

AT-AR02X Series Port Interface Cards (PICs)

Maximize Flexibility

Providing an array of physical interfaces, Port Interface Cards (PICs) offer flexibility when configuring Allied Telesis routers and Rapier™ L3 switches to work in a variety of network topologies and physical media. Users can modify or replace PICs to meet changing network requirements—or they can enhance performance via the cards' on-board I/O controllers.

Reduce Networking Life-cycle Costs

By taking advantage of Allied Telesis's wide range of PIC options, your company can be assured of graceful migrations from one interface to another without having to replace core equipment, resulting in reduced capital, training, deployment, and management requirements as your network evolves.

2-Port FXS-VoIP PIC

The AT-AR027 FXS (Foreign Exchange Service) PIC provides low-density, high-quality, full-duplex, inter-site voice/fax communication over IP. Combined with an Allied Telesis router or Rapier Layer 3 switch it will allow up to eight telephones or faxes to be connected to a Local Area Network.

Industry Standard Compatibility

The AT-AR027 fully complies with Industry Standard Protocols, such as VoIP, H.323 v2, SIP, G.711 A/μlaw, G.723.1 and G.729 A/B (optional).

High Quality of Voice

The AT-AR027 also provides support for various voice CODECs i.e. G.711 (A/μlaw) vocoder 64Kbps, G.723.1 (5.3 and 6.3Kbps) and G.729 A/B (8Kbps) (optional).
