

DW-100

DVD Burner and Player

Item Code: 2683B002

Overview

Key to enjoying the superb video produced by the latest Canon High Definition and Standard Definition camcorders is sharing that video with family and friends. Now, it's easier than ever to transfer and backup footage from your camcorder onto DVDs with the Canon DW-100 DVD Burner.

Created to provide data backup for Canon Hard Disk Drive and Flash Memory camcorders, the DW-100 allows you to connect to a Canon VIXIA HG10, VIXIA HF10, and VIXIA HF100 as well as the FS11, FS10 and FS100 camcorders to download video and burn AVCHD or Standard Definition DVDs.

Still images captured in your compatible Canon camcorder can also be sent to the DW-100 and from them a "photo movie" can be created.

The DW-100 will also play back the AVCHD discs created in the burner on an HDTV monitor through your HG10 or VIXIA HF10 or VIXIA HF100 camcorder.

Features

Simple and Easy

The DW-100 is easy to use. Three buttons- power, record and eject- are all you need to backup your video. With a simple connection to your camcorder using the USB 2.0 Hi-Speed cable you can send the video information to the DW-100 to create your DVD.

Simple and Easy

The DW-100 is compatible with the Canon VIXIA HG10, VIXIA HF10, VIXIA HF100 high definition camcorders as well as the Canon FS11, FS10 and FS100 standard definition camcorders.

It will create AVCHD as well as Standard Definition DVDs which will play in compatible disc players. In addition, you may use your AVCHD camcorder along with the DW-100 to play back AVCHD discs which have been created in the DW-100 on an HDTV monitor. Just connect the burner to your VIXIA HG10, VIXIA HF10 or VIXIA HF100 camcorder and use the HDMI or Component terminal on the camcorder to connect with the HDTV to view the content of the disc.

When finalizing AVCHD or Standard Definition video from your camcorder, the DW-100 can also create a menu screen for use when performing this operation.

Backup Options

You can choose from three data backup methods with the DW-100. The entire media file may be transferred from the camcorder; or just those portions which are new or have changed; or your Playlist registration. All of these are available for both High Definition or Standard Definition footage.

It's also possible to transfer photos taken on your Canon VIXIA HG10, VIXIA HF10, VIXIA HF100, FS11, FS10 and FS100 camcorder. The DW-100s Photomovie creation function will convert all jpeg files into a photomovie for storage or for viewing on your television.

Extended Recording Time

The DW-100 is compatible with 8.5GB High Capacity DVD-R DL discs. You will have approximately 2.6 hours of recording time when using a DL disc at the SP setting.

Specifications

Digital Video
