- [2] The *HIGH* control allows you to boost/cut the high-frequency range.
- [3] The *LOW* control allows you to boost/cut the low-frequency range.
- [4] Use the *GAIN* control to adjust the amount of overdrive.
- [5] With the *BAL(ance)* control you can adjust the amount of the dry direct signal and the effect signal.
- [6] The *ON/BATT* LED illuminates when the effect is activated. It also serves as a battery level indicator.
- [7] Use the footswitch to activate/deactivate the effect.
- [8] Use this 1/4" TS *IN* connector to plug in the instrument cable.
- [9] The 1/4" TS *OUT* connector sends the signal to your amp.

Use the *DC IN* connection at the front of the unit to plug in a 9 V power supply (not included).

The *BATTERY COMPARTMENT* is located underneath the pedal cover. To install or replace the 9 V battery, press the hinges with a ballpen and remove the pedal cover. Be careful not to scratch the unit.

 The BOD400 has no on/off switch. As soon as you insert the jack into the *IN* connector, the BOD400 begins running. When not using the BOD400, remove the jack from the *IN* connector. This extends the life of the battery.

The *SERIAL NUMBER* is located at the bottom.
