PUSH TO TALK GUIDE

The Keys to Push to Talk

Push to Talk (PTT) from AT&T lets you see whether your family, friends, and co-workers are available to talk before you call. You can reach them individually or everyone at once via a group call, all in an instant. No other Push to Talk service enables you to do all this.

This handset supports centralized corporate contact management via the Push to Talk Corporate Administrator website. Contact your business sales representative, or www.wireless.att.com/ptt for more information.
