BNC Coaxial Connectors

IDEAL coaxial connectors are available in two grades. A premium specification grade features precision machined brass bodies with nickel plating. The commercial grade consists of machined diecast components with nickel plating. A variety of connectors handle different termination types, cable size, impedance rating and attachment means.

■ Connector construction covers both plenum and non-plenum cable jackets

■ Captive gold center contacts provide maximum conductivity and minimal resistance

■ Nickel plating resists corrosion, tarnish and ensures signal quality

■ Meets military specifications. MS39012 and MIL202 where applicable.

■ Available in both small and bulk quantities to suit a range of application requirements

Polishing Films for Fiber Optic Connectors

- For optimum connector polishing results, we recommend a three-step procedure using 0.5µm, 3µm and 12µm 3 in. x 6 in. aluminum oxide polishing films
- Lot-to-lot consistency in our films means repeatable connector finishes on ceramic, stainless steel, plastic and composite ferrules
- A single sheet will typically yield 10 to 20 connectors when using the recommended 3-step procedure
