Thank you for choosing the up-to-date CDM-8200, our new model, developed by top researchers to support the IS-95B system through Qualcom-manufactured MSM 3100 chips and CDMA technologies. This product allows for high speed communication services, such as web browsing and data \& fax services.
Among its many advanced features, the T9 input mode makes it much easier to enter letters into messages and the phonebook. In addition, the CDM-8200 has many user friendly features such as:

- Full Graphic display of 5 text input line and 1 icon line with variable font size.
- Two-way speakerphone for hands-free operation.
- Multilingual (English and Spanish available).
- Enhanced for web browsing \& data services (i.e.; wireless internet access, wireless fax send/receive, Openwave.com, Up browser).

## IMPORTANT INFORMATION

This CDM-8200 user guide contains very important information about how to handle and use the product. So please read this manual thoroughly. Please make sure that you don't drop the phone, apply any physical impact on, and immerse the phone. And also please pay attention to the warranty on the back page and be alert to the exclusions and limitations of your warranty, which are related with the unauthorized use of components.

Standard Battery

Handstrap

HANDSET DESCRIPTION

## THEFUNCTION KEYS I

Press to scroll through the items in the menu.

(Soft 1) Press to access the menu or function as shown in the bottom line of the display.

(Soft 2) Press to access the web browser and review a voice or text message, and return to the previous page.

Press to scroll through the items and adjust volume up/down.
These are on the left side of the phone.

Press and hold to set Manner Mode. In this mode, keypad tone is off and vibrator is on.

HANDSET DESCRIPTION

Service Indicator
Call is in progress, indicates the phone is in
standby mode.
S Scratchpad

## E Emergency Call

Blinks when an emergency call is in progress.

```
Manner Mode
Manner Mode on - phone will vibrate when call is
received.
```

## BATTERY USAGE

## BATTERY USAGE

## BATTERY INSTALLIATION

BATTERY CHARCING
POWER CONNECTION
1 (1) Place the battery on the back of the handset and slide into place. (2) Push the battery down until it locks into place.

## DATTERY REMOVAL

1 (1) Pull down the release latch, (2) lift up the battery and remove the battery from the handset.

Securely place the battery to avoid slipping off during a call. To avoid losing any unsaved features and messages, turn off the phone before removing the battery.
(1) Connect the adapter into the desktop charger and plug it to the standard AC wall outlet.

## The red LED indicates charging is in progress

Fully charge the battery before using - it is not charged when purchased.

## CHARGING THE BATTERY WITH THE HANDSET

1 Place the handset (with battery attached) into the charger.
 It is more
If the red LED does not illuminate when charging, check the power connection and make sure the handset is securely in place

## CHARGING THE BATTERY ONLY

1 Detach battery from handset and place in charger.

The red LED indicates charging is in progress.
The green LED indicates charging is completed

## BATTERY LIFE (FOR NEW BATTERY)

The operating time is subject to your handset usage and configuration.

|  |  | Standard Battery <br> (950 mAh) |
| :---: | :---: | :---: |
| Talk <br> (min) | AMPS | 170 min |
|  | PCS | 130 min |
|  | AMPS | 190 min |
|  | PDMA | 160 hrs |
|  | PCS | 12 hrs |

## DOs

- Only use the battery and charger approved by the manufacturer
- Only use the battery for its original purpose.
- Try to keep batteries in a temperature between $41^{\circ} \mathrm{F}$ and $95^{\circ} \mathrm{F}$.
- If the battery is stored in temperatures above or below the recommended range, give it time to warm up or cool down before using.
- Completely drain the battery before recharging. It may take one to four weeks to completely drain.
- Store the discharged battery in a cool, dark, and dry place.
- Purchase a new battery when its operating time gradually decreases after fully charging.
- Properly dispose of the battery according to local laws.

## DON'IS

- Don't attempt to disassemble the battery - it is a sealed unit with no serviceable parts.
- Don't accidentally short circuit the battery by carrying it in your pocket or purse with other metallic objects such as coins, clips and pens. This may critically damage the battery.
- Don't leave the battery in hot or cold temps. Otherwise, it could significantly reduce the capacity and lifetime of the battery.
- Don't dispose of the battery into a fire.

BASIC OPERATION

This chapter addresses and explains the basic features of your phone including:

$\checkmark$ Accessing the Menu and Menu Options
$\checkmark$ Making and Answering a Call
$\checkmark$ Placing Emergency Calls

TURNING THE PHONE ON / OFF

## TURNING THE PHONE ON

1 Press and hold [ © ], until the logo appears and the tone sounds.
(!) - When "Password" appears on the display enter your 4-digit password to unlock your phone.

- The default password is the last 4 digits of your phone number.
- The tone will not be heard if keypad volume is set to silent.

## TURNING THE PHONE OFF

1 Press and hold [ © ] until "Power off" displays.

- Immediately change or recharge the battery when "Low Battery Warning Power Off" appears on the display Memory may possibly be damaged if the phone turns off due to the battery completely draining
Turn the phone off before removing or replacing the battery. If the phone is on, data may be lost.

## ACCESSING THE MENU

Your phone can be customized via the menu. Each function can be accessed by scrolling with the navigation keys or by pressing the number that corresponds with the menu item.

1 In the standby mode, press [ $\cdot \cdot$ ] to access the menu.

2 Use the navigation key or the volume buttons to scroll through the menu.

3 Press [ $\odot$ ] to return to the previous page. Press [ $\kappa^{\circ}$ ] to exit the current menu

4 Select an item with the navigation key or the volume buttons when it is highlighted.
Or, press the corresponding number with the digit keys.

5 [ $\because$ ], [ $\odot$ ], [ © ] , [ © ] , [* $\%$, [ [\#) ] enable you to scroll through the menu.

1: INCOMING
2 : OUTGOING
3 : MEMORY
4 : LONG DISTANCE
5 : 900\#' S
1 : CLR PHONEBOOK 2 : CLR SCHEDULE 3 : CLR CALL LOGS 4 : CLR HOME CALLS 5 : CLR ROAM CALLS

## BASIC FUNCTIONS

## MAKING A GALI

1 Enter a phone number.

## To modify the phone number you have entered:

- Press [ $\ldots$ ] to erase one digit at a time
- Press and hold [ $\odot$ ] to erase the entire number and input correct number again.

2 Press [ $\bigcirc$ ].
The indicator "CALL" appears on the display
(Nofit)

- If "CALL FAILED" appears on the display or the line is busy, press [ ©.] to return to the standby screen or [ © ] to try to call again.
- If you activate the "AUTO RETRY" function, the phone will automatically retry for the number of times you have selected. (refer to page 40)

3 Press [ © ] to end the call.

## BASIC FUNCTIONS

## PAUSE FEATURE

You can dial or save a phone number with pauses for use in the automated systems where you need to enter a pin number, a social security number, and so on. This feature is convenient if you are linked to ARS (Advanced Record System).

Enter a phone number, then press [ $: \cdot$ ]

2 Select one desired pause.

| In standby mode | In receiving mode |
| :--- | :--- |
| 1: STORE | $1:$ SEND PHONE\# |
| 2: BY NUMBER | $2:$ SCRATCH PAD |
| 3: HARD PAUSE | $3:$ MUTE |
| 4 : ONE HYPHEN | $4:$ VIEW PHONE\# |
|  | $5:$ VOICE PRIVACY |
|  | $6:$ SPEAKER MODE |

(NOPE) Pause Definitions

- To dial or save a phone number with pause functions: When you select Hard Pause, the next numbers are sent by pressing [ © ] key

3 Press [ $\bigcirc$ ] to dial or [©] to store

## BASIC FUNCTIONS

## ANSWERING A CALLI.

1 Press any key to answer the call except the volume buttons and [ © ].

2 Press [ © ] to end the call.
Nofit E) In Auto Answer Mode, a call is automatically answered after a present number of ring tones. See page 40 for more details.

## CALLER ID FUNGTION

Displays the caller's name and phone number, if available, in the phone book.

```
The Caller ID is stored in the call log
```

## CALL WAITING FUNCTION

Notifies you of an incoming call when you are on the phone by making a beep sound and displaying the caller's phone number on the screen.

1 Press [ $\cap$ ] to answer the other call. This places the first call on hold while answering the second call.
Press [ ] ] again to switch back to the first call.

## BASIC FUNCTIONS

## MISSED CALL DISPLAY

1 Displays the number of missed calls with the time of the last missed call.
 PREV
Press [ $\odot \cdot]$ or $[\because]$ to clear the
missed call display.

## DADJUSTING VOLUME

Adjust the volume with the volume buttons on the side of the handset or through the menu entry.

## 1 Volume adjustments are as follows:

```
During a call : Earpiece volume Standby mode : Ringer volume When the phone rings : Ringer volume
In hands-free car kit : Kit volume. (Press [ © ] to
``` mute the ring when the phone rings)

\section*{VIBRATOR}

Notifies you of an incoming call by vibrating instead of sounding the ringer tone.
1 Press [ \(\cdot \cdot][\) (306F \(][\). \(1 .-\) ] and select "Vibrator" to enable the function.

\section*{MANNER MODE}

Allows you to silence the ringer and other tones while attending a meeting or any other time you do not want a ring heard. Press and hold [ ** A happy face appears in the display when Manner Mode is activated

\section*{DURING A CALL}

\section*{SENDING YOUR NUMBER TO A PACER}

Automatically transmits your phone number to a pager during a call without manually entering the number.

1 When connected to a pager and asked to enter your phone number, press [ \(\odot\) ] [ \(\cdot-\) ].

\section*{SCRATCH PAD}

Stores a new phone number during a call without the calling party hearing the keypad tones.

1 While on a call, press [ \(: \cdot][\) [2.. \(]\)
2 Enter a phone number, press [ \(\because\) ] and, then, save the phone number in the phonebook. (refer to page 30)

\section*{MUTE}

The caller cannot hear you and any sound from your side, while you can hear his or her voice.
1 Press [ \(\odot][\) [3" \(]\).
To unmute, press \([\odot]\).
 xxx-xxx-xxxx CEENO OFF

\section*{D VIEW PHONE \#}

Displays your phone number during a call and automatically returns to the receiving mode in five minutes.

1 Press [ \(\odot]\left[4{ }^{\circ} \mathrm{m}\right]\).

DOICE PRIVACY
Enhances voice privacy during a call.

\section*{MAKING AN EMERGENCY CALL}

An enhanced 911 feature that puts your phone on the Emergency Call Mode when you dial the preprogrammed emergency number, 911. It even operates in the lock mode and out of the service area

\section*{E911 IN LOCK MODE}

The 911 call service is available even in the lock mode.
1 Enter "911" and press [ ( )].

2 The call connects.

3 The phone exits the Lock Mode in 5 minutes.

When the call ends, the phone returns to the Lock Mode.

\section*{E911 USING ANY AVAILABLE SYSTEM,}

1 Enter " 911 " and press [ ( )].
2 The call connects.

3 Reserve emergency mode during 5 minutes.
```

When the call ends, the phone returns to the
Emergency mode.
The phone continuously attempts to receive
service from any available system

```
1 Press [ \(\%\) ][5m].

This chapter addresses memory functions including:
\(\checkmark\) Storing Phone Numbers
\(\checkmark\) Entering Letters, Numbers and Characters
Making Calls Through a Phonebook

\section*{STORING A PHONE NUMBER}

The phonebook stores up to 100 numbers.
1 Enter a phone number (more than
Location: \(\quad X X\)
\begin{tabular}{l}

\section*{HOME CALLS}

Displays talk time of all calls made within Home area
\[
1 \text { Press }[\odot][4(4 \sigma)][3(3 \sigma)] \text {. }
\]

ROAM CALIS
Displays talk time of roaming calls.

\section*{SCHEDULE}

Organizes and tracks your schedule.
LIST ALL Lists and displays scheduled activities.
\((1\) Press [ \(\odot\) ][ \(5 \cdot \infty][(1)][\oplus]\).
Pressing [ \(: \cdot\) ] displays schedule details.
INPUT SCHEDULE Inputs your schedule and sets its alarm.

2 Select a date in the calendar and press [ \(\odot\) ].
\(\square\)
[ © \& 8 \(]\) ]/ [ [ \(\oplus-\) ], numeric key - day input.
3 Select one of the following options.
Alarm type: Press [1.]. Select One time or Daily, then press \([\odot]\).
Schedule title: Press [ \(2 \boldsymbol{2} \boldsymbol{\sigma}\) ]. Input a schedule title, then press \([\odot]\).
Phone number: Press [ 30 ]. Input a phone number and reserve a call then press [ \(: \cdot\) ].
4 Then press [ \(:\) ].
5 Set the time \& time of day for the schedule. Use the navigation key to choose AM or PM. Press [ \(: \cdot\) ] to select the time. Use the navigation key or the digit keys to change the time.
Press [ \(: \cdot\) ] to save.
PAUSE ALL Places all schedules on hold.

2 Select "Yes" or "No" with the navigation key and press [ \(: \cdot\) ].

\section*{STOPWAICH}

1 Press [ \(\odot]\left[5^{5 \cdot m}\right][2 \times \pi]\).

2 Press [ \(\odot\) ]/[ \(\odot\) ] to use the stopwatch

Press [ .. ] to start or stop.
Press [ \(\odot\) ] for Split/Split Release /Initia/Previous. The time is displayed in a \(100^{\text {m }}\) unit of a second.

3 Press [ © ] to exit and return to the initial display.

\section*{CALCULATOR}

2 To use the calculator.

\section*{Definitions}
 You can enter up to 8 integer digits.
There is no way to enter a decimal point.
To express a negative number, you subtract its absolute value from 0

To calculate \(128 \times 32=\) 1. Enter 128
2. Press [ 80 ]
3. Enter 32
4. Press \([\odot]\) to calculate it.

\section*{BIORHYHHM}

Provides your physical, emotional and intelligent condition for today or a specific day. You will have input your birthday before using this function.
```

1 Press[ % ][ 5.0][400] ].

```

2 Press [ 3 (30] "BIRTHDAY".

\section*{2:Someday \\ }

1:Today
\(\qquad\)
Enter your birthday in year/ month/day, then press [ \(\odot\) ].

3 Select "Today" to check out your biorhythm for today or "Someday" to check out your biorhythm for a specific day

The biorhythm functions only when the phone can synchronize with the network system.
You cannot enter a date earlier than your birthday to check out the biorhythm for the specific date. You cannot enter your birthday later than today, either.

\section*{- What is the biorhythm?}

Biorhythm is a life rhythm that consists of three rhythm curves, which are a physical, emotional and intelligent ones. The rhythm will match up to your condition from birth to death.
- How does it work?

You will see a physical,emotional, and intelligent quotient with a number indicating how many days have passed from birth to date.The biorhythm is displayed on the upper portion of the screen.
© Physical rhythm
The physical rhythm controls your physical condition in a cycle of 23 days,such as resistance to diseases, muscle strength, agility, speed, physiology, and so on
(8) Emotional rhythm.

The emotional rhythm manages creativity,sensitivity,recognition and human nature in a cycle of 28 days.
- Intelligent rhythm.

The intelligent rhythm affects our susceptibility to fright, acceptance of knowledge, logical and analytic power, and memory in a cycle of 33 days.

\section*{MIN ALERTT}

Sounds an alert every minute of a phone call.

2 Select "On or "Off" with the
 navigation key and press [ \(\cdot \cdot\) ] to save it.

\section*{DOAM ALERTI}

Sounds an alert when leaving a service area and entering a roaming service area.

2 Select "On" or "off" with the navigation key and press [ \(\because\) ] to save it.

\section*{FADE ALIERT}

Sounds an alert when entering an area where calls cannot be made due to weak signal strength. The alert sounds in standby mode.

2 Select "On" or "off" with the
 navigation key and press [ \(\cdot \cdot\) ] to save it.

\section*{DATA SERVICE}

LOW SICNAL ALIERTI
Sounds an alert when low signal strength is encountered during a call.

2 Select "On" or "Off" with the
 navigation key and press [ \(: \cdot\) ] to save it.

\section*{CONNECT ALERT}

Notifies you that a call has been successfully placed.
1 Press [ \(\odot \mathrm{l}[\mathrm{c}=\mathrm{m}][\mathrm{s} \cdot \mathrm{m}]\).

2 Select one of the following options (OFF/LOW/MID/HIGH) with the navigation key.
Press [ \(: \cdot\) ] to save it.

RECEIVE MODE

2 Select one from (INACTIVE/DATA/FAX) with the navigation key and press [ \(\odot\) ].

INACTIVE : In use of the phone DATA : For use of data
FAX: In use of a fax

\section*{) FLOW CONTROL}

Controls data flow when data service is received

2 Select either "HARDWARE" OR "SOFTWARE" with the navigation key and press [.\(\cdot\) ] to save it.
```

HARDWARE : Hardware flow control
SOFTWARE : Software flow control
(RECOMMEND : Hardware flow control)

```

\section*{) PREF SYSTEIM |}

Selects the Preferred System.
1 Press \([\because][8 m][\uparrow]\).

2 Select one of the following options (Automatic A/Automatic B/Home Only) with the navigation key and press [ \(: \cdot\) ].

Automatic A: Scan the radio channels based on the Automatic A setting.
Automatic B : Scan the radio channels based on the Automatic B setting.
Home Only : Only within your home area or home affiliated area.

\section*{CHANCE NAM}

Changes the NAM (Number Assignment Modules) used by the phone when you have multiple registrations.

1 Press [ \(\%\) ][ \(8=][\) [2me \(]\).
2 Select a NAM (NAM1, NAM2) with the navigation key and press [ \(: \cdot\) ].

\section*{AUTO NAMI}

Automatically switches phone to proper NAM when you have multiple NAM registrations.

2 Select "Yes" or "No", then press

[ \(\because\) ] to save it.

\section*{PRLID}

Displays the phone's PRL (Preferred Roaming List).
1 Press [ \(\odot][8 m][4 \sigma m\).

\section*{FORCE ANALOG}

Temporarily forces your phone to use the Analog mode - mode automatically ends in 10 minutes

1 Press [ \(\odot][8 m][5 m]\).

\section*{CALL PROMPT}

This function will notify you whether you are to be charged for the incoming call or not.

1 Press \([\because][8:][6(6)]\).
2 Select one of the following options (ON / OFF / 7 seconds) with the navigation key and press [ \(: \cdot\) ] to save it.

OFF : Will not display call prompt
ON : Display [To be charged] only when the ringer sounds. 7 seconds : Display [To be charged] for 7 seconds.

You are to press [ © ] only to place a call when either ON or 1 seconds is set in "Call Prompt".

CHECKING MY NUMBER
To display your phone number:
1 Press [ \(: \cdot][\infty]\).

\section*{Chapter 5}

\section*{SECURITY FEATURES}

This copy addresses security features including
\(\checkmark\) Locking the Phone
\(\checkmark\) Changing Your Password
Restricting Your Phone
\(\checkmark\) Clearing the Memory

\section*{AUTO LOCK}

Prevents others from using your phone without permission.
When locked, the menu cannot be accessed.
\(\square\) password.
Then press [ ©. ].

The default password is the last 4 digits of your phone number.

2 Select one of the following options (Power On/ Off/On) with the navigation key and press [ \(: \cdot]\).
"POWER ON" : Locks your phone whenever it is turned on.
"OFF" : Unlocks your phone and leave it unlocked.
"ON" : Locks your phone as it is.

\section*{CHANCE CODE}

Changes your 4-digit password
1 Press [ \(\because][\%]\) and enter your password.
Then press [ \(2 \times 0\) ]. \(\square\)
Password? xxxx

The default password is the last 4 digits of your phone number.

2 Enter a new password and press [ \(: \cdot\) ].

3 Enter the new password again and press [ \(: \cdot\) ].

Even if your phone is locked, you can still make an Even if your phone is locked, you can still make an function.

CHANGING YOUR BANNER

\section*{CHANGE BANNER}

Changes the banner that displays on the screen. It can be a maximum of 16 characters.

1 Press [ \(\because\) ][ \(\overbrace{\text { oeet }}\) ] and enter your password.
Then press [ उ \({ }^{\text {beFF }}\) ].

2 Select an input mode by using [ © ].
(Please refer to page 30 for more details on entering letters and numbers.)

3 Enter a new banner, then press [ \(\odot\) ].

\section*{RESTRICTING YOUR PHONE}

\section*{RESTRICT}

Prevents the unauthorized use of the phone and the changing of settings. There are 5 different restriction modes available.

1 Press \([. \cdot][\sigma]\) and enter your password.
Then press [ © \(\dagger \mathrm{m}]\).

The default password is the last 4 digits of your phone number.

2 Select "Yes" to enable the restriction with the navigation key and press [ \(\cdot:\) ].

\section*{RESTRICTING YOUR PHONE}

\section*{INCOMING CALLS}

Blocks all incoming calls while allowing outgoing calls to be placed.
1 Press [ \(\odot\) ][ \(\odot\) ] and your password, then [ 4ome]. Select "Yes" and press [ ©. \(]\)

2 Select "Allow" or "Restrict" with the navigation key.

\section*{RESTRICT : Restrict an incoming call}

ALLOW : Allow an incoming call.
3 Press [ \(\%\) ].

\section*{OUTGOING CALLS}

Blocks all outgoing calls except emergency calls from being placed, while allowing incoming calls to be answered.

1 Press [ \(\odot][\) ore \(]\) and enter your password, then [ 4me]. Select "Yes" and press [ \(2 \cdot=\) ]

2 Select "Allow" or "Restrict" with the navigation key.

RESTRICT : Restrict an outgoing call. ALLOW : Allow an outgoing call.

3 Press [ \(: \cdot\) ].

\section*{RESTRICTING YOUR PHONE}

\section*{MEMORY}

Blocks access to, and protects data in your phonebook.
Press \([\because]\left[\odot^{\circ}\right]\) ] and enter you
password, then paswa, Select "Yes" and press [ उö] \(\square\)

2 Select "Allow" or "Restrict" with the navigation key.

RESTRICT : Restrict access to the phonebook.
ALLOW : Allow access to the phonebook.
3 Press [ \(: \cdot\) ].

\section*{LONG DISTANCE CALLS}

Restricts calling long distance numbers - the phone is limited to calling numbers within the area.
 password, then [ 40m)].
Select "Yes" and press [ 4me]. \(\square\)

2 Select "Allow" or "Restrict" with the navigation key.

RESTRICT : Restrict a long distance call
ALLOW : Allow a long distance call.
3 Press [ \(:\) ].

\section*{RESTRICTING YOUR PHONE}

\section*{900 \#'S}

\section*{Restricts calling 900 dial service numbers}
 password, then [ 4am ]. Select "Yes" and press [ 5m ]
Select "Allow" or "Restrict" with the navigation key.
RESTRICT : Restrict a 900-dial service.
RESTRICT : Restrict a 900-dial service.
ALLOW : Allow a 900-dial service.
ALLOW : Allow a 900-dial service.
(3) Press [ \(\cdot\) ].
"This phone is restricted" appears on the display when you attempt to make a restricted call.

\section*{CLEARING YOUR MEMORY}

CLEARING YOUR MEMORY

\section*{CLEARING CALL LOCS}

Clears all dialed numbers from call logs.
1 Press [ \(\because \mathrm{H}[\mathrm{m}]\) and enter your password.
Then press [ \(6 \cdot]\) [ 3.0 ].

The default password is the last 4 digits of your phone number.

2 Select "Yes" or "No" with the navigation key. Press [ \(:\). ].

\section*{CLEARING SCHEDULES}

Clears all schedules.

\section*{CLEARING THE PHONEBOOK}

Clears all phonebook entries.
1 Press [ \(\cdot \cdot][\) [rate ] and enter your password.
Press [ (6m) [ \(\uparrow\)

The default password is the last 4 digits of your phone number.

2 Select "Yes" or "No" with the navigation key. Press [ \(: \cdot\) ].

1 Press [ \(:]\) ] \(\odot\) and enter your password.
Then press [ \(\left.\sigma^{6 m}\right][2 m]\).

2 Select "Yes" or "No" with the navigation key. Press [ \(: \cdot\) ].

\section*{CLEARING HOME CALLS}

Clears airtime used for home calls.
1 Press [ \(\because][\%]\) and enter your password.

2 Select "Yes" or "No" with the navigation key. Press [ \(: \cdot\) ].

Clears airtime used for roaming calls.
1 Press [ \(\%\) ][ \(\%\) ] and enter your password.
Then press [ \(\left.\mathrm{c}_{\mathrm{m}} \mathrm{m}\right)\) [ \(\left.\mathrm{c}_{5} \mathrm{~m}\right)\) ].

The default password is the last 4 digits of your phone number.

2 Select "Yes" or "No" with the navigation key Press [ \(\because\) ].

\section*{VERSION}

Displays the version of your phone.
1 Press [ \(\because]\) ] \(\odot\) ] and enter your password. Then, press [

``` HW: TX-2ib.XX OK PR QREV
```

SAFETY AND
WARRANTY

This chapter addresses Safety and Warranty issues including \(\checkmark\) Antenna Care
\(\checkmark\) Driving and Talking on the Phone
\(\checkmark\) Use Around Electronic Devices
\(\checkmark\) Precautions
- SAR Information
\(\checkmark\) FDA Consumer Update

\section*{SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES}

\section*{Read This Information Before Using Your Handheld Portable Cellular Telephone}

\section*{EXPOSURE TO RADIO FREQUENCY SIGNALS}

Your wireless handheld portable telephone is a low power radio transmitter and receiver. When it is ON, it receives and also sends out radio frequency (RF) signals.

In August 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for handheld wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standard bodies:

> ANSI C95.1 \((1992)^{*}\)
> NCRP Report 86 (1986) *
> ICNIRP (1996) *

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C951).
The design of your phone complies with the FCC guidelines (and those standards)

\section*{ANTENNA CARE}

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

\section*{SAFETY INFORMATION FOR WIRELESS HANDHELD PHONES}

\section*{DRIVING SAFETY}

Talking on the phone while driving is extremely dangerous and is illegal in some states. Remember, safety comes first. Check the laws and regulations on the use of phones in the areas where you drive. Always obey them.
Also, if using your phone while driving, please:
- Give full attention to driving. Driving safely is your first responsibility.
- Use hands-free operation, if available.
- Pull off the road and park before making or answering a call, if driving conditions so require.

If you must use the phone while driving, please use one-touch, speed dialing, and auto answer modes.

An airbag inflates with great force. DO NOT place objects, including both installed or portable wireless equipment, in the area over the airbag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

WARNING: Failure to follow these instructions may lead to serious personal injury and possible property damage.

\footnotetext{
\(1^{*}\) : American National Standards Institute.
\(2^{*}\) : National Council on Radiation protection and measurements.
\(3^{\star}\) : International Commission on Nonionizing Radiation Protection.
}
(84)
85)

\section*{SAFETY INFORMATION FOR WIRELESS \\ HANDHELD PHONES}

ELECTRONIC DEVICES
Most modern electronic equipment is shielded from RF energy However, certain electronic equipment may not be shielded agains the RF signals from your wireless phone.

\section*{PACEMAKERS}

The Health Industry Manufacturers Association recommends that a minimum separation of six ( 6 ") inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendation f Wireless Technology Research
Persons with pacemakers :
- ALWAYS keep the phone more than six inches from you pacemaker when the phone is turned on.
- Do not carry the phone in a breast pocket.
- Use the ear opposite the pacemaker to minimize the potentia for interference.
- If you have any reason to suspect that interference is taking place, turn your phone OFF immediately.

\section*{OTHER MEDICAL DEVICES}

If you use any other personal medical device, consult the manufacturer of your device to determine shielded from external RF energy Your physician may be able to assist you in obtaining this information.

Turn your phone OFF in healthcare facilities when any regulations posted in these areas instruct you to do so. Hospitals or healthcare RF energy.

\section*{POSTED FACILITIES}

Turn your phone OFF where posted notices so require.

\section*{OTHER SAFEIY GUIDELINES}

\section*{AIRCRAFT}

FCC and Transport Canada Regulations prohibit using your phone while in the air. Turn your phone OFF before boarding an aircraft.

\section*{BLASTING AREAS}

To avoid interfering with blasting operations, turn your phone OFF when in a "blasting area" or in areas posted: "Turn off two-way radio." Obey all signs and instructions

\section*{POTENTIALLY EXPLOSIVE ATMOSPHERES}

Turn your phone OFF when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury o even death

Areas with a potentially explosive atmosphere are often, but no always, clearly marked. They include fueling areas such as gas stations; below deck on boats; fuel or chemical transfer or storag facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or articles, such as grain, dust, or metal powders; and any other area where you would normally be advised to turn off your vehicle's engine.

\section*{SAFETY INFORMATION FOR WIRELESS \\ HANDHELD PHONES}

\section*{PRECAUTIONS}

Your Handheld Portable Telephone is a high quality piece of equipment. Before operating, read all instructions and cautionary markings on (1) AC Adaptor (2) Battery and (3) Product Using Battery.DO NOT use this equipment in an extreme environment where high temperature or high humidity exists.DO NOT abuse the equipment. Avoid striking, shaking or shocking. When not using, lay down the unit to avoid possible damage due to instabilityDO NOT expose this equipment to rain or spilled beverages.DO NOT use unauthorized accessories

DO NOT disassemble the phone or its accessories. If service or repair is required, return unit to an authorized Audiovox electric shock or fire may result.

DO NOT short-circuit the battery terminals with metal items etc

\section*{SAFETY INFORMATION FOR} FCC RF EXPOSURE

\section*{4}

\section*{WARNING! Read this Information before using}

\section*{CAUTIONS}

In August 1996 the Federal Communications Commossion (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. Th design of this phone complies with the FCC guidelines and thes esign of this phone complies with the FCC guidelines and thes international standards.

Use only the supplied or an approved antenna. Unauthorized antennas, modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations.
Do not use the phone with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result Please contact your local dealer for replacement antenna.

\section*{BODY-WORN OPERATION}

This device was tested for typical body-worn operation with the back of the phone kept 0.5 inchs \((1.27 \mathrm{~cm})\) from the body. To comply with FCC RF exposure requirements, a minimum separation distance of 0.5 inchs \((1.27 \mathrm{~cm})\) must be maintained between the user's body and the back of the phone, including the antenna, whether extended or retracted. All belt-clips, holsters and similar accessories used by this device must not contain any metallic components. Body-worn accessories that do not meet these requirements may not comply with FCC RF exposure limits and should be avoided.

\section*{VEHICLE MOUNTED EXTERNAL ANTENNA}

\section*{(OPTIONAL, IF AVAILABLE)}

A minimum separation distance of 7.9 inches \((20 \mathrm{~cm})\) must be maintained between the user/bystander and the vehicle mounted external antenna to satisfy FCC RF exposure requirements.

For more information about RF exposure, please visit the FCC website at www.fcc.gov

\section*{THIS MODEL PHONE MEETS THE GOVERNMENT'S \\ RE-QUIREMENTS FOR EXPOSURE TO RADIO WAVES}

Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to radiofrequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF standards the gere developed by independent scientific organizations through periodic and thorough evaluation of scientific orudies. The standards include a substantial safoty margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is \(1.6 \mathrm{~W} / \mathrm{kg}\). * Tests for SAR are conducted with the phone transmitting at its highest certified power level in all with the phone transmitting at its highest certified power level in all highest certified power level, the actual SAR level of the phone while highest certified power level, the actual SAR level of the phone while
operating can be well below the maximum value. This is because the operating can be well below the maximum value. This is because the
phone is designed to operate at multiple power levels so as to use only the power required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the powe output.

Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the governmentadopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model. The highest SAR value for this model phone when tested for use at the ear is \(1.47 \mathrm{~W} / \mathrm{kg}\) and when worn on the body, as described in this user guide, is \(0.499 \mathrm{~W} / \mathrm{kg}\). (Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements). While there may be differences between the SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure.

\footnotetext{
In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts \(/ \mathrm{kg}(\mathrm{W} / \mathrm{kg})\) averaged over one gram of tissue. The standard incorporates a sub-stantial margin of safety to give additional protection for the
public and to account for any variations in measurements.
}

The FCC has granted an Equipment Authorization for this mode phone with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display
 PP4TX-21B

Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association(CTIA) web-site at http://www.wow-com.com.

\section*{}
1. Do wireless phones pose a health hazard?
The available scientific

The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, however, that wireless
phones are absolutely safe. Wireless phones emit low levels of radiofrequency phones are absolutely safe. Wireless phones emit low levels of radiofrequency
energy (RF) in the microwave range while being used. They also emit very low levels of RF when in the stand-by mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating ef-fects causes no known adverse health effects. Many studies of low leve RF exposures have not found any biological ef-fects. Some studies have suggested that some biological ef-fects may occur, but such findings have no
been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.

\section*{2. What is FDA's role concerning the safety of wireless phones?}

Under the law, FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, as it does with new
drugs or medical de-vices. However, the agency has authority to take action if wire-less phones are shown to emit radiofrequency energy (RF) at a level that is hazardous to the user. In such a case, FDA could require the manufacturers of wireless phones to notify users of the health hazard and to repair, replace or recal the phones so that the hazard no longer exists. Although the existing scientific data do not justify FDA regula-tory actions, FDA has urged the wireless phone industry Support needed research into possible biologica emitted by wireless phones;
- Design wireless phones in a way that minimizes any RF ex-posure to the user not necessary for device function;
and
Cooperate in providing users of wireless phones with the best possible
FDA belongs to an interagency working group of the federal agencies that have esponsibility for different aspects of RF safety to ensure coordinated efforts at the federal level. The following agencies belong to this working group: - National Institute for Occupational Safety and Health
- Environmental Protection Agency
- Occupational Safety and Health Administration
- National Telecommunications and Information Administration

The National Institutes of Health participates in some inter-agency working group activities, as well. FDA shares regulatory responsibilities for wireless phones with the Federal Communications Commission (FCC). All phones that are sold in the United States must comply with FCC safety guidelines that limit RF exposure. FCC
relies on FDA and other health agencies for safety questions about wireless relies on FDA and other health agencies for safety questions about wireless
phones. FCC also regulates the base stations that the wireless phone networks rely upon. While these base stations operate at higher power than do the wireless phones themselves, the RF expo-sures that people get from these base stations are typically thousands of times lower than those they can get from wire-les phones. Base stations are thus not the subject of the safety questions discussed in this document.
3. What kinds of phones are the subject of this update?

The term "wireless phone" refers here to hand-held wireless phones with built-in antennas, often called "cell," "mobile," or "PCS" phones.

These types of wireless phones can expose the user to measurable radiofrequency energy (RF) because of the short distance between the phone and the user's head. These RF exposures are limited by Federal Communications Commission safety
guidelines that were developed with the advice of FDA and other federal health and safety agencies. When the phone is located at greater distances from the user, the exposure to RF is drastically lower because a person's RF exposure decreases rapidly with increasing distance from the source. The so-called "cordless phones, which have a base unit connected to the telephone wiring in a house, typically operate at far lower power levels, and thus produce RF expo-sures far below th limits.

\section*{4. What are the results of the research done already?}

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments wirestigating the effects of radiofrequency energy (RF) exposures characteristic of wire-less phones have yielded conflicting results that often cannot be repeated in other laboratories. A few animal studies, how-ever, have suggested that low levels
of RF could accelerate the development of cancer in laboratory animals. However many of the studies that showed increased tumor develop-ment used animals that had been genetically engineered or treated with cancer-causing chemicals so as to be pre-dis-posed to develop cancer in the absence of RF exposure. Other studies exposed the animals to RF for up to 22 hours per day. These conditions are no similar with certainty what the results of such studies mean for human health. Thre large epidemiology studies have been published since December 2000. Between them, the studies investigated any possible association between the use of wireless phones and primary brain cancer, glioma, meningioma, or acoustic neuoma, tumors of the brain or salvary gland, le kia, ores health effects from wireless phone RF exposures. However, none of the studies can answer questions about long-term exposures, since the average period of phone use in these studies was around three years.
5. What research is needed to decide whether RF expo-sure from wireless phones poses a health risk?
A combination of laboratory studies and epidemiological stud-ies of people actually using wireless phones would provide some of the data that are needed.
Lifetime animal exposure studies could be completed in a few years. However, very large numbers of animals would be needed to provide reliable proof of a cancer promoting effect if one exists. Epidemiological stud-ies can provide data that is directly applicable to human popu-lations, but 10 or more years' follow-up may be needed to pro-vide answers about some health effects, such as cancer.
This is because the interval between the time of exposure to a can-cer- causing agent and the time tumors develop - if they do -may be many, many years. The interpretation of epidemiologi-cal studies is hampered by difficulties in measuring actual RF exposure during day-to-day use of wireless phones. Many fac-tors affect this measurement, such as the angle at which the phone is held, or which model of phone is used

\section*{6. What is FDA doing to find out more about the possible health effects ne RF?}
nvestigators around the U.S. National Toxicology Program and with groups of conducted to address ine world to ensure that high priority animal studies are radiofrequency energy (RF). FDA has been a leading participant in the World Health Orga-nization International Electromagnetic Fields (EMF) Project since its inception
in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world.

The Project has also helped develop a series of public information documents on
EMF issues. FDA and the Cellular Telecommunications \& Internet Asso-ciation EMF issues. FDA and the Cellular Telecommunications \& Internet Asso-ciation
(CTIA) have a formal Cooperative Research and De-velopment Agreemen (CRADA) to do research on wireless phone safety. FDA provides the scientific oversight, obtaining input from experts in government, industry, and academic organizations. CTIA-funded research is conducted through con-tracts to independent investigators. The initial research will include both laboratory studies
and studies of wireless phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world.
7. How can I find out how much radiofrequency energy exposure I can get by using my wireless phone?
All phones sold in the United States must comply with Federal Communications Commission (FCC) guidelines that limit radiofrequency energy (RF) exposures. FCC
established these guidelines in consultation with FDA and the other federal health and safety agencies. The FCC limit for RF exposure from wire-less telephones is set at a Specific Absorption Rate (SAR) of 1.6 watts per kilogram ( \(1.6 \mathrm{~W} / \mathrm{kg}\) ). The FCC limit is consistent with the safety standards developed by the Institute o Electri-cal and Electronic Engineering (IEEE) and the National Council on Radiation Protection and Measurement. The exposure limit takes into consideration the
body's ability to remove heat from the tissues that absorb energy from the wireless phone and is set well below levels known to have effects. Manufacturers o wireless phones must report the RF expo-sure level for each model of phone to the FC. The FCC website (http://www.fcc.gov/oet/rfsafety) gives directions for ocating the FCC identification number on your phone so you can find your phone's RF exposure level in the online listing.
8. What has FDA done to measure the radiofrequency en-ergy coming from wireless phones?
The Institute of Electrical and Electronic Engineers (IEEE) is developing a technica standard for measuring the radiofrequency energy (RF) exposure from wireless phones and other wireless handsets with the participation and leader-ship of FDA scientists and engineers. The standard, "Recom-mended Practice for Determining the Spatial-Peak Specific Absorption Rate (SAR) in the Human Body Due to
Wireless Communications Devices: Experimental Techniques," sets forth the first consistent test methodology for measuring the rate at which RF is deposited in the heads of wireless phone users. The test method uses a tissue-simulating model of the human head. Standardized SAR test methodology is expected to greatly improve the consistency of measurements made at different laboratories on the
same phone. SAR is the mea-surement of the amount of energy absorbed in tissue, either by the whole body or a small part of the body. It is measured in watts/kg (or milliwatts \(/ \mathrm{g}\) ) of matter. This measurement is used to determine whether a wireless phone complies with safety guidelines

\section*{9. What steps can I take to reduce my exposure to radiofrequency energy} from my wireless phone?
If there is a risk from these products-and at this point we do not know that there is-it is probably very small. But if you are concerned about avoiding even
potential risks, you can take a few simple steps to minimize your exposure to radiofrequency energy (RF). Since time is a key factor in how much exposure a person receives, reducing the amount of time spent using a wireless phone will educe RF exposure.
- If you must conduct extended conversations by wireless phone every day, you could place more distance between your body and the source of the RF, since
the exposure level drops off dramatically with distance. For example, you could use a headset and carry the wireless phone away from your body or use a wireless phone connected to a remote an-tenna.

Again, the scientific data do not demonstrate that wireless phones are harmful. But you are concerned about the RF exposure from these products, you can us
measures like those described above to reduce your RF exposure from wire-less phone use.
The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to adiofrequency energy (RF), the measures described above would apply to children and teenagers using wireless phones. Reducing the time of wire-less phone use
and increasing the distance between the user and the RF source will reduce RF exposure. Some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all. For example, the government in the United King-dom distributed leaflets containing such a recommendation in December 2000. They noted that no evidence exists that us-
ing a wireless phone causes brain tumors or other ill effects. Their ecommendation to limit wireless phone use by children was strictly precautionary it was not based on scientific evi-dence that any health hazard exists.
11. What about wireless phone interference with medical equipment?

Radiofrequency energy (RF) from wireless phones can inter-act with some electronic devices. For this reason, FDA helped develop a detailed test method to measure electromagnetic interference (EMI) of implanted cardiac pacemakers and defibriliators from wireless telephones. This test method is now part of a standard
sponsored by the Association for the Ad-vancement of Medical instrumentation (AAMI). The final draft, a joint effort by FDA, medical device manufacturers, and many other groups, was completed in late 2000. This standard will allow manufacturers to ensure that cardiac pacemakers and defibrillators are safe from wireless phone EMI. FDA has tested hearing aids for interference from handheld wireless phones and helpec develop a voluntary standard sponsored by the
Institute of Electrical and Electronic Engi-neers (IEEE). This standard specifies test methods and per-formance requirements for hearing aids and wireless phones so that that no interference occurs when a person uses a "com-patible" phone and compatible hearing aid at the same time. This standard was approved by the IEEE in 2000. FDA continues to monitor the use of wireless phones for pos-sible occur, FDA will conduct testing to assess the interference and work to resolve the problem.

\section*{12. Where can I find additional information?}

For additional information, please refer to the following re-sources:

Read your Warranty carefully, with the special consideration to paragraph seven of the Limited Warranty for your unit.
"Warranty does not apply to... or to any product or part thereof which has suffered through alteration... mishandling misuse, neglect or accident".

Many companies are making look alike accessories and in some cases, promoting that their product is equal to or better than the Audiovox product. Be careful. Some of these products may not be compatible to use with your Audiovox product and may damage the is or cause it to malfunction. If service is required on your unit and is dem with your unit the Warranty will not apply In addition, if the problem was already suffered irreversible damage by reason of a non compatible accessory, the Warranty will be voided. To protect your Warranty, use only compatible accessories which cannot damage or interfere with the functioning of your Audiovox product.

\section*{AUDIOVOX COMMUNICATIONS CORP.}

555 Wireless Blvd., Hauppauge, New York 11788, 800-229-1235 16808 Marquardt Avenue, Cerritos, California 90703, 562-802-5100 Audiovox Canada
5155 Spectrum Way, Unit \#5, Mississauga, Ontario Canada L4W 5A1, 800-465-9672

Audiovox Communications Corp. (the Company) warrants to the
original retail purchaser of original retail purchaser of this Audiovox handheld portable cellular
telephone, that should this product or any part thereof during normal telephone, that should this product or any part thereof in ing natermal
consumer usage and conditions, be proven defective in material or workmanship that results in product failure within the first twelve (12) month period from the date of purchase, such defect(s) will be repaired or replaced (with new or rebuilt parts) at the Company's option, w
defect(s). The antenna, keypad, display, rechargeable battery and battery
charger, if included, are similarly warranted for twelve (12) months from date of purchase.

This Warranty extends only to consumers who purchase the product in the United States or Canada and it is not transferable or assignable.
This Warranty does not apply to:
(a) Product subjected to abnormal use or conditions, accident, installation or repair or improper storage;
(b) Product whose mechanical serial number or electronic serial (b) Product whose mechanical serial number
number has been removed, altered or defaced.
(c) Damage from exposure to moisture, humidity, excessive temperatures or extreme environmental conditions;
(d) Damage resulting from connection to, or use of any accessory or other product not approved or authorized by the Company;
(e) Defects in appearance, cosmetic, decorative or structural items
such as framing and non-operative parts; such as framing and non-operative parts;
(f) Product damaged from external causes such as fire, flooding, dirt, sand, weather conditions, battery leakage, blown fuse, theft or improper usage of any electrical source.

The Company disclaims liability for removal or reinstallation of the product, for geographic coverage, for inadequate signal reception by
the antenna or for communications range or operation of the cellular system as a whole.

To obtain repairs or replacement within the terms of this Warranty, the product should be delivered with proof of Warranty coverage (e.g. dated bill of sale), the consumer's return address, daytime phone number and/or fax number and complete description of the problem, transportation prepaid, to the Company at the address shown below
or to the place of purchase for repair or replacement processing. In addition, for reference to an authorized Warranty station in your area, you may telephone in the United States (800) 229-1235, and in
Canada (800) 465-9672 (in Ontario call 905-712-9299). Canada (800) 465-9672 (in Ontario call 905-712-9299).

\section*{12 MONTH LIMITED WARRANTY}

THE EXTENT OF THE COMPANY'S LIABILITY UNDER THIS WARRANTY IS LIMITED TO THE REPAIR OR REPLACEMENT PROVIDED ABOVE AND, IN NO EVENT, SHALL THE COMPANY'S
LIABILITY EXCEED THE PURCHASE PRICE PAID BY PURCHASER FOR THE PRODUCT.
ANY IMPLIED WARRANTIES, INCLUDING ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, SHALL BE LIMITED TO THE DURATION OF THIS
WRITTEN WARRANTY. ANY ACTION FOR BREACH OF ANY WARRANTY MUST BE BROUGHT WITHIN A PERIOD OF 18 MONTHS FROM DATE OF ORIGINAL PURCHASE. IN NO CASE SHALL THE COMPANY BE LIABLE FOR AN SPECIAL
CONSEQUENTIAL OR INCIDENTAL DAMAGES FOR BREACH OF THIS OR ANY OTHER WARRANTY, EXPRESS OR IMPLIED, WHATSOEVER. THE COMPANY SHALL NOT BE LIABLE FOR THE DELAY IN RENDERING SERVICE UNDER THIS WARRANTY OR LOSS OF USE DURING THE TIME THE PRODUCT IS BEING REPAIRED OR REPLACED.

No person or representative is authorized to assume for the Company any liability other than expressed herein in connection with the sale of this product.

Some states or provinces do not allow limitations on how long an implied warranty lasts or the exclusion or limitation of incidental or andequential damage so the above limitation or exclusions may no apply to you. This Warranty gives you specific legal rights, and you may also have other rights which vary from state to state or provinc to province

IN U.S.A.: AUDIOVOX COMMUNICATIONS CORP 555 Wireless Blvd. Hauppauge, NY 11788 (800) 229-1235
