord and the surge suppressor away from heated surfaces.
- 13. Never move the walking belt while the power is turned off. Do not operate the treadmill if the power cord or plug is damaged, or if the treadmill is not working properly. (See BEFORE YOU BEGIN on page 5 if the treadmill is not working properly.)
- 14. Never start the treadmill while you are standing on the walking belt. Always hold the handrails while using the treadmill.
- 15. The treadmill is capable of high speeds. Adjust the speed in small increments to avoid sudden jumps in speed.
- 16. Never leave the treadmill unattended while it is running. Always remove the key, unplug the power cord and move the on/off switch to the off position when the treadmill is not in use. (See the drawing on page 5 for the location of the on/off switch.)
- 17. Do not attempt to raise, lower, or move the treadmill until it is properly assembled. (See ASSEMBLY on page 6, and HOW TO FOLD AND MOVE THE TREADMILL on page 18.) You must be able to safely lift 45 pounds (20 kg) in order to raise, lower, or move the treadmill.
- 18. Do not change the incline of the treadmill by placing objects under the treadmill.
- 19. When folding or moving the treadmill, make sure that the storage latch is fully closed.

- 20. When using iFIT.com CD's and videos, an electronic "chirping" sound will alert you when the speed and/or incline of the treadmill is about to change. Always listen for the "chirp" and be prepared for speed and/or incline changes. In some instances, the speed and/or incline may change before the personal trainer describes the change.
- 21. When using iFIT.com CD's and videos, you can manually override the speed and incline settings at any time by pressing the speed and incline buttons. However, when the next "chirp" is heard, the speed and/or incline will change to the next settings of the CD or video program.
- 22. Always remove iFIT.com CD's and videos from your CD player or VCR when you are not using them.

- 23. Inspect and tighten all parts of the treadmill regularly.
- 24. Never insert or drop any object into any opening.
- 25. **DANGER:** Always unplug the power cord immediately after use, before cleaning the treadmill, and before performing the maintenance and adjustment procedures described in this manual. Never remove the motor hood unless instructed to do so by an authorized service representative. Servicing other than the procedures in this manual should be performed by an authorized service representative only.
- 26. This treadmill is intended for in-home use only. Do not use this treadmill in any commercial, rental, or institutional setting.

**AWARNING:** Before beginning this or any exercise program, consult your physician. This is especially important for persons over the age of 35 or persons with pre-existing health problems. Read all instructions before using. SEARS assumes no responsibility for personal injury or property damage sustained by or through the use of this product.

### SAVE THESE INSTRUCTIONS

The decals shown below have been placed on your treadmill. If a decal is missing, or illegible, please call our toll-free HELPLINE to order a free replacement decal (see the back cover of this manual). Apply the decal in the location shown.

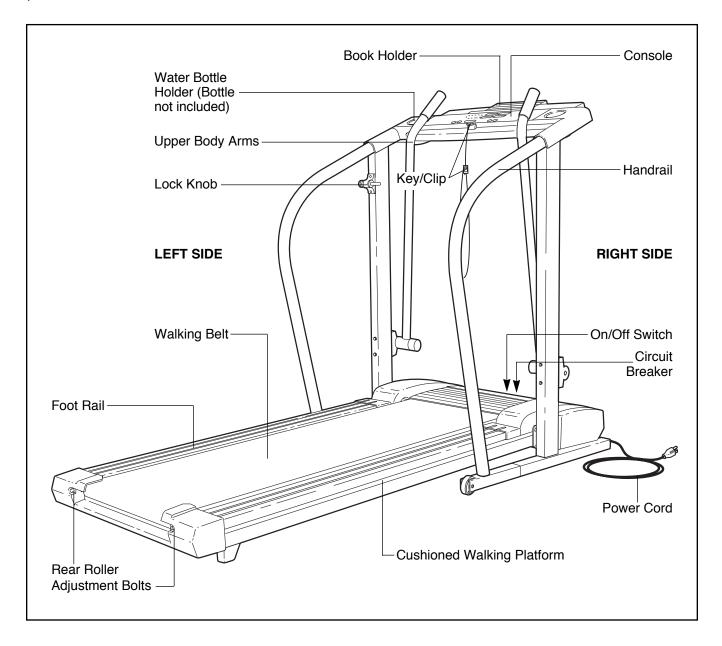

### **BEFORE YOU BEGIN**

Thank you for selecting the revolutionary PROFORM<sup>®</sup> 635CW treadmill. The 635CW treadmill combines advanced technology with innovative design to help you get the most from your exercise program in the convenience and privacy of your home. And when you're not exercising, the unique 635CW can be folded up, requiring less than half the floor space of other treadmills.

For your benefit, read this manual carefully before using the treadmill. If you have additional questions, please call our toll-free HELPLINE at 1-800-736-6879, Monday through Saturday, 7 a.m. until 7 p.m. Central Time (excluding holidays). To help us assist you, please note the product model number and serial number before calling. The model number of the treadmill is 831.299450. The serial number can be found on a decal attached to the treadmill (see the front cover of this manual for the location).

Before reading further, please review the drawing below and familiarize yourself with the parts that are labeled.

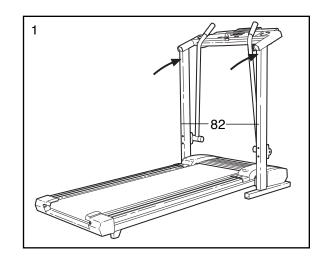

### ASSEMBLY

Assembly requires two people. Set the treadmill in a cleared area and remove all packing materials. Do not dispose of the packing materials until assembly is completed. Assembly requires the included allen wrench and your own phillips screwdriver (

Note: The underside of the treadmill walking belt is coated with high-performance lubricant. During shipping, a small amount of lubricant may be transferred to the top of the walking belt or the shipping carton. This is a normal condition and does not affect treadmill performance. If there is lubricant on top of the walking belt, simply wipe off the lubricant with a soft cloth and a mild, non-abrasive cleaner.

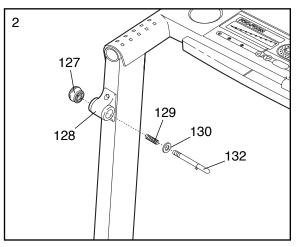

1. With the help of a second person, carefully raise the Uprights (82) until the treadmill is in the position shown.

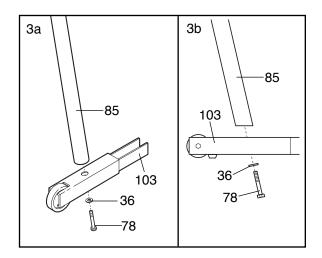

2. Remove the Lock Knob (127) from the Lock Pin (132).

Make sure that the Lock Pin Collar (130) and the Spring (129) are on the Lock Pin as shown. Insert the Lock Pin into the Lock Knob Bracket (128).

Tighten the Lock Knob (127) onto the Lock Pin (132).

Refer to drawing 3a. Loosely thread a Handrail Bolt (78) with a Handrail Washer (36) into each Extension Leg (103) and Handrail (85) as shown. Note: Notice the angle of the Bolt; attach the Bolt and Washer at the observed angle. It should be the same as the angle of the Handrail (see drawing 3b).

 Slide the upper end of a Handrail (85) and then the Extension Leg (34) into the right Upright (82) as shown. (Note: It may be helpful to tip the Uprights [82] forward as you insert the Extension Leg.)

Slide the other Handrail (85) into the left Upright (82) as described above.

5. With the help of a second person, carefully tip the Uprights (82) down as shown. Make sure that the Extension Legs (103) and Handrails (85) remain in the Uprights.

Attach each Extension Leg (103) with two Short Screws (101) as shown. You may need to press down on the top of the Uprights (82) to fully insert the Extension Legs. Tighten the Handrail Bolts (78).

Note: One replacement Base Pad (97) may be included. Use the extra Base Pad if one becomes worn or needs to be replaced.

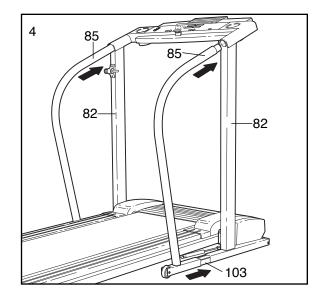

With the help of a second person, carefully tip the Uprights (82) back to the upright position.

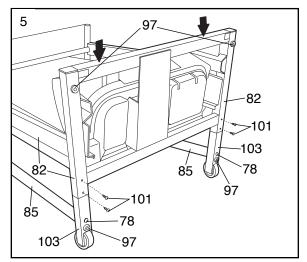

6. Refer to drawing 6a. Locate the **left** Rear Foot (59) on the treadmill. If the left Rear Foot touches the floor, go to step 7. If there is a space between the left Rear Foot and the floor, follow the instructions below.

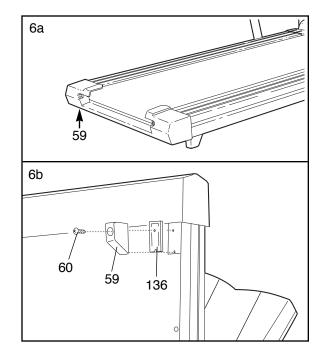

Hold the treadmill firmly with both hands, and raise the treadmill to the storage position as described on page 18.

Refer to drawing 6b. Using a phillips screwdriver, remove the Screw (60), the **right** Rear Foot (59), and the Rear Foot Spacer (136) from the treadmill. Reattach the right Rear Foot without the Rear Foot Spacer. Hold the treadmill with both hands, and lower the treadmill as described on page 19.

Check the **left** Rear Foot (59 [see drawing 6a]). If the left Rear Foot is still off the floor, raise the treadmill and remove the left Rear Foot. Snap the Rear Foot Spacer (136) onto the left Rear Foot and reattach the left Rear Foot. Carefully lower the treadmill.

7. Make sure that all parts are tightened before you use the treadmill. Keep the included allen wrench in a secure place. The allen wrench is used to adjust the walking belt (see page 20). To protect the floor or carpet from damage, place a mat under the treadmill.

### **OPERATION AND ADJUSTMENT**

### THE PERFORMANT LUBE™ WALKING BELT

Your treadmill features a walking belt coated with PERFORMANT LUBE<sup>™</sup>, a high-performance lubricant. **IMPORTANT: Never apply silicone spray or other substances to the walking belt or the walking platform. Such substances will deteriorate the walking belt and cause excessive wear.** 

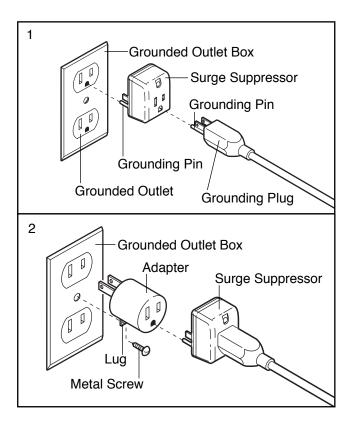

### HOW TO PLUG IN THE POWER CORD

A DANGER: Improper connection of the equipment-grounding conductor can result in an increased risk of electric shock. Check with a qualified electrician or serviceman if you are in doubt as to whether the product is properly grounded. Do not modify the plug provided with the product—if it will not fit the outlet, have a proper outlet installed by a qualified electrician.

Your treadmill, like any other type of sophisticated electronic equipment, can be seriously damaged by sudden voltage changes in your home's power. Voltage surges, spikes, and noise interference can result from weather conditions or from other appliances being turned on or off. To decrease the possibility of your treadmill being damaged, always use a surge suppressor with your treadmill (see drawing 1 at the right).

To purchase a surge suppressor, see your local PROFORM dealer or call toll-free 1-800-366-7278 and order part number 146148. Use only a singleoutlet surge suppressor that is UL 1449 listed as a transient voltage surge suppressor (TVSS). The surge suppressor must have a UL suppressed voltage rating of 400 volts or less and a minimum surge dissipation of 450 joules. The surge suppressor must be electrically rated for 120 volts AC and 15 amps.

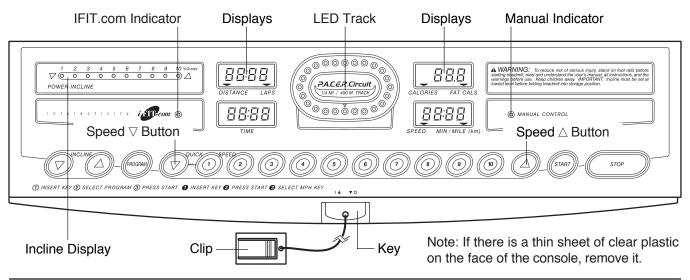

This product must be grounded. If it should malfunction or break down, grounding provides a path of least resistance for electric current to reduce the risk of electric shock. This product is equipped with a cord having an equipment-grounding conductor and a grounding plug. Plug the power cord into a surge suppressor, and plug the surge suppressor into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances. This product is for use on a nominal 120-volt circuit, and has a grounding plug that looks like the plug illustrated in drawing 1 below. A temporary adapter that looks like the adapter illustrated in drawing 2 may be used to connect the surge suppressor to a 2-pole receptacle as shown in drawing 2 if a properly grounded outlet is not available.

The temporary adapter should be used only until a properly grounded outlet (drawing 1) can be installed by a qualified electrician.

The green-colored rigid ear, lug, or the like extending from the adapter must be connected to a permanent ground such as a properly grounded outlet box cover. Whenever the adapter is used it must be held in place by a metal screw. Some 2-pole receptacle outlet box covers are not grounded. Contact a qualified electrician to determine if the outlet box cover is grounded before using an adapter.

### **CONSOLE DIAGRAM**

**CAUTION:** Before operating the console, read the following precautions.

- Do not stand on the walking belt when turning on the power.
- Always wear the clip (see the drawing above) while operating the treadmill.
- Adjust the speed in small increments in order to avoid sudden jumps in speed.
- To reduce the possibility of electric shock, keep the console dry. Avoid spilling liquids on the console and place only a sealed water bottle in the water bottle holder.

### FEATURES OF THE CONSOLE

The treadmill console is designed to help you get the most from your exercise. When the console is in the manual mode, the speed and incline of the treadmill can be controlled with a touch of a button. As you exercise, the LED track and the four displays will provide continuous exercise feedback.

The console also features advanced iFIT.com interactive technology. IFIT.com technology is like having a personal trainer right in your home. Using the included audio cable, you can connect the treadmill to your home stereo, portable stereo, or computer and play special iFIT.com CD programs (one CD is included). IFIT.com CD programs automatically control the speed and incline of the treadmill as a personal trainer guides you through every step of your workout. High-energy music provides added motivation. Each CD features two different programs designed by certified personal trainers.

In addition, you can connect the treadmill to your VCR and TV and play iFIT.com video programs (videocassettes are available separately). Video programs offer the same benefits as iFIT.com CD programs, but add the excitement of working out with a class and an instructor—the hottest new trend at health clubs.

With the treadmill connected to your computer, you can also go to our new internet site at www.iFIT.com and access even more programs. Choose from a selection of basic programs that interactively control the speed and incline of your treadmill to help you achieve your personal exercise goals. Or use iFIT.com audio and video programs directly from our internet site. Visit www.iFIT.com for complete details.

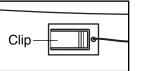

By adding an optional upgrade module to the treadmill, you can use virtually endless features from our internet site. See www.iFIT.com to learn about other iFIT.com features.

To purchase other iFIT.com CD's, iFIT.com videocassettes, or an optional upgrade module, call toll-free 1-800-884-0620.

To use the manual mode of the console, follow the steps beginning on page 10. To use iFIT.com CD or video programs, refer to page 14. To use iFIT.com programs directly from our internet site, see page 16.

### Attach the clip to the waistband of your clothing.

Stand on the foot rails of the treadmill. Find the clip attached to the key, and slide the clip onto the waistband of your clothing. Next, in-

sert the key fully into the console. Test the clip by carefully taking a few steps backward until the key is pulled from the console. If the key is not pulled from the console, adjust the position of the clip as needed. Then, remove the key from the console.

#### Plug in the power cord. 2

See HOW TO PLUG IN THE POWER CORD on page 8.

### Move the on/off switch to the on position.

Locate the on/off switch on the treadmill near the power cord. Move the switch to the on position.

### Insert the key fully into the console.

When the key is inserted, the four displays and various indicators on the console will light.

	VV
ELECT MPH KEY	<b>v</b> o

To use the manual mode of the console, follow the steps beginning on this page. To use iFIT.com CD or video programs, see page 14. To use iFIT.com programs directly from our internet site, see page 16.

Note: The console can display speed and distance in either miles or kilometers (see SPEED/MIN-MILE DIS-PLAY on page 11). For simplicity, all instructions in this manual refer to miles.

#### HOW TO USE THE MANUAL MODE

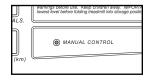

#### Insert the key fully into the console. F

See GETTING STARTED on this page.

### 2

### Select the manual mode.

When the key is inserted, the manual mode will automatically be selected, as shown by the MANUAL CON-TROL indicator. If the

iFIT.com indicator is lit, press the PROGRAM button to select the manual mode.

### Press the START button or the SPEED $\triangle$ button **3** Press and a ..... to start the walking belt.

A moment after the button is pressed, the walking belt will begin to move at 1 mph. Hold the handrails and carefully begin walking.

As you exercise, change the speed of the walking belt as desired by pressing the SPEED  $\triangle$  and  $\bigtriangledown$ buttons. To change the speed setting quickly, press the QUICK SPEED buttons. Note: After the buttons are pressed, it will take a moment for the walking belt to reach the selected speed setting.

To stop the walking belt, press the STOP button. The TIME display will begin to flash. To restart the walking belt, press the START button or the SPEED  $\triangle$  button.

### 4

### Change the incline of the treadmill as desired.

To change the incline of the treadmill, press the incline buttons. Each time a button is pressed, the incline will change by 0.5%. The buttons can be held down to change the incline rapidly.

Note: In the incline display, the first indicator will light when the incline is set at 1.5%. The second indicator will light when the

		-				9 D 	191	ла	у	
	1	2	3	4	5	6	7	8	9	10 %Grade
$\nabla$	0	0	0	0	0	0	0	0	0	OΔ
POV	VER	INC	LINE							

incline is set at 2% or 2.5%, the third indicator will light when the incline is set at 3% or 3.5%, and so forth. After the incline buttons are pressed, it will take a moment for the treadmill to reach the selected incline setting.

#### Follow your progress with the LED track and the four displays.

### The LED

Track—The LED track represents a distance of 1/4 mile. As you exercise, the indicators around the track will light in

sequence until you have walked or run 1/4 mile. A new lap will then begin.

### **DISTANCE/LAPS**

**display**—This display shows the distance that you have walked or run and the number of laps you have completed

(one lap equals 1/4 mile). The display will alternate between one number and the other every seven seconds, as shown by the arrows in the display.

TIME display-This display shows the elapsed time.

# 19:5 TIME

CALORIES

12 2

FAT CALS.

CALORIES/FAT CALS **display**—This display shows the approximate numbers of calories and fat calories you have burned (see FAT BURN-

ING on page 21). Every seven seconds, the display will change from one number to the other, as shown by the arrows in the

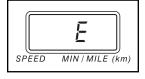

### **SPEED/MIN-MILE**

**display**—This display shows the speed of the walking belt and your current pace (pace is

display.	
	4.3

SPEED MIN / MILE (km) measured in minutes per mile). The display will alternate between one number and the other every seven seconds, as shown by the arrows in the display. Note: When the SPEED buttons are pressed, the display will show the current speed setting.

Note: The console can display speed and distance in either miles or kilometers. To see which unit of measurement is selected, hold down the

STOP button while inserting the key into the console. An "E" for English miles or an "M" for metric kilometers will appear in the SPEED/MIN-MILE display. Press the SPEED  $\triangle$  button to change the unit of measurement. When the desired unit of measurement is selected, remove and then reinsert the key.

### 6 key. When you are finished exercising, remove the

Step onto the foot rails and press the STOP button. Adjust the incline of the treadmill to the lowest setting. The incline must be at the lowest setting when the treadmill is folded to the storage position or the treadmill will be damaged. Next, remove the key from the console and put it in a secure place. Note: If the displays and indicators on the console remain lit after the key is removed, the console is in the "demo" mode. Refer to page 17 and turn off the demo mode.

When you are finished using the treadmill, move the on/off switch near the power cord to the off position and unplug the power cord.

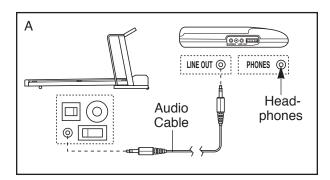

# HOW TO CONNECT THE TREADMILL TO YOUR CD PLAYER, VCR, OR COMPUTER

To use iFIT.com CD's, the treadmill must be connected to your portable CD player, portable stereo, home stereo, or computer with CD player. See pages 12 and 13 for connecting instructions. To use iFIT.com videocassettes, the treadmill must be connected to your VCR. See page 14 for connecting instructions. To use iFIT.com programs directly from our internet site, the treadmill must be connected to your home computer. See page 13 for connecting instructions.

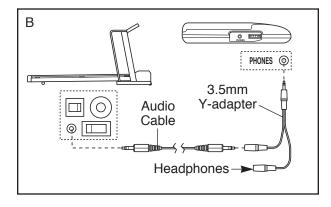

### HOW TO CONNECT YOUR PORTABLE CD PLAYER

### Note: If your CD player has separate LINE OUT and PHONES jacks, see instruction A below. If your CD player has only one jack, see instruction B.

A. Plug one end of the audio cable into the jack on the front of the treadmill near the power cord. Plug the other end of the cable into the LINE OUT jack on your CD player. Plug your headphones into the PHONES jack.

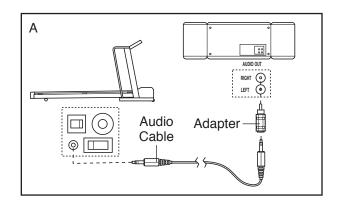

B. Plug one end of the audio cable into the jack on the front of the treadmill near the power cord. Plug the other end of the cable into a 3.5mm Y-adapter (available at electronics stores). Plug the Y-adapter into the PHONES jack on your CD player. Plug your headphones into the other side of the Y-adapter.

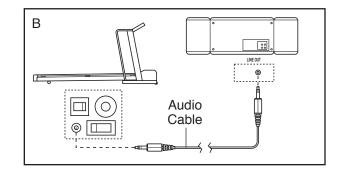

### HOW TO CONNECT YOUR PORTABLE STEREO

Note: If your stereo has an RCA-type AUDIO OUT jack, see instruction A below. If your stereo has a 3.5mm LINE OUT jack, see instruction B. If your stereo has only a PHONES jack, see instruction C.

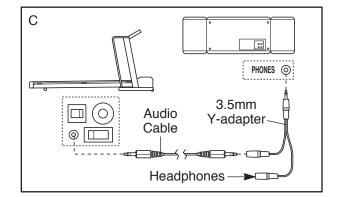

A. Plug one end of the audio cable into the jack on the front of the treadmill near the power cord. Plug the other end of the cable into the included adapter. Plug the adapter into an AUDIO OUT jack on your stereo.

B. Plug one end of the audio cable into the jack on the front of the treadmill near the power cord. Plug the other end of the cable into the LINE OUT jack on your stereo.

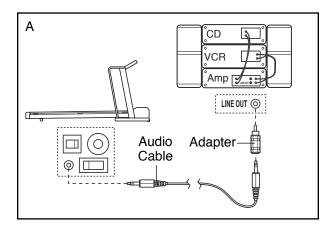

C. Plug one end of the audio cable into the jack on the front of the treadmill near the power cord. Plug the other end of the cable into a 3.5mm Y-adapter (available at electronics stores). Plug the Y-adapter into the PHONES jack on your stereo. Plug your headphones into the other side of the Y-adapter.

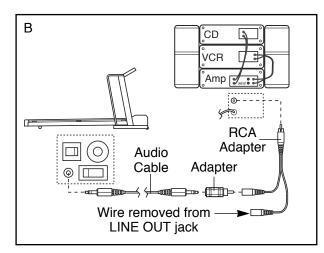

#### HOW TO CONNECT YOUR HOME STEREO

Note: If your stereo has an unused LINE OUT jack, see instruction A below. If the LINE OUT jack is being used, see instruction B.

A. Plug one end of the audio cable into the jack on the front of the treadmill near the power cord. Plug the other end of the cable into the included adapter. Plug the adapter into the LINE OUT jack on your stereo.

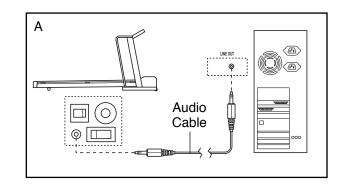

B. Plug one end of the audio cable into the jack on the front of the treadmill near the power cord. Plug the other end of the cable into the included adapter. Plug the adapter into an RCA adapter (available at electronics stores). Next, remove the wire that is currently plugged into the LINE OUT jack on your stereo and plug the wire into the unused side of the RCA adapter. Plug the RCA adapter into the LINE OUT jack on your stereo.

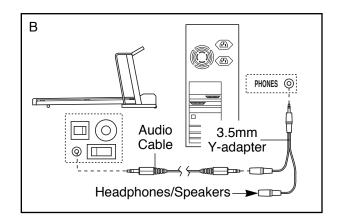

#### HOW TO CONNECT YOUR COMPUTER

# Note: If your computer has a 3.5mm LINE OUT jack, see instruction A. If your computer has only a PHONES jack, see instruction B.

A. Plug one end of the audio cable into the jack on the front of the treadmill near the power cord. Plug the other end of the cable into the LINE OUT jack on your computer.

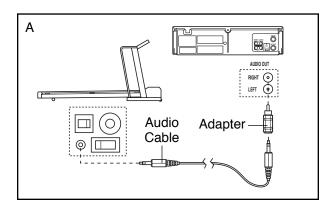

B. Plug one end of the audio cable into the jack on the front of the treadmill near the power cord. Plug the other end of the cable into a 3.5mm Y-adapter (available at electronics stores). Plug the Y-adapter into the PHONES jack on your computer. Plug your headphones or speakers into the other side of the Y-adapter.

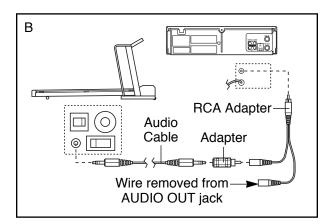

### HOW TO CONNECT YOUR VCR

Note: If your VCR has an unused AUDIO OUT jack, see instruction A below. If the AUDIO OUT jack is being used, see instruction B. If you have a TV with a built-in VCR, see instruction B. If your VCR is connected to your home stereo, see HOW TO **CONNECT YOUR HOME STEREO on page 13.** 

A. Plug one end of the audio cable into the jack on the front of the treadmill near the power cord. Plug the other end of the cable into the included adapter. Plug the adapter into the AUDIO OUT jack on your VCR.

B. Plug one end of the audio cable into the jack on the front of the treadmill near the power cord. Plug the other end of the cable into the included adapter. Plug the adapter into an RCA adapter (available at electronics stores). Next, remove the wire that is currently plugged into the AUDIO OUT jack on your VCR and plug the wire into the unused side of the RCA adapter. Plug the RCA adapter into the AUDIO OUT jack on your VCR.

### HOW TO USE IFIT.COM CD AND VIDEO PROGRAMS

To use iFIT.com CD's or videocassettes, the treadmill must be connected to your portable CD player, portable stereo, home stereo, computer with CD player, or VCR. See HOW TO CONNECT THE TREADMILL TO YOUR CD PLAYER, VCR, OR COMPUTER on page 12. Note: One iFIT.com CD is included. To purchase other iFIT.com CD's or iFIT.com videocassettes. call toll-free 1-800-884-0620.

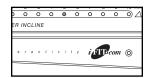

Follow the steps below to use an iFIT.com CD or video program. Note: The instructions included in the CD case describe how to use the CD with a variety of **PROFORM treadmills. Some instructions may not** apply to this treadmill.

Insert the key fully into the console.

See GETTING STARTED on page 10.

#### Press the PROGRAM button. 2

When the key is inserted, the manual mode will automatically be selected. To use an iFIT.com CD or video program, press the

PROGRAM button. The iFIT.com indicator will liaht.

#### Insert the iFIT.com CD or videocassette. 3

If you are using an iFIT.com CD, insert the CD into your CD player. If you are using an iFIT.com videocassette, insert the videocassette into your VCR.

Press the PLAY button on your CD player or VCR.

A moment after the button is pressed, your personal trainer will begin guiding you through your workout. Simply follow your personal trainer's instructions. Note: If the TIME display is flashing, press the START button or the SPEED  $\triangle$  button on the console. The treadmill will not respond to a CD or video program when the TIME display is flashing.

During the CD or video program, an electronic "chirping" sound will alert you when the speed and/or incline of the treadmill is about to change. CAUTION: Always listen for the "chirp" and be prepared for speed and/or incline changes. In some instances, the speed and/or incline may change before the personal trainer describes the change.

If the speed or incline settings are too high or too low, you can manually override the settings at any time by pressing the SPEED or INCLINE buttons on the console. However, when the next "chirp" is heard, the speed and/or incline will change to the next settings of the CD or video program.

To stop the program at any time, press the STOP button on the console. The TIME display will begin to flash. To restart the program, press the START button or the SPEED  $\triangle$  button again. After a moment, the walking belt will begin to move at 1 mph. When the next "chirp" is heard, the speed and incline will change to the next settings of the CD or video program. The program can also be stopped by pressing the STOP button on your CD player or VCR.

When the CD or video program is completed, the walking belt will stop and the TIME display will begin to flash. Note: To use another CD or video program, press the STOP button or remove the key and go to step 1 on page 14.

Note: If the speed or incline of the treadmill does not change when a "chirp" is heard:

- make sure that the iFIT.com indicator is lit and that the TIME display is not flashing. If the display is flashing, press the START button or the SPEED  $\triangle$  button on the console
- adjust the volume of your CD player or VCR. If the volume is too high or too low, the console may not detect the program signals

- make sure that the audio cable is properly connected, that it is fully plugged in, and that it is not wrapped around a power cord
- if you are using your portable CD player and the CD skips, set the CD player on the floor or another flat surface instead of on the console.

**5** Follow your progress with the LED track and the four displays.

See step 5 on page 11.

Measure your pulse, if desired.

See step 6 on page 11.

When the iFIT.com CD or video program is finished, remove the key.

Step onto the foot rails and adjust the incline of the treadmill to the lowest setting. The incline must be at the lowest setting when the treadmill is folded to the storage position or the treadmill will be damaged. Next, remove the key from the console and put it in a secure place. Note: If the displays and indicators on the console remain lit after the key is removed, the console is in the "demo" mode. Refer to page 17 and turn off the demo mode.

When you are finished using the treadmill, move the on/off switch near the power cord to the off position and unplug the power cord.

CAUTION: Always remove iFIT.com CD's and videocassettes from your CD player or VCR when you are finished using them.

# HOW TO USE PROGRAMS DIRECTLY FROM OUR INTERNET SITE

With iFIT.com membership, you can go to our new internet site at www.iFIT.com and access a large selection of programs that interactively control your treadmill to help you achieve your specific exercise goals. In addition, you can play iFIT.com audio and video programs directly from the internet. By adding an optional upgrade module to the console, you can use even more features on our internet site. Explore www.iFIT.com to try free program demos and to find out how easy it is to become a member. To purchase an upgrade module, call toll-free 1-800-735-0768.

To use programs from our internet site, the treadmill must be connected to your home computer. See HOW TO CONNECT YOUR COMPUTER on page 13. In addition, you must have at least a 56K modem and an account with an internet service provider. A list of additional system and software requirements will be found on our internet site.

Follow the steps below to use a program from our internet site.

### Insert the key fully into the console.

See GETTING STARTED on page 10.

### **2** Press the PROGRAM button.

When the key is inserted, the manual mode will automatically be selected. To use a program from our internet site, press the PRO-

5

INCLINE	0 0 0 0 0	0 0 0 0 0	0	-	0	-	0		0		0
rectivity imcom ()									INE	CL	IN

Ű	-										

GRAM button. The iFIT.com indicator will light.

# Go to your computer and start an internet connection.

Follow the desired links on our internet site to select a program.

Read and follow the on-line instructions for using a program.

# Follow the on-line instructions to start the program.

When you start the program, an on-screen countdown will begin.

### Return to the treadmill and stand on the foot rails. Find the clip attached to the key and slide the key onto the waistband of your clothing.

When the on-screen countdown ends, the program will begin and the walking belt will begin to move. Hold the handrails, step onto the walking belt, and begin walking.

During the program, an electronic "chirping" sound will alert you when the speed and/or incline of the treadmill is about to change. **CAUTION: Always listen for the "chirp" and be prepared for speed and/or incline changes.** 

If the speed or incline settings are too high or too low, you can manually override the settings at any time by pressing the SPEED or INCLINE buttons on the console. However, when the next "chirp" is heard, the speed and/or incline will change to the next settings of the program.

To stop the program at any time, press the STOP button on the console. The TIME display will begin to flash. To restart the program, press the START button or the SPEED  $\triangle$  button. After a moment, the walking belt will begin to move at 1.0 mph. When the next "chirp" is heard, the speed and incline will change to the next settings of the program.

When the program is completed, the walking belt will stop and the TIME display will begin to flash. Note: To use another program, press the STOP button and go to step 5 above.

Note: If the speed or incline of the treadmill does not change when a "chirp" is heard, make sure that the iFIT.com indicator is lit and that the TIME display is not flashing. In addition, make sure that the audio cable is properly connected, that it is fully plugged in, and that it is not wrapped around a power cord.

Follow your progress with the LED track and the four displays.

See step 5 on page 11.

Measure your pulse, if desired.

See step 6 on page 11.

**0** When the program is finished, remove the key.

See step 7 on page 15.

#### THE INFORMATION MODE/DEMO MODE

The console features an information mode that keeps track of the total number of hours that the treadmill has been operated and the total number of miles that the walking belt has moved. The information mode also allows you to switch the console from miles per hour to kilometers per hour. In addition, the information mode allows you to turn on and turn off the demo mode.

To select the information mode, hold down the STOP button while inserting the key into the console. When the information mode is selected, the following information will be shown:

159

LAPS

82

TIME

E

SPEED

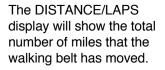

CALORIES

MIN / MILE (km)

ſ

FAT CALS.

DISTANCE

The TIME display will show the total number of hours the treadmill has been used.

An "E" for English miles or an "M" for metric kilometers, will appear in the SPEED/MIN-MILE display. Press the SPEED  $\triangle$  button to change the unit of measurement.

### **IMPORTANT: The CALO-RIES/FAT CALS display** should be blank. If a "d" appears in the display, the con-

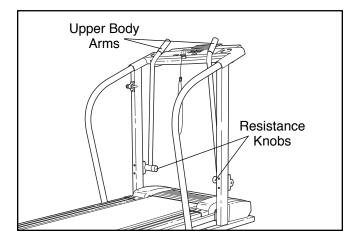

sole is in the "demo" mode. This mode is intended to be used only when a treadmill is displayed in a store.

When the console is in the demo mode, the power cord can be plugged in, the key can be removed from the console, and the displays and indicators on the console will automatically light in a preset sequence, although the buttons on the console will not operate. If a "d" appears in the CALORIES/FAT CALS display when the information mode is selected, press the SPEED  $\bigtriangledown$ button so the CALORIES/FAT CALS display is blank.

To exit the information mode, remove the key from the console.

#### HOW TO USE THE UPPER BODY ARMS

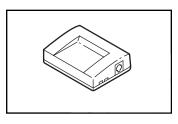

As you exercise on the treadmill, you can hold either the handrails or the upper body arms. The upper body arms are designed to exercise your arms, shoulders, and back for a total body workout. Hold one upper body arm with each hand, and move them forward and back as you walk on the treadmill.

To vary the intensity of your upper body exercise, the resistance of the upper body arms can be adjusted. To increase the resistance, turn the resistance knobs clockwise; to decrease the resistance, turn the knobs counterclockwise.

### THE OPTIONAL IFIT.COM MODULE

By adding an optional iFIT.com module to the treadmill, you can use virtually endless features from our internet site. Imagine on-line competitions, personal training sessions via

the internet, and the ability to use your computer to track your workouts. For information about purchasing the optional iFIT.com module, call toll-free 1-800-884-0620.

## HOW TO FOLD AND MOVE THE TREADMILL

### HOW TO FOLD THE TREADMILL FOR STORAGE

Before folding the treadmill, adjust the incline to the lowest position. If this is not done, the treadmill may be permanently damaged. Next, unplug the power cord. CAUTION: You must be able to safely lift 45 pounds (20 kg) in order to raise, lower, or move the treadmill.

- 1. Hold the treadmill with your hands in the locations shown at the right. CAUTION: To decrease the possibility of injury, bend your legs and keep your back straight. As you raise the treadmill, make sure to lift with your legs rather than your back. Raise the treadmill about halfway to the vertical position.
- 2. Move your right hand to the position shown and hold the treadmill firmly. Hold the lock knob with your left hand and pull it to the left. Raise the treadmill until the lock knob is aligned with the slot in the catch. (Note: You may need to push the handrail to the side slightly.) Slowly release the lock knob. Make sure that the pin on the lock knob is inserted into the slot.

To protect the floor or carpet from damage, place a mat under the treadmill. Keep the treadmill out of direct sunlight. Do not leave the treadmill in the storage position in temperatures above 85° Fahrenheit.

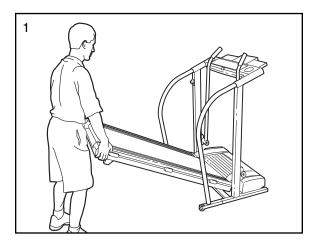

### HOW TO MOVE THE TREADMILL

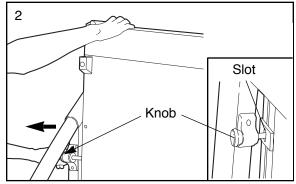

Before moving the treadmill, convert the treadmill to the storage position as described above. Make sure that the storage latch is closed fully over the catch.

- 1. Hold the handrails as shown and place one foot against a wheel.
- 2. Tilt the treadmill back until it rolls freely on the wheels. Carefully move the treadmill to the desired location. Never move the treadmill without tipping it back. To reduce the risk of injury, use extreme caution while moving the treadmill. Do not attempt to move the treadmill over an uneven surface.
- 3. Place one foot on the base, and carefully lower the treadmill until it is resting in the storage position.

### HOW TO LOWER THE TREADMILL FOR USE

- 1. Refer to drawing 2 above. Hold the upper end of the treadmill with your right hand as shown. Using your left thumb, slide the storage latch to the left and hold it. Pivot the treadmill down until the frame is past the storage latch.
- 2. Refer to drawing 1 above. Hold the treadmill firmly with both hands, and lower the treadmill to the floor. **Do not** drop the treadmill frame to the floor. CAUTION: To decrease the possibility of injury, bend your legs and keep your back straight.

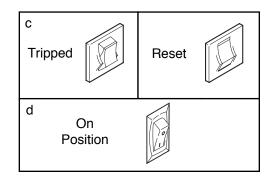

### TROUBLE-SHOOTING

Most treadmill problems can be solved by following the simple steps below. Find the symptom that applies, and follow the steps listed. If further assistance is needed, call our toll-free HELPLINE at 1-800-736-6879, Monday through Saturday, 7 a.m. until 7 p.m. Central Time (excluding holidays).

### 1. SYMPTOM: THE POWER DOES NOT TURN ON

- a. Make sure that the power cord is plugged into a surge suppressor, and that the surge suppressor is plugged into a properly grounded outlet (see page 8). Use only a single-outlet surge suppressor that is UL 1449 listed as a transient voltage surge suppressor (TVSS). The surge suppressor must have a UL suppressed voltage rating of 400 volts or less and a minimum surge dissipation of 450 joules. The surge suppressor must be electrically rated for 120 volts AC and 15 amps. Important: The treadmill is not compatible with GFCI-equipped outlets.
- b. After the power cord has been plugged in, make sure that the key is fully inserted into the console.
- c. Check the circuit breaker located on the treadmill near the power cord. If the switch protrudes as shown, the circuit breaker has tripped. To reset the circuit breaker, wait for five minutes and then press the switch back in.
- d. Check the on/off switch located on the treadmill near the power cord. The switch must be in the on position.

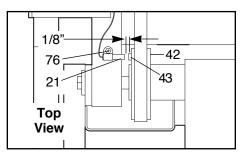

### 2. SYMPTOM: THE POWER TURNS OFF DURING USE

- a. Check the circuit breaker located on the treadmill frame near the power cord (see 1. c. above). If the circuit breaker has tripped, wait for five minutes and then press the switch back in.
- b. Make sure that the power cord is plugged in.
- c. Remove the key from the console. Reinsert the key fully into the console.
- d. Make sure that the on/off switch is in the on position.
- e. If the treadmill still will not run, please call our toll-free HELPLINE.

### 3. SYMPTOM: THE DISPLAYS OF THE CONSOLE DO NOT FUNCTION PROPERLY

a. Remove the key from the console and **unplug the power cord.** Remove the screws from the hood and carefully remove the hood. Locate the Reed Switch (21) and the Magnet (43) on the left side of the Pulley (42). Turn the Pulley until the Magnet is aligned with the Reed Switch. **Make sure that the gap between the Magnet and the Reed Switch is about 1/8**". If necessary, loosen the Reed Switch Screw (76) and move the Reed Switch slightly. Retighten the Screw. Re-attach the hood, and run the treadmill for a few minutes to check for a correct speed reading.

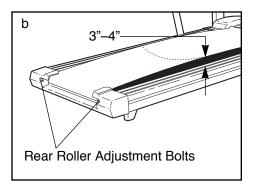

### 4. SYMPTOM: THE INCLINE OF THE TREADMILL DOES NOT CHANGE CORRECTLY OR DOES NOT CHANGE WHEN IFIT.COM CD'S AND VIDEOS ARE PLAYED

a. With the key inserted in the console, press one of the INCLINE buttons. While the incline is changing, remove the key. After a few seconds, re-insert the key. The treadmill will automatically rise to the maximum incline level and then return to the minimum level. This will recalibrate the incline.

### 5. SYMPTOM: THE WALKING BELT SLOWS WHEN WALKED ON

- a. Use only a UL-listed surge suppressor, rated at 15 amps, with a 14-gauge cord of five feet or less in length.
- b. If the walking belt is overtightened, treadmill performance may decrease and the walking belt may be permanently damaged. Remove the key and UNPLUG THE POWER CORD. Using the allen wrench, turn both rear roller adjustment bolts counterclockwise, 1/4 of a turn. When the walking belt is properly tightened, you should be able to lift each side of the walking belt 3 to 4 inches off the walking platform. The center of the walking belt should just touch the walking platform. Be careful to keep the walking belt centered. Plug in the power cord, insert the key and run the treadmill for a few minutes. Repeat until the walking belt is properly tightened.

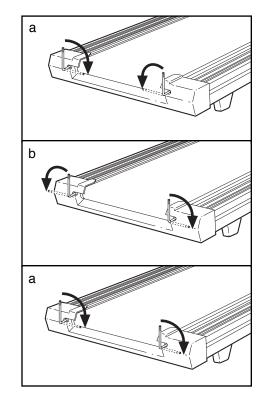

c. If the walking belt still slows when walked on, please call our toll-free HELPLINE.

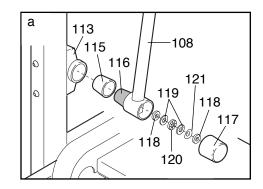

#### 6. SYMPTOM: THE WALKING BELT IS OFF-CENTER

- a. If the walking belt has shifted to the left, first remove the key and UNPLUG THE POWER CORD. Using the allen wrench, turn the left rear roller adjustment bolt clockwise, and the right bolt counterclockwise, 1/4 of a turn each. Be careful not to overtighten the walking belt. Plug in the power cord, insert the key and run the treadmill for a few minutes. Repeat until the walking belt is centered.
- b. If the walking belt has shifted to the right, first remove the key and UNPLUG THE POWER CORD. Using the allen wrench, turn the left rear roller adjustment bolt counterclockwise, and the right bolt clockwise, 1/4 of a turn each. Be careful not to overtighten the walking belt. Plug in the power cord, insert the key and run the treadmill for a few minutes. Repeat until the walking belt is centered.
- c. If the walking belt slips when walked on, first remove the key and UNPLUG THE POWER CORD. Using the allen wrench, turn both rear roller adjustment bolts clockwise, 1/4 of a turn. When the walking belt is correctly tightened, you should be able to lift each side of the walking belt 2 to 3 inches off the walking platform. Be careful to keep the walking belt centered. Plug in the power cord, insert the key and run the treadmill for a few minutes. Repeat until the walking belt is properly tightened.

#### 7. SYMPTOM: ONE OF THE UPPER BODY ARMS SQUEAKS DURING USE

a. (Note: Correcting this problem requires a small amount of white marine grease, available at most hardware stores.) Turn the Resistance Knob (117) counterclockwise until it can be removed. Remove the Resistance Cone (116) and the Upper Body Arm (108), along with the Resistance Washers (118), Spring Washer (121), Thrust Washers (119), and Thrust Bearing (120). (Note: If the Resistance Sleeve [115] comes out of the Resistance Bracket [113], press it back in.) Apply a thin layer of white marine grease to the outer surface of the Resistance Cone (116). Reattach all parts in the order shown.

## **CONDITIONING GUIDELINES**

### A WARNING: Before beginning

this or any exercise program, consult your physician. This is especially important for individuals over the age of 35 or individuals with pre-existing health problems.

The following guidelines will help you to plan your exercise program. Remember—these are general guidelines only. For more detailed exercise information, obtain a reputable book or consult your physician.

### **EXERCISE INTENSITY**

Whether your goal is to burn fat or to strengthen your cardiovascular system, the key to achieving the desired results is to exercise with the proper intensity. The proper intensity level can be found by using your heart rate as a guide. The chart below shows recommended heart rates for fat burning and aerobic exercise.

HEART RATE	TRAINING	g zoni	ES				
AEROBIC	165	155	145	140	130	125	115
MAX FAT BURN	145	138	130	125	118	110	103
FAT BURN	125	120	115	110	105	95	90
	Age 20	30	40	50	60	70	80

To find the proper heart rate for you, first find your age at the bottom of the chart (ages are rounded off to the nearest ten years). Next, find the three numbers at the top of your age. The three numbers are your "training zone." The lower two numbers are recommended heart rates for fat burning; the higher number is the recommended heart rate for aerobic exercise.

### Fat Burning

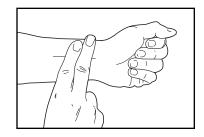

To burn fat effectively, you must exercise at a relatively low intensity level for a sustained period of time. During the first few minutes of exercise, your body uses easily accessible carbohydrate calories for energy. Only after the first few minutes does your body begin to use stored fat calories for energy. If your goal is to burn fat, adjust the speed and incline of the treadmill until your heart rate is near one of the lower two numbers in your training zone.

### Aerobic Exercise

If your goal is to strengthen your cardiovascular system, your exercise must be "aerobic." Aerobic exercise is activity that requires large amounts of oxygen for prolonged periods of time. This increases the demand on the heart to pump blood to the muscles, and on the lungs to oxygenate the blood. For aerobic exercise, adjust the speed and incline of the treadmill until your heart rate is near the highest number in your training zone.

### HOW TO MEASURE YOUR HEART RATE

To measure your heart rate, stop exercising and place two fingers on your wrist as shown. Take a six-second heartbeat count, and multiply the result by ten to find your heart

rate. (A six-second count is used because your heart rate drops quickly when you stop exercising.) If your heart rate is too high or too low, adjust the speed or incline of the treadmill accordingly.

### WORKOUT GUIDELINES

A well-rounded workout includes the following three important parts:

**A Warm-up**—Start each workout with 5 to 10 minutes of stretching and light exercise (see SUGGESTED STRETCHES on page 22). A proper warm-up increases your body temperature, heart rate, and circulation in preparation for exercise.

**Training Zone Exercise**—After warming up, increase the intensity of your exercise until your pulse is in your training zone for 20 to 60 minutes. (During the first few weeks of your exercise program, do not keep your pulse in your training zone for longer than 20 minutes.) Breathe regularly and deeply as you exercise—never hold your breath.

**A Cool-down**—Finish each workout with 5 to 10 minutes of stretching to cool down. This will increase the flexibility of your muscles and will help to prevent postexercise problems.

#### **EXERCISE FREQUENCY**

plete up to five workouts each week if desired.

To maintain or improve your condition, complete three workouts each week, with at least one day of rest between workouts. After a few months, you may comThe key to success is to make exercise a regular and enjoyable part of your everyday life.

#### SUGGESTED STRETCHES

The correct form for several basic stretches is shown at the right. Move slowly as you stretch—never bounce.

### 1. Toe Touch Stretch

Stand with your knees bent slightly and slowly bend forward from your hips. Allow your back and shoulders to relax as you reach down toward your toes as far as possible. Hold for 15 counts, then relax. Repeat 3 times. Stretches: Hamstrings, back of knees, and back.

### 2. Hamstring Stretch

Sit with one leg extended. Bring the sole of the opposite foot toward you and rest it against the inner thigh of your extended leg. Reach toward your toes as far as possible. Hold for 15 counts, then relax. Repeat 3 times for each leg. Stretches: Hamstrings, lower back, and groin.

#### 3. Calf/Achilles Stretch

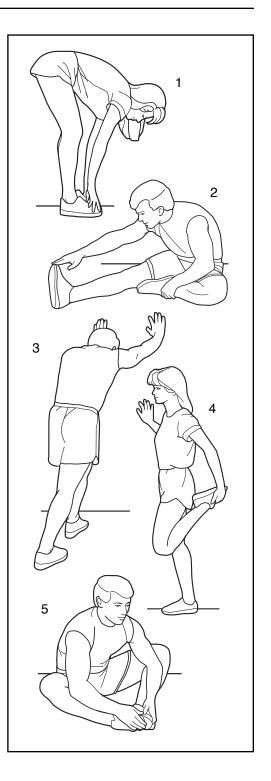

With one leg in front of the other, reach forward and place your hands against a wall. Keep your back leg straight and your back foot flat on the floor. Bend your front leg, lean forward and move your hips toward the wall. Hold for 15 counts, then relax. Repeat 3 times for each leg. To cause further stretching of the achilles tendons, bend your back leg as well. Stretches: Calves, achilles tendons, and ankles.

### 4. Quadriceps Stretch

With one hand against a wall for balance, reach back and grasp one foot with your other hand. Bring your heel as close to your buttocks as possible. Hold for 15 counts, then relax. Repeat 3 times for both legs. Stretches: Quadriceps and hip muscles.

### 5. Inner Thigh Stretch

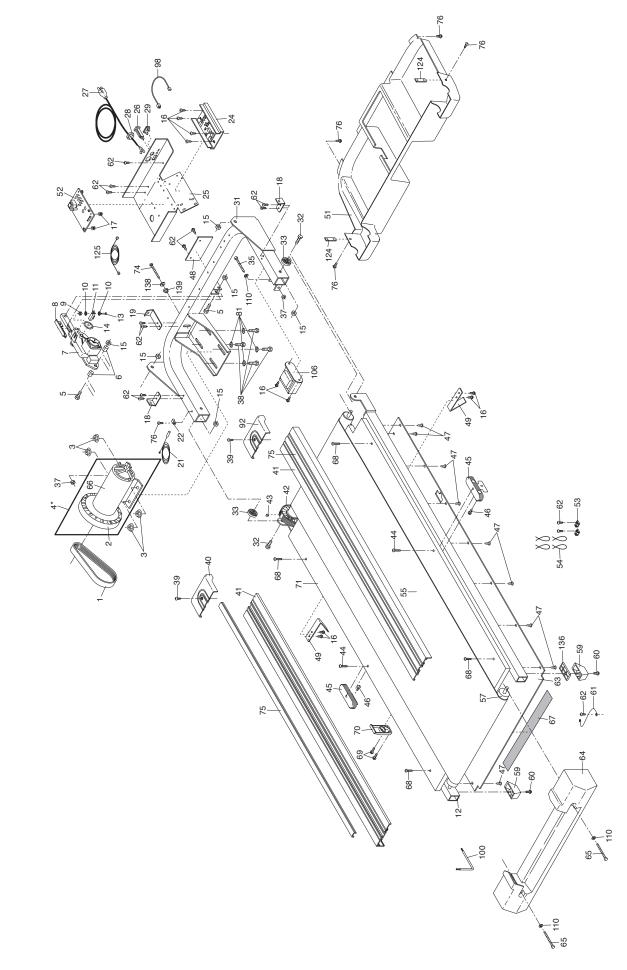

Sit with the soles of your feet together and your knees outward. Pull your feet toward your groin area as far as possible. Hold for 15 counts, then relax. Repeat 3 times. Stretches: Quadriceps and hip muscles.

### PART LIST-Model No. 831.299450

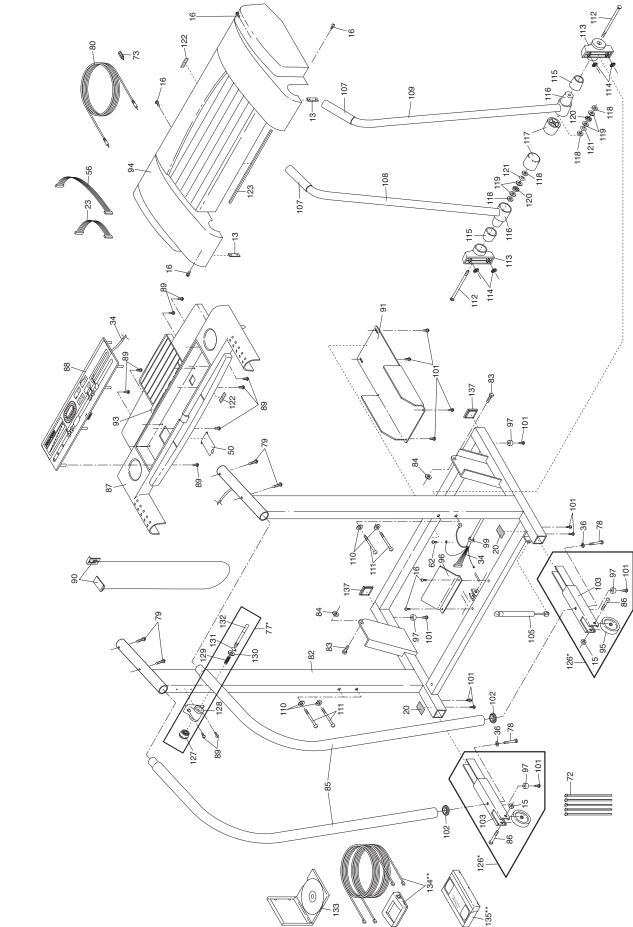

To locate the parts listed below, refer to the EXPLODED DRAWING attached in the center of this manual.

1   Motor Belt   54   4   Cable Tie   107   2   Foam Grip     2   1   Pulley/Flywheel/Fan   55   1   Walking Belt   107   2   Foam Grip     4'   Motor Nut   56   1   Wire Harness   100   1   Upper Body Arm     4'   Motor Nut   56   1   Rear Fool   100   1   Upper Body Arm     5   2   Incline Motor Spacer   60   2   Rear Fool Screw   111   Resistance Bracket   Bolt     7   1   Incline Motor Spacer   61   Roor More   113   Resistance Bracket   Bolt     10   2   Star Washer   64   Rear Folder Adj. ### **QUESTIONS?**

If you find that:

- you need help assembling or operating the PROFORM 635CW treadmill
- a part is missing
- or you need to schedule repair service

call our toll-free HELPLINE

1-800-736-6879

Monday–Saturday, 7 am–7 pm Central Time (excluding holidays)

### REPLACEMENT PARTS

If parts become worn and need to be replaced, call the following toll-free number

1-800-FON-PART (1-800-366-7278) The model number and serial number of your PROFORM<sup>®</sup> 635CW treadmill are listed on a decal attached to the frame. See the front cover of this manual to find the location of the decal.

All replacement parts are available for immediate purchase or special order when you visit your nearest SEARS Service Center. To request service or to order parts by telephone, call the toll-free numbers listed at the left.

When requesting help or service, or ordering parts, please be prepared to provide the following information:

- The NAME OF THE PRODUCT (PROFORM® 635CW treadmill)
- The MODEL NUMBER OF THE PRODUCT (831.299450)
- The KEY NUMBER AND DESCRIPTION OF THE PART (see the EXPLODED DRAWING and PART LIST included in this manual)

### FULL 90 DAY WARRANTY

For 90 days from the date of purchase, if failure occurs due to defect in material or workmanship in this SEARS TREADMILL EXERCISER, contact the nearest SEARS Service Center throughout the United States and SEARS will repair or replace the TREADMILL EXERCISER, free of charge.

This warranty does not apply when the TREADMILL EXERCISER is used commercially or for rental purposes.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state.

### SEARS, ROEBUCK AND CO., DEPT. 817WA, HOFFMAN ESTATES, IL 60179
