

MEV30K gigabeat V Series Portable Video Player

DIGITAL MEDIA ON THE GO!

The new Toshiba MEV30K Portable Video Player puts all of your entertainment needs in the palm of your hand. With a big, bright 3.5" diagonal LCD screen, the MEV30K let's you enjoy full, feature length movies, up to 8 hours² worth! And getting videos is really easy! Whether you subscribe to movie services like VongoSM or record videos on your PC, the newest member of the gigabeat family lets you take your entertainment with you. Thanks to Microsoft[®] Portable Media Center software, downloading to your gigabeat is a snap.

If you never seem to find the time to print all of your digital still images from your camera, the MEV30K is your answer. Simply connect your digital camera via the USB³ input and all of your images will download onto your gigabeat--no need to connect to your PC either!

Of course you're not always going to watch movies, there will be those short commutes to work when you might just want to sit back, relax and enjoy your favorite music. That's why the new MEV30K also let's you download your favorite music from subscription sites, buy your music from music sites and even rip your favorite CDs. Again, thanks to Microsoft's PMC platform it's always quick and easy to get your content. It even has a built-in speaker so that you can share your music with your friends.

All of this entertainment means needing enough juice to keep it running, right? The MEV30K comes with a rechargeable Lithium Ion battery that allows for up to 8 hours² of continuous playback for your favorite movies and videos and up to 30 hours² of continuous playback when just enjoying music.

¹ GB means one billion bytes when referring to hard drive storage capacity.

² Battery life and number of charge cycles will vary depending on use and settings. Rechargeable battery has a limited service life and may eventually need to be replaced. Continuous audio playback is based on Harmonics Improvement Technology being set to the "off" position.

³ USB input is compatible only with digital cameras that support the "USB Mass Storage Classification".
