

PortaStor Secure™ USB Flash Drives

Product Features

- 256-Bit AES Hardware Encryption for the highest level protection against hacking specified by AES
- User Defined Public Partition & Secure Partition for Flexibility and Convenience
- Customized Password to a maximum of 16 characters

Protection from Identity Theft and Fraud

The USB flash drive is one of the most widely used tools for transporting important data and multimedia files due to its size, convenience and near-universal compatibility. However, these same strengths make flash drives vulnerable to loss, theft and other potential breaches in security. Financial data, business proposals, research, development plans and any other confidential materials stored on flash drives are at high risk of falling into the wrong hands and being compromised.

The PortaStor Secure family of USB flash drives addresses this risk by providing a secure partition for confidential files. All information in this secure partition is encrypted using 256-bit AES hardware encryption. This encryption renders all data in the secure partition useless to anyone without authorized access. For even greater security, this secure partition is automatically formatted after six invalid login attempts. The management application is stored right on the PortaStor drive. For the greatest flexibility, users can even specify the size of the secure and non-secure partitions.

Product Specifications

Product Dimensions (LxWxH):

60 x 46 x 9.5 mm
2 3/8 x 1 13/16 x 3/8 in

Weight: 0.3 oz

Software System Requirements:

- Pentium III Processor
- 2MB free disk space
- Operating Systems: Windows® 7, Windows Vista (SP1, SP2), Windows XP (SP1, SP2, SP3), Windows 2000 (SP4)
- USB 2.0 Port
- Three (3) free drive letters

UPC Codes:

808068-00563-6 - 16GB[†], Part # 380106
808068-00562-9 - 8GB[†], Part # 380105
808068-00561-2 - 4GB[†], Part # 380104
808068-00560-5 - 2GB[†], Part # 380103

Country of Origin: Made in India
