

# **Quick Installation Guide**

#### SkyIPCam747W Wireless Night Vision Pan & Tilt Network Camera

Model # AICN747W

Ver. 1A

#### **Package Contents:**

- Wireless Night Vision Pan & Tilt Network Camera
- Antenna
- Wall Mount Kit
- GPIO Connector
- Power Adapter
- Ethernet Cable (Cat.5)
- Utility CD
- Quick Installation Guide

## **Section 1**

This Quick Installation Guide only provides basic instructions. For detailed information on using this product, please refer to the User's Manual on the supplied CD.

### **Getting Started**

**Step 1** Connect one end of the Ethernet cable to the IP Camera and connect the other end to one of the LAN ports on your router or switch.

**Step 2** Power on the IP Camera by connecting one end of supplied power adapter to the power jack of the Camera and connecting the other end to the electrical outlet.

**Step 3** Verify that the yellow light (Power) is solid and the green light (Link) is blinking.

### Installing the SkyIPCam Utility

**Step 1** Insert the provided CD and wait for the auto-run screen to appear.

Step 2 Click on Install SkyIPCam Utility.

	Cancel	< <u>B</u> ack	

### Using the SkyIPCam Utility

Step 1 Go to Start > (All) Programs > AirLink101 > AirLink101 SkylPCam Utiliy

🖬 Airlink101 🔹 🕨	4	Airlink101 SkyIPCam View
	<u>ا</u>	Airlink101 SkyIPCam Utility

**Step 2** Select the IP Camera you want to configure from the list and click on the **Change IP** button.

P Address	Сал	iera Name	Mac Address	
92.168.1.240			00 ff 00 19 00	33
About	Link	Change IP	Search	Exit

<u>Note</u>: If the Camera's IP address does not show up in the window, make sure the camera is properly connected to the same network as your computer is, and then click on the **Search** button.

**Step 3** You may simply accept the suggested **Static IP**, or you can manually change the last 3-digit number of the IP Address, in case that the suggested one has already been used by another device in the same network. Another option is that if your router's DHCP server is enabled, you can select **DCHP**, so the router will automatically assign a dynamic IP address to your camera.

Enter "admin" for both ID and password, and click Change.

Change IP Address								×
Static IP								
IP Address	19	2.	168	•	1	•	240	-
Submask	25	5.	255	•	255	•	0	
Default gateway	19	2.	168	•	1	•	1

Now, unplug the RJ-45 Cable from the camera, and you may access the camera wirelessly.

### **Viewing Images**

Method 1 --- Access from "Web Browser"

**Step 1** If you know the IP address of your network camera, you may open the Web Browser on your computer.

**Step 2** Type the IP address of your camera (the default IP is 192.168.1.240) in the Address bar, and then press [Enter].

Step 3 Enter "admin" for both the User name and Password, and click OK.

Authent	ication Required
?	Enter username and password for "SkyIPCam" at http://192.168.1.240
	admin
	Password:
	****
	Use Password Manager to remember this password.
	OK Cancel

**Step 4** If it is the first time for your computer to access the Web based viewing page, you may be prompted to install the software of ActiveX Control. Click on the bar on top of the screen and click on **Install ActiveX Control**.

Step 5 Click on Install, and then you may be able to view images.

**Note:** If you are not able to find the pictures or video clips saved by "Snapshot' or "Manual Record" under <u>Windows Vista</u>, you may also need to disable Internet Explorer's Protected Mode: Open Internet Explorer and click **Tools**. Then click Internet Options. Select the Security tab, uncheck the box for protected mode, and click Apply. Restart Internet Explorer.
