Preface

Before using this information and the product it supports, please read the following general information.

- This Service Guide provides you with all technical information relating to the BASIC CONFIGURATION decided for Acer's *global* product offering. To better fit local market requirements and enhance product competitiveness, your regional office MAY have decided to extend the functionality of a machine (e.g. add-on card, modem, or extra memory capability). These LOCALIZED FEATURES will NOT be covered in this generic service guide. In such cases, please contact your regional offices or the responsible personnel/channel to provide you with further technical details.
- 2. Please note WHEN ORDERING FRU PARTS, that you should check the most up-to-date information available on your regional web or channel. If, for whatever reason, a part number change is made, it will not be noted in the printed Service Guide. For ACER-AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code to those given in the FRU list of this printed Service Guide. You MUST use the list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

Indicators

The computer has several easy-to-read status indicators:

The front panel indicators are visible even when the computer cover is closed.

lcon	Function	Description
*	Bluetooth	Indicates the status of Bluetooth communication.
Q.	WLAN	Indicates the status of wireless LAN communication.
*	Power	Indicates the computer's power status.
Ē	Battery	Indicates the computer's battery status.
	HDD	Indicates when the hard disk drive is active.

A	Caps Lock	Lights up when Caps Lock is activated.

NOTE: 1. **Charging:** The battery light shows amber when the battery is charging. 2. **Fully charged:** The light shows green when in AC mode.

Easy-Launch Buttons

Located beside the keyboard are application buttons. These buttons are called easy-launch buttons. They are: WLAN, Internet, email, Bluetooth, Arcade and Acer Empowering Technology.

The mail and Web browser buttons are pre-set to email and Internet programs, but can be reset by users. To set the Web browser, mail and programmable buttons, run the Acer Launch Manager.

lcon	Function	Description
е	Empowering Technology	Launch Acer Empowering Technology. (user-programmable)
e z	Web browser	Internet browser (user-Programmable)
X	Mail	Email application (user-Programmable)
*	Bluetooth communication switch	Enables/disables the Bluetooth function.
Q	Wireless communication switch	Enables/disables the wireless function.

Touchpad Basics (with fingerprint reader)

The following items show you how to use the touchpad with Acer Bio-Protection fingerprint reader:

- Move your finger across the touchpad (2) to move the cursor.
- Press the left (1) and right (4) buttons located beneath the touchpad to perform selection and execution functions. These two buttons are similar to the left and right buttons on a mouse. Tapping on the touchpad is the same as clicking the left button.
- Use Acer Bio-Protection fingerprint reader (3) supporting Acer FingerNav 4-way control function (only for certain models) or the 4-way scroll (3) button (only for certain models) to scroll up or down and move left or right a page. This fingerprint reader or button mimics your cursor pressing on the right scroll bar of Windows applications.

Function	Left Button (1)	Right Button (3)	Main touchpad (2)
Execute	Quickly click twice.		Tap twice (at the same speed as double-clicking a mouse button).
Select	Click once.		Tap once.
Drag	Click and hold, then use finger on the touchpad to drag the cursor.		Tap twice (at the same speed as double-clicking a mouse button); rest your finger on the touchpad on the second tap and drag the cursor.
Access context menu		Click once.	

NOTE: When using the touchpad, keep it - and your fingers - dry and clean. The touchpad is sensitive to finger movement; hence, the lighter the touch, the better the response. Tapping too hard will not increase the touchpad's responsiveness.

Using the Keyboard

The keyboard has full-sized keys and an embedded numeric keypad, separate cursor, lock, Windows, function and special keys.

Lock Keys and embedded numeric keypad

The keyboard has three lock keys which you can toggle on and off.

Lock key	Description
Caps Lock	When Caps Lock is on, all alphabetic characters typed are in uppercase.
Num Lock < Fn> + <f11></f11>	When Num Lock is on, the embedded keypad is in numeric mode. The keys function as a calculator (complete with the arithmetic operators +, -, *, and /). Use this mode when you need to do a lot of numeric data entry. A better solution would be to connect an external keypad.
Scroll Lock <fn> +</fn> <f12></f12>	When Scroll Lock is on, the screen moves one line up or down when you press the up or down arrow keys respectively. Scroll Lock does not work with some applications.

The embedded numeric keypad functions like a desktop numeric keypad. It is indicated by small characters located on the upper right corner of the keycaps. To simplify the keyboard legend, cursor-control key symbols are not printed on the keys.

Desired access	Num Lock on	Num Lock off
Number keys on embedded keypad	Type numbers in a normal manner.	
Cursor-control keys on embedded keypad	Hold <shift></shift> while using cursor- control keys.	Hold <fn></fn> while using cursor- control keys.
Main keyboard keys	Hold <fn></fn> while typing letters on embedded keypad.	Type the letters in a normal manner.

Windows Keys

The keyboard has two keys that perform Windows-specific functions.

	Key	Description
	Windows key	Pressed alone, this key has the same effect as clicking on the Windows Start button; it launches the Start menu. It can also be used with other keys to provide a variety of functions:

		<ctrl> + < >> + <tab>: Use the arrow keys to cycle through programs on the taskbar by using Windows Flip 3-D</tab></ctrl>
		Note: Depending on your edition of Windows Vista, some shortcuts may not function as described.
M	Application key	This key has the same effect as clicking the right mouse button; it opens the application's context menu.

Hot Keys

The computer employs hotkeys or key combinations to access most of the computer's controls like screen brightness, volume output and the BIOS utility.

To activate hot keys, press and hold the **<Fn>** key before pressing the other key in the hotkey combination.

System Utilities

BIOS Setup Utility

The BIOS Setup Utility is a hardware configuration program built into your computer's BIOS (Basic Input/ Output System).

Your computer is already properly configured and optimized, and you do not need to run this utility. However, if you encounter configuration problems, you may need to run Setup. Please also refer to Chapter 4 Troubleshooting when problem arises.

To activate the BIOS Utility, press **F2** during POST (when "Press <F2> to enter Setup" message is prompted on the bottom of screen).

Press **F2** to enter setup. The default parameter of F12 Boot Menu is set to "disabled". If you want to change boot device without entering BIOS Setup Utility, please set the parameter to "enabled".

Press <F12> during POST to enter multi-boot menu. In this menu, user can change boot device without entering BIOS SETUP Utility.

Navigating the BIOS Utility

There are six menu options: Information, Main, Advanced, Security, Boot, and Exit.

Follow these instructions:

- To choose a menu, use the left and right arrow keys.
- To choose an item, use the up and down arrow keys.
- To change the value of a parameter, press F5 or F6.
- A plus sign (+) indicates the item has sub-items. Press Enter to expand this item.
- Press Esc while you are in any of the menu options to go to the Exit menu.
- In any menu, you can load default settings by pressing F9. You can also press F10 to save any changes made and exit the BIOS Setup Utility.
- **NOTE:** You can change the value of a parameter if it is enclosed in square brackets. Navigation keys for a particular menu are shown on the bottom of the screen. Help for parameters are found in the Item Specific Help part of the screen. Read this carefully when making changes to parameter values. **Please note that system information is subject to different models**.

NOTE: When you are prompted to enter a password, you have three tries before the system halts. Don't forget your password. If you forget your password, you may have to return your notebook computer to your dealer to reset it.

Setting a Password

Follow these steps as you set the user or the supervisor password:

 Use the ↑ and ↓ keys to highlight the Set Supervisor Password parameter and press the Enter key. The Set Supervisor Password box appears:

 Type a password in the "Enter New Password" field. The password length can not exceeds 8 alphanumeric characters (A-Z, a-z, 0-9, not case sensitive). Retype the password in the "Confirm New Password" field.

IMPORTANT: Be very careful when typing your password because the characters do not appear on the screen.

- 3. Press Enter. After setting the password, the computer sets the User Password parameter to "Set".
- 4. If desired, you can opt to enable the Password on boot parameter.
- 5. When you are done, press F10 to save the changes and exit the BIOS Setup Utility.

Removing a Password

Follow these steps:

 Use the ↑ and ↓ keys to highlight the Set Supervisor Password parameter and press the Enter key. The Set Password box appears:

5	Set Supervisor Password		
	Enter current password	[]
	Enter New Password	[]
	Confirm New Password	[]

- 2. Type the current password in the Enter Current Password field and press Enter.
- 3. Press Enter twice without typing anything in the Enter New Password and Confirm New Password fields. The computer then sets the Supervisor Password parameter to "Clear".
- 4. When you have changed the settings, press u to save the changes and exit the BIOS Setup Utility.

Changing a Password

 Use the ↑ and ↓ keys to highlight the Set Supervisor Password parameter and press the Enter key. The Set Password box appears.

- 2. Type the current password in the Enter Current Password field and press Enter.
- **3.** Type a password in the Enter New Password field. Retype the password in the Confirm New Password field.
- 4. Press Enter. After setting the password, the computer sets the User Password parameter to "Set".
- 5. If desired, you can enable the Password on boot parameter.
- 6. When you are done, press F10 to save the changes and exit the BIOS Setup Utility.

If the verification is OK, the screen will display as following.

The password setting is complete after the user presses Enter.

If the current password entered does not match the actual current password, the screen will show you the Setup Warning.

BIOS Flash Utility

The BIOS flash memory update is required for the following conditions:

- New versions of system programs
- New features or options
- Restore a BIOS when it becomes corrupted.

Use the Phlash utility to update the system BIOS flash ROM.

NOTE: Create a Crisis Recovery Media (such as USB HDD) before you use the Phlash utility.

NOTE: Do not install memory-related drivers (XMS, EMS, DPMI) when you use the Phlash.

NOTE: Please use the AC adaptor power supply when you run the Phlash utility. If the battery pack does not contain enough power to finish BIOS flash, the system will not boot as the BIOS is not loaded.

Perform the following steps to use the Flash Utility:

- 1. Press F2 during boot to enter the Setup Menu.
- Select Boot Menu to modify the boot priority order, for example, if using USB HDD to Update BIOS, move USB HDD to position 1.

Remove HDD/BIOS Utility

This section provide you with removing HDD/BIOS method:

Remove HDD Password:

• If you key in wrong HDD password three times, Hdd password error code displays. See the image below.

To reset the HDD password, run HDD_PW.EXE as follows:

- 1. Key in hdd_pw 15494 0
- 2. Press 2.
- 3. Select one upper-case string from the list.

4. Reboot system and key in the selected string (0KJFN42 or UVEIQ96) on the HDD User Password screen.

Remove BIOS Password:

If you key in the wrong Supervisor Password three times, System Disabled displays on the screen. See the image below.

To reset the BIOS password, run BIOS_PW.EXE as follows:

- 1. Key in **bios_pw 14452 0**
- 2. Select one string from the list.

3. Reboot the system and key in the selected string (qjjg9vy, 07yqmjd etc.) for the BIOS user password.

Machine Disassembly and Replacement

This chapter contains step-by-step procedures on how to disassemble the notebook computer for maintenance and troubleshooting.

Disassembly Requirements

To disassemble the computer, you need the following tools:

- Wrist grounding strap and conductive mat for preventing electrostatic discharge
- Flat screwdriver
- Philips screwdriver
- Plastic flat screwdriver
- Plastic tweezers
- **NOTE:** The screws for the different components vary in size. During the disassembly process, group the screws with the corresponding components to avoid mismatch when putting back the components.

General Information

Pre-disassembly Instructions

Before proceeding with the disassembly procedure, make sure that you do the following:

- 1. Turn off the power to the system and all peripherals.
- 2. Unplug the AC adapter and all power and signal cables from the system.

- 3. Place the system on a flat, stable surface.
- 4. Remove the battery pack.

Disassembly Process

The disassembly process is divided into the following stages:

- External module disassembly
- Main unit disassembly
- LCD module disassembly

The flowcharts provided in the succeeding disassembly sections illustrate the entire disassembly sequence. Observe the order of the sequence to avoid damage to any of the hardware components. For example, if you want to remove the main board, you must first remove the keyboard, then disassemble the inside assembly frame in that order.

Removing the Battery Pack

- 1. Turn computer over.
- 2. Slide the battery lock/unlock latch to the unlock position.

3. Slide and hold the battery release latch to the release position (1), then slide out the battery pack from the main unit (2).

Removing the SD dummy card

1. Push the SD dummy card all the way in to eject it.

2. Pull it out from the slot.

Removing the ExpressCard dummy card

1. Push the ExpressCard all the way in to eject the ExpressCard dummy.

2. Pull it out from the slot.

Removing the Lower Covers

- 1. See "Removing the Battery Pack" on page 50.
- 2. See "Removing the SD dummy card" on page 51.
- 3. See "Removing the ExpressCard dummy card" on page 52.
- 4. Loosen the captive screws in the covers as shown.

5. Carefully open the Lower Cover.

6. Remove the HDD2 Cover as shown.

Removing the Switch Cover

CAUTION: Using tools to remove the Switch Cover may cause damage to the outer casing. It is recommended that only fingers are used to remove the Switch Cover.

- 1. See "Removing the Battery Pack" on page 50.
- 2. Place the computer on a clean dry surface.
- 3. Locate and remove the ten securing screws on the bottom of the computer.

Step	Size	Quantity	Screw Type
Switch Cover	M2.5*6.5-I (BZN(NYLOK-RED)	10	9 ****

4. Turn the computer over and open the LCD module to expose the Switch Cover.

IMPORTANT: The LCD module does not fully extend. Damage will occur if you attempt to extend the LCD module beyond the manufacturer's design.

5. Lift the Switch Cover as shown, and place over the keyboard.

IMPORTANT: Do not remove at this point. FFC cables are still attached on the underside.

6. Disconnect the two FFC cables as shown.

7. Lift the Switch Cover clear of the chassis.

Removing the Power Board

- 1. See "Removing the Battery Pack" on page 50.
- 2. Expose the bottom side of the Switch Cover. See "Removing the Switch Cover" on page 66.
- 3. Unlock the connector to remove the FFC cable.

4. Grasp the cable and disconnect from the Power Board.

5. Remove the three securing screws from the Power Board.

Step	Size	Quantity	Screw Type
Power Board	M2.0*3.0-I (BKAG) (NYLOK) IRON	3	

6. Hold the module by the sides and lift to remove.

Removing the Keyboard

- 1. Remove the Switch Cover. See "Removing the Switch Cover" on page 66.
- 2. Lift and turn the keyboard over (as shown) to expose the FFC.

3. Unlock the connector and pull the FFC to remove.

4. Remove the keyboard from the chassis.

Removing the Speaker Module

- 1. Remove the Keyboard. See "Removing the Keyboard" on page 69.
- 2. Remove the three securing screws (red in the following image) from the Subwoofer Module.
- 3. Remove the two securing screws (blue in the following image) the Speaker Module.

Step	Size	Quantity	Screw Type

4. Disconnect the speaker cable as shown.

5. Grasp the Subwoofer Module from the RIGHT side as shown and tilt over and to the left, as shown.

NOTE: The Subwoofer Module is not a replacable part. Do NOT remove from the computer.

6. Grasp the Speaker Module by the right side and tilt up to remove.

Removing the Antenna Cables

- 1. Remove the Lower Cover. See "Removing the Lower Covers" on page 53.
- 1. Remove the Speaker Module. See "Removing the Speaker Module" on page 70.
- 2. Turn the computer upside down, and disconnect the Antenna Cables from the WLAN module.

3. Pull back the cables away and out of the housing well.

- 4. Turn the computer over (upper base facing up) to expose the Antenna cables.
- 5. After removing the Speaker Modules, grasp the Antenna cables sitting underneath. Pull through.

6. Continue to remove the cables until they are completely out of the housing well.

NOTE: Place the cables to one side to avoid damage.

Removing the LCD Module

- 1. Disconnect the Antenna cables. See "Removing the Antenna Cables" on page 71.
- 2. Disconnect the LCD and Power cables.

3. Remove the four securing screws (two on each hinge) from the LCD hinges.

4. Hold the USB board by the edges and pull up to remove.

Removing the Modem Module

- 1. Remove the Upper Base. See "Removing the Upper Base" on page 74.
- 2. Disconnect the RJ-11 cable from the modem as shown.

3. Remove the two (2) securing screws.

Step	Size	Quantity	Screw Type
Modem Module	M2.0*3.0-I-NI-NYLOK	2	

4. Lift the module and remove from the lower cover as shown.

Removing the Bluetooth Module

- 1. Remove the Modern Module. See "Removing the Modern Module" on page 79.
- 2. Grasp the cable as shown and pull to disconnect from the Bluetooth module.

3. Remove the single securing screw.

Step	Size	Quantity	Screw Type
Bluetooth Module	M2.0*3.0-I-NI-NYLOK	1	2

4. Grasp the module by the right side and lift up to remove.

Removing the Mainboard

- 1. Remove the LCD Module. See "Removing the LCD Module" on page 73.
- 2. Remove the Upper Base. See "Removing the Upper Base" on page 74.
- 3. Remove the See "Removing the Modern Module" on page 79.
- 4. Remove the Bluetooth Module. See "Removing the Bluetooth Module" on page 80.
- 5. Disconnect the USB and Bluetooth cables remaining on the mainboard.

6. Grasp the RJ-11 cable and remove it from the mainboard as shown.

7. Disconnect the Subwoofer cable attached to the mainboard.

8. Remove the three securing screws.

Step	Size	Quantity	Screw Type
Mainboard	M2.5*4.0-I (NI)(NYLOK)	3	

9. While holding the left side of the Lower Base, lift and pivot the mainboard to remove from the base.

10. Grasp the mainboard by both sides and pivot upwards to remove.

Removing the Thermal Module

- 1. Remove the Mainboard. See "Removing the Mainboard" on page 82.
- 2. Turn the Mainboard over and place on a clean surface.
- 3. Hold the cable connector and lift to disconnect from the mainboard.

4. Remove the two securing screws (red) and loosen the four captive screws (blue) found on the Thermal Module.

Step	Size	Quantity	Screw Type
CPU Thermal Module (red call out)	M2.5*4.0-I (NI)(NYLOK)	2	

WARNING:To prevent damage to the Thermal Module or the CPU, hold and lift the Thermal Module by lifting both ends up and away at the same time.

5. Hold the module on both sides and lift it clear of the Mainboard.

Removing the CPU

- 1. Remove the Thermal Module. See "Removing the Thermal Module" on page 84.
- 2. Using a flat screwdriver, turn the CPU socket latch counter-clockwise 180° to release the CPU.

3. Lift the CPU clear of the Mainboard.

LCD Brackets	M2.0*3.0-I (BKAG) (NYLOK) IRON	8	86.ARE07.002

Removing the LCD Bezel

- 1. Remove the LCD module. See "Removing the LCD Module" on page 73.
- 2. Remove the four upper screw caps and screws, and the six remaining lower securing screws.

Step	Size	Quantity	Screw Type
LCD Bezel	M2.5*6.5-I (BZN(NYLOK-RED)	10	(here)

3. Lift up the bezel, topside first, and remove it from the LCD Module.

4. Turn the bezel and pry the left side upwards, followed by the right side.

5. After removing the top part of the bezel, grasp the bottom corners and continue lifting up the bezel as shown.

6. Lift the bezel away from the panel and lay it flat to expose the Mic cable.

7. Disconnect the Mic cable and remove the LCD bezel.

Removing the Inverter Board

- 1. Remove the LCD Bezel. See "Removing the LCD Bezel" on page 87.
- 2. Disconnect both cables from the Inverter Board.

NOTE: If you are having difficulty removing the cables, first lift the Inverter Board from the back cover before disconnecting the cables.

3. Remove the Inverter board from the LCD Module.

Removing the Camera Module

- 1. Remove the LCD Bezel. See "Removing the LCD Bezel" on page 87.
- 2. Disconnect the Camera Module cable as shown.

NOTE: If necessary lift the camera module to provide better access to the cables.

3. Place your finger on the ends of the module and pry it away from the cover.

Removing the LCD Panel

- 1. Remove the LCD Bezel. See "Removing the LCD Bezel" on page 87.
- 2. Remove the six securing screws from the LCD hinges.

Step	Size	Quantity	Screw Type
LCD Panel	M2.5*2.5-I (NI)(NYLOK)	6	De

3. Grasp the top of the LCD Panel and pivot upwards to a 90 degree angle.

4. Once the panel is upright, lift the panel upwards taking care of the cables located in the hinges.

Removing the LCD Brackets and FPC Cable

- 1. Remove the LCD panel. See "Removing the LCD Panel" on page 92.
- 2. Dislodge the LCD cable from the left LCD hinge as shown in the following image.

3. Turn the LCD Panel over on a clean surface, and grip the LCD cable by both ends and pull it back.

4. Grip the adhesive strip and pull it back.

5. Continue to pull back the LCD cable.

6. Peel back the adhesive strip holding the cable to the bottom.

7. Remove the eight securing screws (four on each side) from the LCD Panel brackets.

Step	Size	Quantity	Screw Type
LCD Brackets	M2.0*3.0-I (BKAG) (NYLOK) IRON	8	

8. Remove the LCD brackets by pulling them away from the LCD Panel.

LCD Module Reassembly Procedure Replacing the LCD Panel

1. Align the LCD brackets with the eight screw holes (four on each side) on the LCD Panel as shown.

2. Secure the LCD brackets to the LCD panel.

3. Turn the panel over. Insert the LCD Panel cable into the LCD Panel as shown. Secure the cable by replacing the securing strip.

4. Replace the remaining securing strips and press down along the length of the cable to secure it in place ensuring the cable ends are in line with the edge of the panel.

5. Turn the LCD Panel over and re-insert the LCD cable into the hinge retainer.

6. Align the brackets with the alignment wells in the back panel and lower the LCD brackets into the bracket wells as shown.

7. Pivot the LCD Panel down in place.

NOTE: Ensure the CMOS and Inverter cables are not under the LCD Panel and correctly aligned.

8. Replace the six screws to secure the panel within the LCD module.

- **9.** Locate the alignment pins (2) and replace the Camera Board taking care the pins protrude through the sockets.
- 10. Connect the Camera Module cable as shown.

- **11.** Connect the right Inverter board cable as shown.
- 12. Connect the left Inverter board cable as shown.

13. Replace the Inverter board as shown and press down to secure in place.

NOTE: Tuck the cables securely to prevent damage to the cables or module.
Replacing the LCD Bezel

1. Align the edge of the bezel with the bottom cover and reconnect the Mic Cable.

2. Align the hinge covers taking care to tuck in all cabling, and lower the bezel down in place.

3. Continue to press the bezel down in place to lock the upper and lower covers in place.

4. Replace the ten securing screws and screw caps on the LCD bezel.

Main Module Reassembly Procedure

Replacing the CPU

- 1. Carefully turn the mainboard upside down (CPU side up), and insert the CPU into the CPU bracket as shown.
- **2.** Using a flat-tipped screw driver, lock the CPU in the socket as shown.

Replacing the Thermal Module

WARNING: To prevent damage to the Thermal Module or the CPU, hold the Thermal Module by both ends at the same time.

- **1.** Align and place the Thermal Module in the on the mainboard as shown.
- 2. Replace the two securing screws (red) and tighten the four captive screws (blue) found on the Thermal Module.

3. Connect fan cable to the mainboard as shown.

Replacing the Mainboard

1. Ensure that the Mainboard is face up. Place the Mainboard in the chassis, left hand rear edge first.

2. While holding the left side of the Lower Base, lower and pivot the mainboard in to the base.

3. Ensure the screw sockets are aligned. Replace the three securing screws as shown.

NOTE: Make sure the I/O ports are positioned correctly through the lower cover, and the screw sockets are visible through the mainboard.

4. Reconnect the subwoofer cable to the mainboard.

IMPORTANT:Ensure that the cable passes through the mainboard, as shown, and is inserted into the retaining clip to avoid trapping when the upper case is replaced.

5. Replace the RJ-11 cable in the retaining clip on the mainboard and stick it in place using the adhesive strip.

6. Reconnect the Bluetooth and USB cables to the mainboard.

Replacing the Bluetooth Board

- 1. Position the module over the aligning pins and insert in place.
- **2.** Replace the bluetooth cable as shown.

3. Replace the single screw to secure the board.

Replacing the Modem Module

- 1. Align the screw sockets and press the modem module down to connect to the mainboard.
- 2. Replace the two securing screws.

3. Connect the modem cable as shown

Replacing the USB Board

1. Replace the USB board on the lower base and secure with the single screw (provided).

2. Reconnect the USB cable as shown.

Replacing the Finger Print Reader

1. Replace the Finger Print Reader board in the upper cover and secure with the three screws as shown.

2. Reconnect the TouchPad and Finger Print Reader FFCs as shown.

Replacing the Upper Cover

WARNING:Care must be taken when replacing the Upper Case to prevent damage or stress to the surface.

1. Starting with the rear, align the upper cover with the lower cover, taking care to not force in place.

2. Replace the ten securing screws on the top panel.

3. Reconnect the three FFC cables to the mainboard.

Reconnect A as shown, and close the locking latch.

Reconnect B as shown, and close the locking latch.

Reconnect C as shown, and close the locking latch.

4. Turn the computer over. Replace the ten screws on the bottom panel.

Replacing the LCD Module

1. Carefully align the LCD module over the hinge sockets and lower the module into the chassis, taking care not to trap the LCD cables.

2. Replace the four securing screws (two on each side) securing the LCD module.

- 3. Replace the LCD power cable and AC power cable in the cable guides and clips as shown.
 - **NOTE:** There are two cable channels. The upper channel holds the AC power cable and the lower channel holds the LCD power cable.

4. Reconnect the cables as shown.

5. Replace the antenna and backlight cables as shown, taking care to follow the cable guides and clips.

6. Push the antenna cables through the chassis and pull through from the other side.

7. Turn the computer over and replace the antenna cables as shown, taking care to follow the cable guides and clips.

Replacing the Speaker Module

- 1. Align and replace the Speaker Module in the lower 2. Reconnect the speaker cable as shown. case.

3. Place subwoofer module in to the lower case and replace the five securing screws.

Replacing the Keyboard

- 1. Align the FFC with the connector and press the latch down to secure.
- 2. Turn the keyboard over and press down to secure.

Replacing the Power Board

- 1. Place the power board in the switch cover as shown.
- **2.** Replace the three securing screws.

3. Reconnect the cable and FFC as shown.

Replacing the Switch Cover

1. Locate the following FFC cables.

3. Reconnect the Launch Board FFC.

2. Reconnect the Power Board FFC.

4. Turn the switch board over.

5. Press down on the edges of the Switch Cover first. 6. Snap the Switch Cover in to place by pressing

down in the centre of the cover.

7. Turn the computer over and replace the ten screws as shown.

Replacing the Second Hard Disk Drive Module

1. Place the HDD in the HDD carrier.

3. Replace the HDD and slide to the right to connect 4. Replace the two securing screws as shown. the HDD interface.

2. Replace the four screws to secure the carrier.

Replacing the ODD Module

- 1. With the ODD tray in the eject position, replace the **2.** Turn the ODD over and replace the ODD bracket. ODD cover on the ODD Module.

3. Slide the module in to the chassis and press until module is flush with the chassis.

Replacing the Main Hard Disk Drive Module

1. Replace the HDD connector.

3. Replace the four screws to secure the carrier.

2. Place the HDD in the HDD carrier.

4. Replace the single securing screw as shown.

4. Insert the back first and angle the HDD in place. Push down to connect the HDD interface.

Replacing the WLAN Module

 $\label{eq:linear} \textbf{1.} \ \ \textbf{Insert the WLAN board into the WLAN socket}.$

 Connect the two antenna cables to the module.
 NOTE: The White cable goes to the upper terminal and the black cable to the lower terminal. 2. Replace the two screws to secure the module.

4. Ensure that the cabling is replaced as shown to avoid trapping when the covers are replaced.

Replacing the TV Tuner Module

1. Insert the TV Tuner into the bracket as shown.

3. Replace the two securing screws.

2. Insert the TV Tuner in to the socket.

 Attach the cable as shown, ensuring that the TV Tuner antenna follows the installation pattern of the LCD antenna cables.

Replacing the VGA Module

1. Insert the VGA module into the socket as shown.

2. Replace the four securing screws.

Replacing the DIMM Modules

NOTE: To replace DIMM Module 2, first remove DIMM Module 1. In this procedure, only DIMM Module 1 is shown.

1. Insert the DIMM Module flush with the connector and press down to lock in place.

Replacing the Lower Covers

1. Replace the HDD2 and Lower Covers and secure the captive screws.

1. Insert the ExpressCard and push into the slot until 2. Insert the SD Card and push into the slot until flush with the chassis cover.

Troubleshooting

Common Problems

Use the following procedure as a guide for computer problems.

- **NOTE:** The diagnostic tests are intended to test only Acer products. Non-Acer products, prototype cards, or modified options can give false errors and invalid system responses.
- 1. Obtain the failing symptoms in as much detail as possible.
- 2. Verify the symptoms by attempting to re-create the failure by running the diagnostic test or by repeating the same operation.
- 3. Use the following table with the verified symptom to determine which page to go to.

Symptoms (Verified)	Go To
Power On Issue	Page 124
No Display Issue	Page 125
LCD Failure	Page 127
Internal Keyboard Failure	Page 127
Touchpad Failure	Page 128
Internal Speaker Failure	Page 128
Internal Microphone Failure	Page 130
Rightside USB Failure	Page 134
Other Functions Failure	Page 135
Intermittent Failures	Page 136
Undetermined Failures	Page 136

4. If the Issue is still not resolved, see "Online Support Information" on page 225.

Power On Issue

If the system doesn't power on, perform the following actions one at a time to correct the problem. Do not replace a non-defective FRUs:

Computer Shutsdown Intermittently

If the system powers off at intervals, perform the following actions one at a time to correct the problem.

- 1. Check the power cable is properly connected to the computer and the electrical outlet.
- 2. Remove any extension cables between the computer and the outlet.
- **3.** Remove any surge protectors between the computer and the electrical outlet. Plug the computer directly into a known good electrical outlet.
- 4. Disconnect the power and open the casing to check the Thermal Unit and fan airways are free of obstructions.
- 5. Remove all external and non-essential hardware connected to the computer that are not necessary to boot the computer to the failure point.
- 6. Remove any recently installed software.
- 7. If the Issue is still not resolved, see "Online Support Information" on page 225.

No Display Issue

If the **Display** doesn't work, perform the following actions one at a time to correct the problem. Do not replace a non-defective FRUs:

No POST or Video

If the POST or video doesn't display, perform the following actions one at a time to correct the problem.

- Make sure that the internal display is selected. On this notebook model, switching between the internal display and the external display is done by pressing Fn+F5. Reference Product pages for specific model procedures.
- 2. Make sure the computer has power by checking at least one of the following occurs:
 - Fans start up
 - Status LEDs light up

If there is no power, see "Power On Issue" on page 124.

- **3.** Drain any stored power by removing the power cable and battery and holding down the power button for 10 seconds. Reconnect the power and reboot the computer.
- Connect an external monitor to the computer and switch between the internal display and the external display is by pressing Fn+F5 (on this model).

If the POST or video appears on the external display, see "LCD Failure" on page 127.

5. Disconnect power and all external devices including port replicators or docking stations. Remove any memory cards and CD/DVD discs. Restart the computer.

If the computer boots correctly, add the devices one by one until the failure point is discovered.

- 6. Reseat the memory modules.
- 7. Remove the drives (see "Disassembly Process" on page 48).
- 8. If the Issue is still not resolved, see "Online Support Information" on page 225.

Abnormal Video Display

If video displays abnormally, perform the following actions one at a time to correct the problem.

- 1. Reboot the computer.
- 2. If permanent vertical/horizontal lines or dark spots display in the same location, the LCD is faulty and should be replaced. See "Disassembly Process" on page 48.
- 3. If extensive pixel damage is present (different colored spots in the same locations on the screen), the LCD is faulty and should be replaced. See "Disassembly Process" on page 48.
- Adjust the brightness to its highest level. See the User Manual for instructions on adjusting settings.
 NOTE: Ensure that the computer is not running on battery alone as this may reduce display brightness.

If the display is too dim at the highest brightness setting, the LCD is faulty and should be replaced. See "Disassembly Process" on page 48.

- 5. Check the display resolution is correctly configured:
 - a. Minimize or close all Windows.
 - **b.** If display size is only abnormal in an application, check the view settings and control/mouse wheel zoom feature in the application.
 - c. If desktop display resolution is not normal, right-click on the desktop and select Personalize→ Display Settings.
 - d. Click and drag the Resolution slider to the desired resolution.
 - e. Click Apply and check the display. Readjust if necessary.
- 6. Roll back the video driver to the previous version if updated.
- 7. Remove and reinstall the video driver.
- 8. Check the Device Manager to determine that:
 - The device is properly installed. There are no red Xs or yellow exclamation marks.
 - There are no device conflicts.
 - No hardware is listed under Other Devices.
- 9. If the Issue is still not resolved, see "Online Support Information" on page 225.
- 10. Run the Windows Memory Diagnostic from the operating system DVD and follow the onscreen prompts.
- **11.** If the Issue is still not resolved, see "Online Support Information" on page 225.

Random Loss of BIOS Settings

If the computer is experiencing intermittent loss of BIOS information, perform the following actions one at a time to correct the problem.

- 1. If the computer is more than one year old, replace the CMOS battery.
- 2. Run a complete virus scan using up-to-date software to ensure the computer is virus free.
- 3. If the computer is experiencing HDD or ODD BIOS information loss, disconnect and reconnect the power and data cables between devices.

If the BIOS settings are still lost, replace the cables.

- 4. If HDD information is missing from the BIOS, the drive may be defective and should be replaced.
- 5. Replace the Motherboard.
- 6. If the Issue is still not resolved, see "Online Support Information" on page 225.

LCD Failure

If the **LCD** fails, perform the following actions one at a time to correct the problem. Do not replace a nondefective FRUs:

Built-In Keyboard Failure

If the built-in **Keyboard** fails, perform the following actions one at a time to correct the problem. Do not replace a non-defective FRUs:

Touchpad Failure

If the **Touchpad** doesn't work, perform the following actions one at a time to correct the problem. Do not replace a non-defective FRUs:

Internal Speaker Failure

If the internal **Speakers** fail, perform the following actions one at a time to correct the problem. Do not replace a non-defective FRUs:

Sound Problems

If sound problems are experienced, perform the following actions one at a time to correct the problem.

- 1. Reboot the computer.
- 2. Navigate to Start → Control Panel → System and Maintenance → System → Device Manager. Check the Device Manager to determine that:
 - The device is properly installed.
 - There are no red Xs or yellow exclamation marks.
 - There are no device conflicts.
 - No hardware is listed under Other Devices.
- 3. Roll back the audio driver to the previous version, if updated recently.
- 4. Remove and reinstall the audio driver.
- 5. Ensure that all volume controls are set mid range:
 - a. Click the volume icon on the taskbar and drag the slider to 50. Ensure that the volume is not muted.
 - **b.** Click Mixer to verify that other audio applications are set to 50 and not muted.
- Navigate to Start → Control Panel → Hardware and Sound → Sound. Ensure that Speakers are selected as the default audio device (green check mark).
 NOTE: If Speakers does not show, right-click on the Playback tab and select Show Disabled Devices (clear by default).
- 7. Select Speakers and click **Configure** to start **Speaker Setup**. Follow the onscreen prompts to configure the speakers.
- 8. Remove and recently installed hardware or software.
- 9. Restore system and file settings from a known good date using **System Restore**.

If the issue is not fixed, repeat the preceding steps and select an earlier time and date.

- 10. Reinstall the Operating System.
- 11. If the Issue is still not resolved, see "Online Support Information" on page 225.

Internal Microphone Failure

If the internal **Microphone** fails, perform the following actions one at a time to correct the problem. Do not replace a non-defective FRUs:

Microphone Problems

If internal or external **Microphones** do no operate correctly, perform the following actions one at a time to correct the problem.

- Check that the microphone is enabled. Navigate to Start → Control Panel → Hardware and Sound → Sound and select the Recording tab.
- 2. Right-click on the Recording tab and select Show Disabled Devices (clear by default).
- 3. The microphone appears on the Recording tab.
- 4. Right-click on the microphone and select **Enable**.
- 5. Select the microphone then click **Properties**. Select the Levels tab.
- 6. Increase the volume to the maximum setting and click OK.
- 7. Test the microphone hardware:
 - a. Select the microphone and click Configure.
 - b. Select Set up microphone.
 - c. Select the microphone type from the list and click Next.
 - d. Follow the onscreen prompts to complete the test.
- 8. If the Issue is still not resolved, see "Online Support Information" on page 225.

HDD Not Operating Correctly

If the HDD does not operate correctly, perform the following actions one at a time to correct the problem.

- 1. Disconnect all external devices.
- 2. Run a complete virus scan using up-to-date software to ensure the computer is virus free.
- 3. Run the Windows Vista Startup Repair Utility:
 - a. insert the Windows Vista Operating System DVD in the ODD and restart the computer.
 - **b.** When prompted, press any key to start to the operating system DVD.
 - c. The Install Windows screen displays. Click Next.
 - d. Select Repair your computer.
 - e. The System Recovery Options screen displays. Click Next.
 - f. Select the appropriate operating system, and click Next.

NOTE: Click Load Drivers if controller drives are required.

- g. Select Startup Repair.
- h. Startup Repair attempts to locate and resolve issues with the computer.
- i. When complete, click Finish.

If an issue is discovered, follow the onscreen information to resolve the problem.

- 4. Run the Windows Memory Diagnostic Tool. For more information see Windows Help and Support.
- 5. Restart the computer and press F2 to enter the BIOS Utility. Check the BIOS settings are correct and that CD/DVD drive is set as the first boot device on the Boot menu.
- 6. Ensure all cables and jumpers on the HDD and ODD are set correctly.
- 7. Remove any recently added hardware and associated software.
- 8. Run the Windows Disk Defragmenter. For more information see Windows Help and Support.
- Run Windows Check Disk by entering chkdsk /r from a command prompt. For more information see Windows Help and Support.
- 10. Restore system and file settings from a known good date using System Restore.

If the issue is not fixed, repeat the preceding steps and select an earlier time and date.

11. Replace the HDD. See "Disassembly Process" on page 48.

ODD Not Operating Correctly

If the **ODD** exhibits any of the following symptoms it may be faulty:

- Audio CDs do not play when loaded
- DVDs do not play when loaded
- Blank discs do not burn correctly
- DVD or CD play breaks up or jumps
- Optical drive not found or not active:
 - Not shown in My Computer or the BIOS setup
 - LED does not flash when the computer starts up
 - The tray does not eject
- Access failure screen displays
- The ODD is noisy

Perform the following general solutions one at a time to correct the problem.

1. Reboot the computer and retry the operation.

- 2. Try an alternate disc.
- 3. Navigate to Start → Computer. Check that the ODD device is displayed in the Devices with Removable Storage panel.
- 4. Navigate to Start → Control Panel → System and Maintenance → System → Device Manager.
 - a. Double-click IDE ATA/ATAPI controllers. If a device displays a down arrow, right-click on the device and click Enable.
 - **b.** Double-click **DVD/CD-ROM drives**. If the device displays a down arrow, right-click on the device and click **Enable**.
 - c. Check that there are no yellow exclamation marks against the items in **IDE ATA/ATAPI controllers**. If a device has an exclamation mark, right-click on the device and uninstall and reinstall the driver.
 - **d.** Check that there are no yellow exclamation marks against the items in **DVD/CD-ROM drives**. If a device has an exclamation mark, right-click on the device and uninstall and reinstall the driver.
 - **e.** If the exclamation marker is not removed from the item in the lists, try removing any recently installed software and retrying the operation.

Discs Do Not Play

If discs do not play when inserted in the drive, perform the following actions one at a time to correct the problem.

- 1. Check that the disc is correctly seated in the drive tray and that the label on the disc is visible.
- 2. Check that the media is clean and scratch free.
- **3.** Try an alternate disc in the drive.
- 4. Ensure that AutoPlay is enabled:
 - a. Navigate to Start → Control Panel → Hardware and Sound → AutoPlay.
 - b. Select Use AutoPlay for all media and devices.
 - c. In the Audio CD and DVD Movie fields, select the desired player from the drop down menu.
- 5. Check that the Regional Code is correct for the selected media:

IMPORTANT:Region can only be changed a limited number of times. After Changes remaining reaches zero, the region cannot be changed even Windows is reinstalled or the drive is moved to another computer.

- a. Navigate to Start \rightarrow Control Panel \rightarrow System and Maintenance \rightarrow System \rightarrow Device Manager.
- b. Double-click DVD/CD-ROM drives.
- c. Right-click DVD drive and click Properties, then click the DVD Region tab.
- d. Select the region suitable for the media inserted in the drive.

Discs Do Not Burn Properly

If discs can not be burned, perform the following actions one at a time to correct the problem.

- 1. Ensure that the default drive is record enabled:
 - a. Navigate to Start \rightarrow Computer and right-click the writable ODD icon. Click Properties.
 - **b.** Select the **Recording** tab. In the **Desktop disc recording** panel, select the writable ODD from the drop down list.
 - c. Click OK.
- 2. Ensure that the software used for burning discs is the factory default. If using different software, refer to the software's user manual.

Playback is Choppy

If playback is choppy or jumps, perform the following actions one at a time to correct the problem.

1. Check that system resources are not running low:

- **a.** Try closing some applications.
- b. Reboot and try the operation again.
- 2. Check that the ODD controller transfer mode is set to DMA:
 - a. Navigate to Start \rightarrow Control Panel \rightarrow System and Maintenance \rightarrow System \rightarrow Device Manager.
 - b. Double-click IDE ATA/ATAPI controllers, then right-click ATA Device 0.
 - c. Click **Properties** and select the **Advanced Settings** tab. Ensure that the **Enable DMA** box is checked and click **OK**.
 - d. Repeat for the other ATA Devices shown if applicable.

Drive Not Detected

If Windows cannot detect the drive, perform the following actions one at a time to correct the problem.

- 1. Restart the computer and press F2 to enter the BIOS Utility.
- Check that the drive is detected in the ATAPI Model Name field on the Information page.
 NOTE: Check that the entry is identical to one of the ODDs specified in "Hardware Specifications and Configurations" on page 18.
- **3.** Turn off the power and remove the cover to inspect the connections to the ODD. See "Disassembly Process" on page 48.
 - a. Check for broken connectors on the drive, motherboard, and cables.
 - **b.** Check for bent or broken pins on the drive, motherboard, and cable connections.
 - **c.** Try an alternate cable, if available. If the drive works with the new cable, the original cable should be replaced.
- 4. Reseat the drive ensuring and all cables are connected correctly.
- 5. Replace the ODD. See "Disassembly Process" on page 48.

Drive Read Failure

If discs cannot be read when inserted in the drive, perform the following actions one at a time to correct the problem.

- 1. Remove and clean the failed disc.
- 2. Retry reading the CD or DVD.
 - d. Test the drive using other discs.
 - e. Play a DVD movie
 - f. Listen to a music CD

If the ODD works properly with alternate discs, the original disc is probably defective and should be replaced.

- **3.** Turn off the power and remove the cover to inspect the connections to the ODD. See "Disassembly Process" on page 48.
 - a. Check for broken connectors on the drive, motherboard, and cables.
 - b. Check for bent or broken pins on the drive, motherboard, and cable connections.
 - **c.** Try an alternate cable, if available. If the drive works with the new cable, the original cable should be replaced.
- 4. Replace the ODD. See "Disassembly Process" on page 48.

USB Failure (Rightside)

If the rightside **USB** port fails, perform the following actions one at a time to correct the problem. Do not replace a non-defective FRUs:

External Mouse Failure

If an external **Mouse** fails, perform the following actions one at a time to correct the problem.

- 1. Try an alternative mouse.
- 2. If the mouse uses a wireless connection, insert new batteries and confirm there is a good connection. See the mouse user manual.
- 3. If the mouse uses a USB connection, try an alternate USB port.
- 4. Try an alternative program to verify mouse operation. Reinstall the program experiencing mouse failure.
- 5. Restart the computer.
- 6. Remove any recently added hardware and associated software.
- 7. Remove any recently added software and reboot.
- 8. Restore system and file settings from a known good date using **System Restore**.

If the issue is not fixed, repeat the preceding steps and select an earlier time and date.

- **9.** Run the Event Viewer to check the events log for errors. For more information see Windows Help and Support.
- 10. Roll back the mouse driver to the previous version if updated recently.
- 11. Remove and reinstall the mouse driver.
- **12.** Check the Device Manager to determine that:
 - The device is properly installed. There are no red Xs or yellow exclamation marks.
 - There are no device conflicts.
 - No hardware is listed under Other Devices.
- **13.** If the Issue is still not resolved, see "Online Support Information" on page 225.

Other Failures

If the CRT Switch, Dock, LAN Port, external MIC or Speakers, PCI Express Card, 5-in-1 Card Reader or Volume Wheel fail, perform the following general steps to correct the problem. Do not replace a non-defective FRUs:

- 1. Check Drive whether is OK.
- 2. Check Test Fixture is ok.
- 3. Swap M/B to Try.

Intermittent Problems

Intermittent system hang problems can be caused by a variety of reasons that have nothing to do with a hardware defect, such as: cosmic radiation, electrostatic discharge, or software errors. FRU replacement should be considered only when a recurring problem exists.

When analyzing an intermittent problem, do the following:

- 1. Run the advanced diagnostic test for the system board in loop mode at least 10 times.
- 2. If no error is detected, do not replace any FRU.
- 3. If any error is detected, replace the FRU. Rerun the test to verify that there are no more errors.

Undetermined Problems

The diagnostic problems does not identify which adapter or device failed, which installed devices are incorrect, whether a short circuit is suspected, or whether the system is inoperative.

Follow these procedures to isolate the failing FRU (do not isolate non-defective FRU).

NOTE: Verify that all attached devices are supported by the computer.

- **NOTE:** Verify that the power supply being used at the time of the failure is operating correctly. (See "Power On Issue" on page 124.):
- 1. Power-off the computer.
- 2. Visually check them for damage. If any problems are found, replace the FRU.
- 3. Remove or disconnect all of the following devices:
 - Non-Acer devices
 - Printer, mouse, and other external devices
 - Battery pack
 - Hard disk drive
 - DIMM
 - CD-ROM/Diskette drive Module
 - PC Cards
- 4. Power-on the computer.
- 5. Determine if the problem has changed.
- 6. If the problem does not recur, reconnect the removed devices one at a time until you find the failing FRU.
- 7. If the problem remains, replace the following FRU one at a time. Do not replace a non-defective FRU:
 - System board
 - LCD assembly

POST Codes Tables

These tables describe the POST codes, drivers, and keys for the POST.

Chipset POST Codes

The following table details the Chipset POST codes and components used in the POST.

POST Code	Function	Phase	Component
0xA0	MRC Entry	PEI	chipset/MRC
0x01	Enable MCHBAR	PEI	chipset/MRC
0x02	Check ME existence	PEI	chipset/MRC
0x03	Check for DRAM initialization interrupt and reset fail	PEI	chipset/MRC

Clearing Password Check and BIOS Recovery

This section provide you the standard operating procedures of clearing password and BIOS recovery for Aspire 6930/6930G. Aspire 6930/6930G provides one Hardware Open Gap on main board for clearing password check, and one Hotkey for enabling BIOS Recovery.

Clearing Password Check

Hardware Open Gap Description

Item	Description	Location
G1 and G2	Clear CMOS Jumper	Main HDD bay

Steps for Clearing BIOS Password Check

If users set BIOS Password (Supervisor Password and/or User Password) for a security reason, BIOS will ask the password during systems POST or when systems enter to BIOS Setup menu. However, once it is necessary to bypass the password check, users need to short the HW Gap to clear the password by the following steps:

- Power Off a system, and remove HDD, AC and Battery from the machine.
- Open the back cover of the machine, and find out the HW Gap on M/B as picture.
- Use an electric conductivity tool to short the two points of the HW Gap.
- Plug in AC, keep the short condition on the HW Gap, and press Power Button to power on the system till BIOS POST finish. Then remove the tool from the HW Gap.
- Restart system. Press F2 key to enter BIOS Setup menu.
- If there is no Password request, BIOS Password is cleared. Otherwise, please follow the steps and try again.

NOTE: The steps are only for clearing BIOS Password (Supervisor Password and User Password).

BIOS Recovery by Crisis Disk

BIOS Recovery Boot Block:

BIOS Recovery Boot Block is a special block of BIOS. It is used to boot up the system with minimum BIOS initialization. Users can enable this feature to restore the BIOS firmware to a successful one once the previous BIOS flashing process failed.

BIOS Recovery Hotkey:

The system provides a function hotkey: **Fn+Esc**, for enable BIOS Recovery process when system is powered on during BIOS POST. To use this function, it is strongly recommended to have the AC adapter and Battery present. If this function is enabled, the system will force the BIOS to enter a special BIOS block, called Boot Block.

Steps for BIOS Recovery by Crisis Disk:

Before doing this, one Crisis Disk should be prepared ready in hand. The Crisis Disk could be made by executing the Crisis Disk program in another system with Windows XP OS.

Follow the steps below:

- 1. Power Off failed system.
- 2. Attach a USB floppy drive to the failed system.
- 3. Insert the Crisis Disk in to the USB floppy drive attached to the BIOS flash failed system.
- 4. In the power-off state, press and hold Fn+Esc then press the Power button.

The system powers on and the Crisis BIOS Recovery process begins.

BIOS Boot Block begins restoring the BIOS code from the Crisis floppy disk to BIOS ROM on the failed systems.

When the Crisis flash process is finished, the system restarts with a workable BIOS.

5. Update to the latest version BIOS for the system using the regular BIOS flashing process.

FRU (Field Replaceable Unit) List

This chapter gives you the FRU (Field Replaceable Unit) listing in global configurations of Aspire 6930/6930G. Refer to this chapter whenever ordering for parts to repair or for RMA (Return Merchandise Authorization).

Please note that WHEN ORDERING FRU PARTS, you should check the most up-to-date information available on your regional web or channel. For whatever reasons a part number change is made, it will not be noted on the printed Service Guide. For ACER AUTHORIZED SERVICE PROVIDERS, your Acer office may have a DIFFERENT part number code from those given in the FRU list of this printed Service Guide. You MUST use the local FRU list provided by your regional Acer office to order FRU parts for repair and service of customer machines.

NOTE: To scrap or to return the defective parts, you should follow the local government ordinance or regulations on how to dispose it properly, or follow the rules set by your regional Acer office on how to return it.

Online Support Information

This section describes online technical support services available to help you repair your Acer Systems.

If you are a distributor, dealer, ASP or TPM, please refer your technical queries to your local Acer branch office. Acer Branch Offices and Regional Business Units may access our website. However some information sources will require a user i.d. and password. These can be obtained directly from Acer CSD Taiwan.

Acer's Website offers you convenient and valuable support resources whenever you need them.

In the Technical Information section you can download information on all of Acer's Notebook, Desktop and Server models including:

- Service guides for all models
- User's manuals
- Training materials
- Bios updates
- Software utilities
- Spare parts lists
- TABs (Technical Announcement Bulletin)

For these purposes, we have included an Acrobat File to facilitate the problem-free downloading of our technical material.

Also contained on this website are:

- Detailed information on Acer's International Traveler's Warranty (ITW)
- · Returned material authorization procedures
- An overview of all the support services we offer, accompanied by a list of telephone, fax and email contacts for all your technical queries.

We are always looking for ways to optimize and improve our services, so if you have any suggestions or comments, please do not hesitate to communicate these to us.
