F.A.Q's

1. **Q: What is the major benefit of the 5.8GHz frequency?**

A: Superior Clarity.

2. **Q: Will the phone work with a Wireless LAN system?**

A: Yes, 5.8GHz technology will not interfere with typical wireless networks such as 802.11b, 802.11g or 802.11n because it operates on a different frequency.

3. **Q: Do I need more than one phone socket to have multi-handset capabilities?**

A: No, with just the one phone line in to the house this phone is able to communicate with up to 10 handsets.

4. **Q: What is the purpose of a Dual LCD Display?**

A: These phones have a display on both the handset and base so you can enjoy and access all the phone's features from anywhere.

5. **Q: Do all the handsets have the baby/room monitor feature?**

A: Yes and the operating range of this feature is just the same as the talking range of the phone.
